Consignment Directors: David Mayfield, Mark Borckardt, Win Callender, Sam Foose, Jason Friedman, Bob Marino, Mark Stephenson, Sarah Miller, Al Pinkall, Roxana Uskali

Cataloged by: Mark Van Winkle, Chief Cataloger
Mark Borckardt, Senior Numismatist
David Stone; John Sculley, Zeke Wischer, Jacob Lipson, Brian Koller

U.S. Coins

Featuring:

Charlie O's Collection
The Marcello Collection, Part VII
The ACW Collection
The Cedar Crest Collection, Part II
The Jack Royse Collection of Hobo Nickels

June 6-7 & 9, 2019 | Long Beach

FLOOR Signature® Sessions 1-3

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Long Beach Convention Center • Room 103A
300 E. Ocean Blvd. • Long Beach, CA 90802

Session 1 – PREMIER

Thursday, June 6 • 6:00 PM PT • Lots 3001–3320

Session 2

Friday, June 7 • 1:00 PM PT • Lots 3321–3860

Session 3

Friday, June 7 • 6:00 PM PT • Lots 3861–4454

ONLINE ONLY Signature® Session 4

(HERITAGELive!®, Internet, Fax, & Mail only Session)

Session 4

Sunday, June 9 • 2:00 PM CT • Lots 7001–8126

LOT SETTLEMENT AND PICK-UP

Friday, June 7 • 10:00 AM – 1:00 PM PT
Saturday, June 8 • 9:00 AM – 12:00 PM PT

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

Buyer's Premium Per Lot:

This auction is subject to a Buyer's Premium of 20% (minimum \$19) per lot.

HERITAGE
AUCTIONS 

Dear Bidder,

Welcome to the Long Beach Expo! Results are in for Heritage's recent Signature® auction at the April Central States Numismatic Society convention. Total prices realized at the Chicago event exceeded \$33 million, including World and Ancient coins and U.S. and World currency. More than \$19.5 million of the total comes from U.S. coins. The results are encouraging – buyers are ready and willing, limited only by the number of coins and collections coming to market. It is a good time to consign to a Heritage auction!

We expect a similar strong showing at our Official Signature Auction at the current Long Beach Expo. Several fine Featured Collections will be of keen interest to a diversity of collectors and specialists:

CHARLIE O'S COLLECTION

Charlie O's Collection includes many exceptional, Registry-grade coins in the Lincoln cent, Buffalo nickel, and Washington quarter series. The capstone of the collection is a memorable 1909-S VDB Lincoln cent, MS67 Red PCGS – tied for finest-known of this famous, always-in-demand issue with full Red surfaces.

We thank our consignor for providing the following numismatic autobiography: "In my case, coin collecting was almost hereditary. My interest in coins came from my dad, who was a small town banker. He often found time to bring home a number of interesting coins, and he became a modest collector. My desire to collect coins grew substantially in my teen years (I remember I found a 1932-D quarter in my change one day – well-circulated, but a treasure to me). During college and early marriage years, my wife and I focused on a growing family of five children, which didn't leave much extra cash in the till for collecting. When Dad passed away, I inherited his collection, modest as it was. Some attractive, Uncirculated coins inspired me to add to the collection. Mint sets he purchased over the years spurred me to place standing orders with the U.S. Mint, and to expand that part of the collection, too. Over time, I accumulated a large number of coins, so I asked our youngest son to help me with a coin inventory program. Despite having cerebral palsy since birth, our son has had a successful information technology career as a software engineer for over 35 years. He wrote a wonderful coin inventory program. We thought about selling the program to collectors, but never got around to 'dressing it up' to be marketable. I had a demanding career as a CPA with an international accounting and auditing firm, and often I could only find time to dabble with collecting. In retirement, I found more time and funds to collect, although I have always been more of a dabbler. It seems appropriate for me, since coins were truly a hobby. Still, I am proud of the quality levels and high-grade Uncirculated coins I was able to acquire over the years. All good things must come to an end – thus this auction, while I focus on what is most important to me in late retirement. My family."

THE MARCELLO COLLECTION, PART VII

Over the past nine months, a parade of spectacular gold ingots has emerged from the amazing Marcello Collection – a Featured Collection in six of Heritage's previous Signature® auctions. At Long Beach, The Marcello Collection yields yet another "treasure of the deep" from the S.S. *Central America*. A Justh & Hunter gold ingot weighing 266.97 ounces just misses the Extremely Large Size category, and ranks as the third-largest ingot from Justh & Hunter's Marysville office. Marysville was located about 125 miles north of San Francisco during the height of the California Gold Rush. The town was founded in 1842, and the name changed to Marysville in 1849. Serving the heart of Gold Rush territory, Marysville was an ideal location for miners to bring their gold ore. The town was home for preeminent assayers Harris, Marchand & Co., as well as Justh & Hunter.

THE ACW COLLECTION

Selections from one of the top current and all-time-finest collections of Lincoln cents comes to Long Beach from The ACW Collection, making this auction a significant event for the highly competitive and popular Classic Lincoln Cent Registry categories. Focused on dates and mintmarks from 1909 to 1964, nearly all of the coins are in Gem to Superb Gem in full Red grades ranging from MS65 to MS68. Most pieces grade MS67 or MS67+ PCGS. The ACW Collection includes 16 Premier Session coins, plus many superb selections in Floor Session 2 and in the Internet® Signature Session. Lincoln cent collectors seeking upgrades will find numerous opportunities. All are suitable for emerging high-grade Mint State sets as well as for long-established advanced collections.

THE CEDAR CREST COLLECTION, PART II

We are pleased to present a second installment from The Cedar Crest Collection, a carefully assembled collection of highly graded classic commemoratives. Part I of this fine collection turned heads at Central States, and we expect the same enthusiastic reception at Long Beach. As before, the quality is outstanding: More than 66% of the consignment carries CAC endorsement, 50% of the coins are Plus-graded by PCGS, and several pieces are either the finest, or tied for the finest-certified at PCGS.

THE JACK ROYSE COLLECTION OF HOBO NICKELS

Among hobo nickel collectors, the name Jack Royse Jr. stands out as one of the foremost early collectors of the genre. Several of his coins appear in Del Romines' original *Hobo Nickels* book published in 1982, and both his name and his coins figure prominently in Joyce Ann Romines' 1996 book updating and expanding the original reference. Jack Royse was an Indiana prep golf star who earned a scholarship from LSU to play golf there. After college, he was a professional golfer and competed on the PGA tour. Later, he was club pro at several country clubs including Olympia Fields, El Dorado, and others. Until he passed away at age 91, Jack enjoyed the distinction of being the oldest PGA golf pro in Indiana, where he was a PGA professional for over 60 years. In his later

years, Jack collected historic memorabilia and won awards showing his collections throughout the U.S. He also collected fine art, as well as rare coins. He once owned a famous New England sixpence – the so-called "Potato Field" coin – in addition to his hobo nickel collection. Carvings by Bert Wiegand and George Washington "Bo" Hughes make up the majority of The Jack Royse Collection of Hobo Nickels, including one of the best-known Bert "Prisoner" nickels, two other Bert carvings, and 22 important and rare Bo Hughes masterpieces. To our knowledge, nearly all of the nickels in this collection have not appeared at public auction in at least three decades, and perhaps never. These carvings intertwine within the very fabric of hobo nickel lore. Most of the pieces are well-documented in the references. Individually or together, they form the foundation of a truly great hobo nickel collection.

For those who cannot attend the Long Beach Expo in person, Heritage makes it simple to place your bids either before or during the auction. Heritage Live!® provides a bidding platform that is second to none in the auction industry. Dependable interactive computer bidding is available "real time" from anywhere in the world during the auction, as is telephone bidding. Our well-trained staff is always happy to accept your bids via e-mail, fax, or regular mail before the auction, and to answer any questions you may have.

Good luck with your bids, and please accept our sincere thanks for your participation. We hope to see you in Long Beach!

Sincerely,

A handwritten signature in blue ink, reading "Greg Rohan".

Greg Rohan
President

SESSION ONE

COLONIALS

1779 Rhode Island Ship Token, MS62
Wreath Below Ship, Brass, Betts-563

- 3001** 1779 Rhode Island Ship Token, Wreath Below, Brass, MS62 PCGS. Betts-563, W-1740, R.3. Most of these English-made tokens are struck in brass (copper-zinc alloy) with a wreath below the ship, as here. It was previously believed that brass examples were rare, but that is the typical composition. Other examples are known in pewter or with a silver wash. They usually survive in circulated condition, having likely been used as gaming tokens or counters in Holland. Mint State examples are rare. This glossy, razor-sharp example enjoys coffee-brown color and steel-blue accents. Marks are unobtrusive. Population: 4 in 62, 5 finer (4/19). Listed on page 52 of the 2020 *Guide Book*. NGC ID# 2AUM, PCGS# 587

1773 Virginia Halfpenny, Gem Red
With Period, Newman 25-M

- 3002** 1773 Virginia Halfpenny, Period, MS65 Red PCGS. N. 25-M, W-1580, R.2. Seven harp strings. In its Detroit ANA auction appearance, we cataloged the present lot as "undoubtedly the finest example we can remember having seen. Struck on a highly polished planchet prior to striking, the coin has an exceptional brightness and freshness of color that is truly amazing. The bright red color is accented by brown only on the highest portions of the design elements on each side. Showing an unerring eye for quality, the consignor, David M. Faraday, purchased this coin from the Little Mint of San Francisco on November 7, 1967 for the princely sum of \$75!" To this we can only add that the halfpenny is semi-prooflike, lacks noticeable marks, and is housed in a green label holder. Listed on page 47 of the 2020 *Guide Book*. Population: 2 in 65 Red, 0 finer (4/19).

Ex: Detroit ANA (*Heritage*, 7/1994), lot 5008; *Central States Signature* (*Heritage*, 4/2008), lot 2219, which realized \$6,325. NGC ID# 2ATK, PCGS# 242

1787 Immunis Columbia, MS66 Brown
Eagle Reverse, Plain Edge, W-5680
Narrow Planchet Variety
Single-Finest Certified Example

3003 1787 Immunis Columbia, Eagle Reverse, Narrow Planchet, W-5680, High R.4, MS66 Brown PCGS. The 1787 Immunis Columbia, with the Eagle reverse, is a mysterious issue that has puzzled numismatists since the earliest days of the hobby. In *The Early Coins of America*, Sylvester Sage Crosby states these pieces were originally believed to be manufactured in England. However, Crosby's study of the punches used for the dies and the overall workmanship convinced him they were closely related to contemporary issues, like the Liber Natus Liberatem Defendo, Non Vi Virtute Vici, and the George Clinton cent, which he believed were made in this country, possibly as patterns for a proposed state or federal coinage. Walter Breen followed this line of reasoning in his *Encyclopedia*, where he suggested the coins were struck as patterns at Rahway, New Jersey, from dies engraved by Thomas Atlee.

A different theory was proposed by Michael Hodder in his article "The 1787 'New York' Immunis Columbia, A Mystery Re-Ravelled" in the January 1991 issue of *The Colonial Newsletter*. Two varieties of the 1787 Immunis Columbia/Eagle coppers are known, differentiated by the size of the planchets they were struck on. Hodder noted that all four known examples of the Wide Planchet variety are struck over New Jersey coppers of the Maris 26-S variety, in a late state of the dies. The late state 26-S coppers were actually struck in 1788, or later. Since the Narrow Planchet examples are in a later die state than the Wide Planchet pieces, it is certain they were also struck in 1788 or early 1789 and, therefore, were not produced as patterns for any proposed 1787 coinage issue. Hodder concludes:

"This new study indicates that the issue was struck circa late 1788-middle 1789 under the auspices of Matthias Ogden in the original Rahway mint, where New Jersey 16-S and 26-S had also been coined. It is probable that the entire issue was planned for circulation, and was not struck to support Matthias Ogden's March 3, 1787 coinage proposal, but rather, to provide Ogden with another source of revenue free from the 10% seigniorage payable to the state on the New Jersey coinage."

The W-5680 is the only readily collectible variety in the Immunis Columbia series, indicating it was struck in larger numbers than most pattern issues. A number of coins are known in lower grades or impaired condition, also arguing that the issue was produced for circulation. The new information about the New Jersey origin has significantly expanded interest in the Immunis Columbia pieces among collectors of New Jersey state coinage.

The present coin is the single-finest certified 1787 Immunis Columbia copper at either of the leading grading services. Both obverse and reverse are well-centered, with all devices, lettering, and the date complete, but most of the dentils off the planchet. The design elements are sharply detailed throughout. The glossy chocolate-brown surfaces are impeccably preserved, with a few traces of olive at the peripheries. Evidence of die rust shows in the upper obverse field and some slight granularity is evident on Liberty's torso. Altogether, a most attractive example of this popular Colonial issue. Listed on page 57 of the 2020 *Guide Book*. Population: 1 in 66 Brown, 0 finer (4/19). NGC ID# BFJL, PCGS# 841

1785 Nova Constellatio Copper, MS64 Brown
Pointed Rays, Crosby 3-B

3004 Nova Constellatio Copper, Pointed Rays, Large Date, MS64 Brown NGC. Crosby 3-B, W-1895, R.2. The usually seen large die break is present in the leaves, above the date. This impressive Choice specimen exhibits well-detailed design elements with some evidence of die rust. The well-preserved olive-brown surfaces are smooth and attractive. Listed on page 56 of the 2020 *Guide Book*. Census: 5 in 64 Brown, 0 finer (4/19). NGC ID# 2AZ3, PCGS# 813

1783 Chalmers Threepence, AU53+
Important Colonial-Era Issue
W-1760, Strong Definition

3005 1783 Chalmers Threepence AU53+ PCGS. CAC. Breen-1018, W-1760, R.5. The coinage conditions of the period were such that John Chalmers, a silversmith in Annapolis, Maryland, felt compelled to strike his own coins. Chalmers was upset by the lack of circulating change in general and the preponderance of unscrupulously cut Spanish fractionals. He struck threepence, sixpence, and shilling coins in 1783 to remedy the situation, with multiple varieties known for the sixpence and shilling.

This lovely, high-end threepence in AU53+ displays antique golden-gray patina with lavender and peach-orange accents. The legends and motifs are strong with minimal trace of rub. Struck slightly off-center toward 11 o'clock on the obverse (the coin is upside down in the holder). Listed on page 53 of the 2020 *Guide Book*. Population: 2 in 53 (2 in 53+), 8 finer. CAC: 1 in 53, 2 finer (4/19). NGC ID# 2AUP, PCGS# 592

1783 Chalmers Sixpence, XF40
W-1770, Large Date

3006 1783 Chalmers Sixpence, Large Date XF40 PCGS. Breen-1014, W-1770, R.6. There are four varieties of Chalmers sixpence listed in the *Whitman Encyclopedia of Colonial and Early American Coins*, and these varieties rank among the hardest of all colonial American coins to properly attribute. Examination of the various listing in the *Whitman Encyclopedia* and Walter Breen's *Complete Encyclopedia* suggest that one of the varieties may not exist. Differentiating the Small Date and Large Date dies provides a significant challenge. As is often the case, this pleasing Chalmers sixpence is unevenly struck with weak details at the lower obverse and left side of the reverse. A few old scratches are blended with the surrounding surfaces that exhibit trivial handling marks. A trace of mint luster remains. Listed on page 53 of the 2020 *Guide Book*. Population: 2 in 40, 2 finer (4/19). NGC ID# 2AUS, PCGS# 594

1785 Bar Copper 'Cent,' AU55
W-8520

- 3007** (1785) Bar Copper AU55 PCGS. Breen-1145, W-8520, R.4. A lovely Choice AU example of this popular and well-known Colonial-era issue. The USA monogram is believed to be based on buttons worn by soldiers in the Revolutionary War. The reverse design is simply a bar for each of the 13 states. The reverse shows the diagnostics seen on originals: a small 'spur' on the right end of the second bar from the top and a die break connecting the sixth and seventh bars. This is a medium brown-olive coin that shows no mentionable defects other than having been struck slightly off center. Listed on page 76 of the 2020 *Guide Book*.
Ex: Central States Signature (Heritage, 5/2005), lot 5026. NGC ID# 2B5J, PCGS# 599

1793 Washington Ship Halfpenny
Very Rare Plain Edge Variety
Baker-18A, VF Details

- 3008** 1793 Washington Ship Halfpenny, Copper, Plain Edge — Environmental Damage — NGC Details. VF. Baker-18A, W-10850, Musante GW-20, High R.7. Struck from Baker-18 dies, but with a plain edge instead of the expected legend, PAYABLE IN ANGLESEY LONDON OR LIVERPOOL. Breen (1988) stated "three known," but his #2 and #3 were the same piece, pedigreed to both the 1975 EAC and 1983 Roper auctions. A walnut-brown example with lightly granular surfaces that are much more pleasing than implied by the NGC designation. The usual die state with advanced buckling on the reverse, which affects the upper sail and rigging of the ship. Page 85 of the 2020 *Guide Book*.

LARGE CENTS

1793 S-1, B-1 Chain Cent, VF Details
Famous AMERI. Reverse

- 3009** 1793 Chain, AMERI., S-1, B-1, R.4—Tooled—PCGS Genuine. VF Details. The Chain AMERI. cent is historically important as the first copper coin produced for circulation at the U.S. Mint in Philadelphia. With a supply of copper on hand, and all equipment in place, the Mint was finally prepared to strike circulation coinage 11 months after Congress passed the Coinage Act of April 2, 1792. While areas of corrosion appear on both sides, with evidence that the olive-brown surfaces have been smoothed or tooled, this is an exceptionally well-detailed piece that will serve nicely in a date, type, or variety collection. Our EAC grade Fine 12.

PROOF LARGE CENT

1848 N-19 Cent, PR63 Brown
Rare Proof-Only Issue

- 3010** 1848 N-19, R.6, PR64 Brown PCGS. CAC. The proof-only Newcomb-19 variety is rightfully in strong demand by large cent specialists — there are simply not enough examples to go around, from a surviving mintage that ranges from an estimated 25 to 35 pieces. This Select proof displays lovely violet, gold, aquamarine, and sky-blue shades that emerge as a medley of variegated color across mirrored fields, vibrantly visible when the coin is viewed at the proper angle. The devices are well-struck and the surfaces are free from all but a few faint handling marks beneath the toning, including a cluster of shallow abrasions in the field near star 2. We expect spirited competition when this attractive N-19 large cent is called. Our EAC grade PR62. NGC ID# 226X, PCGS# 397617 Base PCGS# 1973

PROOF FLYING EAGLE CENTS

1856 Flying Eagle Cent, Snow-9
Proof With Mint Details

- 3011** 1856 Snow-9 — Cleaned — NGC Details. Proof. By the late 1850s, the 1856 Flying Eagle cent had become famous among nascent numismatists. All wanted at least one example of the recent rarity. The U.S. Mint was willing to oblige, and added the 1856 cent to its discreet catalog of backdated issues, along with proof half cents and Seated dollars. The Snow-9 proofs were struck circa-1859. They were well made, with sharp strikes and moderately reflective fields. The present specimen is boldly impressed and displays aquamarine and rose-gold patina. A shallow strike-through above the wreath ribbon loops serves as an identifier. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

**1856 Flying Eagle Cent, PR65
Snow-9, Reflective Fields**

- 3012 1856 Snow-9 PR65 NGC.** Snow-9 is one of the more frequently encountered proof varieties of the 1856 Flying Eagle cent, perfect for type purposes or for collectors seeking only a single example of this key date. Diagnostics include a small tine off the tip of the left branch stem on the reverse, and a thin die line in the forward part of the eagle's left wing on the obverse. The Gem offered here is fully struck and modestly reflective. Each side displays satiny tan-gold patina, but when the fields are tilted toward a light, shades of lilac, peach, and silvery color emerge. Eye appeal is outstanding. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

INDIAN CENTS

**1877 Indian Cent, MS63 Red and Brown
Low-Mintage Series Key**

- 3013 1877 MS63 Red and Brown PCGS.** With a small reported mintage of 852,500 pieces, and a relatively low survival rate, the 1877 Indian cent is the sought-after key to the series. This attractive MS63 specimen exhibits well-detailed design elements and the lightly marked surfaces show a mix of original red and light brown patina. Glossy mint luster shines through the toning. Housed in a green label holder. NGC ID# 2284, PCGS# 2128

**1886 Type One Cent, MS66 Red and Brown
Attractive Luster and Color**

- 3014 1886 Type One MS66 Red and Brown PCGS.** The lowest headress feather points between the IC in AMERICA on the Type One 1886 hub. Premium Gem examples of this issue are rare with any color designation. Offered here is a satiny Red and Brown coin with mainly copper-orange luster. Delicate rose and green overtones in the margins prevent a Red designation. The strike is full. Population: 10 in 66 (1 in 66+) Red and Brown, 0 finer (4/19). NGC ID# 228D, PCGS# 2155

LINCOLN CENTS

**1909-S VDB Lincoln Cent, MS66 Red
Popular Key Issue, Rare Any Finer**

- 3015 1909-S VDB MS66 Red PCGS.** The 1909-S VDB Lincoln cent is a sought-after first-year key to the series, with a low mintage of 484,000 pieces. The issue is somewhat scarce in MS66 condition, with original red surfaces, and PCGS has certified only 15 numerically finer examples with the Red designation (4/19). This well-detailed Premium Gem exhibits vibrant mint luster and virtually flawless surfaces.
From The ACW Collection. NGC ID# 22B2, PCGS# 2428

1909-S VDB Lincoln Cent, MS67 Red
Sought-After First-Year Key
Lowest Mintage of the Series

3016 1909-S VDB MS67 Red PCGS. The debut of the Lincoln cent was highly anticipated, by coin collectors and the general public alike. As the first U.S. portrait coin struck for circulation, with the bust of the universally popular president on the obverse, the new design was greeted with unprecedented enthusiasm. The August 1909 edition of *The Numismatist* notes, "... the advance demand at the Mint for this piece was far greater than that accompanying any previous coin issue." When the coins were released on August 2, long lines formed at banks, the Philadelphia and San Francisco Mints, the Sub-Treasury facilities in Chicago, Boston, New York, and St. Louis, and the Treasury building in Washington, D.C. Individual purchases were limited to 100 examples per person. Despite the purchase limits, the advanced mintage of approximately 25 million coins of the new design was exhausted in just three days.

One feature of the coins that was initially overlooked by the general populace was the prominent designer's initials VDB (for Victor D. Brenner) on the reverse. Unfortunately, controversy about these initials soon developed in official circles, causing the Secretary of the Treasury to order their removal. Coinage of the new cents was halted after the Philadelphia Mint had issued more than 27.9 million pieces with the offending initials, but the mintage at the San Francisco facility was only 484,000 examples when the coinage was discontinued.

Fortunately for present-day collectors, news of the small mintage caused contemporary collectors to hoard many high-quality specimens of the San Francisco coinage for numismatic and investment purposes. Today, the 1909-S VDB is not difficult to locate in an absolute sense, but intense collector demand ensures that any offering will command high premiums. Of course, at the lofty MS67 grade level, with Red surfaces, the 1909-S VDB is a prime condition rarity, and no Red coins have been certified in higher numeric grades (4/19).

The present coin is a spectacular Superb Gem, with sharply detailed design elements throughout and bold designer's initials. The original red surfaces are virtually flawless, with just a few microscopic specks of carbon on the reverse, only visible with a loupe. Vibrant mint luster radiates from both sides and overall eye appeal is terrific. Population: 15 in 67 Red, 0 finer (4/19).

From Charlie O's Collection. NGC ID# 22B2, PCGS# 2428

1909-S Lincoln Cent, MS67 Red
Among the Finest Pieces Certified

3017 1909-S MS67 Red PCGS. Although valued lower overall, the 1909-S Lincoln cent without Victor D. Brenner's initials is scarcer than the VDB variety. This is especially notable in high Red grades, where Condition Census examples of both issues are sought-after for Registry Sets. Two of the top five current highest-rated PCGS Registry Sets lack a 1909-S in MS67 Red. The piece offered here is among the finest certified. Each side displays vibrant tan-gold mint luster and is devoid of carbon spotting. The strike is sharp and neither side has observable abrasions. Eye appeal is outstanding. Population: 10 in 67 (1 in 67+) Red, 0 finer (3/19).

From The ACW Collection. NGC ID# 22B4, PCGS# 2434

1910-S Cent, MS67 Red
Tied for Finest Certified
An Exemplary Registry Candidate

3018 1910-S MS67 Red PCGS. Blazing mint luster engulfs this Superb Gem Red 1910-S Lincoln cent, producing vibrant yellow-gold and peach-orange hues across unabraded and carbon-free surfaces. The strike is bold throughout, adding to the incredible visual appeal. The 1910-S is a well-known better date, being an early San Francisco issue. However, its rarity in MS67 Red is often underappreciated. In this grade, it is rarer than the 1909-S VDB, and no finer pieces are known. That offered here is an outstanding Registry coin. Only one of the top five current highest-rated PCGS Registry Sets contains a comparable example of this issue. Population: 8 in 67 Red, 0 finer (3/19).

From The ACW Collection. NGC ID# 22B6, PCGS# 2440

1912-S Lincoln Cent, MS66 Red
Among the Finest Certified

- 3019** 1912-S MS66 Red PCGS. From a smallish mintage of 4.4 million pieces, the 1912-S Lincoln cent is a better date, especially in high grade. This delightful Premium Gem exhibits sharply detailed design elements and well-preserved original red surfaces, with vibrant mint luster on both sides. Eye appeal is terrific. Population: 7 in 66 Red, 0 finer (3/19).
From The ACW Collection. NGC ID# 22BC, PCGS# 2458

1913-D Lincoln Cent, MS66 Red
Rarely Seen This Fine

- 3020** 1913-D MS66 Red PCGS. Despite an adequate mintage of 15.8 million pieces, the 1913-D Lincoln cent is an elusive issue at the MS65 grade level and finer coins, like this stunning Premium Gem, are condition rarities. This sharply detailed MS66 example displays virtually flawless original red surfaces, with vibrant mint luster on both sides. PCGS has graded no numerically finer examples with the Red designation (3/19).
From The ACW Collection. NGC ID# 22BE, PCGS# 2464

1914-D Cent, MS65 Red
Long Recognized Key to the Series

- 3021** 1914-D MS65 Red PCGS. Ex: Tom Mershon Collection. For many years, the 1909-S VDB, 1914-D, 1922 "Plain," 1931-S, and 1955 Doubled Die Lincoln cents were considered the key-date issues within this series. While the grading service population or census data has shown that many other dates are rare in high-grade, these five issues are still the most difficult dates when all grades are considered. This Gem 1914-D cent has bright golden luster with splashes of crimson-red toning, especially around the peripheral areas. Even close examination fails to reveal any carbon spotting. This is one of the very finest 1914-Ds available in the current market place. Population: 74 in 65 (10 in 65+) Red, 7 finer (4/19).
Ex: Tom Mershon #2 All-Time PCGS Registry Set of Lincoln Wheat Cents / Central States Signature (Heritage, 5/2005), lot 5315. NGC ID# 22BH, PCGS# 2473

1914-S Cent, MS65+ Red
Registry-Grade Rarity
None Seen Finer in More Than 10 Years

3022 1914-S MS65+ Red PCGS. The 1914-S Lincoln cent is slightly scarcer in Gem Red and finer grades than the key-date 1914-D. Gem Red coins are elusive overall, and only three numerically finer pieces are reported, all at PCGS. We have not seen a finer piece in more than a decade. Of the MS65 Red coins that we have handled, only one has been Plus-graded — it sold in the Central States Signature (Heritage, 4/2018), lot 4215, for \$12,000. The piece offered here is equally attractive and well-preserved, showing a sharp strike and natural bronze-gold luster with rich peach-orange hues. The obverse has a fine mattelike texture, while the reverse displays a smoother, satiny appearance. Population: 48 in 65 (5 in 65+) Red, 3 finer (3/19).

From The ACW Collection. NGC ID# 22BJ, PCGS# 2476

1915-S Cent, MS66 Red
Glossy, Textured Surfaces

3023 1915-S MS66 Red PCGS. The 1915-S is among the more challenging Lincoln cents to acquire in high-end Red grades. Red coins are scarce in any condition, but they are particularly rare in MS66. No finer pieces are reported. This Premium Gem displays satiny mint luster with a subtle glossy appearance. Mattelike texture is apparent beneath a loupe. The coin is fully struck and displays integrated peach-gold and pale rose-gold hues over unabraded surfaces. Eye appeal is pleasing. PCGS and NGC combined report only a dozen 1915-S cents this fine. The coin offered here could easily upgrade the 1915-S slot in two of the top five current PCGS Registry Sets. Population: 10 in 66 Red, 0 finer (3/19).

From The ACW Collection. NGC ID# 22BM, PCGS# 2485

1917-D Lincoln Cent, MS65+
Original Red Surfaces

3024 1917-D MS65+ Red PCGS. Despite a large mintage of more than 55 million pieces, the 1917-D Lincoln cent is seldom encountered at the MS65 grade level, with the Red designation, and PCGS has graded only seven numerically finer red examples (4/19). This Plus-graded Gem is sharply detailed and well-preserved, with vibrant mint luster throughout.

From The ACW Collection. NGC ID# 22BT, PCGS# 2500

1917-D Cent, MS66 Red
Rich Color, Full Strike

3025 1917-D MS66 Red PCGS. Rich sunset-red color and an unprecedented full strike are hallmarks of this 1917-D Lincoln cent, from an issue that typically comes soft. None of the usual muting of color is noted on either side, only a couple of thin russet toning streaks appear in the right obverse field. A small patch is also visible at the base of Lincoln's shoulder. Even close examination with a magnifier fails to reveal any mentionable marks or abrasions. This is a outstanding opportunity for the Lincoln cent enthusiast. Population: 7 in 66 Red, 0 finer (4/19).

Ex: Central States Signature / Tom Mershon (Heritage, 5/2005), lot 5325, where it realized \$21,275; Jerald L. Martin Collection / FUN Signature (Heritage, 1/2019), lot 4347. NGC ID# 22BT, PCGS# 2500

1918-S Lincoln Cent, MS65 Red
Registry Grade Example

3026 1918-S MS65 Red PCGS. The 1918-S Lincoln cent is a rarity at the MS65 grade level, and no numerically finer Red coins are known (3/19). This luminous satin Gem is remarkably well-preserved and attractive, showing a bold strike and original red surfaces, with a few microscopic specks of carbon. Eye appeal is terrific. Population: 23 in 65 (2 in 65+) Red, 0 finer (3/19).

From The ACW Collection. NGC ID# 22BX, PCGS# 2512

1920 Cent, MS67 Red
Top-Grade Registry Coin
Rarely Offered So Fine

3027 1920 MS67 Red PCGS. Blazing golden mint luster reveals tinges of peach-orange and lilac as it cartwheels around untouched, carbon-free surfaces. The rims are not fully squared by the strike, but the interior details are bold. Eye appeal is generous. The 1920 Lincoln cent is rare in this lofty grade, and with no numerically finer coins certified, we anticipate strong interest in this coin from Registry Set collectors. Population: 18 in 67 (1 in 67+) Red, 0 finer (3/19).

From The ACW Collection. NGC ID# 22C3, PCGS# 2524

1920-S Lincoln Cent, MS65 Red
Among the Finest Red Coins Certified

3028 1920-S MS65 Red PCGS. The scarcity of the 1920-S with original red color is well-documented, both by David W. Lange and Q. David Bowers. Bowers writes in *A Guide Book of Lincoln Cents*, "If certification services add the sophistication of striking and original color to their evaluations, this is a date and mint that will break out of the charts as a formidable rarity."

The Gem Red example offered here appears original in all aspects, right down to the reddish-orange hue of the surfaces that Bowers describes as characteristic of natural luster. An area of lilac color is also visible on Lincoln's face. Neither side exhibits bothersome abrasions or carbon spotting. Population: 17 in 65 (1 in 65+) Red, 0 finer (3/19).

From The ACW Collection. NGC ID# 22C5, PCGS# 2530

**1922 Die Pair 2 Cent, MS62 Brown
Scarce Uncirculated Example**

- 3029 1922 No D, Strong Reverse, FS-401, MS62 Brown PCGS.** Die Pair 2. A recent article in *Coin World* pointed out that the 1922 cent is the product of “something that is missing” on the coins. They all are, in fact, 1922-D cents; the obverse die on two of the die pairs clogged to some degree in the exact position of the mintmark producing what appears to be a 1922 Philadelphia coin, but no cents were actually struck in 1922 in Philadelphia. Die Pair 2 is the most popular variety and was produced not from die clogging, but rather from overly vigorous die polishing to remove die clash marks on each side, resulting in completely polishing away the mintmark (How many other times did this happen on other issues when P-mint coins were produced that year?) This is an uncommonly high-grade example. Most pieces were pulled from circulation beginning in the 1930s and they were almost all gone by the early 1950s, so the majority of survivors are well-worn. This glossy example displays blue-brown patina over each side with no mentionable abrasions. Population: 27 in 62 Brown, 17 finer (4/19). NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

**1923 Cent, MS67+ Red
Vivid Color and Vibrant Luster**

- 3030 1923 MS67+ Red PCGS. CAC.** A rare Superb Gem example of this otherwise plentiful Philadelphia issue. All Superb Gems at PCGS are Red coins, and these are sought-after Registry pieces. CAC-approved examples in this condition are the exception, not the rule. Offered here is a beautiful, luminous specimen with a balance of golden-yellow and fire-orange colors. The Deeper hues cling to the border regions, leaving the interiors lighter. Eye appeal is spectacular, as neither side has abrasions or mentionable carbon spotting. Population: 25 in 67 (4 in 67+) Red, 2 finer. CAC: 8 in 67, 1 finer (3/19).
From The ACW Collection. NGC ID# 22CA, PCGS# 2545

**1930-S Lincoln Cent, MS67 Red
Registry Set Essential**

- 3031 1930-S MS67 Red PCGS.** From a mintage of 24 million pieces, the 1930-S Lincoln cent is seldom encountered at the MS67 grade level and neither PCGS nor NGC have certified any coins in higher numeric grades with red surfaces (4/19). This spectacular Superb Gem exhibits sharply detailed design elements and impeccably preserved original red surfaces, with no trace of carbon. Vibrant mint luster adds to the outstanding eye appeal. Population: 9 in 67 Red, 0 finer (3/19).
From The ACW Collection. NGC ID# 22CZ, PCGS# 2611

**1934-D Lincoln Cent, MS67+ Red
Tied for Finest Certified**

- 3032 1934-D MS67+ Red PCGS.** The 1934-D Lincoln cent claims a mintage of 28.4 million pieces, making it an available issue in grades up to the MS 66 level. The 1934-D is rare in MS67 condition, however, and no numerically finer red coins have been certified at either of the leading grading services (3/19). This Plus-graded Superb Gem exhibits impeccably preserved original red surfaces with no trace of carbon. The design elements are well-detailed and vibrant mint luster radiates from both sides. Population: 50 in 67 (4 in 67+) Red, 0 finer (3/19).

From The ACW Collection. NGC ID# 22DA, PCGS# 2638

1937 Cent, MS68 Red
Tied With One Other for Finest Known

- 3033** 1937 MS68 Red PCGS. Here offered is one of only two MS68 Red examples known, both PCGS coins (4/19). Each side displays luminous copper-orange luster with no abrasions or carbon spotting. The strike is sharp throughout and eye appeal is exceptional. This piece is nearly half of a grade point finer than the coin in the current highest-rated Registry Set.

Ex: FUN Signature (Heritage, 1/2017), lot 3311, which realized \$6,462.50.

From Charlie O's Collection. NGC ID# 86CF, PCGS# 2659

1972 FS-101 Cent, MS67+ Red
Doubled Die Obverse

- 3036** 1972 Doubled Die Obverse, FS-101, MS67+ Red PCGS. The Cherrypickers' Guide lists nine different varieties of Doubled Die Obverse 1972 cents, but FS-101 is the Guide Book variety most in demand by collectors. The obverse legends exhibit a spread that approaches the famous 1955 FS-101. The present crisply struck Superb Gem offers booming luster and unabraded orange-red surfaces. As of (4/19), PCGS has certified only 2 pieces as MS67+ Red, with just one coin finer. NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

1955 FS-101 Doubled Die Obverse Cent
Satin and Colorful MS64 Red

- 3034** 1955 Doubled Die Obverse, FS-101, MS64 Red PCGS. The wide obverse die doubling of this FS-101 Guide Book variety is visible to the naked eye, earning this issue tremendous popularity in the Lincoln cent series. It is one of the most prominent doubled dies across all 20th century denominations. This near-Gem example borders on a Plus designation. The smooth, satiny fields are unabraded and display luminous rose-gold and mint coloration. Lincoln's bust has deeper yellow-gold and lilac accents. PCGS lists only 21 finer Red examples (4/19).

From The ACW Collection. NGC ID# 8H87, PCGS# 37912 Base PCGS# 2827

PROOF LINCOLN CENTS

1915 Lincoln Cent, PR65 Red
In-Demand Matte Proof Issue

- 3037** 1915 PR65 Red PCGS. The design elements of this delightful Gem exhibit razor-sharp definition throughout, and the original red surfaces are impeccably preserved, with strong matte luster characteristics. Overall eye appeal is terrific. From a proof mintage of 1,150 pieces. Population: 16 in 65 Red, 10 finer (4/19). Ex: Long Beach Signature (Heritage, 2/2017), lot 3179, which realized \$6,462.50. NGC ID# 22KY, PCGS# 3323

1964 Lincoln Cent, MS67 Red
Registry Set Contender

- 3035** 1964 MS67 Red PCGS. The 1964 Lincoln cent is a plentiful issue in most grades, but few examples have been certified at the MS67 grade level. This extraordinary Superb Gem exhibits sharply detailed design elements and impeccably preserved original red surfaces, with a few microscopic specks of carbon on the reverse. Vibrant mint luster adds to the terrific eye appeal. Population: 12 in 67 (1 in 67+) Red, 0 finer (3/19).

From The ACW Collection. NGC ID# 22G7, PCGS# 2890

1916 Cent, PR66 Red and Brown
Mostly Red Surfaces

- 3038** 1916 PR66 Red and Brown PCGS. CAC. The scarcest matte proof Lincoln, following the the 1909 VDB. High-end Red and Brown or Red 1916s are scarce, and few carry CAC endorsement. This Premium Gem is fully struck and well-textured, showing modest tan-gold and reddish hues. A few chestnut overtones earn the Red and Brown designation, although this coin clearly leans toward the Red end of that range. Population: 29 in 66 (2 in 66+) Red and Brown, 4 finer; 5 in 66 Red, 0 finer. CAC: 14 in 66, 1 finer (4/19). NGC ID# 22KZ, PCGS# 3325

TWO CENT PIECE

1872 Two Cent, MS64+ Red and Brown
Glowing, Eye-Appealing Key Date

- 3039 1872 MS64+ Red and Brown PCGS. CAC. The mintage for the 1872 two cent was 65,000 pieces, representing the final batch of coins struck in business-strike format in the series. This high-end key-date example boasts glowing copper and amber-brown surfaces with faint violet accents. The shield, leaves, wreath, and legends are well-struck. A tremendous example for the grade with elegant, original eye appeal. NGC ID# 22NG, PCGS# 3613

PROOF THREE CENT SILVER

1863/2 Three Cent Silver, PR64 Cameo
Scarce *Guide Book* Variety

- 3040 1863/2 PR64 Cameo PCGS. A *Guide Book* variety, rarely seen with cameo contrast. Date placement aids in attribution, being slightly further left in relation to the star point than other proofs. PCGS has certified 55 examples of the variety, just 15 of which are Cameos, with no Deep Cameos. This near-Gem displays needle-sharp definition and deeply reflective fields. Light golden toning includes occasional daubs of lilac and ocean-blue. Population: 7 in 64 Cameo, 7 finer (4/19). NGC ID# 22ZP, PCGS# 83713

PROOF THREE CENT NICKEL

1865 Three Cent, PR66 Ultra Cameo
Widely Repunched Date

- 3041 1865 PR66 Ultra Cameo NGC. Repunched Date. Rare in proof format, the date shows repunching southwest near the tops of the primary digits, similar to *Cherrypickers'* variety RPD-002, also seen on some circulation strikes. Proofs were struck first, since most circulation strikes from the dies show heavy die cracks. Spikelike die lines exist at STA of STATES. This is a deeply contrasted proof, fully struck with richly frosted devices set upon glassy-mirrored fields. The surfaces could hardly be finer. Census: 5 in 66 Ultra Cameo, 3 finer (4/19). NGC ID# 52MV, PCGS# 93761

PROOF SHIELD NICKELS

1866 Rays Shield Nickel, PR67 Cameo
Sharp and Iridescently Toned

- 3042 1866 Rays PR67 Cameo NGC. The 1866 is by far the more available of the two With Rays proof issues in this series, earning it popularity as a type coin. That offered here is among the finest Cameos certified, and it displays lovely iridescent toning in the mirrored fields. The strike is razor-sharp. Census: 12 in 67 Cameo (2 in 67★), 0 finer; 5 in 67 (3 in 67+) Ultra Cameo, 0 finer (4/19). NGC ID# 276G, PCGS# 83817

1873 Nickel, PR67 Cameo
Closed 3, None Finer

- 3043 1873 Closed 3 PR67 Cameo PCGS. At least 1,100 proof Shield nickels were struck in 1873, all of them early in the year with a Closed 3 in the date. This is one of the top examples from that production. It enjoys jet-black fields, frosty relief elements, and tremendous Cameo contrast. Population: 4 in 67 (1 in 67+) Cameo, 0 finer (4/19). NGC ID# 276P, PCGS# 83827

LIBERTY NICKEL

1885 Nickel, Scarce MS66
Early Die State Registry Coin

- 3044 1885 MS66 PCGS.** Many high-grade examples of this key Liberty nickel issue show extensive peripheral die cracks, but not this piece. Both sides have crisp, satiny mint luster from an early die state. The usual strike weakness affects the corn ear to the left of the wreath bow, as well as Liberty's temple. Premium Gem examples of this issue are scarce. PCGS lists just five higher-grade representatives (5/19). NGC ID# 2773, PCGS# 3846

BUFFALO NICKELS

1915-D Buffalo Nickel, MS66+
Registry Set Quality

- 3045 1915-D MS66+ PCGS. CAC.** The availability of the 1915-D Buffalo nickel drops off sharply above MS65, and the issue is far out of reach for most collectors in MS67, assuming such a coin can be found. This Plus-graded, CAC-approved Premium Gem will earn the respect of Registry Set collectors. It is among the finest coins with CAC endorsement. The satiny, champagne-tinted surfaces are devoid of abrasions and show no die erosion. The bison's shoulder has the only discernible strike weakness, and it is minor. Population: 47 in 66 (8 in 66+), 4 finer. CAC: 25 in 66, 0 finer (4/19). NGC ID# 22R8, PCGS# 3928

1916 Doubled Die Obverse Nickel, VF Details
FS-101, Famous *Guide Book* Variety

- 3046 1916 Doubled Die Obverse, FS-101 — Tooled — PCGS Genuine. VF Details.** Dramatic die doubling on the obverse motifs accounts for intense collector demand for this *Guide Book* variety year after year. A shortage of available pieces only compounds the problem of supply relative to demand. The estimated survival rate is about 400 coins. This example has VF sharpness and wisps of golden-olive color that complement the deep nickel-gray surfaces. Horizontal hairlines and evidence of tooling prevent a numeric assessment.

1917-S Buffalo Nickel, MS67
The Sole-Finest Certified at Either Service

- 3047 1917-S MS67 NGC.** Although NGC has certified 12 examples of the 1917-S Buffalo nickel in MS66 (one in MS66+) and PCGS has graded 27 at that level (three in MS66+) (with almost certain duplications in those numbers), the present MS67 1917-S nickel is the only one so certified at either service (5/19). Any Registry Set collector pursuing the ultimate Buffalo nickel set simply must have this coin, and none other.

The strike is unusually sharp, producing sculptural detail to all design elements. The knot binding the hair in the Indian's queue is well separated at both top and bottom. All digits of the date are bold and the hairline is complete. On the reverse, the bison's tail is split, the hair at the shoulder is sharp if not entirely full, and the hair on the head is of similar quality. Contact is, of course, not an issue here and eye appeal is terrific.

Ex: ANA Signature (Heritage, 7-8/2008), lot 1568; Long Beach Signature (Heritage, 6/2010), lot 396; Central States Signature (Heritage, 4-5/2016), lot 4558; FUN Signature (Heritage, 1/2019), lot 4378. NGC ID# 22RF, PCGS# 3936

1918/7-D Buffalo Nickel, XF40
Collector-Favorite Overdate

- 3048** 1918/7-D FS-101 XF40 NGC. The 1918/7-D is a famous 20th century overdate, showing the clear silhouette of a 7 within and around the 8. It is also a key issue in the Buffalo nickel series and a prominent *Guide Book* variety. Collector-grade examples such as this XF coin are scarce and highly sought-after. Each side displays pewter-gray patina with olive accents and satiny fields. Light wear is present, although the coin is sharply detailed. Eye appeal is outstanding for the grade. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1918/7-D Nickel, AU53
Scarce in AU Condition

- 3049** 1918/7-D FS-101 AU53 NGC. This wartime overdate is usually encountered in VG-Fine grades, but is seldom seen in AU. The reason for this skewing of grades on the low side is when the overdate feature was discovered — examples were reported as early as 1930, but by that time the coins had been in circulation for 12 years. This piece is well-defined, an unusual trait for the overdate nickel, with muted gray patina over each side. The gray toning tends to subdue the remaining traces of mint luster. A loupe shows four or five specks of carbon in the center of the reverse. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1920-D Buffalo Nickel, MS65+
Early-Date Strike Rarity

- 3050** 1920-D MS65+ PCGS. The 1920-D is a well-known strike and condition rarity from the 1920s and is seldom located in Gem condition. The obverse on this piece is especially well-defined with hair definition complete all the way down to the knot in the braid. The reverse, on the other hand, is somewhat soft on the bison's head but the tail is fully split. Rich cinnamon-rose and lilac toning covers the surfaces of this softly frosted, problem-free Gem. NGC ID# 22RR, PCGS# 3945

1921-S Buffalo Nickel, MS65
Lovely Pastel Toning

- 3051** 1921-S MS65 PCGS. A low-mintage S-mint key in Gem grades, the 1921-S Buffalo nickel is accompanied by (and sometimes overshadowed by) the other S-mint issues of the '20s, such as the 1926-S, but it is quite elusive in MS65. This PCGS example shows great eye appeal with vivid pastel violet, gold, and pinkish patina on each side, accompanied by a strike that is better than usually seen and no major marks. Interesting die cracks appear on each side. Population: 84 in 65 (10 in 65+), 10 finer (4/19).
Ex: Central States Signature (Heritage, 4/2014), lot 3342, which realized \$5,875.
From Charlie O's Collection. NGC ID# 22RU, PCGS# 3948

1926-S Buffalo Nickel, MS64
Recognized Series Key

- 3052 1926-S MS64 PCGS.** The 1926-S is one of the most challenging Buffalo nickel issues, boasting the only mintage in the series below 1 million coins (970,000 pieces). This date is challenging in Choice grade, and anything finer is a rare acquisition. David Hall, writing for PCGS CoinFacts, states: "Excluding the 1918/7-D overdate, this issue is THE key date to the Buffalo nickel series." This Choice example is better struck than is often seen for this issue, although minor softness persists on the bison's head and shoulder and the finer details of the Indian's hair; the bison's horn is defined. Iridescent golden-gray patina yields hints of rose and lilac, and the satiny surfaces are free of any major abrasions. Only 16 coins are numerically finer at PCGS (4/19).

Ex: *Summer FUN Signature* (Heritage, 7/2015), lot 3053.

From *Charlie O's Collection*. NGC ID# 22S7, PCGS# 3959

1926-S Nickel, MS64
San Francisco Condition Rarity

- 3053 1926-S MS64 PCGS.** As it is for most branch mint nickels of this era, strike tends to be problematic for the 1926-S. The usual areas, including 19 in the date, braid, and the bison's head and shoulder, are slightly incomplete on this otherwise outstanding near-Gem survivor. Wisps of golden-brown toning grace satiny surfaces. For an issue that claims an average certified grade between below VF30, this piece is remarkably preserved. Extremely difficult to upgrade.

Ex: *William H. LaBelle, Sr. Collection* (American Numismatic Rarities, 7/2005), lot 845; *Internet-Only Auction #50* (David Lawrence Rare Coins, 8/2005), lot 117. NGC ID# 22S7, PCGS# 3959

1937-D Buffalo Nickel, MS64
Three-Legged Reverse

- 3054 1937-D Three-Legged, FS-901, MS64 PCGS.** After the dies clashed, they were removed from the press for resurfacing, but in the process that also removed the bison's front leg. A few other characteristics identify genuine examples of this highly popular Buffalo nickel variety. A Choice Mint State example, this piece is sharply defined with satin luster beneath light gold toning. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

1938-D/S Buffalo Nickel, MS68
FS-511, Guide Book Variety

- 3055 1938-D/S FS-511 MS68 NGC.** The overmintmark feature is visible with a loupe on this Guide Book variety. The finest examples known grade MS68, and these are rare. The present example displays satiny mint luster and lovely pastel rainbow toning. Some die erosion produces metal flowlines in the fields, although the devices remain sharply defined. There is trivial softness on the bison's shoulder. Census: 10 in 68 (1 in 68★), 0 finer (4/19). NGC ID# 22T3, PCGS# 38476 Base PCGS# 3985

PROOF BUFFALO NICKELS

1915 Nickel, Pastel-Toned PR68
Among the Finest Proofs at PCGS

- 3056 1915 PR68 PCGS.** This 1915 is among the finest matte proof Buffalo nickels certified at PCGS across all dates, and it is a major rarity as such. Proof nickel coinage in 1915 amounted to only 1,050 pieces. PCGS has seen eight coins that qualify for the PR68 grade and none finer. That offered here is a prime Registry candidate. Delicate lavender toning graces the interiors, leaving yellow-gold border toning as a frame around each side. The details are fully struck and neither side has a single discernible flaw. Eye appeal is outstanding. Population: 8 in 68 (2 in 68+), 0 finer (4/19). NGC ID# 278U, PCGS# 3992

1916 Nickel, Exceptional PR67
Final Matte Proof Issue

- 3057 1916 PR67 PCGS. CAC.** The matte proof mintage of 600 pieces was possibly not a complete sellout, a factor that may influence the scarcity of high-grade 1916 proofs. This coin is one of the finest, with lovely sunset-gold and lavender toning, and full details throughout both sides. Luster glows from the attractive matte surfaces, which display the smooth texturing to its best advantage as intended by the Mint. CAC-endorsed for the high-end surface quality and eye appeal. Population: 39 in 67 (3 in 67+), 10 finer. CAC: 22 in 67, 1 finer (4/19). NGC ID# 278V, PCGS# 3993

PROOF JEFFERSON NICKEL

1940 Jefferson Nickel, Toned PR68
Extraordinary, Reverse of 1940

- 3058 1940 Reverse of 1940 PR68 NGC.** For those unfamiliar, the Reverse of 1940 shows the redesigned reverse with the "straight steps" rather than the "wavy steps" seen on the initial year of production in 1938, and reused in 1939 and to a limited extent again in 1940. Only 14,158 proofs were struck this year and high-grade examples are rare. The centers of this piece are ice-blue and surrounded at the margins by rich golden-rose toning. The surfaces appear flawless. Census: 9 in 68, 1 finer (4/19). NGC ID# 279Z, PCGS# 4177

EARLY HALF DIMES

1795 Half Dime, MS63
Heavily Adjusted V-5, LM-8

3059 1795 V-5, LM-8, R.3, MS63 PCGS. CAC. The lustrous fields are light silver-gray, toned with darker gold and lilac through the stars and on the reverse in the fields, but the devices are bright. The strike is decent for the issue, with noticeable weakness on the upper curls of Liberty and the eagle's breast. Heavy adjustment marks cross Liberty's face and hair, disturbing several important design elements. Nevertheless, adjustment marks were part of the minting process, and a substantial number of silver and gold coins from this era show evidence of being adjusted with a metal file prior to being struck. Often the adjustment marks were obliterated (or nearly so) by striking, but not so on this coin. Given the limitations of the somewhat primitive early Philadelphia Mint, rolling out silver ingots into precisely the correct thickness for planchets must have been a nightmare. It was far easier to make the planchets slightly thick, then adjust them down to the proper weight with a file, rather than having a planchet that was too thin and thus had to be melted and taken through the entire rolling process again. This half dime bears witness to the step-saving economies of the day. This is the usual die state, with the obverse die crack down from the rim through the Y of LIBERTY to Liberty's nose. Population for all 1795 half dimes: 43 in 63 (1 in 63+), 61 finer. CAC: 9 in 63, 24 finer (4/19). NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

1795 Flowing Hair Half Dime, MS64
V-4, LM-10
Exceptional Type Coin

3060 1795 V-4, LM-10, R.3, MS64 NGC. This pleasing Choice Flowing Hair half dime is attractively toned in ocean-blue and caramel-gold. No abrasions are visible, although adjustment marks on the planchet prior to the strike are seen in two places — the peak of the left (facing) wing and on the lower hair tresses. Struck from clashed dies. Satiny luster shimmers across the undisturbed fields and devices. The Flowing Hair type was produced for only two years. The portrait of Liberty was influenced by the Liberty Cap bust on cents and half cents introduced in 1793.
Ex: Central States Signature (Heritage, 4/2008), lot 2257, which realized \$23,000. NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

EARLY DIMES

1796 JR-2 Draped Bust Dime, MS62
Heavy Clash Marks

3061 1796 JR-2, R.4, MS62 PCGS. This satiny MS62 JR-2 dime is among the finer examples of the variety that we have offered in recent years — only about 10% of all surviving 1796 dimes are from the elusive JR-2 die pair. Both sides show prominent clash marks but no evidence of die lapping. The obverse has minor rim crumbling at 10 and 2 o'clock, consistent with the late die state. An attractive example, this piece displays muted silver luster and splashes of delicate gold toning. Trivial hairlines and marks are evident as expected for the grade level. The strike is generally bold, although slightly blunt in the center of the obverse and reverse where the eagle's head and breast are weak and the hair curls on Liberty's neck are poorly defined. Draped Bust 1796 dimes generally scarce in pleasing Uncirculated condition. NGC ID# 236B, PCGS# 38743 Base PCGS# 4461

1798 JR-4 Dime, MS64
Toned Large 8 Type Coin

3062 1798 Large 8, JR-4, R.3, MS64 NGC. JR-4 features the only use of this obverse die, which shows a flat top 1 in the date. Heavy die cracks run through the Y in LIBERTY to Liberty's nose and then out into the field from the chin. In a later state, the radial crack from the Y branches back toward the rim at Liberty's nose, between stars 11 and 12. On the reverse, a heavy die break connects the tip of the eagle's left (facing) wing to the dentils. JR-4 is a 13 Stars Reverse issue, ideal for representing the Large 8 *Guide Book* variety. Offered here is a near-Gem example that shows deep lilac-gray toning on each side, with smatterings of ocean-blue and green-gold. It is among the finer-known Normal Date 1798 dimes certified. NGC lists four coins in this grade, both varieties included, and just one Gem finer (4/19). NGC ID# 236E, PCGS# 38753 Base PCGS# 4466

1807 JR-1 Dime, MS64
Dual-Denomination Reverse

3063 1807 JR-1, R.2, MS64 PCGS. Only one set of dies was used to strike 165,000 dimes in 1807. This reverse was also employed in the production of four different quarter eagle varieties dating back to 1805. The hardy die remained in good condition through the coining of these final-year Heraldic Eagle dimes, but the obverse did not stand up as well. It exhibits heavy clashing and loss of detail from die sinking, particularly on the leftmost stars, ER in LIBERTY, and stars 12 and 13. Although this coin lacks detail around certain peripheral areas, it remains in unworn, Mint State condition. Indeed there are only a handful of coins known finer. Liberty and the eagle are crisp. Few marks appear over the softly lustrous, cream-gray surfaces. Population: 22 in 64 (1 in 64+), 7 finer (4/19). NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

BUST DIME

1829 Bust Dime, MS66
Large 10C, JR-2

3064 1829 Large 10C, JR-2, R.2, MS66 PCGS. A defective right foot on the 1 in 10 C is a pick-up point for the JR-2 variety. A later die state with many delicate cracks, with the most prominent crossing the portrait between stars 3 and 8. This intricately struck and magnificently preserved Premium Gem displays rich dove-gray, lavender, and aquamarine toning. Areas of brilliance remain on the reverse border between 9 and 11 o'clock. An ideal acquisition for the early silver type collector, as well as the devoted series specialist who collects by date, die marriage, or *Guide Book* variety. NGC ID# 2378, PCGS# 38840 Base PCGS# 94511

PROOF BUST DIME

1834 Capped Bust Dime, PR64
Extremely Rare JR-1 Proof
Possible Diplomatic Proof Set Example

3065 1834 PR64 PCGS. JR-1, R.8 as a proof. Seven die varieties are known for the 1834 Capped Bust dime and proofs have been reported from five different die pairs. This is not too surprising, as proofs were just made to order during that early era. Whenever a Treasury official (or private collector with enough clout) wanted proof coinage for official (or unofficial) purposes, the Mint simply polished up a handy pair of dies, selected and prepared a suitable number of planchets, and struck the coins on the medal press, as ordered. The dies would then be used to strike business-strike coinage, if needed, or stored for later use. Since proofs were ordered by different people, at different times, and for different purposes, it makes sense that several pairs of dies would be used to strike proofs throughout the year. PCGS estimates 8-10 proof 1834 Capped Bust dimes are extant, including all varieties.

This coin represents the JR-1 variety, with a large perfect 4 in the date and a double shaft on the top arrow on the reverse. Three proofs of the JR-1 variety have been reported, including the coin in the King of Siam proof set. This poses some questions, as die evidence suggests the JR-1 dies were the first pair used to strike business strikes in 1834, but the diplomatic presentation proof sets, with the famous 1804 dollars, were not ordered until late in the year (Secretary of State John Forsyth ordered the King of Siam and Sultan of Muscat proof sets on November 11, 1834). It therefore seems reasonable that the JR-1 proof dimes were not struck expressly for use in the proof sets, but were struck early in the year for some other purpose, and a few examples were still on hand in November, when the sets were ordered.

This attractive Choice proof exhibits sharply detailed design elements throughout, with full star centers and fine definition on Liberty's hair and the eagle's feathers. The well-preserved surfaces include reflective fields and frosty devices, under shades of cerulean-blue, sea-green, and slate-gray toning. Overall eye appeal is terrific. While no definite link can be established, it is possible this coin was the example included in the Sultan of Muscat proof set in 1834.

Ex: Julian Leidman; purchased privately by Allen Lovejoy on 9/7/1987; Lovejoy Collection (Stack's, 10/1990), lot 141; February Auction (Superior, 2/1999), lot 597. PCGS# 4556

SEATED DIMES

1853 Arrows Seated Dime, MS67
Exemplary Type Coin

3066 1853 Arrows MS67 NGC. Fully lustrous with frosty surfaces. The obverse has intermingled lilac-gray and pale gold color, while the reverse displays lighter golden-champagne toning. This Superb Gem possesses exceptional aesthetic appeal and is sure to please even the most fastidious of collectors. Only a few finer examples have been certified. Census: 12 in 67 (1 in 67★), 5 finer (4/19). NGC ID# 2398, PCGS# 4603

1888-S Seated Liberty Dime, MS66
Extremely Rare Any Finer

3067 1888-S F-110, R.3, MS66 PCGS. CAC. Deep ocean-blue, olive-green, cherry-red, and peach patina encompass this satiny and well-struck Premium Gem. The surfaces appear pristine aside from a small, bright area on the field below the TES in STATES. Fortin-110 is noteworthy for its low and right placement of the mintmark. Population: 5 in 66 (1 in 66+), 1 finer. CAC: 7 in 66, 0 finer (4/19).
Ex: Dallas Signature (Heritage, 12/2017), lot 3051, which realized \$4,800. PCGS# 538792 Base PCGS# 4701

PROOF SEATED DIME

1837 No Stars, Large Date Seated Liberty Dime, PR66
Sought-After Two-Year Type Issue
Only One Finer Certified

3068 1837 No Stars, Large Date, F-101, R.7, PR66 NGC. Chief Engraver William Kneass suffered a stroke before he could finalize the design for the Seated Liberty motif, which replaced the Capped Bust design on U.S. silver coinage in the late 1830s. The talented Christian Gobrecht took over the project and completed the design, based on earlier contributions from Kneass, Thomas Sully, and Titian Peale. The Seated Liberty obverse design appeared first on the famous Gobrecht dollars in 1836, followed by the dime and half dime in 1837, the quarter in 1838, and finally, the half dollar in 1839. Gobrecht's initial obverse design was a masterpiece of simplistic beauty, with no stars around the border, giving the coin an uncluttered, medallion look that creates intense aesthetic appeal. Thanks to its simplicity, the entire design could be engraved into the hub, leaving only the date logotype to be punched in by hand. Among dime issue, the No Stars obverse was used only on the 1837 and 1838-O emissions. Accordingly, the No Stars obverse is always in demand as an important two-year type issue.

Walter Breen notes 30 proof Seated Liberty dimes were struck on June 30, 1837, to serve as presentation pieces to demonstrate the new design to Treasury officials and other VIPs. The proofs show a diagnostic small tine of metal from the dentils above the first T in STATES and a diagonal die scratch through (STAT)ES and O(F). The No Stars design was a favorite of early numismatists, and the proofs apparently started appearing at auction at least as early as lot 162 of the J.N.T. Levick Collection (Edward Cogan, 12/1859), "1837 Dime, no stars, fine proof." The lot realized 75 cents, a strong price at the time. More recent records include the \$97,750 brought by the PR67 NGC example in the Pre-Long Beach Auction (Ira and Larry Goldberg, 9/2007).

The coin offered here is a delightful Premium Gem with sharply detailed design elements and reflective fields, under medium-intensity shades of jade-gold and cobalt-blue toning. The surfaces are impeccably preserved and eye appeal is outstanding. The 1837 No Stars Seated Liberty dime is extremely rare at the PR66 grade level, and the only one coin has been certified finer at either of the leading grading services. NGC ID# 23BN, PCGS# 538978 Base PCGS# 4718

BARBER DIME

1894-O Barber Dime, Toned MS65
A Rarity in Mint State

- 3069 1894-O MS65 PCGS.** This New Orleans issue was a workhorse of commerce. Circulated survivors are plentiful, but Mint State coins are seldom offered in any grade and it is unlikely that more than a few were initially preserved for numismatic purposes. This rare Gem displays satiny mint luster with uniform sea-green and yellow-gold toning. The design elements are sharp and eye appeal is strong. Population: 5 in 65 (1 in 65+), 11 finer (4/19). NGC ID# 23DU, PCGS# 4804

MERCURY DIMES

1916-D Mercury Dime, AU53
Sharp and Partially Lustrous

- 3070 1916-D AU53 PCGS.** The mintmark on this coin is high, tucked close to the branch stem. Luster remains in the fields, and the devices show only light high-point wear. Were this piece Uncirculated, a Full Bands designation might have been achieved, as the fasces is well-struck. The 1916-D Mercury dime is the key date in the series, and it is one of the most sought-after regular 20th century issues across all denominations. With a mintage of only 264,000 pieces, collector-grade pieces such as this AU coin are difficult to acquire. NGC ID# 23GY, PCGS# 4906

1916-D Mercury Dime, AU58 Full Bands
Collector-Grade Example

- 3071 1916-D AU58 Full Bands NGC.** This satiny coin has scattered abrasions and a trace of high-point rub, although the sharpness of the horizontal fasces bands is unimpeded. A few flecks of russet-blue toning are visible, but the majority of the coin is silver-white. Full Bands examples of the 1916-D Mercury dime in AU grades are widely collected when a Mint State coin is out of reach. However, there are few pieces in this grade to go around. NGC ID# 23GY, PCGS# 4907

1919-D Dime, MS65 Full Bands
Rare This Well-Preserved and Sharp
Shattered Obverse Die State

- 3072 1919-D MS65 Full Bands NGC.** This semikey date is one of the most challenging Mercury dimes to acquire in Gem condition with Full Bands. The present coin is one of a half dozen MS65 Full Bands coins at NGC, with none finer. PCGS lists a slightly higher number of pieces in this grade, although the date is inherently rare so fine. Each side of this coin is sharply struck and satiny with light golden toning. There are no mentionable abrasions. Die erosion on the obverse has led to heavy cracks — one bisects the obverse from 12 to 6 o'clock, another extends from the rim near the L in LIBERTY toward Liberty's mouth, and a third runs through the T in LIBERTY into the back of the cap. Census: 6 in 65 Full Bands, 0 finer (4/19). NGC ID# 23H9, PCGS# 4925

1921 Dime, MS66 Full Bands
Registry Set Quality

3073 1921 MS66 Full Bands PCGS. Frosty original mint luster shows no significant abrasions on this Premium Gem Full Bands 1921 Mercury dime. A trace of delicate champagne toning adds just a touch of warmth to each side, although the coin presents as brilliant from most angles. Central strike sharpness is outstanding despite some incompleteness around the upper rims. Finer Full Bands representatives are uncollectible for most Mercury dime enthusiasts. Population: 53 in 66 (4 in 66+) Full Bands, 4 finer (4/19). NGC ID# 23HE, PCGS# 4935

PROOF TWENTY CENT PIECES

1877 Twenty Cent, PR66 Cameo
Delightful Peripheral Patina

3074 1877 PR66 Cameo PCGS. BF-1, R.3. The 1877 is a proof-only date, and has the lowest mintage of the series at just 510 pieces. BF-1 is the sole die variety, distinguished by the date location, reverse lapping, and obverse die lines from Liberty's foot. The present high-grade example has flashy fields and a frosty Liberty and eagle, but its most appealing attribute is its exquisite peripheral patina. Cherry-red, lemon-gold, and powder-blue shades dominate the margins. In addition, the strike is good, and the eye appeal is exceptional. A fleeting opportunity to secure the key date of the four-year proof series. Population: 4 in 66 Cameo, 1 finer (4/19). NGC ID# 27H4, PCGS# 85305

1878 Twenty Cent, Toned PR64
Final-Year of Issue

- 3075** 1878 PR64 PCGS. BF-1, R.3. All 1878 twenty cent pieces were struck from a single die pair, which shows a small die lump in the drapery folds to the right of the Y in LIBERTY. These are all proof coins, coming from a mintage of 600 pieces, and they are the last twenty cent coins struck in any format. This near-Gem displays sharp detail and reflective fields. Deep aquamarine toning encompasses the margins, leaving the centers with a lighter lilac hue. NGC ID# 27H5, PCGS# 5306

EARLY QUARTERS

1796 B-2 Quarter Dollar, Fine Details
Important Small Eagle Type

- 3076** 1796 B-2, R.3 — Corroded, Improperly Cleaned — NCS. **Fine Details.** Tompkins Die State 2, lapped obverse. B-2 is slightly more plentiful overall than B-1, although any example of this one-year type and first-year denominational issue would be a welcome addition to many collections. For many type collectors, the 1796 Small Eagle issue poses the greatest challenge. This piece has Fine details, although moderate corrosion on each side prohibits a numeric grade. Stone-gray and olive-tinged surfaces are slightly glossed, suggestive of a light cleaning. Both sides have strong detail and complete border dentils.

1807 B-1 Quarter Dollar, MS64
Early Die State
Condition Census Example

- 3077** 1807 B-1, R.2, MS64 PCGS. Tompkins Die State 2/2. This early die state shows obverse clash marks left of the hair curls and in front of the profile. Faint reverse cracks from the 2 to UNI and through the tops of ST, as well as clash marks from the drapery through OF, apparently occurred in its earlier appearance with 1805 B-4 or 1806 B-1.

Apparently, only two examples of the B-1 are clearly finer than the present example, according to the Rea-Peterson-Karoleff-Kovach *Early Quarter Dollars of the United States Mint*. One is the ex: Andre Dawson MS66 NGC piece [(ANR, 3/2006), lot 625; Heritage (10/2011), lot 3563], the other the MS67 PCGS ex: Eliasberg coin. The 1807 was the last year of the Draped Bust, Heraldic Eagle quarters, the highest-mintage of the four years (by a hair over the 1806), and a popular choice to represent the type.

This is simply a gorgeous example, and one of the most visually appealing early quarters that we have ever examined. The strike definition is nearly full, and the central motifs are brought up with razor-sharp precision. A few of the stars on each side reveal incomplete central details. A shallow planchet flaw appears just to the left of obverse stars 12 and 13, and a tiny die lump in the center of Liberty's neck. Both sides are attractively toned in shades of electric-green, gold-tan, and rose-gray.

Ex: ANA Sale (*Bowers and Merena*, 8/2000), lot 1251; ANA Signature (Heritage, 8/2015), lot 4016. NGC ID# 23RF, PCGS# 38939 Base PCGS# 5316

BUST QUARTER

1834 B-1 Quarter, MS65
Intricate Strike, Smooth Surfaces

- 3078** 1834 O Over F in OF, B-1, FS-901, R.1, MS65 NGC. Tompkins Die State 1/4. The A in STATES is filled, but the lower leaf pair remains attached to the branch. Medium wheat-gold and steel-gray toning embraces this essentially unabraded Capped Bust type coin. A sharp strike and good luster contribute further to the eye appeal. There are five different 1834 die marriages, but B-1 can be identified at a glance, due to the absence of a period after the C in 25 C. While the Colonel Green / Eric Newman example is regarded as the finest of the variety, the present piece is nonetheless a candidate for the Condition Census, and is a formidable addition to an advanced collection. NGC ID# 23RZ, PCGS# 38992 Base PCGS# 5353

SEATED QUARTERS

1867 Quarter Dollar, MS64
Semiprooflike Fields, Lightly Toned

- 3079** 1867 MS64 PCGS. Briggs 1-A. The fields of both sides are striated by mint-made die polishing, with a notably heavy die line running from the eagle's left (facing) wing through the tip of the ribbon. Lilac and blue-gray toning covers the obverse, fading from dark to light across the coin. The reverse is brilliant in the center with russet and peach border hues. Some prooflikeness is apparent from the die polishing. Population: 3 in 64, 0 finer (4/19). NGC ID# 23UD, PCGS# 5470

1878-S Seated Liberty Quarter, MS65
Elusive, Underrated Issue

- 3080 1878-S MS65 PCGS. Briggs 1-A.** With a mintage of 140,000 coins, the 1878-S Seated quarter is not generally considered among the low-mintage dates that comprise the tail end of the series, but it is actually an elusive issue, both in high grades and overall. Large numbers were apparently melted in anticipation of the new Morgan dollar coinage, and remarkably few examples remain for collectors. PCGS and NGC combined have certified only 109 examples in all grades; in Mint State, PCGS has seen only 17 coins, with just two in MS65, one in MS65+, and two numerically finer (4/19). With such a low population, this San Francisco issue seems to be somewhat underappreciated. The present example showcases radiant, frosty luster beneath shades of lavender-gold, aquamarine, and dusky gray toning. Evidence of die lapping is seen in some of the eagle's feathers, though the strike is sharply impressed. An important, condition census example of this scarce San Francisco issue. NGC ID# 23VA, PCGS# 5510

PROOF SEATED QUARTER

1874 Arrows Quarter, PR65 Cameo
Low-Mintage Two-Year Type

- 3081 1874 Arrows PR65 Cameo PCGS. CAC.** Ex: Gil Clark. The two-year Arrows type is always in high demand, especially in proof format. However, production was limited to 500 pieces in 1873 and 700 in 1874. That total is lower than certain single-year mintages like the 1880. Thin splashes of golden color drape otherwise brilliant surfaces that retain semireflective fields. A terrific example of the type. Population: 12 in 65 (1 in 65+) Cameo, 11 finer. CAC: 5 in 65, 3 finer (4/19).
Ex: Long Beach Signature (Heritage, 1/2019), lot 3593, which realized \$4,800. NGC ID# 23XS, PCGS# 85575

BARBER QUARTERS

1896-O Quarter, MS65
Razor-Sharp Central Motifs

- 3082 1896-O MS65 NGC.** Ex: Richmond Collection. Although this New Orleans issue cannot compare with the 1896-S, it remains a moderately challenging issue in high grades and is rare at the Gem grade level. Liberty's portrait and the eagle's feathers, claws, talons, and fletchings are fully struck. Even the right shield corner is razor-sharp. Both sides maintain their brilliance with satiny mint luster and blushes of golden color. A later die date with cracks, clashing, and crumbling around parts of the rims. Census: 9 in 65, 4 finer (4/19). NGC ID# 23Y8, PCGS# 5614

1896-S Quarter, MS64+ ★
'Big Three' Series Key, Great Eye Appeal

3083 1896-S MS64+★ NGC. Along with the rare 1901-S and 1913-S issues, the 1896-S quarter is unquestionably one of the top three rarities in the Barber quarter series. Just 188,039 pieces were struck. As usual, die clashing is visible within Liberty's ear, a peculiar attribute of genuine 1896-S quarters and a quick way to help verify authenticity.

The vibrantly lustrous surfaces of this borderline Gem display exquisite border toning in shades of electric-blue, violet, and russet-brown. Ivory-gold shades at the centers resonate with silver luster. The coin is sharply struck throughout both sides, with only a few microscopic marks that prevent a full-on Gem grade. This is the sole Plus-graded near-Gem at NGC with the Star designation as well. Census: 14 in 64 (1 in 64★, 1 in 64+★), 8 finer (4/19). NGC ID# 23Y9, PCGS# 5615

1904-O Barber Quarter, MS66+
Extremely Rare Any Finer

3084 1904-O MS66+ PCGS. Despite a mintage of more than 2.4 million pieces, the 1904-O Barber quarter is rare in MS66 condition, and finer coins are virtually unobtainable. This Plus-graded Premium Gem exhibits well-detailed design elements and impeccably preserved, lustrous surfaces, with hints of golden-tan and lavender-gray toning. Population: 16 in 66 (2 in 66+), 3 finer (4/19). NGC ID# 23YZ, PCGS# 5638

PROOF BARBER QUARTER

1903 Quarter, PR68 Cameo
Brilliant and Strongly Contrasted

3085 1903 PR68 Cameo NGC. Thick mint frost over the devices appears worthy of an Ultra Cameo designation, but an area of die polish near Liberty's ear denies this status. The strike is strong in all areas, as expected, with full definition on the claws and the shield corners. Only 755 proofs were struck. Census: 8 in 68 Cameo (1 in 68★, 1 in 68+★), 1 finer (4/19). NGC ID# 24ZJ, PCGS# 85689

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, VF30
Attractive Collector-Grade Example

3086 1916 VF30 PCGS. Midgrade 1916 Standing Liberty quarters are often difficult to accurately grade, as the softness of the obverse design makes the coin appear much more worn than it really is. On this VF30 coin, the date numerals are sharp, which is a good indicator of the grade, and the eagle shows some feather detail on the eagle's right (facing) wing. On lower-grade pieces, the date is often weak, and the eagle's wings are poorly detailed. This slate-gray collector coin displays a tinge of olive-gold border toning on the obverse, while the reverse has deeper russet and ebony peripheral color. Eye appeal is pleasing for the grade. NGC ID# 43XR, PCGS# 5704

1916 Standing Liberty Quarter, AU58
Significant Mint Luster Remains

- 3087** 1916 AU58 NGC. Only 52,000 pieces were struck of the newly designed quarter, and all were produced in late-1916. Many were mixed in with Type One 1917s that were released early in 1917, thus confusing the two issues in the general public's mind. This is an attractive example of this first-year issue. Most of the original mint luster remains with just the slightest trace of high-point friction. There are no obvious abrasions on either side and both obverse and reverse have taken on a light golden-brown patina. An attractive example of this scarce issue. NGC ID# 43XR, PCGS# 5704

1916 Standing Liberty Quarter, MS61
Lightly Toned and Satiny

- 3088** 1916 MS61 ANACS. Golden toning with lilac accents warms each side of this Mint State 1916 Standing Liberty quarter, complementing well-struck design elements. Liberty's head is not quite fully defined, although various degrees of softness are unavoidable on this issue. Grade-limiting abrasions are minimal. NGC ID# 43XR, PCGS# 5704

WASHINGTON QUARTERS

1932-S Quarter Dollar, MS66
Satiny and Deeply Toned
Top-Grade Registry Set Rarity

- 3089** 1932-S MS66 NGC. The 1932-S Washington quarter is nearly as rare in MS66 as its Denver counterpart. Only 11 pieces are reported in this grade with none finer by NGC and PCGS combined, which possibly includes duplication (4/19). This is the first time this coin — or any 1932-S quarter in MS66 — has appeared at auction since 2014. The auction record for the date was set in our January 2013 FUN Signature sale, where a PCGS CAC coin garnered \$35,250. Of the handful of top-grade coins that we have seen, the present is perhaps the most deeply toned around the peripheries, where vivid orange-gold, lilac-gray, crimson, and olive-russet hues circumnavigate the borders. The interiors display warm golden patina. This is a sharp and appealing example of the date, a prime Registry Set contender. Census: 7 in 66, 0 finer (4/19).
Ex: ANA Signature (Heritage, 7-8/2008), lot 1655, which realized \$10,925; Americana Sale (Stack's Bowers, 2/2014), lot 1189, which realized \$15,275. NGC ID# 2449, PCGS# 5792

1937 Quarter, Brilliant MS65
FS-101, Doubled Die Obverse
Important for Major Varieties Registry Sets

- 3090** 1937 Doubled Die Obverse, FS-101, MS65 PCGS. CAC. Heavy die doubling is evident on the motto and date of this important *Guide Book* variety, which is rare in Mint State. PCGS reports only 17 Uncirculated examples, few of which rival the present Gem in terms of quality and eye appeal. This piece is brilliant and satiny with vibrant mint luster. A loupe is required to see the few microscopic surface grazes that prevent an even finer grade from PCGS. Population: 4 in 65, 2 finer. CAC: 1 in 65, 1 finer (4/19).
From Charlie O's Collection. NGC ID# 49ES, PCGS# 145291
Base PCGS# 95803

1941-D Washington Quarter, MS68
Condition Census Registry Coin

- 3091** 1941-D MS68 PCGS. CAC. The 1941-D Washington quarter, with a mintage approaching 17 million coins, is fairly common through the Gem and Premium Gem levels, but at the Superb Gem rank, the population thins dramatically. Only four coins are recorded in MS68 at PCGS and NGC, the highest grade achieved and the one sought-after by Registry Set collectors.

This example radiates vibrant luster from both obverse and reverse. Deep violet, forest-green, orange-gold, and yellow-gold toning covers the right, upper, and lower obverse borders, leaving the remaining areas mostly brilliant. The same color palette occurs on the reverse but is much more confined to the right and lower margins. The design elements are sharply defined, and both sides are beautifully preserved. Population: 3 in 68, 0 finer. CAC: 3 in 68, 0 finer (4/19).

Ex: ANA Signature (Heritage, 7-8/2008), lot 1657, which realized \$20,700.

From Charlie O's Collection. NGC ID# 244Y, PCGS# 5815

1942-S Quarter, MS68
Tied for Finest With One Other Coin

- 3092 1942-S MS68 PCGS.** Any silver Washington quarter is a condition rarity in MS68. Most issues are unknown at this level. Only two 1942-S quarters are certified in MS68 PCGS, and none are reported at NGC (4/19). Pristine, brightly frosted surfaces exhibit full strike detail. Blushes of orange, forest-green, and mauve toning provide a hint of color. The finest example we have ever handled and a important opportunity for advanced collectors.
From Charlie O's Collection. NGC ID# 3TEN, PCGS# 5819

1943 Washington Quarter, MS68
Colorfully Toned Top-Grade Example

- 3093 1943 MS68 PCGS. CAC.** Ex: George's Army Collection. The large wartime mintage of this 1943 Philadelphia quarter was nearly 100 million coins. However, just 10 pieces are recorded in MS68 at PCGS and NGC combined, with none finer (4/19). This phenomenal example is one of just five coins for the grade with CAC endorsement, making it arguably one of the most highly sought-after examples of the date hands down. Waves of orange-gold, crimson, and olive occupy both sides, being slightly more extensive and deeper on the reverse. The design elements are generally well-impressed. Lustrous surfaces are impeccably well-preserved and yield stunning eye appeal. The collector seeking colorfully toned coins will appreciate this specimen. Population: 5 in 68, 0 finer. CAC: 5 in 68, 0 finer (4/19).
Ex: Central States Signature (Heritage, 4/2012), lot 4297; New York Signature (Heritage, 11/2013), lot 3605.
From Charlie O's Collection. NGC ID# 2455, PCGS# 5820

1943-S Quarter, MS68
Finest Example Certified at PCGS

- 3094 1943-S MS68 PCGS. CAC.** This is the only MS68 certified by PCGS of this important wartime issue — and this isn't a coin that "just made it." It is solid for the grade with eye appeal to spare. A couple of small abrasions are present, but it will require both magnification as well as patience to locate them. In addition to the technical preservation of the surfaces, both obverse and reverse display a long arc of deep sea-green and golden-brown toning on the right portion of each side. Exceptional quality and a coin that is sure to bring a record price.

Ex: Long Beach Signature (Heritage, 9/2003), lot 6894.

From Charlie O's Collection. NGC ID# 2457, PCGS# 5822

1944-S Quarter, Toned MS68
Remarkable Top-Grade CAC Coin

- 3095 1944-S MS68 PCGS. CAC.** Blended sea-green, gold, and lilac hues adorn the virtually flawless surfaces of this top-grade Registry coin, complementing bold design elements and satiny mint luster. PCGS and NGC combined have seen a 1944-S quarter in this grade on only 10 occasions, but just three of those coins are PCGS-certified. We anticipate spirited bidding for this remarkable coin, which is without question one of the finest-known examples of the issue. Population: 3 in 68, 0 finer. CAC: 5 in 68, 0 finer (4/19). *Ex: FUN Signature (Heritage, 1/2013), lot 5615, which realized \$9,400.*

From Charlie O's Collection. NGC ID# 245A, PCGS# 5826

1946-S Quarter, MS68
Among the Finest at Both Firms

- 3096 1946-S MS68 PCGS. CAC.** This wonderful rarity is finer than the 1946-S quarter present in the all-time finest PCGS Registry Set (D.L. Hansen). Indeed, it is one of the top examples at both leading grading firms combined. Sea-green, powder-blue, mauve, and golden-orange patina complements areas of frosty brilliance on each side. Fully struck and void of mentionable marks. Population: 6 in 68, 0 finer. CAC: 3 in 68, 0 finer (4/19).

From Charlie O's Collection. NGC ID# 245G, PCGS# 5832

1947-S Washington Quarter, MS68
Exceptional Toning

- 3097 1947-S MS68 PCGS.** *Ex: Stella Colbert.* A spectacularly toned example that has alternating orange, ruby-red, powder-blue, and aquamarine colors around wide margins, which in turn frame mostly brilliant centers. This lustrous and beautifully preserved Superb Gem is a prize for the toning enthusiast. The 1947-S is a low-mintage issue since only 5.5 million pieces were produced, and this high-grade example should be of great interest to the Registry Set collector. Population: 3 in 68, 0 finer (4/19).

Ex: Central States Signature (Heritage, 4-5/2010), lot 2100.

From Charlie O's Collection. NGC ID# 245K, PCGS# 5835

1954-S Quarter, MS68
Spectacularly Toned

- 3098** 1954-S MS68 PCGS. CAC. This spectacularly toned piece is the finest and only piece so graded at PCGS. The reverse is brilliant, while the obverse offers spectacular bands of deep mint-green, magenta, and ocean-blue color. A definite must for color aficionados. Watch the bidding war erupt between toning enthusiasts and Registry Set collectors for this phenomenal piece. Population: 1 in 68, 0 finer. CAC: 2 in 68, 0 finer (4/19).
From Charlie O's Collection. NGC ID# 22FU, PCGS# 5857

1967 Quarter, Delicately Toned MS68
The Sole Finest at PCGS

- 3099** 1967 MS68 PCGS. 30th Anniversary Green Label Holder. This is the sole finest 1967 Washington quarter at PCGS, and just three others are reported this fine at NGC (4/19). Obviously, this piece is a full grade point finer than the example in the current highest-rated PCGS Registry Set. The strike is bold despite die wear that produces metal flowlines in the fields and on areas of the obverse portrait. Both sides display champagne interiors surrounded by lovely lavender and ice-blue border toning. No major abrasions are observed. The sky is the limit when this coin crosses the auction block in the presence of eager Registry Set collectors.
Ex: FUN Signature (Heritage, 1/2017), lot 4802, which realized \$8,812.50.
From Charlie O's Collection. NGC ID# 2494, PCGS# 5880

EARLY HALF DOLLARS

1794 O-101, T-7 Half Dollar, Fine 15
Early Die State

- 3100** 1794 O-101, T-7, High R.3, Fine 15 PCGS. The omnipresent die crack between the D and S in UNITED STATES is clearly visible, but there is no trace of the later state crack at the F in OF. This splendid piece has a blend of ivory and slate-gray on both sides with strong eye appeal. Collector-grade 1794 halves such as this are inherently scarce, with irregular auction appearance rates. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1794 O-101a Half Dollar, VF25
Scarce First Year Type Coin

- 3101** 1794 O-101a, T-7, High R.3, VF25 PCGS. Die cracks through the F in OF, and between nearby leaves, help attribute this first-year Flowing Hair half. The obverse has a cream-gray portrait along with an olive-gray field and glimpses of brick-red throughout the border. The reverse exhibits golden-brown near the letters, while the field is sea-green and the eagle and wreath display lavender toning. A pair of minor and parallel adjustment marks (as coined) cross the cheek, but abrasions are trivial aside from a slight rim knock at 5:30 and faded marks near star 7 and the IB in LIBERTY. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

**1794 Half Dollar, Choice VF
Elusive O-105 Die Variety**

- 3102** 1794 O-105, T-3, R.5, VF35 NGC. In a later die state, O-105 develops a crack from the dentils to the first T in STATES. That die state (O-105a) is rare, but O-105 is scarce in its own right. The leaf pair beneath OF on the reverse is positioned below the F, and on the obverse, star 15 is just higher than the tip of the bust truncation. Star 1 is free of the hair curl to the left of the date, but star 2 touches it.

This piece shows moderate wear with pleasing light golden patina. Deeper amber and russet toning surrounds the borders. Minor adjustment marks appear along the right-obverse stars, but the dentils in that region are still well-defined. Additional adjustment marks are seen on the center of the portrait. The reverse shows wear most significantly on the body of the eagle, leaving the wings well-detailed. NGC ID# 24E6, PCGS# 39206 Base PCGS# 6051

**1795 O-125 Half Dollar, XF45
Bold Central Motifs**

- 3103** 1795 2 Leaves, O-125, T-13, R.4, XF45 NGC. Tompkins Die State 2/1. The 1795 half dollar is often encountered in type specialists' collections. This piece is of a scarce variety, characterized in part by star 1 fully piercing Liberty's lower hair curl. Rich gunmetal-gray and dusky olive-gold patina coats each side, with only light wear seen over the well-defined design elements. Numerous mint-made adjustment marks are noted around the obverse periphery, causing minor softness of strike on the lower-right dentils. Only small abrasions and marks dot the surfaces on both sides. This piece will be of interest to both the type collector and the early half dollar variety specialist.

Ex: FUN Signature (Heritage, 1/2001), lot 7727; Chicago Signature (Heritage, 8/2011), lot 3910; Houston Signature (Heritage, 12/2013), lot 3624; Long Beach Signature (Heritage, 6/2014), lot 4506; Dallas Signature (Heritage, 3/2018), lot 3051; Beverly Hills Signature (Heritage, 12/2018), lot \$5,520. NGC ID# 24E7, PCGS# 39241 Base PCGS# 6052

**1801 O-101 Half Dollar, AU55
Challenging in High Grade**

- 3104** 1801 O-101, T-2, R.3, AU55 NGC. Tompkins Die State 3/4. Both dies are clashed, although the evidence is more prominent on the reverse between the eagle's right (facing) wing and the M in UNUM. Overton-101 is the second and more plentiful die marriage of the 1801 half dollar, distinctive for the large die lumps on the reverse near the arrowheads. This is the variety typically represented in date and type sets. The 1801 half dollar is popular as the first of the Heraldic Eagle reverse type, and its coinage amounted to only 30,289 pieces. While plentiful in low circulated grades, this issue is rare in AU condition and inaccessible for many collectors in Mint State where just a handful of pieces are known. Offered here is a partly lustrous AU55 coin with gold-tinted stone-gray surfaces. The border stars are incompletely struck as usual, although the central devices are bold. Census (both varieties included): 3 in 55, 6 finer (4/19). NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

1806/5 Half Dollar, O-103, MS61
Lavender and Gold Toning

- 3105** 1806/5 O-103, T-8, R.2, MS61 PCGS. Ex: Friend. Tompkins Die State 1/1. According to Stephen Herrman's Fall 2018 *Auction & Mail Bid Prices Realized for Bust Half Dollars*, this is one of the top five finest examples of the O-103 or O-103a offered over the past 10 years. The coin would qualify for fourth place on Tompkins' Condition Census, although no MS61 is listed. Lavender and gold toning dominates each side, with scattered ice-blue accents. The stars and central high points are slightly incomplete, but trivially so and in no way diminishing the appeal of this softly lustrous Uncirculated overdate coin. The remnants of the flag of the previously punched 5 are clear above the knob of the 6.
Ex: *The Dale Friend Collection of Bust Half Dollars, Part II / FUN Signature* (Heritage, 1/2019), lot 4476, which realized \$11,400. NGC ID# 24EK, PCGS# 39299 Base PCGS# 6077

1806 Draped Bust Half Dollar, MS62
O-119, Pointed 6, Stem

- 3106** 1806 Pointed 6, Stem, O-119, T-27, R.3, MS62 PCGS. Satin mint luster illuminates the fields of this lower-end Mint State Draped Bust type coin. There is some softness of strike in the centers, especially around the inner portion of the eagle's left (facing) wing, but the border stars are well-defined. Light russet toning warms each side and grade-limiting abrasions are minimal. Eye appeal is pleasing. NGC ID# 24EJ, PCGS# 39323 Base PCGS# 6071

BUST HALF DOLLARS

1813 O-101 Half Dollar, Iridescent MS64
50C Over UNI Blundered Reverse

- 3107** 1813 50 C Over UNI, O-101, R.2, MS64 PCGS. Stately silver-gray surfaces reveal an amazing palette of pastel iridescence when viewed in light. Blue, pink, lavender, pale-emerald, and peach-gold hues intermingle throughout the frosted surfaces, illuminated by cartwheel mint luster. The strike is razor-sharp on all devices with the exception of stars 4 to 8, which are a bit flat at the centers.

Engraving errors, overdates, outlandish die cracks, and multiple die states make the Bust half series both a challenge and an unending source of enjoyment for specialists. The popular O-101 50C Over UNI die marriage merits its own *Guide Book* listing — an inverted, partially effaced UNI of UNITED runs through the denomination, where it was entered erroneously by a disoriented die sinker. This is an attractive Choice Uncirculated example of the mint error, sure to please the most discerning Bust half enthusiast.
Ex: *Dale Friend Collection of Bust Half Dollars, Part II / FUN Signature* (Heritage, 1/2019), lot 4485. NGC ID# 24F2, PCGS# 39473 Base PCGS# 6104

1815/2 Bust Half, XF45
O-101a, Key Overdate Issue

- 3108** 1815/2 O-101a, R.3, XF45 PCGS. Multiple die clashing on both sides and a strong die crack through 50C confirms a late die state for this low-mintage overdate. Still reeling from the effects of the War of 1812, the Mint managed only 47,150 half dollars in 1815, all struck from an overdated die pair from 1812. This is a sharp Choice XF survivor, with faint traces of luster at the margins that reveal iridescent colors. Shades of blue and tan-gold combine for strong eye appeal, and there are no large or distracting marks. NGC ID# 24F5, PCGS# 39492 Base PCGS# 6108

1823 O-105 Half Dollar, MS65
Ex: Eliasberg, Tied Atop the Condition Census

- 3109** 1823 O-105, R.1, MS65 NGC. Ex: Eliasberg. Tied for top spot on the Condition Census. A horizontal toning streak across the portrait identifies this coin. The centers are mostly brilliant with tan-gold patina around the edges. Highly lustrous and impressively defined. This well-pedigreed O-105 half dollar should occupy a place of prominence in any Bust half set.
Ex: Louis E. Eliasberg, Sr. Collection, Part II (Bowers and Merena, 4/1997), lot 1793; Baltimore Auction (Bowers and Merena, 7/2003), lot 1471. NGC ID# 24FJ, PCGS# 39608 Base PCGS# 6131

1826 O-112a Half Dollar, MS66
Single-Finest Certified

- 3110** 1826 O-112a, R.2, MS66 NGC. Die chips in the upper loop of the first S in STATES, and above the diagonal of the N in UNITED, confirm the usual later Overton die stage. Rich sea-green and chestnut-brown toning encompasses this coruscating and well struck high-grade Capped Bust type coin. The reverse appears immaculate, and obverse contact is minimal, limited to a thin lines on the cheekbone and on the field above the date and west of star 12. Herrman's Spring 2019 Revision Condition Census for O-112a is topped by four MS65 NGC examples, which gives the present lot single-finest bragging rights. NGC ID# 24FM, PCGS# 408532 Base PCGS# 6143

SEATED HALF DOLLARS

1854-O Arrows Half Dollar, MS65
Heavily Cracked Reverse Die

- 3111** 1854-O Arrows, WB-101, Die Pair 4, R.3, MS65 PCGS. Heavy die cracks on the reverse and a rim cud below the D in DOL. aid in attribution of this die pairing. This Gem 1854-O half dollar is conditionally scarce and vibrantly lustrous beneath iridescent ocean-blue, almond-gold, and lavender toning. The left-side stars are softly defined, but the remaining design elements are bold. There are no consequential abrasions. Population: 18 in 65, 19 finer (4/19). NGC ID# 24JM, PCGS# 572088 Base PCGS# 6280

**1854-O Arrows Seated Half, MS66
Razor-Sharp Strike**

- 3112** 1854-O Arrows, WB-101, Die Pair 33, R.3, MS66 PCGS. At least 58 die pairs are known for the 1854-O, and it would be no surprise that others await discovery based on the mintage of more than 5.2 million pieces. This die marriage shows the obverse in a nearly pristine, early die state, with the faint beginnings of a radial die crack at star 11 that runs inward into the right obverse field. Horizontal die lines within the reverse shield recesses and a few short die lines off the eagle's right (facing) leg help identify the reverse die, which features a Large O mintmark set low beneath the feather tip.

The strike is razor-sharp throughout both sides of this Premium Gem. Pearlescent silver-gray surfaces display pale-gold toning that yields to areas of deep-brown patina. Marks are limited to a few minor, hair-thin grazes above the eagle's head. Population: 17 in 66 (2 in 66+), 2 finer (4/19). NGC ID# 24JM, PCGS# 572088 Base PCGS# 6280

**1888 Half Dollar, Golden-Toned MS66
Rarely Encountered CAC Coin**

- 3113** 1888 WB-101 MS66 PCGS. CAC. The 1888 is among the popular late-series Philadelphia issues made famous by low mintages, in this case just 12,001 pieces. However, few examples of this date circulated. Mint State survivors are plentiful, at least in the lower numeric grades. Premium Gems are scarce and finer pieces are rare. This is a seldom-seen CAC coin with softly frosted original luster and light golden border toning. Liberty's head and the adjacent stars exhibit minor strike softness that is only faintly evident elsewhere. Population: 25 in 66 (4 in 66+), 8 finer. CAC: 15 in 66, 6 finer (4/19). NGC ID# 24L3, PCGS# 572273 Base PCGS# 6370

PROOF SEATED HALF DOLLARS

**1871 Half Dollar, PR65 Cameo
Delicate Rose-Gold Toning**

- 3114** 1871 PR65 Cameo NGC. The proof 1871 Seated half dollar becomes increasingly scarce in grades finer than PR64, and all the more with Cameo contrast. NGC reports a mere 16 submissions for Cameo coins, and only this piece received a PR65 grade. The coin is fully struck on the satiny devices and beautifully mirrored in the fields. Both sides are brilliant across the interiors, ceding to rose-gold hues in the margins. Census: 1 in 65 Cameo, 6 finer; 1 in 65 Ultra Cameo, 0 finer (4/19). NGC ID# 27U6, PCGS# 86429

**1883 Half Dollar, PR66 Ultra Cameo
Outstanding Contrast, None Finer at NGC**

- 3115** 1883 PR66 Ultra Cameo NGC. Field-device contrast is outstanding. Fully struck motifs coated in a thick blanket of mint frost reside over reflective, liquidlike mirrors. Total brilliance enhances the black-and-white effect. Only 8,000 business strikes and 1,039 proofs were manufactured in 1883 — extremely low for the series but typical for the 1880s. Census: 3 in 66 Ultra Cameo, 0 finer (4/19). NGC ID# 27UJ, PCGS# 96444

BARBER HALF DOLLARS

1898-O Half Dollar, Toned MS65

- 3116 1898-O MS65 PCGS.** With its sub-1 million piece mintage and O mintmark, the 1898-O was destined to be a high-visibility issue in the Barber half series. Each side displays thick satiny mint luster beneath the multiple layers of toning present. The central strike details are weak, as always, but the surfaces show no obvious or mentionable abrasions. Population: 8 in 65, 6 finer (4/19). NGC ID# 24M4, PCGS# 6481

1901-O Barber Half, Satiny MS65 All-Brilliant Surfaces

- 3117 1901-O MS65 NGC.** The 1901-O is a challenging issue that combines a strike rarity with rarity in mint condition. It is, in fact, a scarce item above the VG level. Only 10 other coins have been certified in Gem condition between the two major certification services (four PCGS and six NGC) with a mere five finer (5/19). This particular piece has a characteristic strike with weakness on the leaves above Liberty's ear, as well as on the eagle. Brilliant throughout, the surfaces display bright, attractive satin mint luster. The only mentionable abrasions are a couple of unobtrusive marks on the lower portion of Liberty's neck. A rare opportunity for the specialist.
Ex: FUN Signature (Heritage, 1/2005), lot 4227; Central States Signature (Heritage, 4-5/2009), lot 806; FUN Signature (Heritage, 1/2019), lot 3526. NGC ID# 24MD, PCGS# 6490

WALKING LIBERTY HALF DOLLARS

1919-S Half Dollar, Toned MS64+ Better Branch Mint Issue

- 3118 1919-S MS64+ PCGS.** Although more collectible in high grade than its Denver counterpart, the 1919-S Walking Liberty half dollar is nonetheless elusive in MS64, and finer pieces are quite scarce. This example is among 11 Plus-graded coins in this grade at PCGS (4/19). It displays a sharp strike and satiny mint luster with no severe abrasions. Dusky olive-gold toning covers much of each side. NGC ID# 24R2, PCGS# 6579

1920 Walking Liberty Half, MS66 Top-Grade Rarity, Ex: Pittman Provenance Back to 1943

- 3119 1920 MS66 NGC.** Ex: Pittman. This coin was raw when it was offered in the Pittman sale as Gem Uncirculated, and indeed, NGC concurs. It is among the finest-certified 1920 half dollars known, and it is rare as such. Each side is frosty and beautifully preserved, with only a tint of light golden toning around the peripheries. The interiors are brilliant. Liberty's head is well-struck and there is thumb separation on Liberty's branch hand. Census: 6 in 66 (1 in 66+), 0 finer (4/19).
Ex: Purchased from James Kelly (12/10/1943) @ \$5; John Jay Pittman Collection, Part II (Akers, 5/1998), lot 1643, which realized \$8,800. NGC ID# 24R3, PCGS# 6580

1939-S Walking Liberty Half, MS68
Tied for Finest Certified

- 3120 1939-S MS68 NGC.** For decades the 1939-S has been one of the highest regarded issues in the Middle Date Series of Walkers. Undoubtedly, many early collectors first noticed the issue's low mintage of only 2.55 million pieces. As high-grade and fully struck sets began to be assembled in the 1970s, it soon became apparent that attractive, highly lustrous examples could be found. What was difficult was to combine the silky mint luster this issue is known for with a full strike and near absence of abrasions. This is the finest 1939-S half NGC has certified, and PCGS has also graded a coin in this lofty condition (4/19). Of great importance to the Walking Liberty specialist. NGC ID# 24RY, PCGS# 6608

FRANKLIN HALF DOLLAR

1963-D Half Dollar, MS67+ Full Bell Lines
The Finest Example Certified

- 3121 1963-D MS67+ Full Bell Lines NGC.** The 1963-D Franklin half dollar does not necessarily stand out as a great rarity. It proves widely available through mid-Uncirculated grade levels with or without Full Bell Lines, and can be obtained without too much effort in MS66 FBL. The population decline at the MS67 level defies expectation, however. More than 67 million of these final-year half dollars were struck, yet only three submissions at NGC plus one at PCGS have been certified MS67 Full Bell Lines. None have been graded without Full Bell Lines. This is the only example at either service with a Plus designation and is therefore the finest by that margin. Aside from the mostly brilliant obverse, this Superb Gem is vibrantly toned in multicolor iridescence. The reverse is especially attractive. Fully struck with radiant underlying mint luster. Census: 3 in 67 (1 in 67+) Full Bell Lines, 0 finer (4/19). NGC ID# 24TU, PCGS# 86685

EARLY DOLLARS

1795 Draped Bust Dollar, AU50
Off-Center Portrait, B-14, BB-51

- 3122** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, AU50 PCGS. Bowers Die State I, the usual perfect dies. Dave Bowers explains in the revised edition of his *Silver Dollar Encyclopedia* that as a type, 1795 Draped Bust dollars are much scarcer than their Flowing Hair counterparts. On their own, BB-51 (Off-Center Bust) and BB-52 (Centered Bust) dollars are still collectible in lower circulated grades, with the former being more available than the latter. Accessibility begins to decline significantly at the AU grade level.

This Almost Uncirculated example of the inaugural-year type by Robert Scot enjoys attractive antique patina with luminous accents of rose, violet, and peach-orange. Both sides are generally smooth and uniformly well-struck, with bold detail on the curls and breast feathers. There are a few small digs around the eagle's head, and as-made file marks occur along the right obverse border. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

1796 B-5, BB-65 Dollar, XF40
Large Date, Small Letters Type Coin

- 3123** 1796 Large Date, Small Letters, B-5, BB-65, R.2, XF40 PCGS. Bowers Die State III. The sole variety with a Large Date, the BB-65 is well-known for its Small Letters reverse with an omnipresent internal die break at CA of AMERICA. The variable-size die break touches both letters and nearly reaches the border on this middle die state example, with a slight bulge below its lower edge. The present piece displays light, silver-gray surfaces with traces of champagne toning. Aside from a few minor, grade-consistent abrasions, the surfaces of this piece are exceptional for a 1796 dollar.
Ex: Long Beach Signature (Heritage, 2/2009), lot 1527; New York Signature (Heritage, 2/2014), lot 5184; Long Beach Signature (Heritage, 6/2016), lot 4611. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

1797 B-3, BB-71 Dollar, Choice VF
10x6 Stars Guide Book Variety

- 3124** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF35 PCGS. Bowers Die State III. The curl under (LI)B(ERTY) and the palm leaf under (AMERIC)A are lapped, confirming the typical die state. A die variety set of 1797 dollars includes only three coins, each of which is listed separately in the *Guide Book*. Bowers estimates the total population of 1797 dollars is only slightly higher than that of the 1795 BB-27 variety. This 1797 10x6 Stars dollar is light silver-gray and shows crisp detail despite a stay in circulation. Dentilation is bold and free of file marks. The surfaces are similarly smooth. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

1798 Large Eagle Dollar, AU55
B-15, BB-112, Pointed 9, Wide Date

- 3125** 1798 Large Eagle, Pointed 9, Wide Date, B-15, BB-112, R.3, AU55 PCGS. Bowers Die State I. The lowest curl and star 13 are unlapped. BB-112 is a collectible Draped Bust dollar variety that shows star 7 very close to the L in LIBERTY, the E in STATES centered over the cloud break, and the leaf tip pointing between RI in AMERICA. Both sides of this Choice About Uncirculated representative show central strike softness but little evidence of friction. The border areas are notably strong. Each side is mostly silver-gray with a few splashes of deeper toning at the rims. Small marks appear at the lower obverse, but they are fairly insignificant. NGC ID# 24X6, PCGS# 40029 Base PCGS# 40018

1799 Draped Bust Dollar, AU53
7x6 Stars, B-5, BB-157

- 3126** 1799 7x6 Stars, B-5, BB-157, R.2, AU53 PCGS. Bowers Die State II, with the die crack through STATES. The upper left serif of U in UNITED is broken and the second T in STATES is nearly centered over a cloud, identifying the BB-157 variety. BB-157 is an available issue in lower circulated grades, but AU coins are elusive. This attractive AU53 example shows some light wear on the high points of the well-detailed design elements and the charcoal-gray surfaces are lightly abraded. NGC ID# 24X7, PCGS# 40049 Base PCGS# 6878

1799 Bust Dollar, MS61
B-12, BB-160; No Berries, Star 1 Distant

- 3127** 1799 7x6 Stars, B-12, BB-160, R.3, MS61 NGC. This colorfully toned and richly reflective early dollar possesses both spectacular eye appeal and a remarkable pedigree. Throughout its well-documented history, it resided in some of the most notable collections imaginable. Howard Rounds Newcomb, "Col." E.H.R. Green, James G. Macallister, and T. James Clarke all owned this coin — four legends of numismatic lore — and the original box from the Colonel Green collection remains with the coin, with a brief-but-significant notation that simply says "Superb."

Now certified MS61 NGC, the coin radiates a beautiful medley of deep-blue, lilac, and peach-gold toning. The strike is pinpoint sharp throughout the obverse stars, set against gleaming, prooflike surfaces that remain vibrant beneath the intense patina. The central details are nearly as sharp, struck from an intermediate die stage between Bowers Die State II and III. A diagnostic die crack from the foot of 1 extends to the right below 7, and another travels from the rim to the bottom edge of the bust. Splendid originality and a storied provenance make this coin a superlative representative of the B-12, BB-160 variety for any advanced collector, and a showpiece of the Draped Bust dollar type. (Total: 2 coins) NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

1799 7x6 Stars Dollar, Scarce AU53
B-11, BB-161, Original Toning

- 3128** 1799 7x6 Stars, B-11, BB-161, R.3, AU53 NGC. Bowers Die State III. The BB-161 variety is scarce in About Uncirculated condition, and rare in Mint State. This is a pleasing, originally toned example, with faint iridescent colors at the margins that deepen to brownish-gray patina throughout the centers of both sides. A few glimmers of reddish-gold mint luster remain among the devices. The coin is well-struck despite multiply clashed dies, and exudes natural eye appeal. Marks are limited to scattered, tiny abrasions and a shallow rim bump near U in UNITED. The 2013 Bowers' reference estimates fewer than 30 examples of BB-161 survive in AU or finer conditions (4/19). NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

1800 Draped Bust Dollar, AU53
Wide Date, Low 8, B-10, BB-190
Guide Book Variety

- 3129** 1800 Wide Date, Low 8, B-10, BB-190, R.3, AU53 PCGS. Bowers Die State VI. Richly toned in golden-brown shades with blue accents, this sharply struck About Uncirculated Heraldic Eagle dollar displays exceptional, mark-free surfaces and near-perfect centering on a well-made planchet. Numerous reverse die cracks represent a late state of the reverse die. On the obverse, a wide date configuration with 8 positioned low between 1 and 0 earns the BB-190 variety its own listing in the 2020 *Guide Book* on page 229. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

1802 B-6, BB-241 Dollar, AU53
Narrow Date, Some Luster Remains

- 3130** 1802 Narrow Date, B-6, BB-241, R.1, AU53 NGC. Bowers Die State III. This is an attractive pewter-gray early dollar with delicate rose and pale blue toning on both sides. The surfaces are pleasing, and traces of luster are still evident. A bold strike delivers well-centered motifs on both sides, while abrasions are few and eye appeal is excellent. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

GOBRECHT DOLLAR

1836 Gobrecht Dollar, Judd-60
Die Alignment I, Richly Toned PR55

- 3131** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 PR55 NGC. CAC. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). Die State C, showing faint dentil chips above the second T in STATES. This early strike (from the last week of December) lacks any trace of the diagonal die clash line above the eagle's wing. The fields on each side show only moderate reflectivity because of the significant overlay of gray-green, rose, and blue speckled toning scattered over each side. The fields are minimally marked for a coin that was slightly circulated (or perhaps carried as a pocket piece). The striking details are also strong throughout with bold definition on the head of Liberty, the foot, and the eagle's plumage.
Ex: *Chicago Signature* (Heritage, 8/2011), lot 7255, where it realized \$16,675; *FUN Signature* (Heritage, 1/2019), lot 4519, which realized \$14,400. NGC ID# BLWV, PCGS# 11225

SEATED DOLLAR

1872-CC Seated Liberty Dollar, Unc Details
Low-Mintage Key

- 3132** 1872-CC — Questionable Color — PCGS Genuine. Unc Details. OC-1, High R.3. From a low mintage of 3,150 pieces, the 1872-CC Seated Liberty dollar is an important key issue in the series. This impressive Mint State specimen exhibits well-detailed design elements, with just a touch of softness on the star centers. The lightly marked surfaces are blanketed in shades of magenta, blue, and sea-green toning spread evenly across the high points and recesses of the devices.

PROOF SEATED DOLLARS

1863 Seated Dollar, Choice Proof
Full Strike, Original Patination

- 3133** 1863 PR64 PCGS. CAC. OC-P2, Low R.4. As the Civil War raged on, mintages of proof silver dollars declined annually between 1860 and 1863, dropping to 460 pieces in the latter year. The present razor-sharp near-Gem displays lush, blended ocean-blue, olive-green, and rose-red patina. No detractions emerge beneath a lens. Although unmentioned in the Osburn-Cushing reference, all proof 1863 silver dollars, including the present specimen, exhibit die doubling on the obverse horizontal shield lines, and the lower edge of the Liberty banner. NGC ID# 23BS, PCGS# 7006

1864 Silver Dollar, Gem Proof
Scarce OC-P4 Variety

- 3134** 1864 PR65 PCGS. CAC. OC-P4, R.5. A fully struck Gem bathed in deep lavender-red, cobalt-blue, and jade-green toning. Thorough examination beneath a lens fails to locate any detractions. Dick Osburn and Brian Cushing have identified four proof 1864 silver dollar die marriages, but OC-P4 is relatively easy to attribute. The date is entered furthest right, and the third vertical reverse shield line extends deep into the horizontal lines. OC-P4 is rarer than OC-P1 and OC-P2, but more available than the stopper OC-P3. Population: 20 in 65 (1 in 65+), 4 finer. CAC: 4 in 65, 4 finer (4/19). NGC ID# 252J, PCGS# 7007

TRADE DOLLARS

1875-S/CC Trade Dollar, MS64
FS-501, Tied for Finest at NGC

3135 1875-S/CC FS-501 MS64 NGC. Large S, Type One Reverse. A late die state, showing a meandering die crack through ICA and into the field at right. Many collectors are unaware there are two varieties of S/CC Trade dollars from 1875. This is the more frequently encountered one and the variant that is much easier to see with the second C widely spaced from the S. Most collectors opt for this variant for the very reason of its visibility, not to mention the extreme rarity of the other variety and need for a high-powered loupe. After the S/CC was first discovered in 1965 it was quickly noticed just how scarce it was in better grades. It is much scarcer than the 1875 S-mint or the CC-mint, especially in strictly Uncirculated condition.

This piece is tied with one other FS-501 near-Gem as the finest at NGC; PCGS lists a finer, Gem example of the S/CC issue, although the coin is not attributed by variety number (4/19). The scarcity of the S/CC is far greater than the number of collectors who are interested in assembling a set of Gem Trade dollars, underscoring the importance of this high-grade coin. The surfaces are remarkably lustrous, showing a frosted sheen that is readily apparent beneath the gray patina seen over each side. The strike details are sharp throughout. If one were to look for a strike defect, it would have to be on the eagle's right (facing) claw, a minor defect if there ever was one. There also are few abrasions of any note, the only one that might serve as a pedigree identifier is a shallow mark in the upper-left obverse field. Specialists will need no urging to bid on this coin, so much so that non-specialists will likely not be serious contenders.

Ex: FUN Signature (Heritage, 1/2018), lot 4914, which realized \$19,200. NGC ID# 2536, PCGS# 145813 Base PCGS# 7040

1877-CC Trade Dollar, MS63
Low-Mintage, Branch Mint Issue

3136 1877-CC MS63 NGC. There is a light coating of reddish-gold and pale lilac patina on both sides of this satiny example. The strike is as close to full as one should expect for a Trade dollar, and the typically abraded surfaces are at the normal reaches of the assigned grade level. Numerous small marks are noted mostly in the obverse fields. The penultimate CC-mint issue in the Trade dollar series, the '77-CC was produced to the extent of just 534,000 coins. Most Mint State survivors — and there are very few of them — grade no finer than the present coin. Census: 21 in 63, 9 finer (4/19). NGC ID# 253D, PCGS# 7045

PROOF TRADE DOLLARS

1875 Trade Dollar, PR65 Cameo
Scarce Contrasted Example

3137 1875 PR65 Cameo NGC. Type One Reverse, no period after FINE. An untuned Gem that exhibits undeniable contrast between frosty devices and mirrored fields. Boldly struck on the obverse, the coin has minor weakness on the reverse eagle's right (facing) leg. Cameo proofs of this date are scarce, and they are rare in Gem or better condition. Ultra Cameos are nearly uncollectible. Census: 12 in 65 Cameo, 6 finer (4/19).

Ex: Denver Signature (Heritage, 8/2006), lot 3784, which realized \$10,585; Houston Signature (Heritage, 11/2007), lot 60798, which realized \$6,900; Summer FUN Signature (Heritage, 6/2008), lot 1268, which realized \$8,625. NGC ID# 27YL, PCGS# 87055

1877 Trade Dollar, PR65 Ultra Cameo
Rarely Seen With Such Stark Contrast

- 3138** 1877 PR65 Ultra Cameo NGC. The proof 1877 Trade dollar is scarce with cameo contrast, and just a few pieces are certified as Ultra Cameos. NGC lists only nine such coins, including this lone Gem and two PR67 Ultra Cameos finer. PCGS has certified 16 Deep Cameo pieces, but none finer than PR65+ (5/19). This coin displays full sharpness and deeply reflective fields. A warm champagne hue covers each side, with small daubs of aquamarine and russet visible occasionally around the borders, mainly on the obverse. An important, starkly contrasted Registry coin, and a high-end 1877 proof overall. PCGS# 97057

1880 Trade Dollar, PR66 Cameo
High-End Proof Type Coin

- 3139** 1880 PR66 Cameo NGC. The 1880 proof Trade dollar is a popular choice for type collections, as it is moderately available in the context of the series and often comes with outstanding eye appeal and good contrast. Such is the case with this Premium Gem Cameo, which is brilliant aside from a halo of golden around the borders. Strike weakness is apparent on the right-side stars, Liberty's head, and her foot, although this is not bothersome. The devices have attractive luminance that complements the liquidity of the fields. Census: 35 in 66 Cameo (1 in 66+, 4 in 66★), 20 finer; 2 in 66 Ultra Cameo, 4 finer (4/19). NGC ID# 27YS, PCGS# 87060

MORGAN DOLLARS

1878 7/8 Tailfeathers Morgan Dollar
MS65 Deep Prooflike, VAM-36

- 3140** 1878 7/8TF Strong, VAM-36, MS65 Deep Mirror Prooflike NGC. VAM-36 is often seen with Deep Prooflike surfaces, but many coins are only one-sided in that regard. This reflective Gem is mirrored on both sides, producing cameo contrast and sharp detail. A trace of light golden toning surrounds the outer periphery, leaving the interiors brilliant. Only a few small surface grazes are visible. VAM-36 shows four of the eight underlying tailfeathers, known as a Strong 7/4 variety. NGC ID# 2TXZ, PCGS# 40216 Base PCGS# 97079

1879-CC Morgan Dollar, MS63 Prooflike
Brilliant Carson City Semikey

- 3141** 1879-CC MS63 Prooflike PCGS. Normal Mintmark. The semikey 1879-CC Morgan dollar (756,000 coins) is challenging in high grades and seldom seen with Prooflike surfaces. This is a brilliant representative, thickly frosted and well-struck with terrific contrast. The fields exhibit profound reflectivity collectors will find universally appealing. Minor chatter occurs on the obverse. NGC ID# 253T, PCGS# 7087

**1879-CC Dollar, MS63 Deep Mirror Prooflike
Scarce With Such Reflectivity**

- 3142 1879-CC MS63 Deep Mirror Prooflike PCGS.** The limited supply of 1879-CC dollars in the GSA holdings makes the issue less accessible to collectors compared to many of its peers. Among Clear Mintmark examples, just 62 pieces have been certified as Deep Mirror Prooflike by PCGS, among them this boldly reflective Select example. A faint gray overtone scarcely dims the essential field-to-device contrast, the mirrors are so deep and the portrait so well-frosted. A reddish-brown streak behind Liberty's head has an echo at the far right reverse, which also has small dapples of the same color. Population: 18 in 63 Deep Mirror Prooflike, 22 finer (3/19). Ex: *FUN Signature (Heritage, 1/2012)*, lot 3338. NGC ID# 253T, PCGS# 97087

**1879-CC Morgan Dollar, MS63
VAM-3, Capped Die**

- 3143 1879-CC Capped Die, VAM-3, MS63 PCGS.** A Top 100 Variety. The popular "Capped Die" variety shows the remnants of a small, partially effaced CC under the primary mintmark. This impressive Select specimen displays well-detailed design elements with just the slightest blending on the hair above the ear. The lightly marked, lightly toned surfaces radiate vibrant mint luster. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**1879-CC Morgan Dollar, MS64
Popular Capped Die Variety**

- 3144 1879-CC Capped Die, VAM-3, MS64 PCGS.** A Top 100 Variety. The remnants of a smaller undertype CC are clearly visible beneath the primary mintmark, identifying the "Capped Die" variety. This attractive Choice example exhibits well-detailed design elements that show just a touch of the usual softness on the hair strands above Liberty's ear. The well-preserved surfaces radiate vibrant mint luster with outstanding eye appeal. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**1880 Silver Dollar, MS66+ Prooflike
Registry Set Quality**

- 3145 1880 MS66+ Prooflike PCGS.** This early P-mint Morgan is seldom found with mirrored fields. Even non-Prooflike Premium Gem examples are rare. This magnificent coin displays a bold strike and brilliant pristine surfaces. Appreciable cameo contrast defines each side. A breathtaking Registry-quality example. Population: 3 in 66 (1 in 66+) Prooflike, 0 finer (4/19). NGC ID# 253Y, PCGS# 7097

**1880-S Morgan Dollar, MS68+
Spectacular Luster and Preservation**

- 3146 1880-S MS68+ PCGS. CAC.** There are a couple of reasons why the 1880-S dollar is a favorite for representing the Morgan type in collections — it is readily available in most grades, and it has tendency to possess incredible eye appeal. The present coin bucks norms of the former, as it is conditionally challenging in this lofty MS68 grade, is Plus-graded, and is CAC-endorsed. However, it fully embraces the 1880-S dollar's reputation for eye appeal and does so perhaps more beautifully than most other examples of this date — an elite among the elite. Blazing, frosted mint luster engulfs each side without toning, save for a halo of gold around the outer peripheries. The reverse fields are prooflike but are equally as flawless as the luminous obverse fields. With only five coins finer at PCGS, and just one at CAC (4/19), this piece is arguably among the top 1880-S Morgans available to even advanced collectors. NGC ID# 2544, PCGS# 7118

1880-S Silver Dollar, MS68 Prooflike
Outstanding Color and Preservation

- 3147 1880-S MS68 Prooflike PCGS.** The reverse is colorfully toned in vivid rainbow shades that run horizontally across the coin's upper half, while the obverse shows just a sliver of the same colors along the lower-right border. The rest of the coin is brilliant, with mirrored fields and sharply struck, frosted devices. In general, the 1880-S ranks among the most attractive dollar coins ever struck. This Superb Gem with prooflike fields adds to that legacy, and it is virtually unimprovable in terms of surface equality and eye appeal. Housed in a previous generation green label holder. Population: 21 in 68 (2 in 68+) Prooflike, 1 finer (4/19). NGC ID# 2544, PCGS# 7119

1881-S Dollar, MS68+
Ultimate Candidate for Type or Set Registry

- 3148 1881-S MS68+ PCGS. CAC.** Plus-graded by PCGS with CAC endorsement, this high-end MS68+ Morgan dollar represents a superlative type coin as well as nearly unimprovable quality for any high-grade silver dollar collection. A translucent golden hue exists on both sides of this otherwise brilliant San Francisco masterpiece, with Liberty's cheek and neck wholly unmarked and a ringing-sharp strike. The thin overlay of golden patina confirms the obvious: This piece is entirely original.

The surfaces are partially (mostly) prooflike, particularly the obverse, which gleams flashy cartwheel luster across virtually pristine fields and devices. A tiny mark beneath the eagle's right (facing) wing is the sole sign of contact, but it poses little distraction — other than seeming entirely out of place on this nearly flawless coin. Population: 18 in 68+, 2 finer. CAC: 140 in 68, 1 finer (4/19). NGC ID# 2549, PCGS# 7130

1881-S Morgan, MS68 Prooflike Spectacular Preservation

- 3149 1881-S MS68 Prooflike PCGS.** 30th Anniversary Green Label Holder. This MS68 Prooflike coin exceeds the quality of almost all other 1881-S dollars. It is among the finest Prooflike pieces certified and it is rare as such. There are a few daubs of gold toning around the borders but most of each side is brilliant. The field reflectivity is captivating, but the true hallmark of this coin is the blatant preservation. Liberty's cheek is flawless. In the fields, examination with a loupe reveals a few microscopic ticks immediately below Liberty's chin, and on the reverse there are similar insignificant signs of contact between UNITED and the dentils. Without these pedigree identifiers, a Plus designation would likely have been awarded. Nonetheless, this remains an exemplary type coin. Population: 5 in 68 Prooflike, 0 finer (4/19). NGC ID# 2549, PCGS# 7131

1882-CC Dollar, MS67 One Example Finer at PCGS

- 3150 1882-CC MS67 PCGS.** The GSA hoard made the 1882-CC a widely accessible date frequently seen in low-to-mid Mint State grades, but it remains elusive at this level. Areas of golden toning around the lower borders do not inhibit the brilliance and cartwheel frost that dominate each side. Liberty and the eagle are fully struck. PCGS has seen a single finer 1882-CC dollar in MS68 condition (4/19). NGC ID# 254S, PCGS# 7134

1883 Dollar, MS66 Deep Mirror Prooflike Among the Finest Survivors

- 3151 1883 MS66 Deep Mirror Prooflike PCGS.** Millions of 1883 Morgan dollars survive, and tens of thousands of coins are certified through upper Mint State grades. Deep Mirror Prooflike pieces are many times scarcer and are notable rarities at this esteemed level. Indeed, none are finer. This Premium Gem features fully struck and frosted motifs set against clean, deeply reflective fields. Population: 16 in 66 (2 in 66+) Deep Mirror Prooflike, 0 finer (4/19). NGC ID# 254G, PCGS# 97143

1884-O Silver Dollar, MS67 Prooflike Contrasted and Brilliant

- 3152 1884-O MS67 Prooflike PCGS. CAC.** The 1884-O is an available Morgan dollar, although it becomes elusive in the upper Prooflike grades. Only seven Prooflike pieces are certified in MS67 at PCGS and NGC combined, with none finer, and this is one of just three with CAC endorsement (5/19). The coin is beautifully preserved and contrasted with untuned cartwheel luster. Slight strike softness in the centers is hardly noticed. Population: 2 in 67 Prooflike, 0 finer. CAC: 3 in 67, 0 finer (4/19). NGC ID# 254N, PCGS# 7155

1884-S Morgan Dollar, MS62 Exceptional for the Grade

- 3153 1884-S MS62 PCGS. CAC.** For the grade, this 1884-S Morgan dollar is quite spectacular. Incredibly radiant cartwheel luster reveals no major abrasions, and a loupe uncovers only light handling marks on the cheek and in the field. Warm golden toning on each side adds to the eye appeal. This is a well-struck coin, deservedly CAC endorsed. Quality such as this for the MS62 grade level is rarely seen on any Morgan dollar. It is especially significant for this coin since it is an 1884-S, a semikey date that is elusive in this grade regardless of eye appeal. Finer 1884-S dollars are scarce and may be out of reach for many collectors. The CAC endorsement is rarely seen on any Mint State example of this issue. CAC: 12 in 62, 19 finer (4/19). NGC ID# 254P, PCGS# 7156

**1886-O Morgan Dollar, MS64
Three Coins Graded Finer**

- 3154 1886-O MS64 PCGS.** Of the 10.7 million 1886-O dollars minted, surprisingly few survive at the MS64 grade level. The issue is scarce this nice and virtually unseen in higher grades with only three coins, all PCGS-graded, certified finer (4/19). Satiny luster over all-brilliant surfaces defines this New Orleans condition rarity. The impression is characteristically incomplete, but marks are scant. NGC ID# 254W, PCGS# 7168

**1886-O Silver Dollar, MS64
Outstanding Luster and Sharpness**

- 3155 1886-O MS64 PCGS.** Radiant cartwheel luster rolls across nearly brilliant surfaces on this Choice 1886-O Morgan dollar. Such is rarely seen on the 1886-O, and this piece is also better struck than typical for the issue. Only a few faint grazes on the obverse prevent Gem classification. The 1886-O Morgan is relatively elusive in this grade, and finer pieces are almost uncollectible. PCGS lists only four finer examples, including a lone Deep Mirror Prooflike Superb Gem (5/19). NGC ID# 254W, PCGS# 7168

**1887/6 VAM-2 Dollar, MS66
A Top 100 and Guide Book Variety**

- 3156 1887/6 VAM-2 MS66 NGC.** A Top 100 Variety. VAM-2 is listed in the *Guide Book* and regularly collected as part of the basic Morgan dollar set. Remnants of the underlying 6 are clear around the lower part of the 7. The fields are lustrous and exceptionally clean, and both sides show thin golden accents while remaining mostly brilliant. Well-struck at the centers with notably strong detail on the eagle's breast feathers. Census: 7 in 66, 2 finer (4/19). NGC ID# 2552, PCGS# 133908 Base PCGS# 7174

**1888-O VAM-1B4 Dollar, MS63
Scarface, Top 100 Variety**

- 3157 1888-O Scarface, VAM-1B4, MS63 NGC.** A Top 100 Variety. VAMWorld.com describes the 1888-O Scarface Morgan dollar as "the mother of all die breaks." Those valued the highest are in the latest stages (VAM-1B3 and VAM-1B4), with the crack running across Liberty's cheek and then down the neck. Most pieces are found in lower Uncirculated grades. This Select example is at the upper end of what is generally available. Splashes of tan-gold patina blanket the satiny, lightly bagmarked surfaces. Central strike detail is typically soft. NGC ID# 2556, PCGS# 133918 Base PCGS# 87184

**1889-CC Morgan Dollar, AU55
Elusive Branch Mint Key**

- 3158 1889-CC AU55 PCGS.** The Carson City Mint reopened for coinage operations in October of 1889 and struck a small mintage of 350,000 Morgan dollars by the end of the year. The 1889-CC is the most elusive Carson City Morgan today. This lightly worn, lightly abraded Choice AU specimen is blanketed in attractive shades of lavender-gray toning, with a few highlights of golden-tan. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Strong AU55

- 3159 1889-CC AU55 PCGS.** An average 1889-CC Morgan dollar is apt to show VF sharpness and some kind of numeric-grade-preventing issue. Minimally worn problem-free representatives are elusive and represent the pinnacle of Carson City coinage. The hallmark of this Choice AU dollar is a bold strike. Loss of detail from circulation is trivial; The curls and feathers remain crisp. Both sides are mostly bright silver with a dash of golden color above OF. Hairlines pose minimal distraction. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, AU58
Sought-After Series Key

1889-CC Dollar, MS62 Prooflike
Key Carson City Issue, Old PCGS Holder

3160 1889-CC AU58 PCGS. The Carson City Mint acted only as an assay office from the end of 1885 to 1889, when it was deemed necessary to reopen the Mint for coinage operations. Before coinage could resume, extensive repairs to the infrastructure and machinery were necessary. New personnel had to be hired, as well. As a result, the facility was not fully operational until October 10, 1889. Accordingly, only 350,000 Morgan dollars were struck before the end of the year. Most of the mintage was released into circulation in the 19th century and some coins held in government storage may have been melted in 1918, under the provisions of the Pittman Act. The 1889-CC is the most elusive Carson City Morgan dollar in today's market and a sought-after key to the series.

The present coin is an impressive near-Mint specimen that shows just the slightest trace of wear on the well-detailed design elements. The lightly abraded surfaces retain much original mint luster intact, with subtle hints of golden-tan toning. The overall presentation is most attractive for this elusive branch mint issue. NGC ID# 2559, PCGS# 7190

3161 1889-CC MS62 Prooflike PCGS. Both prooflike and deep mirror prooflikes are surprisingly scarce for the 1889-CC, which had a limited mintage of just 350,000 silver dollars upon the resumption of coinage operations at the Carson City Mint. The mint was not fully operational until October 1889, when it produced 31,000 double eagles in addition to the small quantity of Morgan dollars.

This is an exceptional survivor for the MS62 level, with pleasingly reflective fields and sharply struck motifs. The coin shows remarkably few abrasions or marks for the assigned grade. A thin line of pale russet-gold toning runs through the dentils on each side, surrounding brilliant centers. This attractive 1889-CC is housed in a Generation 1.2 PCGS "rattler" holder (in use from 1986 to 1989) with the Prooflike designation shown on the label. Population: 35 in 62 Prooflike, 44 finer (4/19). NGC ID# 2559, PCGS# 7191

1890-O Morgan Dollar
Gem Deep Mirror Prooflike

3162 1890-O MS65 Deep Mirror Prooflike PCGS. Although some 1890-O dollars are well-produced, the issue is notorious for weak strikes, and deep mirror prooflike coins often suffer from bagmarks. This Gem DMPL example is notably free of such marks, and the strike is only slightly weak over the ear. The right-hand stars are flat, where vertical striations and roller marks are mint-caused anomalies. The coin is nicely mirrored on both sides, with frosted devices offering considerable cameo contrast. A sheer overlay of clear-gold toning transitions into an attractive silver sheen that graces both obverse and reverse. The 9 in the date is repunched at the outer-left top loop. Population: 23 in 65 (2 in 65+) Deep Mirror Prooflike, 1 finer (4/19). NGC ID# 255E, PCGS# 97201

1892-CC Silver Dollar, MS66
A High-End Condition Rarity

3163 1892-CC MS66 PCGS. Mintage figures are irrelevant in the Carson City Morgan dollar set, as they do not reflect the number of coins released into circulation each year, nor do they reflect the number of coins for some dates that were preserved in government vaults until the 1970s. That latter point is what makes the 1892-CC Morgan a better date, especially in high grade. The GSA sales of the 1970s included only a single example of this issue. In *A Guide Book of Morgan Silver Dollars*, Q. David Bowers notes that government stores of 1892-CC dollars were depleted by 1964, paid out into circulation over many years. Most of the Mint State coins known today likely came out of the Treasury Building in Washington D.C. in the 1950s, having been transferred there after the closure of the Carson City Mint.

Collectors know the 1892-CC silver dollar as a better CC-mint date and a major condition rarity. Examples are most often seen in MS64 and lower grades, and occasionally in MS65. By contrast, Premium Gems are so rare that Heritage has not handled such a coin since the August 2015 ANA Signature. This exemplary PCGS example displays a sharp strike and brilliant cartwheel luster. Only the faintest grazes are visible in the left obverse field, the remainder of the coin being essentially flawless. Population: 37 in 66 (5 in 66+), 3 finer (3/19). NGC ID# 255M, PCGS# 7214

**1893 Dollar, Lustrous MS65
Low-Mintage Philadelphia Issue**

- 3164 1893 MS65 NGC. CAC.** Few silver dollars were struck in the midst of the Panic of '93, in part a legacy of the Sherman Silver Purchase Act of 1890, which was repealed in August, 1893. An overheated economy continued to lose steam, and the nation had no need for more silver dollars that already clogged Treasury vaults. This Gem survivor is CAC-endorsed and housed in a previous generation NGC holder. Brilliant, satin-smooth surfaces are nearly mark-free. A pale blush of reddish-gold toning exists at the top obverse border, and a whisper of gold extends to the reverse margins. PCGS reports just six numerically finer examples (4/19). NGC ID# 255R, PCGS# 7220

**1893-CC Morgan Dollar, MS62
Low-Mintage, Final-Year Issue**

- 3165 1893-CC MS62 NGC. CAC. VAM-2A.** Just 677,000 pieces were struck in Carson City's swan song for its coinage operations. This coin was struck from clashed dies, with the mintmark tilted right. Reddish-gold accents appear along the borders and surround brilliant centers. A few light scuffs and abrasions on Liberty's cheek and in the obverse fields account for the numeric grade, although the frosted surfaces are well-struck and retain sharp eye appeal. The coin is CAC-endorsed, housed in a previous-generation NGC holder. NGC ID# 255S, PCGS# 7222

**1895-S Morgan Dollar, MS62
Scarcer S-Mint Issue**

- 3166 1895-S MS62 NGC. CAC.** Bits of russet and gold toning near the rims yield to brilliant, frosted surfaces of this challenging San Francisco issue. Just 400,000 pieces were struck (50,000 pieces fewer than the even-scarcer 1895-O). Semireflective surfaces are sharply struck, while the omnipresent surface abrasions that characterize the 1895-S are far less frequent than on most examples. The coin is CAC-endorsed, housed in a previous generation NGC holder with an almost intact hologram. NGC ID# 255Z, PCGS# 7238

**1895-S Morgan Dollar, MS63
Semiprooflike Fields**

- 3167 1895-S MS63 PCGS.** The low mintage of 400,000 pieces ranks just below the 450,000 pieces struck at the New Orleans Mint in 1895, yet the San Francisco issue is more obtainable in Mint State. This is a semireflective example with a crisp strike, save for slight central weakness above Liberty's ear and at the eagle's talons. Most bagmarks were avoided, although a heavy one exists above the eye and angles downward across the bridge of Liberty's nose into the left field. Silver luster glows beneath a faint hint of golden-tan toning. NGC ID# 255Z, PCGS# 7238

**1896 Silver Dollar, MS67+
Dash of Rainbow Toning**

- 3168 1896 MS67+ PCGS.** A high-end example of this plentiful Philadelphia issue, suitable for type representation. The 1896 Morgan is collectible in MS67, but a minority of these coins carry a Plus grade, and just two non-Prooflike coins are finer at PCGS (5/19). This piece is well-struck and frosty with clean fields. A crescent of original rainbow toning graces the upper obverse, leaving the remainder of the coin brilliant. NGC ID# 2562, PCGS# 7240

1897-S Dollar, MS67 Prooflike
Brilliant and Reflective Fields, None Finer

3169 1897-S MS67 Prooflike PCGS. The 1897-S was unusually well-produced throughout its 5.8 million-piece mintage. Prooflike examples represent the crème de la crème of highly graded coins, well-represented by this extraordinary prooflike Superb Gem. Brilliant fields are fully reflective on both sides, framing creamy, frost-white devices for bold field/device contrast. A sharp strike renders the obverse and reverse motifs to their best advantage. We note a few high-point grazes on Liberty's portrait and the eagle's legs, plus some ultra-light hairlines that mingle with the Mint's die polish lines.

It is thought that most highly-graded pieces come from the Treasury's great silver release of the 1960s. Despite a large mintage and consistently high-quality production, only a few Superb Gem 1897-S prooflike dollars survive. None are finer than the MS67 level (with designated Prooflike surfaces) at either PCGS or NGC. Population: 4 in 67 Prooflike, 0 finer (4/19). NGC ID# 267S, PCGS# 7251

1898 Morgan Dollar, MS67 Prooflike
Tied for Finest-Known in Prooflike

3170 1898 MS67 Prooflike PCGS. Liberty's cheek and the eagle's breast are both remarkably clean on this Prooflike Superb Gem. The design motifs are sharply struck and the untoned, silver-white surfaces display bright mint frost. The strike is needle-sharp. Tied with two other coins at PCGS for the finest-graded 1898 dollar in Prooflike condition, while NGC lists an additional two coins at MS67 Prooflike and none finer. PCGS population: 3 in 67 (1 in 67+) Prooflike, 0 finer (4/19). NGC ID# 2568, PCGS# 7253

1898-S Morgan Dollar, MS65+
Elusive Prooflike Specimen
Finest at PCGS

3171 1898-S MS65+ Prooflike PCGS. This Plus-graded Gem exhibits well-detailed design elements, with just a touch of softness on the hair strands above Liberty's ear. The frosty devices contrast boldly with the deeply reflective fields, and well-preserved, mostly brilliant surfaces show a few hints of greenish-tan toning. This coin is the finest 1898-S Prooflike certified by PCGS by virtue of its Plus designation. Population: 6 in 65 (1 in 65+) Prooflike, 7 in 65 DM, 0 finer (4/19). NGC ID# 2569, PCGS# 7257

1901 Silver Dollar, MS62
Elusive CAC Endorsement

3172 1901 MS62 PCGS. CAC. Low-end Mint State examples of this better Philadelphia issue are frequently available, although the quality within the grade is often lacking. This is revealed in the disparity between the certified population totals and the CAC census. CAC endorsements are rarely found on any Uncirculated 1901 Morgan dollar. This piece is frosty and lustrous with light, original olive-gold and russet toning over minimally abraded surfaces. The coin is also well-struck, adding to its appeal. CAC: 27 in 62, 36 finer (4/19). NGC ID# 256J, PCGS# 7272

1901 Dollar, Lustrous MS63
Important 20th Century Issue

- 3173 1901 MS63 NGC.** The 1901 carries a modest premium in circulated grades over common issues, although it becomes scarce in Select Mint State. This Philadelphia issue is rare finer, and in Gem grade it is one of the greatest condition rarities in the series. This is a collectible but attractive MS63 coin. The mint luster is vibrant on each side and no toning is present. Strike weakness affects most of the relief elements, not just the centers, and likely contributes to the grade assessment. NGC has seen only 20 finer representatives of this sought-after 20th century condition key (4/19). NGC ID# 256J, PCGS# 7272

1902-O Morgan Dollar, MS67
Top-Grade O-Mint Issue

- 3174 1902-O MS67 PCGS.** The 1902-O Morgan dollar was not a well-produced issue, and many examples seen have weak strikes and poor luster characteristics. This spectacular Superb Gem is a remarkable exception, with sharp detail on most design elements and just a touch of the usual softness on the eagle's breast. The well-preserved surfaces exhibit vibrant mint luster, with attractive highlights of greenish-gold and lavender toning. Neither PCGS nor NGC has certified any numerically finer 1902-O dollars. Population: 39 in 67, 0 finer (4/19). NGC ID# 256N, PCGS# 7280

1904 Morgan Dollar, MS65+
Attractive, Multicolor Toning

- 3175 1904 MS65+ PCGS. CAC.** Coinage of Morgan dollars was suspended after 1904, until the series made one final bow in 1921. The Philadelphia Mint struck a smallish mintage of 2.7 million Morgan dollars in 1904 and the issue is definitely a better date in the series. This Plus-graded Gem is sharply detailed and lustrous, under attractive shades of lavender, violet, and sea-green toning. PCGS has graded 53 numerically finer examples (4/19). NGC ID# 256U, PCGS# 7290

PROOF MORGAN DOLLARS

1880 Dollar, PR66 Cameo
Terrific Contrast and Eye Appeal

- 3176 1880 PR66 Cameo PCGS. CAC.** Although the 1880 claims the highest proof mintage in the Morgan dollar series (1,355 pieces), it is by no means plentiful, especially as fine as this PR66 Cameo with CAC approval. Terrific contrast exists between the frosty motifs and reflective, unmarked fields. Mostly brilliant with a touch of peripheral color. Population: 35 in 66 (3 in 66+) Cameo, 25 finer in this category. CAC: 16 in 66, 12 finer (4/19). NGC ID# 2724, PCGS# 87315

1883 Morgan Dollar, PR66
Beautifully Toned

- 3177 1883 PR66 NGC.** Beautiful shades of blue, green, rose, and violet fully cover the surfaces of this proof 1883 Morgan dollar, one of 1,039 specimens struck. The underlying fields remain reflective, though contrast is minimal. Free of mentionable contact. Census: 20 in 66, 15 finer in this category (4/19). NGC ID# 2727, PCGS# 7318

1883 Morgan, PR66 Cameo
Seldom Seen Finer

- 3178 1883 PR66 Cameo PCGS.** Just a trace of color can be seen over the otherwise brilliant surfaces that are well-preserved and contact-free. Full strike definition includes the eagle's talons and tailfeathers, along with all of the central motifs. This proof issue had a mintage of 1,039 pieces, very few of which are graded finer than PR64 at either service. Population: 13 in 66 (3 in 66+) Cameo, 2 finer (3/19).
Ex: PNG New York Signature (Heritage, 10/2014), lot 3951; FUN Signature (Heritage, 1/2015), lot 6184. NGC ID# 27YV, PCGS# 87318

1897 Morgan, PR66+ Cameo
Rare CAC-Endorsed Example

- 3179** 1897 PR66+ Cameo PCGS. CAC. Fully struck, satiny devices provide appreciable contrast with the deep-liquid fields of this high-end proof Cameo, while a faint golden hue overlays each side. The 1897 proof Morgan is rare this fine in Cameo grades. A few Deep Cameos are known, but they will be out of reach for many collectors. Moreover, CAC endorsement is a rare sight on high-end proofs of this date. Population: 6 in 66 (1 in 66+) Cameo, 12 finer; 1 in 66 Deep Cameo, 2 finer. CAC: 4 in 66, 6 finer (4/19). NGC ID# 27ZV, PCGS# 87332

1898 Morgan, PR67+ Cameo
Conditionally Rare Type Coin

- 3180** 1898 PR67+ Cameo PCGS. The 1898 was a well-made proof issue, often sharp and starkly contrasted. In fact, more high-end Deep Cameos are known than Cameos, as seen in the population data. This high-end Superb Gem proof is on the cusp of a Deep Cameo designation. It is well-contrasted on both sides, although slightly more so on the reverse. A delicate champagne tint across the interiors cedes to russet and blue border toning, which frames the sharp, satiny central devices. The eye appeal is outstanding. Population: 1 in 67 (1 in 67+) Cameo, 1 finer (4/19). Deep Cameo: 18 in 67 (4 in 67+) Deep Cameo, 3 finer (4/19). NGC ID# 27ZW, PCGS# 97333

PEACE DOLLARS

1926 Peace Dollar, MS66+
Tied for Finest at PCGS and CAC

- 3181** 1926 MS66+ PCGS. CAC. Not one example of this issue has earned a Superb Gem grade at PCGS, leaving a group of 27 Plus-graded MS66 coins as the finest obtainable for a PCGS Registry Set. This representative of that elite group is also among the finest 1926 Peace dollars with CAC endorsement. It is sharp, vibrantly lustrous, and virtually flawless. Warm golden toning blankets each side. NGC ID# 257N, PCGS# 7367

1934 Peace Dollar, MS66+
Incredibly Lustrous and Appealing
Few Finer Pieces Are Known

- 3182** 1934 MS66+ PCGS. CAC. Late-date Peace dollars remain favorites within this series, being some of the greatest challenges to acquire in high grade. The 1934 has the added appeal of a low mintage (less than 1 million coins), and its survivorship exists primarily in MS65 and lower grades. Premium Gems are scarce, and those with a Plus designation and CAC endorsement, such as the coin offered here, are rare. This piece showcases incredibly frosty, unabraded mint luster and a sharp strike. Eye appeal is quite spectacular. The brilliant luster needs no toning to generate stellar visual appeal. Population: 33 in 66+, 6 finer. CAC: 68 in 66, 1 finer (3/19). NGC ID# 257Y, PCGS# 7375

ERROR

1979 Kennedy Half, XF45
First Strike Brockage

- 3183 1979 Kennedy Half Dollar — First Strike Brockage — XF45 PCGS.** Brockages are caused when a coin sticks to a die and fails to eject before the next coin is fed between the dies. The present half dollar was struck between the obverse die and the obverse of a previously struck coin, which had stuck to the reverse die. The reverse is a first strike or perfect brockage that shows the obverse design reversed and incused without the distortion and expansion typical of subsequent brockage strikes. The obverse appears to have been struck through a layer of grease, which obscures much of IN GOD WE TRUST and weakens other design elements. The error combination makes the piece difficult to grade, and the coin may have received less circulation wear than implied by the XF45 designation.

CERTIFIED MODERN PROOF SET

1936 Five-Piece Proof Set, PR65-67
All Sequentially Numbered by PCGS

- 3184 Five-Piece 1936 Proof Set, PR65 to PR67 PCGS.** This original proof set has sequential PCGS certification numbers. Included are:

Cent — Satin Finish — PR65 Red. This unusual, one-year finish shows limited brightness in the fields. The surfaces overall are light yellow-gold with only the slightest post-striking imperfections.

Nickel — Satin Finish — PR67. CAC. A magnificently preserved example of this scarcer proof finish, found only in this year and on approximately half of the proof nickels struck. We do not see any defects that merit mention and the surfaces are almost untuned with just the slightest hint of ice-blue and golden toning. Exceptional quality.

Dime PR66. CAC. The bright reflectivity in the fields is partially subdued by the light overlay of streaky iridescent toning, seen over each side. Unquestionably original.

Quarter PR65. CAC. Like the dime above, the quarter is also toned in pale iridescent colors and the toning is also streaked across each side. A high-end example for the grade.

Half Dollar PR66. CAC. Another outstanding representative of this first-year of issue for modern proofs. Like the dime and quarter, this half dollar also displays light streaks of iridescent toning over each side. (Total: 5 coins)

GOLD DOLLARS

1855-C Gold Dollar, AU53
Popular and Scarce Type Two Issue

- 3185 1855-C AU53 PCGS. Variety 2.** Two die varieties exist for the 1855-C gold dollar, a logical number when one considers only 9,803 pieces were struck. Only 250 to 350 examples are believed known today of both varieties, and it seems this second variety is slightly more available. Survivors are usually only found in VF-XF grades with AU pieces scarce. Heavy die clashing is seen in the center of the obverse, but we see no evidence of it on the reverse. Softly struck, as always, there are numerous small abrasions peppered across each side, but the only mark worthy of note is a thin, angling scratch at the top of the reverse. Bright yellow-gold color. Population: 15 in 53, 24 finer (4/19). NGC ID# 25C5, PCGS# 7533

1860-S Gold Dollar, MS63
13,000 Coins Struck

- 3186 1860-S MS63 NGC.** Based on the certification totals at NGC and PCGS, we believe a fair survival rate for the 1860-S gold dollar is between 250 and 350 coins. About 20% of those are in Mint State, and only a handful are as fine as this fully struck Select Uncirculated example. A hint of reflectivity appears in the fields. Lustrous yellow-gold surfaces exhibit minor marks. Census: 5 in 63, 4 finer (4/19). NGC ID# 25CT, PCGS# 7557

1869 Gold Dollar, MS67
Ex: Harry W. Bass, Jr.

- 3187 1869 MS67 PCGS.** Ex: H.W. Bass, Jr Collection. The present Superb Gem was described in the second Bass catalog as "quality-wise certainly one of the highlights of the present offering of gold dollars from the Bass Collection." We can only add that the cataloger neglected to mention the splendid peach-gold toning, augmented by glimpses of sea-green along the lower borders. A sharp strike, potent cartwheel sheen, and pristine preservation confirm the lofty third-party grade. Only 5,900 pieces were produced for commerce. Population: 9 in 67 (1 in 67+), 2 finer (4/19). Ex: Purchased from Rowe and Brownlee, 5/1969; Harry W. Bass, Jr. Collection, Part II (Bowers and Merena, 10/1999), lot 174, which realized \$7,187.50. NGC ID# 25D5, PCGS# 7568

1877 Gold Dollar, MS67
Partially Prooflike Surfaces

- 3188 1877 MS67 NGC.** The 1877 gold dollar claims a small mintage of 3,900 pieces, but many examples were saved by contemporary collectors, so the issue is collectible in higher grades today. This spectacular Superb Gem exhibits well-detailed design elements and impeccably preserved yellow-gold surfaces with reddish-gold intermixed, and strong prooflike reflectivity seen throughout. Census: 9 in 67 (1 in 67★), 8 finer (4/19). NGC ID# 25DF, PCGS# 7578

1889 Gold Dollar, MS68
Last Year of Issue, Rich Color

3189 1889 MS68 PCGS. A popular and highly collectible final-year issue, the 1889 gold dollar is unknown finer than MS68. PCGS lists only 10 coins in MS68 and NGC 15, which are the finest pieces available (5/19). Spectacular orange-gold surfaces on this piece reveal vibrant lavender hues and gleaming mint frost. Fully struck and practically pristine. NGC ID# 25DU, PCGS# 7590

PROOF GOLD DOLLARS

1885 Gold Dollar, PR64 Cameo
Pronounced Contrast

3190 1885 PR64 Cameo NGC. CAC. In his recently published *United States Proof Coins, Volume IV: Gold*, John W. Dannreuther lists two varieties for the 1885 gold dollar (1,105 proofs minted). Both share a common reverse, while the obverses are differentiated by the presence or absence of a die lump on Liberty's forehead. No such lump is present on this example, corresponding to the JD-2 variety. All 1885 gold dollar proofs are scarce, with only 200 to 300 coins known, about evenly split between the two variants. Deep orange-gold surfaces feature profound field reflectivity and frosty devices. There are a couple of contact marks on the obverse but few on the reverse. A lovely 19th century proof gold coin. NGC ID# 25EV, PCGS# 87635

1887 Gold Dollar, PR65 Cameo
Scarcer JD-2 Variety

3191 1887 PR65 Cameo PCGS. CAC. JD-2, R.5. A fairly generous mintage of 1,043 proof gold dollars was accomplished in 1887 and John Dannreuther has identified two die varieties for the date. This coin represents the scarcer JD-2 variety, with a new obverse die that shows a dot behind the eye and an irregular raised area on the chin (this obverse is also used on the JD-1 variety). The reverse die has a low date that slants slightly down from left to right. The JD-2 dies were also used to strike business strikes. The surviving population for JD-2 is estimated at 30-50 examples in all grades.

The present coin is a delightful Gem proof, with razor-sharp definition on all design elements and deeply mirrored fields that contrast boldly with the frosty devices. The lemon-yellow surfaces are well-preserved and appealing. Population: 8 in 65 Cameo, 9 finer. CAC: 6 in 65, 5 finer (4/19). NGC ID# 25EX, PCGS# 87637

1888 Gold Dollar, PR66
Rich Peach Patina

- 3192 1888 PR66 PCGS. JD-1, High R.4.** Proof mintages for the final six years of the Liberty gold dollar series exceeded 1,000 pieces. But those figures are misleading, since most proofs were ordered by jewelers, who fashioned them into love tokens or other adornments. The proof 1888 is surprisingly scarce, and most examples are in PR62 to PR66 grades. The present orange-gold specimen is a fully struck and prominently mirrored Premium Gem. The surfaces appear devoid of contact, though we note a few minute mint-made lint marks, along with a drop of residue near the E in STATES. Population: 7 in 66, 4 finer (4/19). NGC ID# 25EY, PCGS# 7638

1888 Gold Dollar, PR66 Cameo
Conditionally Rare

- 3193 1888 PR66 Cameo NGC.** No non-Cameo proof 1888 gold dollars are certified finer than PR65 at NGC, heightening demand for the few Cameos known in this lofty condition. The present Premium Gem displays razor-sharp detail and modest contrast. The bright yellow-gold surfaces show no distractions. Although Mint records indicate a coinage 1,079 proof gold dollars in 1888, most have not survived. Including possible resubmissions, NGC and PCGS combined have certified only 245 examples of this elusive and well-made issue. In the past, the availability of the 1888 proofs was skewed by prooflike circulation strikes that were frequently offered as proofs. Census: 11 in 66 Cameo, 8 finer (4/19). NGC ID# 25EY, PCGS# 87638

1888 PR66 Cameo Gold Dollar
One of the Finer Survivors

- 3194 1888 PR66 Cameo NGC.** The estimated number of survivors of proof 1888 gold dollars is a mere 150 to 225 pieces. The same dies were used to strike coins for circulation and proofs, and in the past this has led to confusion between the two. This is an unquestioned proof that displays deeply mirrored fields that are slightly stippled from the often-seen orange peel effect. The devices are nicely frosted and present significant cameo contrast. Census: 11 in 66 Cameo, 8 finer (4/19). NGC ID# 25EY, PCGS# 87638

CLASSIC QUARTER EAGLES

1836 Script 8 Quarter Eagle, MS64
Semiprooflike Classic Head Type Coin

3195 1836 Script 8 MS64 PCGS. Breen-6143, Variety 11, R.2. Head of 1835. Two dates stand out in the Classic Head quarter eagle series as type coins — 1834 and 1836. The 1836 issue is further recognized in two major varieties — Block 8 and Script 8, referring to the style of the date numeral. The Script 8 issue is mildly more plentiful, although any 1836 quarter eagle is scarce in MS64, and just a handful of coins are known finer.

Offered here is a bright yellow-gold example with semireflective fields and exceptional preservation. The characteristic Variety 11 die cracks are evident on each side, and typical strike weakness is apparent on the middle hair curls of Liberty's portrait and on the left edge of the eagle's shield. High-grade Classic Head type coins rarely come on the market for collectors. This is an important opportunity. Population (Script 8): 15 in 64 (1 in 64+), 2 finer (4/19). NGC ID# 25FU, PCGS# 7694

1839-D Quarter Eagle, MS62
Richly Patinated Rarity
Important Mint State Offering

3196 1839-D MS62 PCGS. Winter 1-A, Variety 26, R.3. Quarter eagles were struck at all four active mints in 1839. Dahlonega coinage amounted to 13,674 pieces, all from locally mined ore. Although Christian Gobrecht's Liberty Head design replaced the Classic Head dies for the half eagle in 1839, the design change had not yet been implemented on the quarter eagle denomination. Thus, a one-year Classic Head type coin was produced at the Dahlonega Mint. The mintmark is on the obverse above the date.

This Mint State example is conditionally rare. Although Doug Winter estimates as many as 250 examples of the date survive overall, few of them are Uncirculated. PCGS reports 17 Mint State grading events, including likely duplication. It is an arduous task to find an attractive Mint State 1839-D quarter eagle, and it is nearly impossible to locate a piece finer than MS62. The last time was handled a coin in this grade was the Central States Signature (Heritage, 4/2011), where lot 5329 realized \$34,500. We have not seen a finer coin since 2006. The present offering is thus incredible for the Dahlonega gold specialist. The coin is impressively sharp and satiny with rich orange-gold and olive patina. In the border regions, deeper lilac and russet overtones are apparent, attesting to the originality of the surfaces. A few other 1839-D quarter eagles of this quality are known, but only this one is currently on the market. Population: 8 in 62, 4 finer (4/19). NGC ID# 4UKS, PCGS# 7700

LIBERTY QUARTER EAGLES

1845-D Quarter Eagle, AU58
Sharp Dahlonega Coin

- 3197** 1845-D AU58 PCGS. Variety 6-J. This near-Mint quarter eagle displays incredibly sharp detail, particularly on the stars, rims, dentils, legends, and olive leaves. Luster remains within the protected areas, lightening yellow-gold surfaces that show minimal hairlines and just a couple of ticks above the eagle's head. About 200 to 250 pieces survive from a mintage of 19,460 coins. NGC ID# 25GX, PCGS# 7738

Sketch of Dahlonega Mint

1884 Two and a Half, MS65
Condition Census Rarity

- 3198** 1884 MS65 NGC. A paltry mintage of 1,950 coins ensures the scarcity of the 1884 quarter eagle in high grade. This issue was little-saved by contemporary collectors, unlike later dates in the series which hardly circulated. In Gem condition, the 1884 is a great rarity. The Condition Census for this issue includes four MS65s at NGC (two of which are Prooflike), and three others at PCGS (5/19). This example is not designated Prooflike, but it does have substantial field reflectivity, particularly on the reverse. The strike is sharp, and each side displays varying shades of yellow-gold and peach-orange color. A few microscopic marks in the fields prevent an even finer grade but are hardly noticed. NGC ID# 25L8, PCGS# 7836

1899 Quarter Eagle, Radiant MS67
None Finer at PCGS

- 3199** 1899 MS67 PCGS. This completely struck Liberty quarter eagle from a mintage of 27,200 coins glows with radiant mint frost. The thick, vibrant luster shimmers over rose and yellow-gold surfaces that fail to reveal any apparent flaws. A remarkable survivor, one of the finest we have seen. Population: 10 in 67, 0 finer (4/19). NGC ID# 25LP, PCGS# 7851

PROOF LIBERTY QUARTER EAGLES

1875 Liberty Quarter Eagle, PR65+
Spectacular Deep Cameo Example
Classic Gold Rarity, 20 Examples Struck

3200 1875 PR65+ Deep Cameo PCGS. The 1875 quarter eagle is a legendary rarity in the 19th century U.S. gold series. Collectors interested in the Coronet series are well aware of this date's rarity, whether as a circulation strike or a proof. Only 400 business strikes were produced plus another 20 proofs. Survivors in both formats are predictably low. Probably two dozen or more business strikes are extant today, a number greater than most estimates, but we know one collector who hoarded this date and 23 years ago had 18 pieces. Proofs are another matter and probably only 16 or so examples are believed extant today, including one held in the Smithsonian Institution and another in the ANS.

With only 400 circulation strikes minted, all are essentially first strikes and almost all high-grade examples retain significant die polish in the fields and many resemble proofs. Confusion between business strikes and proofs was a problem years ago, but today diagnostics are known for each and prooflike circulation strikes are no longer called proofs and dull proofs are not confused with business strikes. On proof strikings the date is higher than on business strikes and the 5 nearly touches the bust.

Each side of this magnificent rarity shows even reddish-gold color. The surfaces are lightly hairlined, but the only pedigree identifiers we see are a few lint marks near star 3. The sharply detailed, frosty design elements contrast profoundly with the deeply mirrored fields to create an intense cameo effect. While several high-grade proofs are known of the 1875 quarter eagle, they are infrequently offered at public auction. This particular coin was in a foreign collection for several decades before 2011 and it is likely that it is relatively unknown to the present generation of rare gold collectors. This is a rare opportunity to acquire one of the classics in the proof quarter eagle series. Population: 2 in 65 (2 in 65+) Deep Cameo, 1 finer (4/19).

Ex: European Collection; FUN Signature (Heritage, 1/2011), lot 5036. NGC ID# 287W, PCGS# 97901

1890 Two and a Half, PR64+ Deep Cameo
Starkly Contrasted Surfaces

3201 1890 PR64+ Deep Cameo PCGS. CAC. After dipping to only 48 proofs the previous year, the production of proof quarter eagles dated 1890 returned to a more normal level with 93 pieces struck. Close to half that number are believed extant with John Dannreuther estimating between 35 and 45 pieces known today in all grades. Quite a few of those known show either Cameo or Deep Cameo surfaces. This example displays wonderfully deep mirrors on each side with the expected thick mint frost over the devices. A loupe reveals a few insignificant contact marks, but such close examination also reveals why this piece is Plus-designated by PCGS. Even, bright yellow-gold color is seen across both sides. Population: 3 in 64 (2 in 64+) Deep Cameo, 10 finer. CAC: 2 in 64, 10 finer (3/19). NGC ID# 288D, PCGS# 97916

1896 Liberty Quarter Eagle, PR66+★
Stunning Ultra Cameo Specimen

3202 1896 PR66+★ Ultra Cameo NGC. CAC. A generous mintage of 132 proof Liberty quarter eagles was accomplished in 1896, to accompany a regular-issue production of 19,070 pieces. Both formats enjoyed a relatively high survival rate, making the 1896 an available issue in proof or business strike today. Only one pair of dies was used to strike the proofs, easily identified by a spike through the dentils above the T in UNITED. John Dannreuther estimates the surviving population at 65-80 examples in all grades.

The 1896 Liberty quarter eagle was a well-produced issue, and this Plus-graded Premium Gem exhibits razor-sharp definition on all design elements. The virtually flawless lemon-yellow surfaces show the slight orange-peel texture of the best proofs of this era. The deeply mirrored fields contrast profoundly with the richly frosted devices to create an intense cameo effect. The outstanding quality and eye appeal of this stunning example is attested by both the Star designation and the CAC certification. Census: 4 in 66 Ultra Cameo (1 in 66+, 1 in 66★, 2 in 66+★), 10 finer. CAC: 8 in 66, 3 finer (4/19). NGC ID# 288K, PCGS# 97922

INDIAN QUARTER EAGLES

1911-D Two and a Half, MS61
Rare CAC-Approved Example

- 3203 1911-D MS61 PCGS. CAC.** The 1911-D quarter eagle claims key date status for the series due to its mintage of only 55,680 pieces. However, it is generally available to collectors in most grades, even the low end of the Mint State spectrum. The challenge comes in locating an attractive low-end Mint State coin. In fact, of the more than 1,000 pieces reported by NGC and PCGS in MS61 (this figure likely includes duplication), *just 19 are CAC endorsed.* This is one of them. It displays a sharp strike and bold mintmark. The characteristic granular luster of this issue has only faint field marks that limit the grade, and the peach-gold color is original. Remarkably eye-appealing. Housed in a prior generation holder. NGC ID# 7KR7, PCGS# 7943

1912 Quarter Eagle, Sharp MS65
Two Finer Coins at NGC

- 3204 1912 MS65 NGC.** The 1912 ranks among the scarcer Indian Head quarter eagles at the Gem grade level. Each side displays needle-sharp definition and eye-catching red-gold color. This clean, satiny representative can be identified by the coppery alloy spot on the nose. It is practically void of singular abrasions. Census: 72 in 65 (1 in 65+), 2 finer (4/19). NGC ID# 7KR8, PCGS# 7944

PROOF INDIAN QUARTER EAGLE

1912 Two and a Half Indian, PR66
Bright, Sparkling Surfaces

- 3205 1912 PR66 PCGS. CAC.** The 1912 proof production continued the sandblast tradition the Mint first introduced in 1908, skipped two years, and then resumed in 1911. There were 197 proof quarter eagles struck in 1912 and a considerable number have survived, some in high grades. John Dannreuther estimates that between 90 and 110 pieces are extant. Color and surface quality varies, as J.D. points out, depending on the batch of coins being sandblasted. The coins from each batch was dependent on the size of sand used and the intensity of the blaster. This is an exceptional piece of matte proof gold. The surfaces sparkle with thousands of tiny facets created by the sandblasting technique. There are no immediately apparent flaws, one will need a loupe to find any surface defects. Bright yellowish tinted, light brown color. Population: 12 in 66 (1 in 66+), 9 finer. CAC: 7 in 66, 2 finer (4/19). NGC ID# 7JYU, PCGS# 7961

THREE DOLLAR GOLD PIECES

1866 Three Dollar Gold, MS62
Attractive for the Grade

- 3206** 1866 MS62 NGC. Just 4,000 three dollar gold pieces were struck in 1866, all at the Philadelphia Mint. Mint State survivors are scarce, and they are rarely seen finer than MS62. This piece is within the reach of many collectors. Each side has satiny orange-gold color and the reverse is semiprooflike. The wreath bowknot shows the only mentionable strike weakness. Grade-limiting abrasions are minor, leaving this coin with excellent eye appeal for the grade. Census: 8 in 62, 8 finer (4/19). NGC ID# 25MM, PCGS# 7987

1880 Three Dollar, MS63+
Only 1,000 Coins Struck

- 3207** 1880 MS63+ PCGS. A 1,000-coin mintage makes the 1880 one of the most desirable issues in the series. A healthy number of coins survive through Select and even near-Gem condition, above which point the population tapers off significantly. Rose accents complement this frosty, sharply struck example. The wreath bow is notably strong. Light chatter in the fields. NGC ID# 25N3, PCGS# 8002

PROOF THREE DOLLAR GOLD PIECES

1881 Three Dollar Gold, PR64
Rare Deep Cameo Example

- 3208** 1881 PR64 Deep Cameo PCGS. CAC. The 1881 three dollar gold proof marks the beginning of elevated proof mintages for the last decade of the denomination, though the stated mintage of 54 pieces pales in comparison to certain later figures. Few specimens released then have the degree of contrast seen on this wonderful Choice piece. Gorgeous, sharply struck central devices have no breaks in the frost, though the hollow of Liberty's neck shows a polished area that is consistent with Mint practices of the time. The yellow-gold fields are fantastically reflective, gleaming even at arm's length. Though a few hairlines are visible when the piece is tilted under a light source, the overall eye appeal is grand. Population: 2 in 64 Deep Cameo, 3 finer. CAC: 3 in 64, 1 finer (4/19). Ex: FUN Signature (Heritage, 1/2009), lot 4025, realized \$20,700. PCGS# 98045

1887 Three Dollar Gold, PR64+
160 Examples Struck

3209 1887 PR64+ PCGS. CAC. The Philadelphia Mint struck 160 proof three dollar gold pieces in 1887, to satisfy collector demand for a series that was rapidly nearing its end. A modest mintage of 6,000 business strikes was also accomplished that year. Business strikes show doubling on the letters ERTY in LIBERTY and ERICA in AMERICA, making it easy to differentiate between the formats. The proofs were produced in four batches, delivered quarterly throughout the year. Only one pair of dies was used, but examples are known with different die alignments. John Dannreuther estimates the surviving population at 90-110 examples in all grades.

The present coin is a Plus-graded Choice proof, with sharply detailed design elements and deeply mirrored fields. The vivid orange-gold surfaces show traces of the orange-peel texture that characterizes the best 19th century profs. Only minor signs of contact are evident and eye appeal is strong. Population: 22 in 64 (1 in 64+), 15 finer. CAC: 3 in 64, 2 finer (4/19). NGC ID# 28AW, PCGS# 8051

EARLY HALF EAGLES

1797/5 Capped Bust Right Five, MS61
Rare Large Eagle, 15 Stars, BD-7
Condition Census Example

3210 1797/5 Large Eagle, 15 Stars, BD-7, High R.6, MS61 PCGS. Seven varieties of 1797-dated half eagles are known to numismatists today, four with a Small Eagle reverse and three with the Large Eagle motif. Two of the Large Eagle varieties (BD-5 and BD-6) are each represented by a single known example, and both of those coins are included in the National Numismatic Collection at the Smithsonian Institution. This coin represents the only collectible Large Eagle variety, the rare BD-7, with a surviving population of 16-20 examples in all grades. One of the BD-7 survivors is also in the Smithsonian and a second specimen is in the Bass Core Collection at the ANA Money Museum.

The BD-7 obverse was overdated from an unused die from 1795, making it easy to identify. The BD-7 is one of the most noticeable overdates in all of American coinage, every bit as bold as the 1918/7-D Buffalo nickel and the 1918/7-S Standing Liberty quarter. It appears that the final digit in the date was overpunched with no effort to efface the undertype 5. David Akers believed the 1797/5 was probably struck in late 1797 or early 1798, along with the anomalous 1798 Small Eagle varieties, but Robert Hilt thought these coins might be the remainders of the 470 half eagles delivered on July 8, 1797. This was the only use of the obverse die, but the reverse was used previously to strike the unique BD-6 example in the Smithsonian Institution.

The overdate feature was noticed by catalogers as early as Woodward's Sixth Semi-Annual Sale (3/1865), but the issue was often just identified by the Large Eagle reverse in early lot descriptions. One early appearance was in lot 872 of the John Colvin Randall Collection (W. Elliot Woodward, 6/1885):

"1797 Fifteen stars; rev., large eagle; nearly proof, and excessively rare. Mr. Haseltine says the half eagles of 1797 are equal in rarity to the silver dollars of 1804. I considered this statement within bounds when it was made; it is certainly true, since the recent impulse has been given to the manufacture of 1804 dollars."

The lot realized \$51, a strong price at the time. Recent sales include the AU55 PCGS Gold CAC example in lot 5843 of the FUN Signature (Heritage, 1/2017), that realized \$211,500.

The present coin is a delightful MS61 example, the second-finest certified at PCGS, behind the Pogue MS62+ specimen. It is tied with two MS61 NGC coins for second place in the Condition Census for the issue (4/19). This piece exhibits sharply detailed peripheral design elements, with some localized softness on Liberty's hair and the eagle, due to some planchet adjustment marks on the reverse that were not completely struck out. The vivid orange-gold surfaces are lightly marked for the grade and show a mix of satiny mint luster and prooflike reflectivity in sheltered areas. The overall presentation is most attractive for this important early gold rarity.

Ex: James Stack Collection (*Stack's*, 10/1994), lot 1036; Pittsburgh Elite Coin Auction (*Superior*, 8/2004), lot 978. NGC ID# BFX4, PCGS# 519872 Base PCGS# 8077

1803/2 BD-4 Half Eagle, AU50+
Estimated 125 to 175 Coins Extant

3211 1803/2 BD-4, R.4, AU50+ NGC. Bass-Dannreuther Die State c/c. The crack through the base of the date extends left. Two overdated obverse dies were used to strike the 1803/2 half eagles. The first die (BD-1 to BD-3) is missing the right foot on the T in LIBERTY. This is the only use of the second obverse die (BD-4), with a complete T. About 125 to 175 pieces survive. Partial luster and profound red-gold color provide lovely eye appeal. Minimally worn motifs exhibit strong detail. A slender mark joins star 6 to the portrait, and specks of aqua residue appear on each side. NGC ID# 25NY, PCGS# 504951 Base PCGS# 8084

1803/2 BD-4 Half Eagle, MS62
Popular Overdate Variety

3212 1803/2 BD-4, R.4, MS62 NGC. Bass-Dannreuther Die State c/c, with a prominent crack through the base of the date that extends left to star 1. Once thought to be a major rarity, this variety is now considered the second most plentiful of the year, and it is an ideal choice for date and type collectors. Two different overdate obverse dies are known for the 1803/2 half eagles, combined with three reverse dies to create four varieties. The bright lemon-yellow surfaces of this example are fully lustrous with minimal marks. Census for all 1803/2 varieties: 46 in 62 (2 in 62+), 52 finer (4/19). *Ex: Dallas Signature (Heritage, 11/2017), lot 16914, which realized \$13,200.* NGC ID# 25NY, PCGS# 504951 Base PCGS# 8084

1806 Knob 6 Half Eagle, XF45
BD-6, Bust Right Type Coin

- 3213** 1806 Knob 6, 7x6 Stars, BD-6, R.2, XF45 PCGS. Bass-Dannreuther Die State d/e, as usual. Fine die cracks are visible on each side, and there is a small rust lump on the upright of the R in LIBERTY. Only BD-6 has a Knob 6 in the date, making this a *Guide Book* variety. The die pair was hardy, being used to strike 35,000 to 50,000 coins, according to John Dannreuther. Mint records indicate a mintage of only 64,093 coins for all six 1806 die pairings combined. This Choice XF type coin displays bright, satiny yellow-gold surfaces and little high-point wear. Strike weakness affects the left side of the shield. Housed in a green label holder. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1809/8 BD-1 Half Eagle, Unc Details
Scarcest Date of This Type

- 3214** 1809/8 BD-1, High R.3 — Cleaned — NGC Details. Unc. Bass-Dannreuther Die State a/b. The obverse die is uncracked, while clash marks occur above the eagle's wings and below the scroll. BD-1 is the only variety for the year. All examples feature an 1809/8 overdate, and about 250 to 325 piece are thought to survive. John Dannreuther has called this "the scarcest date of this type..." This coin showcases boldly struck and unworn devices over orange and yellow-gold surfaces that have been lightly cleaned. NGC ID# BFXK, PCGS# 507603 Base PCGS# 8104

1810 BD-4 Five Dollar, AU58
Large Date, Large 5, Collectible Type

- 3215** 1810 Large Date, Large 5, BD-4, R.2, AU58 NGC. Bass-Dannreuther die state a/a, uncracked and unclashed. The 1810 Large Date, Large 5 (BD-4) half eagle is one of the most collectible issues of this type or any other early five dollar gold piece. Dannreuther's survival estimate ranges from 500 to 700 pieces known. This yellow-gold example remains in nearly Uncirculated condition. Strike definition is soft over the centers, with roller marks present across the portrait, but a pleasing degree of luster brightens the lightly abraded surfaces. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

1811 Half Eagle, Bright AU58
Small 5, BD-2

- 3216** 1811 Small 5, BD-2, R.3, AU58 NGC. Bass-Dannreuther Die State d/a, without clash marks on reverse below the eagle's beak. The 1811 five dollar gold pieces are known with Small and Tall 5s in the denomination. Small 5 coins have the center of the upper flag directly under the point of the fletching. This is the more available variant, but not by much. The estimated survivorship is only 225 to 300 coins. A slightly uneven strike failed to obliterate parallel planchet striations at the upper reverse. Definition is strong over the centers, and each side remains lustrous with yellow-gold color. NGC ID# BFXR, PCGS# 507599 Base PCGS# 8109

1813 BD-1 Half Eagle, MS64+
CAC Endorsement, Remarkable Quality
Few Type Coins Are Known This Fine

3217 1813 BD-1, R.2, MS64+ PCGS. CAC. Bass-Dannreuther Die State b/b, clashed dies. BD-1 is the more plentiful of two die varieties for the 1813 half eagle, a popular choice for type collectors. This issue is one of the few readily collectible dates for the type. In 1813, John Reich modified his obverse design to show a more cropped portrait of Liberty than had been in use since 1807. The half eagle diameter was reduced by 1.2 mm in 1829, at the hand of William Kneass, 12 years after Reich left the Mint, but Reich's design was not replaced until 1834. The Classic Head design introduced in 1834 signaled a weight reduction for the half eagle of 0.39 gm. For much of the reign of Reich's Capped Bust Left design from 1813 to 1834, the bullion weight of half eagles exceeded the coins' face value, resulting in rampant hoarding and melting of the coins. Throughout the 1820s, half eagles were rare or nonexistent in circulation. The destruction of U.S. gold coinage during this period for gold profit is responsible for the rarity of most Capped Bust Left half eagles today. Thus the importance of the 1813 issue to type collectors — other dates just are not available, or they are prohibitively expensive.

This Plus-graded near-Gem 1813 presents an incredible opportunity to acquire a high-end example of one of the most elusive types of all early U.S. coinage. Uncirculated 1813 fives are uniquely collectible compared to other dates, but there is a limit to their availability. Choice examples are typically the finest seen — and arguably the finest collectible. PCGS lists only two 1813 half eagles finer than the present coin, one of each variety. The finer BD-1 coin is the Pogue MS66 specimen. This MS64+ piece, however, stands apart on its own pedestal, carrying CAC endorsement at a slightly finer level of preservation than the typical MS64. Heritage has not previously handled an MS64 coin with a Plus grade. The most recent comparable from our archives is the MS64 PCGS CAC coin in the Philadelphia Signature (Heritage, 8/2012), lot 5355, which realized \$47,000. Fast forward seven years, and this Plus-graded coin crosses the auction block in Long Beach. It has frosty greenish-gold luster and an even, sharp strike. Only the most insignificant luster grazes on each side prevent Gem classification. The 1813 half eagle's popularity as a type coin will be on full display when this remarkably high-end example is offered. Population (both varieties included): 58 in 64 (6 in 64+), 2 finer. CAC: 15 in 64, 4 finer (4/19). NGC ID# 25PM, PCGS# 519907 Base PCGS# 8116

1834 Capped Half Eagle, MS61
BD-1, Plain 4
Few Examples Seen at Auction

3218 1834 With Motto, Plain 4, BD-1, High R.5, MS61 NGC. Bass-Dannreuther Die State a/a. There are four varieties of the Capped Bust 1834 half eagle, but only two are usually collectible. BD-4 is unique, and BD-3 is a High R.7 die pairing. John Dannreuther estimates a survivorship of 45 to 55 coins for BD-2 and 30 to 40 for BD-1, which is offered here in Uncirculated condition. Bright yellow-gold surfaces are satiny and minimally abraded, save for a small mark on Liberty's chin that serves as a pedigree marker. The design elements are well-struck in the centers, although the border stars are infrequently weak.

BD-1 is a Plain 4 variety and an ideal type coin for collectors seeking a final-year representative of this heavier 8.75 gm series. However, it is somewhat scarcer than the BD-2 marriage. In the last decade, most of the 1834 Capped Bust half eagles that we have seen were BD-2 coins. In fact, we have not handled a BD-1 example since the Chicago Signature (Heritage, 8/2011), lot 7544, where an MS65 NGC coin garnered \$143,750. More recently, the Pogue MS64 coin realized \$152,750 (Stack's Bowers, 5/2016). This MS61 example comes to the market with no true comparables. We anticipate strong collector interest in this piece as a type coin, although specialists should also pay attention to the variety, as BD-1 has proven to be far rarer than BD-2 in recent years. PCGS# 519955 Base PCGS# 8160

LIBERTY HALF EAGLES

1851-D Five Dollar, AU58
Strong D, Fewer Than 200 Survivors

3219 1851-D AU58 PCGS. Variety 30-V. The Strong D mintmark touches the stem, and the date is positioned far left. This Dahlonega issue is more elusive than collectors give it credit for. Of the 62,710 pieces struck, Winter estimates only 135 to 185 examples survive — mostly in VF to XF condition. The peripheral elements are bold on each side, while the centers are typically soft. Partial luster glows from attractive medium orange-gold surfaces. Population: 7 in 58 (1 in 58+), 4 finer (4/19). NGC ID# 25U8, PCGS# 8248

1881-CC Five Dollar, AU55
Partially Lustrous Original Surfaces

3220 1881-CC AU55 NGC. CAC. Variety 1-A. Hints of original mint luster remain in the fields of this Choice AU 1881-CC half eagle, complementing smooth wheat-gold and olive coloration. The strike is sharp and little high-point wear is apparent. No distracting abrasions are visible. The 1881-CC half eagle is seldom offered this fine. Mint State coins are rare. Census: 15 in 55, 12 finer. CAC: 6 in 55, 6 finer (4/19). NGC ID# 25XE, PCGS# 8356

1882-CC Liberty Half Eagle, AU58
Popular Branch Mint Type Issue

3221 1882-CC AU58 PCGS. CAC. Variety 1-A. The 1882-CC Liberty half eagle claims a relatively large mintage of 82,817 pieces, making it one of the more available Carson City issues in high grade. This attractive Near-Mint example shows just a trace of wear on the high points of the design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. Population: 85 in 58, 25 finer. CAC: 27 in 58, 4 finer (4/19). NGC ID# 25XH, PCGS# 8359

PROOF LIBERTY HALF EAGLES

1895 Half Eagle, PR64+ Cameo
Strong Contrast, Sharp Eye Appeal

3222 1895 PR64+ Cameo PCGS. CAC. The rarity of 1895 proof half eagles is well-documented with only a few dozen examples known from a mintage of 81 pieces. Cameo proofs make up a large percentage of the survivors — PCGS and NGC combined report just 47 grading events (undoubtedly with several duplications). 75% of those are in the Cameo or Deep Cameo categories.

This high-end Choice Cameo proof displays both the PCGS Plus designation and CAC endorsement. Gleaming mirrored fields surround nicely frosted devices with strong white-on-black contrast when viewed at an oblique angle. A glass reveals no obvious imperfections, with just a few random lines and a tiny horizontal mark near the eagle's head visible under magnification. Delightful orange-gold coloration adds to the exceptional eye appeal of this razor-sharp, borderline Gem Cameo proof. Population: 3 in 64 (1 in 64+) Cameo, 3 finer. CAC: 2 in 64, 2 finer (3/19). NGC ID# 28CZ, PCGS# 88490

1898 Five Dollar, PR64 Deep Cameo
Strongly Contrasted Example

3223 1898 PR64 Deep Cameo PCGS. CAC. Just before the shift to the brilliant proof style in 1902 and the subsequent loss of the cameo contrast so admired today, the U.S. Mint in Philadelphia produced some of the most gorgeous proofs ever produced in the country. The coins had thick frost on the devices and deep mirrors, a combination that guaranteed incredible contrast. In terms of that contrast, this near-Gem is among the best of the best. Deep yellow-gold mirrors show tinges of orange, while the devices are amply frosted with complete detail. Just a few tiny field disturbances determine the grade. Population: 3 in 64 (2 in 64+) Deep Cameo, 11 finer. CAC: 4 in 64, 8 finer (3/19).

Ex: Summer FUN Signature (Heritage, 7/2011), lot 4793, where it sold for \$19,550. NGC ID# 28D4, PCGS# 98493

INDIAN HALF EAGLES

1908 Pratt Half Eagle, MS65+
High-Grade First-Year Example

- 3224 1908 MS65+ PCGS.** The 1908 was a well-saved first-year issue. While it is considered one of the few accessible Pratt half eagles in Gem condition, the 1908 becomes scarce in MS66 and uncollectible in MS67. Strongly struck, highly lustrous surfaces display attractive orange-gold and lavender hues. A single wispy abrasion at the upper reverse prevents an even finer assessment. NGC ID# 28DE, PCGS# 8510

1911 Half Eagle, MS65
Scarce This Fine

- 3225 1911 MS65 NGC.** Its large mintage of 915,000 pieces makes the 1911 half eagle an available date in lower Mint State grades and a popular choice for type collectors. The issue becomes scarce in MS64, and Gems are quite elusive. In *A Handbook of 20th Century United States Gold Coins*, David Akers opines "Gems are rare in an absolute sense" and "MS-66s are virtually unknown."

The present coin is a delightful Gem, with lustrous, greenish-gold surfaces. The strike is a little soft on the lower feathers of the headdress, a feature commonly seen on this issue. While the 1911 is usually seen heavily abraded, the surfaces of this example show only a few insignificant handling marks. Census: 50 in 65, 1 finer (4/19). NGC ID# 28DP, PCGS# 8520

1911-D Five Dollar, MS61
Merely 72,500 Coins Struck

- 3226 1911-D MS61 NGC.** A mere 72,500 half eagles were manufactured at the Denver Mint in 1911, the mintage being only marginally higher than its quarter eagle counterpart. Mint State offerings are correspondingly elusive. This piece enjoys satiny, reddish-gold surfaces and good detail. A slender, well-hidden linear abrasion through the headdress and minor hairlines explain the grade. NGC ID# 28DR, PCGS# 8521

1914-D Five Dollar, MS65
Rarely Offered So Fine

- 3227 1914-D MS65 PCGS.** Both sides of this Gem 1914-D half eagle showcase lovely rose-gold and greenish hues in the fields, although the underlying patina is fire-orange, making for eye-catching color and visual appeal. There is some strike weakness on the lower headdress feathers, but the remainder of the coin is well-defined. Preservation is excellent for this issue. The 1914-D is rare in MS65, and higher-grade coins are uncollectible for most enthusiasts. We last offered a Gem example of this issue in the FUN Signature (Heritage, 1/2013), lot 5889, which realized \$19,975. Indian gold specialists should expect competition for this condition rarity. Population: 17 in 65 (1 in 65+), 3 finer (4/19). NGC ID# 28DV, PCGS# 8528

1916-S Five Dollar, MS64
Rich Reddish-Gold Color

3228 1916-S MS64 NGC. The 1916-S is conditionally rare, and this near-Gem is awash in rich reddish-gold color. Pleasingly frosted in finish, both sides are sharply struck over all but the highest points of the design. Generally distraction-free save for a few wispy abrasions in the left obverse and upper reverse fields. Census: 68 in 64 (6 in 64+), 13 finer (4/19).

Ex.: Long Beach Signature (Heritage, 9/2002), lot 8302; Long Beach Signature (Heritage, 2/2003), lot 8308; Summer FUN Signature (Heritage, 7/2013), lot 3378; FUN Signature (Heritage, 1/2019), lot 5764. NGC ID# 28DY, PCGS# 8532

1916-S Five Dollar, MS64+
Beautifully Preserved

3229 1916-S MS64+ PCGS. Only one other half eagle issue was produced after this one — the 1929, which most collectors consider uncollectible. This is also the final five dollar emission from the San Francisco Mint. The feathers on each side show strong detail, one element of a crisp strike overall. Frosty luster glows from beautifully preserved straw-gold surfaces that nearly meet the standards for the next highest grade level. Only 15 submissions are finer at PCGS (4/19). NGC ID# 28DY, PCGS# 8532

1916-S Five Dollar, Frosty MS64+
Rare CAC-Approved Example

3230 1916-S MS64+ PCGS. CAC. The 1916-S marks the final half eagle coinage from the San Francisco Mint, and it is the only issue for the year from any mint for this denomination. A moderate mintage of 240,000 pieces was accomplished, although few pieces survive in high Uncirculated grades. PCGS has seen only 15 coins finer than this Plus-graded Choice example (4/19). Each side shimmers with frosty original luster and warm prairie-gold hues. The lower headdress feathers exhibit the only mentionable strike weakness, and abrasions are at a minimum for the grade. Population: 30 in 64+, 15 finer. CAC: 25 in 64, 9 finer (4/19). NGC ID# 28DY, PCGS# 8532

Chief Thundercloud

PROOF INDIAN HALF EAGLE

1908 Indian Half Eagle, PR67
 First Year of Design
 Only One Finer Coin at NGC

3231 1908 PR67 NGC. JD-1. Bela Lyon Pratt's exciting incuse Indian design debuted on the half and quarter eagles in 1908. The incuse design was intended to reduce wear on the coins, since the devices would be sheltered below the surface. Unfortunately, this feature made it impossible for the Mint to produce proof coins with the brilliant finish collectors prized in previous years. Instead, the proofs were struck with specially prepared dies and then sandblasted to impart a dark, artistic matte finish to the coins. Only one pair of dies was used to strike the 167 proof half eagles delivered in 1908.

Initially, the novelty of the new design appealed to collectors and a substantial number of proofs was distributed. However, the matte finish proved unpopular and sales declined rapidly as the year went on. Any unsold examples were melted after the close of the year. John Dannreuther estimates the surviving population at 80-100 examples in all grades, making the 1908 the most available proof Indian half eagle in today's market.

The new proofs began appearing at auction at least as early as lot 476 of the Captain Andrew C. Zabriskie Collection (Henry Chapman, 6/1909), which featured a complete, four-piece gold proof set, "1908 Gold proof set, \$20, \$10, \$5, \$2 1/2, Dull sand blasted finish. Extremely rare. Set." The set sold for a strong price of \$70. Recent sales of the 1908 proof half eagle include the PR67 NGC specimen in our September 2014 Long Beach Signature, which realized \$54,343.75.

The present coin is a magnificent Superb Gem proof, with razor-sharp definition on the design elements. The khaki-gold surfaces are impeccably preserved and no useful pedigree markers are evident. Both sides exhibit unbroken matte luster, with outstanding eye appeal. We expect intense competition from series specialists when this lot is called. Census: 11 in 67, 1 finer (4/19). NGC ID# BYJ6, PCGS# 8539

EARLY EAGLES

1795 Eagle, BD-1, VF Details

- 3232 1795 13 Leaves, BD-1, High R.3 — Repaired — NGC Details. VF. Ex: Hilt Collection. BD-1 is the most plentiful 1795 Small Eagle ten dollar variety, with 225 to 325 examples believed extant, ideal for type or date purposes. This piece is lightly circulated, with extensive repair work to both sides, possibly in an attempt to eradicate minor surface abrasions. The color is a bright green-gold hue, with a degree of flash observed when tilted beneath a light. From *The Liberty USA Collection / FUN Signature* (Heritage, 1/2015), lot 7201, where it sold for \$9,400.

9
Elias Boudinot

Mint Director Elias Boudinot, 1795-1805

1797 Ten Dollar, XF40
Large Eagle, BD-4 Die Pair
Hint of Reflectivity

- 3233 1797 Large Eagle, BD-4, High R.4, XF40 PCGS. Bass-Dannreuther Die State d/b. Radial die cracks through C and R in AMERICA are typical. The earlier die state is rarely seen. All 1797 Heraldic Eagle ten dollar gold coins are scarce, with the upper range of the Dannreuther survival estimate being 260 coins spread across three die varieties. BD-4 exists to the extent of perhaps 90 to 110 pieces. They are identified by triangular shape of the eagle's neck and the star below its beak. The stars, curls, and all the eagles' feathers retain crisp definition, though this XF ten dollar saw moderate circulation. A hint of reflectivity appears in the fields, partly obscured by peppered abrasions. Identifying marks occur between stars 1 and 2, and stars 12 and 13. The total reported mintage of 10,940 coins, low survival rate, and 18th-century date make this a highly desirable issue in any condition. NGC ID# 25ZY, PCGS# 45719 Base PCGS# 8559

1799 Eagle, Partly Lustrous AU50
Rare BD-2 Die Marriage
Small Obverse Stars

- 3234** 1799 Small Obverse Stars, BD-2, High R.5, AU50 PCGS. Bass-Dannreuther Die State d/c, cracked on both sides. The heaviest crack is vertical from the rim near the L in LIBERTY down into Liberty's cap. BD-2 is a rare variety of this otherwise plentiful date, with an estimated survivorship of only 35 to 45 coins. John Dannreuther suggests that only 1,500 to 2,000 pieces were ever struck from this die pair. The coin offered here is sharply struck and displays complete border dentils. Partial luster remains in the peripheral fields complementing honey-gold color overall. Neither side has distracting blemishes. Housed in an old rattler holder. NGC ID# 2624, PCGS# 45725 Base PCGS# 98562

1799 Capped Bust Right Eagle, AU Details
Small Obverse Stars, BD-6

- 3235** 1799 Small Obverse Stars, BD-6, R.5 — Reverse Scratched — NGC Details. AU. Bass-Dannreuther Die State d/a. Star 9 touches Y in LIBERTY, Star 13 is away from the bust, and the eagle's beak does not touch the star on the reverse, identifying the rare BD-6 variety with a surviving population of 35-45 examples in all grades. Only light wear shows on the devices, but several minor rim bruises are evident on both sides and there is an extensive network of pin scratches on the central reverse. A number of obverse die cracks are visible on close inspection, the heaviest along the back of the cap, through star 8, to the rim.

1799 Capped Bust Right Eagle, XF45
Small Obverse Stars, BD-7

- 3236** 1799 Small Obverse Stars, BD-7, R.3, XF45 NGC. Bass-Dannreuther Die State b/b. A respectable mintage of 37,449 Capped Bust Right eagles was accomplished in 1799, with 10 die varieties known for the date. This coin represents the BD-7 variety, with Small Obverse Stars, the 17 in the date tilted right, and the star away from the beak on the reverse. BD-7 is an available variety, with a surviving population of 250-350 examples in all grades. The obverse die was used again to strike the BD-8 variety of this date and the reverse was used previously to produce the BD-6 variety. Die evidence suggests there was a remarriage of the BD-7 dies, with the BD-8 coins struck in between the two pairings.

The present coin is an impressive Choice XF specimen, from a fairly early state of the dies. Just a trace of crumbling is evident on the dentils between stars 1 and 2 on the obverse and the reverse shows evidence of lapping from its previous use on BD-6. The well-detailed design elements exhibit some light wear and the pleasing orange-gold surfaces are lightly abraded. An inconspicuous (almost invisible) rim ding shows at 4 o'clock on the obverse. A few traces of original mint luster remain intact NGC ID# 2625, PCGS# 45730 Base PCGS# 98562

1799 Ten Dollar, AU Details
BD-8, Small Obverse Stars

3237 1799 Small Obverse Stars, BD-8, R.5 — Rim Damage — NCS. AU Details. Bass-Dannreuther Die State c/b, with reverse die cracks. This is the only use of this reverse die, which failed early in its usage. John Dannreuther estimates that only 2,500 to 3,500 coins were struck from this die marriage. Only 45 to 55 pieces are believed extant. At first glance, this orange-gold and cherry-red example appears to be unimpaired, but thorough study locates an obverse rim nick at 3 o'clock and minor rim bruises near 7:30. The obverse also has scattered tiny marks, but these are generally unimportant. Partial luster remains in the fields.

Ex: ANA Signature (Heritage, 3/2008), lot 1530, which realized \$9,775.

1801 Ten Dollar, Late Die State, AU55
Elusive BD-1 Die Variety

3238 1801 BD-1, R.5, AU55 PCGS. Bass-Dannreuther Die-State b/d, nearly terminal. The vertical die crack from the rim between the 01 in the date bisects the obverse, connecting to the rim above the L in LIBERTY. Another crack branches off of that one between 01 in the date, extending right through the 1. The arcing die crack from star 13 through Liberty's bust is a mainstay of this die state. BD-1 shares its reverse with the lone 1800 eagle variety and the final 1799 die pairing. The large-size obverse star punch is seen here in its final use. The 1804 eagle, which also shows stars from this punch, was likely a leftover, undated die from this earlier period.

The 1801 eagle is divided into two varieties, BD-1 being by far the rarer — only 40 to 50 examples are believed known. In *Early U.S. Gold Coin Varieties*, John Dannreuther estimates that only 2,500 to 4,000 examples of this variety were struck, with the balance of the 1801 ten's 44,344-coin mintage awarded to the plentiful BD-2 die marriage. We have handled few BD-1 coins over the past 20-plus years. Two of those are prior appearances of this coin. This variety of 1801 is scarcer than the 1797 Small Eagle and 1798/7 9x4 Stars varieties, which often enjoy higher auction premiums due to their *Guide Book* listings. This is a well-preserved 1801 BD-1 ten, with remnant luster in the protected portions of the fields. Wear is light on the straw-gold surfaces. The strike is even, although mild weakness is noted in the central reverse, where faint adjustment marks are visible. NGC ID# 2627, PCGS# 45733 Base PCGS# 8564

1801 Capped Bust Right Eagle, AU55
Popular BD-2 Variety

3239 1801 BD-2, R.2, AU55 PCGS. Bass-Dannreuther Die State b/b. A substantial mintage of 44,344 Capped Bust Right eagles was accomplished in 1801, with two die varieties known for the date. This coin represents the more available BD-2 variety, identified by the position of star 1 distant from the hair. John Dannreuther estimates the surviving population of the popular BD-2 at 600-800 examples in all grades. This was the only use of the obverse die, but the reverse was used again to strike the BD-3 variety in 1803.

The present coin is an impressive Choice AU specimen that shows just a trace of wear on the strongly impressed design elements. Some vertical spikes are seen in the cap, identifying the late die state. Heritage numismatist Mark Borckardt believes these spikes were caused by a set screw that fell between a planchet and the obverse die during striking, leaving an impression of its threads on the die. The vivid orange-gold surfaces are appropriately abraded for the grade and show vibrant satiny mint luster throughout. Population (for the variety): 1 in 55, 4 finer (4/19). NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

1801 BD-2 Ten Dollar, AU58
Spines in Cap

3240 1801 BD-2, R.2, AU58 NGC. Bass-Dannreuther Die State a/a. There are no clash marks present, although this near-Mint coin does display the vertical spines in Liberty's cap, resultant from die damage of an unknown nature. One theory is that the spines are from a small set screw that may have fallen out of the press and gotten between a planchet and the obverse die. Whatever the case, the spines readily identify the die variety, which is popular as a type coin with early gold collectors. In *Early U.S. Gold Coin Varieties*, John Dannreuther estimates that 600 to 800 examples of BD-2 survive. However, a great many are impaired in some way. This piece has satiny yellow-gold surfaces and a bold strike. Light, scattered abrasions are in keeping with the grade. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

1801 BD-2 Ten Dollar, AU58
Partly Lustrous Early Eagle Type Coin

- 3241 1801 BD-2, R.2, AU58 NGC.** Bass-Dannreuther Die State b/b. Late die state with clash marks in the cap. Not only is this the more collectible of two die marriages for the year (distinguished by star 1 above the lowest curl), it is the most available variety among all early eagles. John Dannreuther provides a survival estimate of 600 to 800 pieces. While a relatively large number survive in AU and even Mint State grades, the total pales in comparison to the demand for them among type collectors and American coin enthusiasts in general.

The famous Capped Bust portrait of Liberty by Robert Scot and his Heraldic Eagle are nearly unworn. Yellow-gold color and partial mint luster grace the well-preserved and sharply defined surfaces. There are an expected number of small, scattered abrasions throughout and a few areas of softness, but they have no effect on the excellent appeal of this early eagle. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

LIBERTY EAGLES

1845-O Ten Dollar, AU58
Limited Availability in Better Grades

- 3242 1845-O AU58 NGC. Variety 1.** The mintage for the 1845-O ten was 47,500 pieces, yet only 250-300 individual examples are believed to have survived. Its availability would be even more limited had it not been for a small hoard that entered the market in the 1990s. This yellow-gold example shows numerous small, but individually insignificant abrasion over each side, and the strike is typical for coins from this mint and from this era. Census: 22 in 58, 7 finer (4/19). NGC ID# 262V, PCGS# 8593

1847-O Ten Dollar, MS60
Conditionally Rare No Motto Branch Issue

- 3243 1847-O MS60 PCGS. Variety 5.** The 1847-O has the largest mintage of any New Orleans gold issue, regardless of denomination. Nevertheless, few if any were saved by collectors until decades later, and foreign bank holdings have also failed to yield examples. As a result, the '47-O is rarer in Mint State than any of the low mintage O-mint ten dollar issues dated between 1888 and 1906. The present well defined caramel-gold representative displays many pockets of bright luster. Although small marks are scattered, only a wedge-shaped depression behind Liberty's mouth merits passing mention. NGC ID# 2632, PCGS# 8598

1858-O Eagle, Near-Mint
Scarce New Orleans Issue

- 3244 1858-O AU58 PCGS. Variety 1.** The advent of the San Francisco Mint reduced the flow of gold bullion from West to East. As a result, mintages of gold denominations at New Orleans dwindled by the end of the 1850s. The 1858-O ten dollar production was just 20,000 pieces. Among the 300 to 400 survivors, the typical coin grades AU50. The present nicely struck near-Mint example displays orange toning and pleasing surfaces. Only a thin mark on the nose is worthy of comment. NGC ID# 55GX, PCGS# 8626

1877 Ten Dollar, XF45
Only 797 Pieces Produced

- 3245 1877 XF45 PCGS.** The 1877 is another notably rare, low-mintage Philadelphia issue, a short run that began with 1875. Only 797 pieces were produced and the majority are XF-AU. As with most survivors, this moderately circulated example still retains traces of original die polish in the fields. The surfaces are original with rich reddish-tinted patina. Numerous small abrasions are scattered across each side. Population: 6 in 45, 32 finer (4/19). NGC ID# 265F, PCGS# 8677

1882-O Eagle, Reflective AU58
Seldom Offered Finer

- 3246 1882-O AU58 NGC. Variety 1.** This piece is in an early die state, before cracks develop through AMERICA. The fields are deeply prooflike in the protected areas, while the open expanses and the high points of the central devices display slight friction. This bright yellow-gold coin is sharp and minimally abraded. Finer, Uncirculated 1882-O tens are scarce. Census: 43 in 58, 17 finer (11/18). NGC ID# 55GJ, PCGS# 8697

1897-O Ten Dollar, MS63
Conditionally Challenging Issue

- 3247 1897-O MS63 PCGS. CAC. Variety 3.** The 1897-O has a mintage of only 42,500 pieces, but three die pairings have been identified. Variety 3 is the scarcest of the trio, and shows minute repunching within the lower loop of the 8 in the date. Since the issue is generally found in AU55 to MS62 grades, most collectors will have greater interest in the preservation, instead of the variety. Those who inspect the present coin for its quality will be impressed, since the slightly dusky apricot-gold surfaces are lustrous, well struck, and only lightly to moderately abraded. Population: 22 in 63, 11 finer. CAC: 7 in 63, 4 finer (4/19). NGC ID# 7LHC, PCGS# 8738

INDIAN EAGLES

1909 Ten Dollar, MS64
Brightly Frosted, Textured Fields

- 3248 1909 MS64 PCGS. CAC.** The 1909 can be more difficult to find than expected, particularly in Choice and Gem Uncirculated condition. This is a well-detailed and brightly frosted example that shows high-end preservation for the grade. The finely textured fields lack obvious abrasions, and warm yellow-gold color with orange accents is readily appealing. CAC: 28 in 64, 8 finer (4/19). NGC ID# 28GM, PCGS# 8862

1909 Ten Dollar Indian, MS65+
Unusually Smooth Surfaces

- 3249 1909 MS65+ NGC.** From a mintage of less than 185,000 pieces, the 1909 Indian eagle is underrated outside of series specialists. The 1909 can be located in lower Uncirculated grades with patience, but it is elusive in MS65 and rare finer. This Plus-graded Gem is sharp. The orange-gold surfaces are unusually well-preserved, as most examples seen display many minor abrasions from storage and shipment in bags. Both sides radiate vibrant, eye-appealing mint luster. Census: 25 in 65 (1 in 65+), 7 finer (4/19). NGC ID# 28GM, PCGS# 8862

1911-D Indian Eagle, MS60
Sharp Strike, Low Mintage

- 3250 1911-D MS60 NGC.** The obverse is nearly fully defined, and the mintmark is bold. A hint of incompleteness on the tip of the eagle's wing is normal for the type. Luster shines from the areas around the relief elements and is expectedly subdued in the open fields. Minor chatter is scattered over the straw-gold surfaces of this low-mintage Indian eagle (30,100 coins). A conditionally scarce Mint State survivor. NGC ID# 28GU, PCGS# 8869

1912 Indian Eagle, MS66
Seldom Offered PCGS Coin

- 3251 1912 MS66 PCGS.** The 1912 Indian eagle is an available date in most grades, but Premium Gem examples are conditionally rare. This is the only PCGS-certified coin that we have handled since our January 2009 FUN Signature sale, lot 3517, where another coin realized \$17,250. This example is comparably equal to that piece and displays especially luminous surfaces with original wheat-gold color. Some faint metal flowlines in the fields aid in producing a vibrant cartwheel effect, and the design elements are sharp. A few tiny ticks on Liberty's cheek are all that deny perfection. Population: 11 in 66 (2 in 66+), 2 finer (4/19). NGC ID# 28GW, PCGS# 8871

1913 Ten Dollar, Sharp MS65+
A Better Date in High Grade

- 3252 1913 MS65+ PCGS.** Seldom seen above the Gem level, 1913 eagles are scarce with surface quality and eye appeal even incrementally finer than MS65. This Plus-graded Gem exudes high-end eye appeal. Sunny yellow-gold color radiates mint luster from nearly mark-free, frosted surfaces. The sharp strike approaches full details throughout both sides. Population: 8 in 65+, 21 finer (4/19). NGC ID# 28GY, PCGS# 8873

1914-S Ten Dollar, MS64
Rare Any Finer

- 3253 1914-S MS64 PCGS. CAC.** Similar to other S-mint Indian tens, the 1914-S is a significant condition rarity. This issue saw a mintage of 208,000 pieces and is relatively easy to obtain in circulated grades. Most Mint State examples grade MS60 to MS63, and are obtainable with patience and searching. Near-Gems are scarce and MS65 and finer pieces are rare.

Both sides of this near-Gem are awash with vibrant mint luster and display light reddish-gold coloration. The design elements are sharply struck, though the eagle's shoulder feathers are soft, a usual characteristic of the issue. A few unobtrusive marks preclude Gem classification. Population: 70 in 64 (4 in 64+), 14 finer. CAC: 15 in 64, 0 finer (3/19).

Ex: Long Beach Signature (Heritage, 9/2013), lot 6832, where it realized \$16,450. NGC ID# 28H4, PCGS# 8877

LIBERTY DOUBLE EAGLES

1850-O Twenty Dollar, AU53
Semireflective and Minimally Abraded

- 3254 1850-O AU53 PCGS. Variety 3.** The 1850-O is a scarcer O-mint in spite of its substantial mintage of 141,000 pieces. As Doug points out in his recent reference on all New Orleans gold: "... properly graded mid-range AUs with good eye appeal are very hard to locate." This is such a piece. The fields retain significant semiprooflikeness on each side. The bright surfaces are minimally abraded and the strike details are well-defined. Only 600-800 pieces are believed known in all grades today, the vast majority of which are VF and XF. Only 58-76 examples are estimated to have survived in AU condition with 3-4 pieces known in Uncirculated. Population: 32 in 53, 18 finer (4/19). NGC ID# 268G, PCGS# 8903

1850-O Double Eagle, AU55
Variety 2, Low Mintmark

- 3255 1850-O AU55 NGC. Variety 2.** The mintmark is centered in the space between the N in TWENTY and the eagle's tail. It is also centered over the N in TWENTY. The high mintmark variety, with the O touching the eagle's tail feathers appears to be the scarcer variety. This issue is the scarcest of the first three New Orleans double eagles, despite a mintage of 141,000 coins. Demand is strong as it is the first year of double eagle coinage at New Orleans. This Choice AU twenty features reflective fields and lovely light yellow surfaces. Census: 46 in 55 (1 in 55+★), 25 finer (4/19). NGC ID# 268G, PCGS# 8903

1852-O Double Eagle, Attractive AU55
Original, Pleasing Early O-Mint

3256 1852-O AU55 PCGS. Variety 1. A thin veil of dappled, olive-gray toning settles over partially prooflike, yellow-gold surfaces of this attractive 1852-O twenty. Although more readily available than other early O-mint dates, few Choice About Uncirculated examples have the charisma of this sharply struck and well-preserved coin. A minimum of light marks exist on either side, adding to the outstanding eye appeal and strong technical quality. Population: 46 in 55 (1 in 55+), 63 finer (4/19). NGC ID# 268L, PCGS# 8907

1852-O Double Eagle, AU58
Collectible Type One O-Mint Issue

3257 1852-O AU58 NGC. Variety 1. Borderline Uncirculated New Orleans double eagles are scarce, with the bulk of production from the Southern facility struck prior to 1854. Recovered shipwreck hoards of 1857 to 1861 contained only a few O-mint survivors, with 20 1852-O examples coming from the *S.S. Republic* salvage operations, of which just one piece was Mint State.

The present example is evenly struck and displays consistent straw-gold color. Noticeable amounts of prooflike luster can be seen over surfaces that lack individually significant abrasions. A small strike-through of mint origin is present between obverse stars 4 and 5. Sharp definition remains on all but the highest portion of the hair bun. Collectors of early New Orleans double eagles gravitate toward the 1852-O as the most logical of Type One selections from the Southern mint. This representative will fit seamlessly in any mid- to high-grade set. NGC ID# 268L, PCGS# 8907

1852-O Twenty Dollar, AU58
Smooth, Semiprooflike Surfaces

3258 1852-O AU58 PCGS. Variety 1. A true AU58 coin, this bright yellow-gold 1852-O double eagle displays only a brush of friction over the devices, with reflectivity remaining in the fields. The surfaces are remarkably smooth. New Orleans double eagles typically come with heavy abrasions, especially in the AU grades. Attractive problem-free coins such as this are decidedly rare, even for dates such as the 1852-O that are generally considered plentiful in the context of New Orleans gold. This issue boasts a mintage of 190,000 coins, but it is most often seen in poor condition. Near-Mint coins are scarce, and Uncirculated pieces are rare. Population: 43 in 58, 20 finer (4/19). NGC ID# 268L, PCGS# 8907

1853/2' FS-301 Double Eagle, AU58
Only Five Finer at NGC

3259 1853/2' FS-301 AU58 NGC. Through the entire Liberty double eagle series, relatively few varieties have been documented. The 1853/2' was once the only overdate known for the entire 58-year history of the design. In fact, only one other overdate, the 1909/8, is known for the entire denomination. Recent research involving photographic overlays suggests that the 1853/2' is not a true overdate, but it remains a sought-after variety in the series. A large die lump beneath the R in LIBERTY confirms the attribution.

Like this specimen, with its lustrous yellow surfaces, most known examples of the variety grade between XF45 and AU58. For example, NGC has certified 196 examples of the variety, and all but 16 of those coins fall in that grade range with 11 lower grade examples and five Mint State pieces. Census: 46 in 58, 5 finer (4/19). NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

1853-O Double Eagle, AU55
Rarely Found Finer

3260 1853-O AU55 NGC. Variety 1. Following substantial mintages from 1850 to 1852, the New Orleans double eagle production dropped markedly in 1853 and deposits of California gold diminished following the opening of the U.S. Assay Office. New Orleans deposit records, preserved in the Fort Worth branch of the National Archives, indicate that a large percentage of gold deposited at that facility was from California. The deposit records give the date, name of the depositor, type of gold, amount, and other details. The New Orleans Mint accepted 60 gold deposits on March 1, 1853, totaling 7,809 ounces of gold (before assaying). Of that total, 7,600 ounces was described as California gold, 122 ounces was Australia gold, and 87 ounces was mixed coins. All other deposits throughout the year reveal similar percentages. There is less than a 3% chance that this piece does not contain California gold. This Choice AU double eagle has faint green and orange overtones on its pleasing light yellow surfaces with ample luster and minimal signs of handling. Census: 40 in 55, 32 finer (4/19). NGC ID# 268N, PCGS# 8910

1853-O Twenty Dollar, AU55
Sharp Early O-Mint Issue

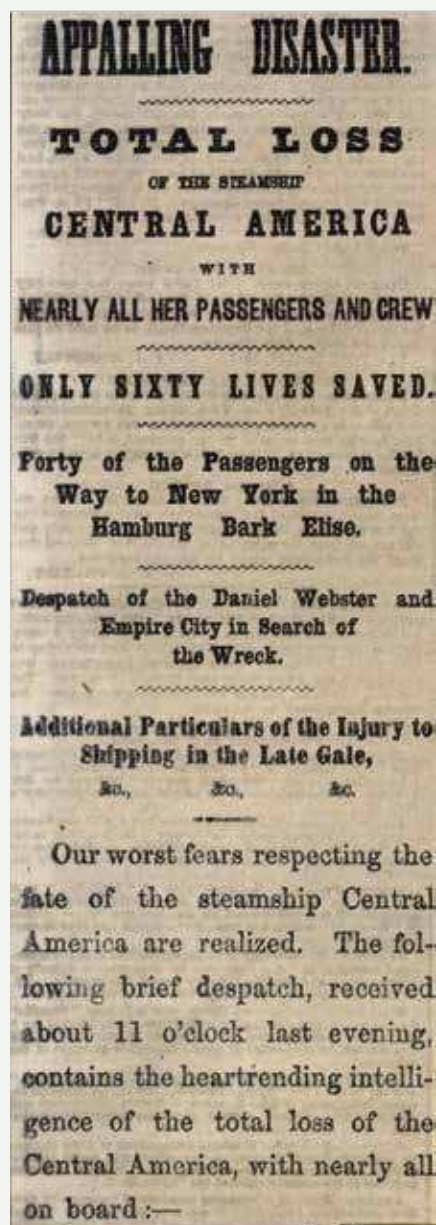

3261 1853-O AU55 NGC. *Variety 1*. Doug Winter's 2018 book, *Gold Coins of the New Orleans Mint 1839-1909*, suggests between 400 and 500 1853-O double eagles exist in all grades. While this O-mint issue is more available than the many rare New Orleans dates of the 1850s, it is challenging in its own right in About Uncirculated and finer conditions. Winter believes it is much scarcer than the 1850-O, 1851-O, and 1852-O.

This is a gleaming, medium-gold example with only slight rub — most-visible on the upper hair bun and forecurls. The stars are sharp, and all other devices show above-average definition. Bright-gold surfaces have a subtle orange hue, peppered with the expected tiny marks and fine hairlines that accompany virtually all Type One twenties that have seen even brief circulation. Most collectors would be delighted to include this Choice About Uncirculated New Orleans twenty in their set. NGC ID# 268N, PCGS# 8910

1856-S Twenty Dollar, MS61
Highly Lustrous

3262 1856-S MS61 PCGS. Medium S. The population of Mint State 1856-S double eagles was affected considerably by the recovery of the S.S. *Central America* treasure, though not nearly to the same extent as the 1857-S. It is entirely possible, even likely that this lustrous example derives from that cache, though no mention of it appears on the PCGS insert. Rich golden-yellow color covers each boldly struck side. There are few abrasions for the grade. NGC ID# 2692, PCGS# 8919

1856-S Double Eagle, MS62
From the S.S. *Central America*
Great Eye Appeal for the Grade

3263 1856-S No Serif, Tilted S, Variety 17L, MS62 PCGS. CAC. Ex: S.S. *Central America*, SSCA 5502. Recovery efforts continue at the most-famous treasure ship ever to be lost at sea, and then found. This attractive 1856-S double eagle was minted in the year prior to the S.S. *Central America* shipwreck, but it never saw circulation. The coin was astonishingly well-preserved at the ocean depths for more than 125 years until its recovery with more than 1,000 other 1856-S twenties, many of which were also in Uncirculated condition.

This is an especially attractive example for the assigned MS62 grade. Sun-gold color radiates from the frosted surfaces amid vibrant cartwheel luster. Marks are understandably minor and infrequent compared to land-based survivors of similar grade (if one could be found), and the strike remains razor-sharp. The coin remains housed in its original gold foil holder, now with CAC endorsement. NGC ID# 2692, PCGS# 70021 Base PCGS# 8919

1857-O Double Eagle, AU53
Elusive New Orleans Twenty

3264 1857-O AU53 NGC. Variety 1. Despite some fortunate seawater recoveries and several rare New Orleans counterparts, the 1857-O remains a scarce Type One issue with just 200 to 250 pieces known from an original mintage of 30,000 pieces. Uncirculated examples are rarities, making any About Uncirculated coin of special interest to double eagle collectors and O-mint specialists.

Liberty's high-point curls and bun show smooth wear and the surfaces are lightly marked, yet there are no heavy abrasions or untoward signs of contact. Mild, pale-olive color balances obverse and reverse, enlivened by traces of orange at the margins. Many collections lack an 1857-O, making this elusive AU example an obvious opportunity not to be missed. Census: 25 in 53, 59 finer (4/19). NGC ID# 2694, PCGS# 8921

1857-S Spiked Shield Twenty, MS66
Exquisite Orange-Gold Color
Ex: S.S. Central America

3265 1857-S Spiked Shield, Variety 20A, MS66 PCGS. CAC. Ex: S.S. Central America. SSCA 0330. The 1857-S double eagle is one of numismatics' most dramatic rags-to-riches stories. The issue was virtually unknown in Mint State until recoveries from shipwrecks — most notably the S.S. Central America — reintroduced a vast store of gold into collector hands. High-grade pieces became the rule, rather than the exception.

This is a stunning Premium Gem example, with exquisite orange-gold color and vivid, frosted luster that radiates from nearly mark-free surfaces. A needle-sharp strike adds to the outstanding eye appeal. The 1857-S is now the most plentiful Liberty twenty in Uncirculated grades, where it offers gold enthusiasts an almost unbelievable opportunity to obtain a Type One double eagle in spectacular, nearly pristine condition. Housed in its original gold label holder. NGC ID# 2696, PCGS# 70000 Base PCGS# 8922

1857-S Double Eagle, MS64
Bold S, Ex: S.S. Central America

3266 1857-S Bold S, Variety 20B, MS64 PCGS. Ex: S.S. Central America, SSCA 7655. At first glance, this near-Gem 1857-S double eagle seems too fine for the grade. Each side displays the blazing yellow-gold mint luster that is characteristic of Central America coins, and the devices are sharp. The reverse is pristine, and the obverse fields are mostly untouched. However, PCGS deemed a few small marks on Liberty's cheek important enough to prevent Gem classification. The S.S. Central America shipwreck is the source of most Uncirculated 1857-S double eagles, and many collectors admire such coins as type representatives. NGC ID# 2696, PCGS# 70001 Base PCGS# 8922

1857-S Twenty Dollar, MS63
S.S. Central America, Variety 20D.

3267 1857-S Faint S, Variety 20D, MS63 PCGS. Ex: S.S. Central America. SSCA 0550. A lovely pumpkin-gold representative that exhibits a few scattered small marks but nonetheless appears conservatively assessed by PCGS. The portrait is particularly smooth. The strike is crisp except on the shoulder curls. Housed in a gold label holder. Included with the lot is a certificate of authenticity signed by Tommy Thompson, an olive-green box imprinted David Hall's North American Trading, and a faux book. NGC ID# 2696, PCGS# 70003 Base PCGS# 8922

1858-O Twenty Dollar, AU55
Scarce in Any Grade

3268 1858-O AU55 NGC. **Variety 4.** Both the 1857-O and 1858-O provide challenge and opportunity to New Orleans gold enthusiasts. The two issues seem to go hand-in-hand in terms of mintage, survivorship, and value. This is a Choice About Uncirculated 1858-O, with vibrant orange-gold color and glimmers of prooflikeness around its raised elements. A sharp strike is tempered by brief high-point wear and slight weakness at stars 1 and 2.

Light field chatter is expected at the AU level, and nominal friction is present throughout the fields. Liberty's portrait shows only shallow, tiny abrasions and no heavy marks. Enough mint luster remains to add substantial eye appeal to this popular O-mint date. Census: 29 in 55, 37 finer (4/19). NGC ID# 2698, PCGS# 8924

1859-S Double Eagle, MS60
Rare in CAC Mint State

3269 1859-S MS60 PCGS. CAC. Although NGC reports that 59 examples were recovered from the 1865 shipwreck of the *S.S. Republic*, nearly all of those pieces are in circulated grades. The 1859-S is collectible in XF and AU, but Mint State examples are very scarce, and rarely seen with a CAC seal. This double eagle displays obverse marks consistent with the grade, but the honey-gold surfaces are original and display ample luster. CAC: 6 in 60, 3 finer (4/19). NGC ID# 269C, PCGS# 8928

1866 Twenty Dollar, MS61
First-Year Motto Issue
Notably Scarce in Mint State

3270 1866 Motto MS61 PCGS. CAC. The first year of the Type Two double eagle design included the motto *IN GOD WE TRUST* above the eagle's head, with a plentiful mintage of nearly 700,000 pieces. Most of the coins were either melted or used in foreign trade, and few double eagles were released into postwar circulation. Some of the mintage found its way into the hands of hoarders, brokers, and gold speculators. Of the few coins that did circulate, those that survive did so in grades ranging from VF to low AU.

This Mint State example far exceeds the average 1866 Motto twenty. Sharply struck with attractive orange-gold color, traces of deep-gray "mint grime" confirm the natural surfaces. Bagmarks and field chatter abound on this lustrous and original Uncirculated example, yet the eye appeal is undeniable, as confirmed by its CAC endorsement. Population: 38 in 61, 11 finer. CAC: 10 in 61, 2 finer (4/19). NGC ID# 269X, PCGS# 8949

1866 Motto Double Eagle, MS60
FS-801, Doubled Reverse

- 3271** 1866 Doubled Motto, FS-801, MS60 PCGS. An attractive orange-gold and sea-green Mint State representative. Sharply struck and coruscating with moderate marks on the field near the chin. Several letters in IN GOD WE TRUST are doubled, most notably the N in IN. 1866 was the first year of the Motto subtype, and perhaps the legend was added by hand to some working dies before a master hub with the legend was created. Another possibility is that a master was briefly in use before a similar replacement, and a reverse die was hubbed from both masters. NGC ID# 38JK, PCGS# 145733 Base PCGS# 8949

1867 Double Eagle, Reflective MS62
Essentially Unobtainable in Better Condition

- 3272** 1867 MS62 PCGS. The second-year Philadelphia Type Two issue claims a mintage of 251,015 coins. Collectors scarcely have the opportunity to obtain examples in this relatively high grade, and finer pieces are essentially unobtainable. This rich yellow-gold Liberty double eagle showcases reflective fields and remarkably bold design detail for the type. Undistracting chatter is expected. Population: 57 in 62 (4 in 62+), 5 finer (4/19). NGC ID# 269Z, PCGS# 8951

1867-S Double Eagle, AU58
Scarce With CAC Seal

- 3273** 1867-S AU58 PCGS. CAC. Large S. Most '67-S twenties instead have a Small Squat S mintmark. A Type Two issue struck after the famous 1857 to 1865 shipwrecks, the 1867-S is usually encountered in circulated grades. This example retains its original caramel-gold color and shows plentiful pockets of luminous luster. The strike is good, and the only mentionable marks are near obverse star 5 and on the rim near the 7 in the date. CAC: 32 in 58, 3 finer (4/19). NGC ID# 26A2, PCGS# 8952

1877-CC Double Eagle, AU53
Type Three Debut Issue, Low Mintage

- 3274** 1877-CC AU53 NGC. CAC. Variety 3-A. The rich, yellow-gold color is typical of 1877-CC twenties in their natural state, here bolstered by mint luster that glows throughout the margins and clings to the raised design elements. Abrasions are few, and those that exist are lessened by circulation, giving this Type Three Carson City double eagle unusually smooth surfaces with attractive eye appeal. The quality is duly recognized by CAC endorsement. Just 42,565 pieces were struck, making this an ideal specimen at the assigned grade. CAC: 10 in 53, 36 finer (4/19). NGC ID# 26AZ, PCGS# 8983

1877-CC Twenty Dollar, AU55
First CC Type Three Issue

- 3275** 1877-CC AU55 NGC. Variety 3-A. This issue brought the Type Three double eagle design to Carson City, and it has been popular with collectors for decades. This briefly circulated piece is mildly reflective and generally orange-gold, though areas of grease stains (as struck) are noted around the left obverse stars and at the top of Liberty's hair bun. Ex: Long Beach Signature (Heritage, 9/2008), lot 4195. NGC ID# 26AZ, PCGS# 8983

1878-S Twenty Dollar, MS62+
Blatantly Original

- 3276** 1878-S MS62+ PCGS. CAC. Small S. Type Three doubles eagles were produced for the second year in 1878, with San Francisco production reaching 1.7 million pieces. The 1878-S is accessible through MS62 but rare in MS63. Khaki and rose accents blend with original orange-gold color. Each side is well-struck and awash in lively mint frost. Scattered marks barely limit the grade. PCGS records 13 higher grading events (5/19). NGC ID# 338K, PCGS# 8987

1879-CC Twenty Dollar, AU50
Uncommonly Lustrous and Sharp

3277 1879-CC AU50 PCGS. Variety 1-A. A single die pair was used for the small mintage of 1879-CC double eagles — just 10,708 pieces were struck. Small rust spots beneath the 9 in the date and the W in TWENTY are diagnostic of the 1879-CC. While this Type Three issue is moderately available in XF to AU condition — primarily from European holdings that returned to the U.S. — nearly all coins show myriad small marks and signs of rough handling during transport and storage.

This is a particularly pleasing coin for the assigned grade. Considerable prooflike surface and luster remains throughout both sides. Abrasions seem few in-hand, although a lens reveals numerous minor marks. Vibrant orange-gold color provides plentiful eye appeal, with only brief high-point wear on the sharply struck devices. Carson City gold specialists and gold collectors of every persuasion flock to the issue based on its low mintage, making 1879-CC twenties scarce by demand as well as in an absolute sense. Population: 40 in 50, 81 finer (4/19). NGC ID# 338L, PCGS# 8989

1879-CC Double Eagle, AU55
An Upper-End Example

3278 1879-CC AU55 NGC. Variety 1-A. Early die state. The 1879-CC double eagle is a better date among Carson City issues, struck to the extent of only 10,708 coins. We have not handled a problem-free example in any grade in more than a year. This issue's availability declines as the grade ascends through the AU spectrum. In our February 2018 Long Beach Signature, an AU53 NGC coin garnered \$18,000, while an AU55 NGC example in the FUN Signature (Heritage, 1/2018), was bid up to \$22,800. An AU58 NGC coin in the same sale realized \$31,200.

This Choice AU example displays original peach-gold and olive coloration with remnants of luster in the fields. Trivial high-point wear accompanies slight field chatter, determining the grade, but there are no unsightly flaws. Eye appeal is quite pleasing for a Carson City coin from this period. Census: 64 in 55 (1 in 55+★), 59 finer (4/19). NGC ID# 338L, PCGS# 8989

1884-CC Double Eagle, Lustrous MS62
High-End Surfaces and Eye Appeal

3279 1884-CC MS62 NGC. Variety 1-A. The 1884-CC double eagle is a rare gift for Carson City gold collectors — a somewhat available issue, minted in relatively large quantity, and well-produced with sharp strikes and pleasing color. All gifts are off, however, above the MS62 level, when the issue becomes rare and pricey. Nearly all 1884-CC Mint State survivors come from European holdings, which seldom exceed the MS60 to 61 grades.

This frosted and minimally abraded MS62 displays clear fields and lustrous, caramel-gold color. A few light marks on Liberty's cheek represent the only deterrent to an even finer grade. Mint luster spotlights sharp definition on both sides, with crisply struck stars and bold hair details. The eye appeal is exceptional for a Carson City twenty. Census: 48 in 62, 6 finer (4/19). NGC ID# 26BK, PCGS# 9001

1884-CC Twenty Dollar, MS62
Popular Carson City Gold Type
Few Pieces Are Finer

3280 1884-CC MS62 PCGS. Variety 1-A. Richly frosted with only minor marks for the assigned grade, this sharp Carson City twenty displays bold mint luster and vibrant cartwheel effect. The 1884-CC ranks high among the most-available double eagles from the Nevada Mint, and it is a preferred issue for type as a result. Only the 1890-CC has a higher mintage among Type Three Carson City twenties.

Flashy sun-gold color blankets both sides, while full details define every strand of Liberty's hair. The stars are fully formed. Although the 1884-CC appears with regularity at auction, at the MS62 level just seven pieces are numerically finer at PCGS, and NGC records only six finer submissions. Population: 81 in 62 (7 in 62+), 7 finer (4/19). NGC ID# 26BK, PCGS# 9001

1889-CC Liberty Double Eagle, AU58
Lustrous and Colorful

- 3281** 1889-CC AU58 NGC. **Variety 1-A.** The 1889-CC Liberty double eagle claims a modest mintage of 30,945 pieces, but the emergence of a hoard in the 1990s makes the issue more available than the small production total would suggest. This attractive near-Mint specimen offers sharply detailed design elements, with just a trace of high-point wear. The lightly abraded yellow and rose-gold surfaces retain much of their original luster. NGC has graded 65 numerically finer examples (4/19). NGC ID# 26BV, PCGS# 9011

1889-CC Twenty Dollar, AU58
Carson City Gold Relic

- 3282** 1889-CC AU58 NGC. **Variety 1-A.** This large gold relic from the fabled Carson City branch mint is sharply struck, especially on the reverse. The star centers and radials are complete, save trivial softness on star 1. Liberty's curls also show limited signs of friction. Yellow-gold surfaces are lustrous with a trace of semireflectivity. Faintly hairlined. NGC ID# 26BV, PCGS# 9011

1889-CC Double Eagle, MS60
Elusive in Mint State

- 3283** 1889-CC MS60 NGC. **Variety 1-A.** The Carson City Mint famously resumed coining operations in 1889 with the production of silver dollars and double eagles. Both issues are highly sought-after; only 30,945 twenties and 350,000 dollars were struck. This frosty Mint State representative features minimal obverse abrasions for the grade. A few of the marginal elements are incomplete, while the centers show crisp detail. The 1889-CC is challenging in Uncirculated condition. Census: 22 in 60 (1 in 60+), 43 finer (4/19). NGC ID# 26BV, PCGS# 9011

1890-CC Double Eagle, MS61
Uncirculated Carson City Type Coin

- 3284** 1890-CC MS61 NGC. **Variety 1-A.** Lapped reverse die state, with the eagle's tailfeathers partially effaced. This Uncirculated coin shows scattered light abrasions, although eye appeal is pleasing or the grade. Luster is alive in the fields, and each side displays a pleasing peach-gold hue. When tilted beneath a light, slight reflectivity becomes apparent. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Twenty, MS61
Popular CC-Mint Type Issue

- 3285** 1890-CC MS61 PCGS. **Variety 1-A.** From a mintage of 91,209 pieces, the 1890-CC is a relatively available Type Three issue and a popular choice of branch mint type collectors. This impressive MS61 specimen is sharply detailed, from an early state of the dies, with complete definition on the tailfeathers. The lustrous orange-gold surfaces are lightly marked for the grade. NGC ID# 26BY, PCGS# 9014

1892-CC Liberty Double Eagle, AU58
In-Demand Type Three Issue

- 3286** 1892-CC AU58 PCGS. **Variety 1-A.** The influx of double eagles from foreign holdings continues, albeit at a much slower pace, and the availability of 1892-CC twenties has increased greatly from the process. Mint State examples remain scarce and in demand, a situation that benefits borderline Uncirculated pieces such as this AU58 example. Gleaming, lightly abraded surfaces retain much of their sharp strike and original mint luster. A few small obverse edge nicks are noted, some of which may be test cuts. NGC ID# 26C6, PCGS# 9020

1897 Double Eagle, MS65 None Numerically Finer

3287 1897 MS65 PCGS. Frosted, finely grained surfaces radiate vibrant, cartwheel mint luster to illuminate this fully struck, Gem Uncirculated 1897 twenty. Splendid rose-gold accents enrich the underlying orange-gold color for outstanding eye appeal. Super-smooth fields show few imperfections of any kind, while Liberty's portrait displays a rounded cheek with only two or three tiny ticks and a bit of mint grime.

Historically, the 1897 is known as one of the most-available Liberty double eagles, which is true up to the Select Uncirculated level. Near-Gem coins are seen on occasion, but full Gems remain stubbornly rare. Neither PCGS nor NGC has certified a single coin numerically finer than the MS65 level. This example is tied with eight other Gems at PCGS. Finding one finer will be a difficult task. Population: 9 in 65 (1 in 65+), 0 finer (4/19). NGC ID# 26CH, PCGS# 9031

1905 Double Eagle, Frosty MS63 Scarce in This Grade

3288 1905 MS63 PCGS. More 5 million double eagles were struck at the Philadelphia Mint in 1904, surely a factor in the comparatively tiny mintage of 58,919 pieces in 1905. As a result, the 1905 is scarce in an absolute sense, and conditionally rare at Select Uncirculated or finer grades. This is a particularly fine Select example, with few marks on the crisply struck and frosted, orange-gold surfaces. A few light abrasions on the cheek, neck, and left obverse field are minor in the context of the assigned grade. Population: 72 in 63 (2 in 63+), 15 finer (4/19). NGC ID# 26D2, PCGS# 9047

HIGH RELIEF DOUBLE EAGLES

1907 High Relief Twenty, Unc Details Wire Rim Variant

3289 1907 High Relief, Wire Rim — Cleaned — NGC Details. Unc.

It is no small thing to have a life-long skill that will pay the bills when other sources of income dry up. Augustus Saint-Gaudens had such a skill as a cameo-cutter. He was apprenticed to Louis Avet at the age of 13, and his skills increased to a master's level over the next decade. He was able to help support himself and his family in New York City, later he supplemented what little money his family sent him while he was in school at the École des Beaux Arts in Paris, and finally when he set up as a sculptor in Rome after the Franco-Prussian War. This early and continuing craft as a cameo-cutter helped develop his later skills as a sculptor, and much later (1905-1907) this experience working in a small space gave him the background to adapt his masterworks, the bust of Nike and the figure of Victory from the Sherman Memorial, to the ten and twenty dollar gold coins. The high relief he used to "sculpt" the double eagle gives this coin a singular and unexcelled appearance, as well as a popularity with collectors that has only increased in the more than a century since the coins' creation. This is a sharply impressed example of Saint-Gaudens' paramount work in U.S. coinage. All the sculptural quality remains, but the surfaces are overbright from cleaning. Each side is refreshingly free from abrasions. NGC ID# 26F2, PCGS# 9135

1907 Wire Rim Double Eagle, Unc Details
Sculptural Quality in a Gold Coin

- 3290 1907 High Relief, Wire Rim — Cleaned — NGC Details. Unc.** Certain historic events provide a convenient dividing line for how society views major cultural shifts. The beginning of the 20th century and World War II are two notable examples. In the middle of the 19th century, the Civil War provided a convenient cultural divide. Before the war, when sculpture was a consideration in America it consisted almost exclusively of reproductions of works from antiquity or Neoclassical themes. After the war, tastes quickly evolved toward works that were more directly and simply focused and dealt in a realistic manner with the subject at hand. This refocusing of the emphasis in sculpture enabled Augustus Saint-Gaudens to develop a true American style and use realism in whatever subject he worked on, making him the dominant American sculptor in the latter part of the 19th century. For the High Relief double eagles he blended realism with the allegorical figure of Liberty, shown striding forward into the dawn of the 20th century. This piece is bright from cleaning, yet retains all of the three-dimensional details, as designed. The strike details are complete in all areas and there are no obvious or mentionable contact marks on either side. NGC ID# 26F2, PCGS# 9135

1907 High Relief, Wire Rim Twenty, MS62
Bright, Yellow-Gold Surfaces

- 3291 1907 High Relief, Wire Rim MS62 NGC.** The contrast was profound between the coinage created by sculptors such as Augustus Saint-Gaudens, Victor Brenner, Hermon MacNeil, and Adolph Weinman when contrasted to the uninspired designs of Charles Barber and George Morgan. One is tempted to use a word such as “shocking” to underscore the artistry achieved by the former group to the workmanlike approach of the latter. However, artistry did not come to coinage without a cost. In the case of the High Relief twenty that cost was how to solve the inherent artistry of the design with the commercial needs of a single strike from a steam press. In the case of the High Relief that was simply not achievable, which is why only 12,367 pieces were produced; the design was later drastically lowered by Charles Barber for commercial needs. This is a bright yellow-gold example of the three-dimensional design by Saint-Gaudens. The strike details are fully brought up in all areas, the grade is limited only by a few small, scattered contact marks. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty, MS62
Wire Rim Example

3292 1907 High Relief, Wire Rim MS62 PCGS. During his 30-year career, Augustus Saint-Gaudens produced more than 100 sculptural portraits, and of those more than 80 are in relief. While he is best known for bringing a sense of realism to American sculpture, his figures were a mixture of the real and ideal. His figure of Victory in the Sherman Memorial was primarily based on model Hettie Anderson, but the face of the Nike appears to be a blend of three models. Thus, an idealized portrait emerges with realistic features. These two sculptural works, Victory in the Sherman Memorial and the head of Nike, were the basis for Saint-Gaudens' twenty and ten dollar gold coins, respectively. While 19th century museum-goers and the few who could afford Saint-Gaudens' commissions had high praise for his works, the widespread availability of the ten and twenty dollar gold pieces made these two works popular to thousands of people who might not otherwise consider sculpture a part of their lives. And it was precisely this sculptural quality that has imbued the High Relief double eagle with a popularity to multiple generations of collectors since their production in 1907. The sculpted nature of the High Relief is fully seen on this attractive MS62 coin. All the features on both sides are fully detailed and both obverse and reverse display light, even reddish patina. There are no obvious or detracting contact marks on either side. NGC ID# 26F2, PCGS# 9135

1907 Twenty Dollar High Relief, MS63
Wire Rim

3293 1907 High Relief, Wire Rim MS63 PCGS. In the closing years of the 19th century, American artists and sculptors became increasingly aware of the possibility of provincialism creeping into their works. Some, like Augustus Saint-Gaudens and Lorado Taft, were able to counteract this tendency by attending the leading art schools in Paris. Saint-Gaudens actively cultivated a more cosmopolitan world view with occasional, but lengthy visits and work trips to the French capital. All the while, his subject matter remained American; yet, his perspective of realism accompanied by a grounding in the classic works of the ancient world gave his sculpture a unique appeal that placed him at the top of the short list of great American sculptors at the dawn of the 20th century. Saint-Gaudens' wider world view enabled him to create original and unanticipated designs when President Roosevelt asked him to take on the project of reimagining the nation's coinage. He did what he knew best, sculpture. His design for the double eagle was executed in high relief, using the power of a hydraulic press. This novel approach gave his High Relief twenty dollar a three-dimensional appearance that remains unequalled to this day. This fully detailed example shows a few tiny contact marks that help explain the grade. Each side displays even, light reddish-gold patina. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty, MS64
Wire Rim, Three Dimensionality in Coin Form

- 3294** 1907 High Relief, Wire Rim MS64 NGC. When Augustus Saint-Gaudens is recalled today it is primarily as the master of late-19th century American sculpture. What is little considered are the influences upon him. In his *Reminiscences* (1913), he reflects on a specific work by his friend and fellow-sculptor Paul Dubois:

“... his ‘Joan of Arc’ is, to my thinking, one of the greatest statues in the world. I know of but one or two that I would rank higher. For elevation, distinction, and nervousness of style it is extraordinary.”

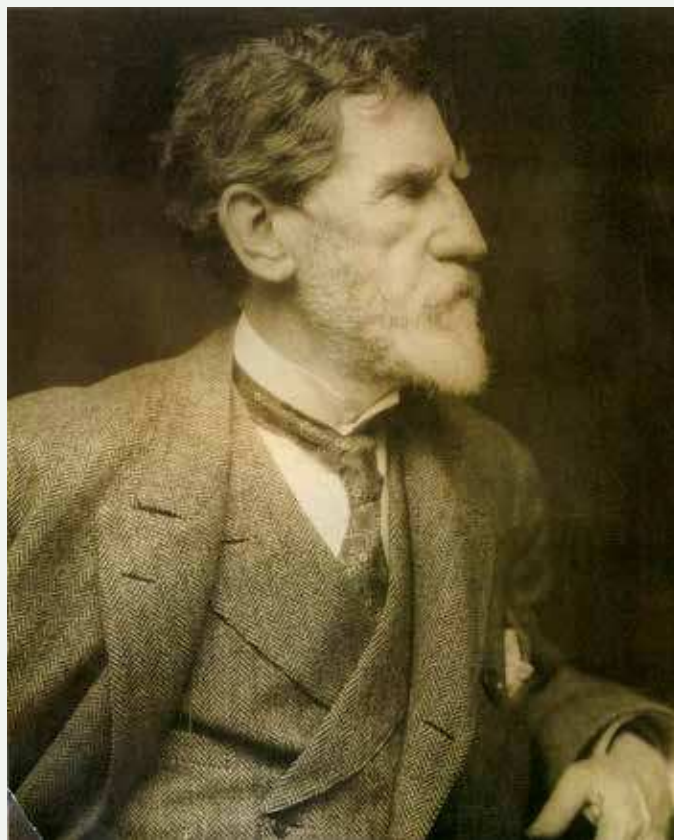

While Saint-Gaudens did not infuse the High Relief twenty with a “nervousness of style” he does point to a commonality both sculptors shared: the translation of realism and feeling into their sculptural works. This is a lovely three-dimensional coin that exhibits subdued satiny mint luster and light, even reddish patina over each side. There are no marks apparent at arm’s length. NGC ID# 26F2, PCGS# 9135

SAINT-GAUDENS DOUBLE EAGLES

1914-D Twenty Dollar, MS66
Only Two Coins Finer at NGC

- 3295** 1914-D MS66 NGC. A favorite mintmarked Saint-Gaudens twenty, the 1914-D is well-known among collectors for its sharp and attractive surfaces. This Premium Gem coin ups the ante for eye appeal, with dazzling mint luster and vibrant coloration. Finely textured fields display flame-orange hues that surround quicksilver-pink centers. Marks are limited to just a few tiny contacts, unseen by the naked eye but visible with magnification. Finer examples are rare. Census: 56 in 66 (2 in 66+), 2 finer (4/19). NGC ID# 26FT, PCGS# 9165

1923 Saint-Gaudens Twenty, MS66
One of Five Pieces So-Graded
None Finer at PCGS or NGC

3296 1923 MS66 PCGS. While many 1923 double eagles avoided mass melting in the 1930s, the issue is scarcer than other non-melt Saint-Gaudens twenties in the 1922 to 1928 date range. It is also a notable condition rarity — scarce in Gem condition, and rare any finer. In lesser grades, the 1923 is considered plentiful and generally follows the market for generic issues.

This Premium Gem example is anything but plentiful, and it is of the utmost importance to Saint-Gaudens specialists. The coin is one of just five such pieces certified by PCGS and NGC combined, with no finer examples at either service. Silk-smooth surfaces display vibrant orange-gold color, and a needle-sharp strike everywhere except the lower-left border (which has the typical slight softness characteristic of the Philadelphia issue). The date and a few of the surrounding rays show minor strike doubling. There are simply no marks of significance, and the eye appeal is extraordinary. At the MS66 grade level, the 1923 is nearly unobtainable — we encourage advanced double eagle collectors to take note and bid accordingly. Population: 5 in 66, 0 finer (4/19). NGC ID# 26G5, PCGS# 9175

1924-D Double Eagle, MS63+
About 1,200 Pieces Extant

3297 1924-D MS63+ PCGS. This former major rarity is now merely scarce thanks to overseas repatriations. Still, only 1,200 or so example survive, with the rest of the 3 million coins having been melted after 1933. Mint luster is softly frosted rather than satiny, swirling over rose-tinged wheat-gold surfaces. This well-struck MS63+ double eagle shows a hint of softness on the Capitol and minor chatter throughout. NGC ID# 34VF, PCGS# 9178

1924-D Double Eagle, MS63+
Challenging Branch Mint Issue

3298 1924-D MS63+ PCGS. Roger Burdette explains in his series reference, *Saint-Gaudens Double Eagles as Illustrated by the Phillip H. Morse and Stephen Duckor Collections*: "A number of small hoards of the 1924-D were uncovered in Europe in the 1950s, 1960s, and even the 1970s. The 1924-D is now only moderately rare, and perhaps just scarce" This MS63+ twenty displays swirling mint luster over peach-gold surfaces that show trivial bagmarks. NGC ID# 34VF, PCGS# 9178

1925-S Double Eagle, AU58
Heavily Melted

3299 1925-S AU58 NGC. This branch mint issue fared poorly under the Gold Recall of 1933. Only 1,500 of the 3.7 million coins struck are believed to have survived the mass meltings. This near-Mint example showcases strong motifs and partial luster. Each side is yellow-gold and minimally abraded. NGC ID# 26GC, PCGS# 9182

1926-S Double Eagle, MS64
Scarcer Mintmarked Issue

- 3300 1926-S MS64 PCGS.** A scarcer mintmarked Saint from the 1920s, but one that is nowhere near as difficult as it was several decades ago. Seldom do we encounter this issue in such a superior state of preservation. The frosty surfaces are bright and lustrous, and display lovely, subtly variegated coloration. Several moderate marks are noted on the obverse, below Liberty's breast, on the upper right (facing) arm, and in the field area adjacent to Liberty's right (facing) knee.
Ex: *FUN Signature (Heritage, 1/2005)*, lot 6091. NGC ID# 26GF, PCGS# 9185

1928 Double Eagle, MS67
Spectacular Luster and Original Color
A Type Coin of High Merit

- 3301 1928 MS67 PCGS.** The Philadelphia Mint produced a staggering number of double eagles in 1928 (more than 8.8 million pieces), which were intended for distribution to Federal Reserve Banks and for use in foreign trade. In *Saint-Gaudens Double Eagles*, Roger Burdette notes that about half of the entire mintage was transferred to the Federal Reserve. From there, many coins served a domestic commercial purpose, which at this time was largely to back outstanding gold certificates. The 1928 was the last double eagle produced and distributed in quantity. Examples are plentiful for type purposes, although Superb Gems claim a trivial survivorship by comparison. Offered here is one of the finest coins certified (3/19), an MS67 example with radiant cartwheel luster and beautiful orange-gold, peach-yellow, and delicate lilac hues. The strike is sharp, and neither side exhibits the bothersome abrasions that typically affect Saint-Gaudens double eagles. NGC ID# 34VK, PCGS# 9189

COMMEMORATIVE SILVER

1893 Isabella Quarter, MS67 Commemorating 'The Industry of Women'

- 3302 1893 Isabella Quarter MS67 PCGS.** The net distribution of the Isabella quarter dollar was 24,214 pieces, and commemorated "the industry of women." Cobalt-blue, orange-gold, and lavender patination is more extensive and deeper on the reverse of this Superb Gem. Its lustrous surfaces have been well cared for. Finer examples are rarely seen. Population: 56 in 67 (7 in 67+), 7 finer (4/19). NGC ID# BYJ9, PCGS# 9220

1936 Albany Half Dollar, MS68 None Certified Numerically Finer

- 3303 1936 Albany MS68 NGC.** The 1936 Albany commemorative half dollar claims a relatively generous distribution of 17,671 pieces, but examples in MS68 condition are prime condition rarities. This magnificent MS68 specimen exhibits well-detailed design elements and impeccably preserved lustrous surfaces, with highlights of sea-green and lavender toning. Census: 11 in 68 (2 in 68★, 1 in 68+★), 0 finer (4/19). NGC ID# 23WZ, PCGS# 9227

1934 Boone Half Dollar, MS68 Tied for Finest Certified

- 3304 1934 Boone MS68 NGC.** This is the first issue in the Daniel Boone Bicentennial half dollar series, which was continued through 1938. In later years, the date 1934 was inscribed above PIONEER YEAR on the reverse, to indicate the true bicentennial of the famous frontiersman's birth. This spectacular MS68 specimen exhibits well-detailed design elements and impeccably preserved, lustrous surfaces, under shades of lavender-gray and pale gold toning, with a few spots of amber. From a distribution of 10,007 pieces. Census: 3 in 68, 0 finer (4/19). NGC ID# BYFN, PCGS# 9257

1936-S Oregon Trail Half Dollar, MS68 Tied for Finest Certified, CAC Endorsed

- 3305 1936-S Oregon MS68 PCGS. CAC.** The 1936-S Oregon Trail half dollar is rarely seen in MS68, although the certified population in this grade is minutely higher than that of its Philadelphia counterpart. Neither PCGS nor NGC have designated an example MS69, placing the present offering within the Condition Census. This piece boasts a remarkably full strike on the rear of the wagon, which is usually soft, and showcases lovely iridescent toning over satiny luster. Tinges of olive, gold, and amber-red color accent the peripheries. The CAC endorsement is especially important here. Population: 9 in 68 (1 in 68+), 0 finer. CAC: 10 in 68, 0 finer (4/19). NGC ID# BYHC, PCGS# 9346

Pioneer Ezra Meeker Retraces His Journey on the Oregon Trail

**1939-D Oregon Trail Half Dollar, MS68+
CAC-Approved Registry Contender
Tied for Finest at PCGS/CAC**

- 3306 1939-D Oregon MS68+ PCGS. CAC.** Tied for finest at PCGS, this Plus-graded, CAC-approved 1939-D Oregon Trail half dollar is also one of the top-graded coins ever offered at auction. NGC lists a single finer example, although it is not known to have ever been offered publicly. This is only the fourth MS68+ coin that we have handled, and the second in a PCGS holder. The other PCGS coin appear in the Philadelphia Signature (Heritage, 8/2012), lot 5468, where it realized \$16,450. This piece boasts CAC endorsement and has rich forest-green and violet tab-toning around the reverse border. The obverse periphery displays more traditional olive-gold and russet-amber hues. Both sides are brilliant across the interiors. This remarkable type coin and Registry Set candidate displays a bold strike and satiny, unabraded mint luster. Population: 33 in 68 (6 in 68+), 0 finer. CAC: 30 in 68, 0 finer (4/19). NGC ID# BYHM, PCGS# 9353

COMMEMORATIVE GOLD

**1903 Louisiana Purchase Gold Dollar, MS67+
McKinley Obverse, CAC Endorsed**

- 3307 1903 Louisiana Purchase, McKinley Gold Dollar MS67+ NGC. CAC.** This remarkable Superb Gem is among the finest 1903 Louisiana Purchase, McKinley gold dollars endorsed by CAC, and the grading services report only a handful of finer pieces. This coin is fully struck and displays bright yellow-gold color. The obverse fields have faint die striations, while the reverse is semiprooflike. Eye appeal is exemplary. NGC lists a half dozen finer coins (5/19). NGC ID# BYLE, PCGS# 7444

**1904 Lewis and Clark Gold Dollar, MS66
Glittering, Colorful Surfaces**

- 3308 1904 Lewis and Clark Gold Dollar MS66 PCGS.** Charles Barber's design benefits greatly from the lemon-yellow and rippling orange accents that punctuate the satin-smooth, lustrous surfaces of this Premium Gem. The Lewis and Clark Exposition gold dollar features dual bareheaded portraits of Meriwether Lewis and William Clark inspired by the works of Charles Willson Peale. A single tiny mark above R in CLARK and some brief patches of die erosion do not distract. Few coins exceed the quality of this eye-stopping example — PCGS shows just 28 numerically finer certifications (4/19). NGC ID# BYLE, PCGS# 7447

PROOF COMMEMORATIVE GOLD

1903 Louisiana Purchase Gold Dollar, PR62
Rare Jefferson Type Proof

- 3309** 1903 Louisiana Purchase, Jefferson Gold Dollar PR62 PCGS. A sharp, deeply reflective yellow-gold example of the rare proof striking. Scattered light contact marks limit the grade, but the collector appeal of this coin as a proof is significant. The first 100 strikings of the Jefferson type dollar were in proof format, and these coins were originally placed in wax-sealed glass frames with a certificate. Few coins survive still in their original frames, but occasionally collectors have an opportunity to acquire the proof coin by itself, as is offered here. NGC ID# BYMF, PCGS# 7482

MODERN BULLION COINS

1995-W Silver Eagle, PR70 Ultra Cameo
Spectacular Modern Proof Key

- 3310** 1995-W Silver Eagle PR70 Ultra Cameo NGC. The frost-white devices of this flawless Ultra Cameo proof glisten with mint luster, a stark contrast to the liquidlike mirroring of the fields that glimmers when tilted in-hand. The coin is fully struck and beautiful. Collectors are well-acquainted with the challenge of acquiring this key West Point issue in top condition. The coin was only distributed to the public through the 1995-W 10th anniversary bullion program proof set, which included this Silver Eagle plus an example of each Gold Eagle denomination, all in proof and all struck at the West Point Mint. Sales of the set reached only 30,125 pieces. This is insignificant for the gold proofs in the set, as they were available for purchase outside of the set. But the 1995-W proof Silver Eagle was not. This example of the proof Silver Eagle key is visually outstanding, living up to the expectations of even the most studious collectors. NGC ID# CFWX, PCGS# 9887

1995-W Silver Eagle, PR70 Deep Cameo
West Point Mint Key

- 3311** 1995-W Silver Eagle PR70 Deep Cameo PCGS. The West Point mintmark is to modern coins as the Carson City mintmark is to the issues of the 19th century — it is often associated with low mintages and greater collector appeal, and many of the most sought-after modern issues are West Point Mint products. Such is the case with the 1995-W proof Silver Eagle. It has the distinction of being the only Silver Eagle struck at West Point prior to the year 2000, and it was distributed in such small numbers — just 30,125 pieces — that it reigns as the series key today across circulation strikes and proofs. Without doubt, a top-grade Deep Cameo example of this issue is a must-have for the advanced Silver Eagle collector. Offered here is a PR70 Deep Cameo with untouched, untuned surfaces and a full strike. It is flawless in all respects. NGC ID# CFWX, PCGS# 9887

TERRITORIAL GOLD

1850 Moffat & Co. Five Dollar, AU53
Problem-Free K-7 Example

- 3312** 1850 Moffat & Co. AU53 NGC. K-7, R.4. Small Eagle. The berry is over the F in FIVE, and the end of the olive branch is beneath the S in S.M.V. Moffat & Co. gold pieces were well-respected in the West and circulated extensively. This AU five dollar piece displays smooth olive-gold surfaces and little wear. An entirely problem-free type coin. Listed on page 401 of the 2020 *Guide Book*. NGC ID# ANJ6, PCGS# 10243

JOHN LITTLE MOFFAT,
Senior Member Firm of Moffat & Co.

1852 Assay Office Fifty, XF40
Kagin-13, 887 Thous.

1853 Assay Office Twenty Dollar, MS61
K-18, 900 Thous. Sharp and Colorful

3313 1852 Assay Office Fifty Dollar, 887 Thous. XF40 PCGS. K-13, Low R.5. This well-circulated fifty dollar gold ingot survives from the penultimate year of the United States Assay Office of Gold. These octagonal gold pieces are scarce in all grades, despite having served an important stint as the workhorse Assay Office denomination. Large-scale issuance of ten dollar and 20 dollar gold coins commenced in Spring 1853, effectively ending the tenure of the fifty dollar pieces as a circulating medium of exchange.

Most of the cumbersome fifties were soon melted, both for lack of demand and for their substandard fineness. The few surviving octagonals are highly valued by collectors as symbolic of the early Gold Rush era, as well as for their shape, size, and heft. This example shows substantial wear and myriad small marks, although the corners and edges are relatively free of heavy hits. We note a short scrape where the ribbon crosses the eagle's wing, and weakness at the outer lettering commensurate with the assigned grade. Listed on page 404 of the 2020 *Guide Book*. Population: 16 in 40, 55 finer (4/19). NGC ID# ANHG, PCGS# 10016

3314 1853 Assay Office, 900 Thous. MS61 PCGS. Kagin-18, R.2. By 1853, the U.S. Assay Office of Gold had equipment comparable to the Philadelphia Mint, capable of producing 36,000 ten dollar and twenty dollar gold pieces per day. The Kagin reference estimates more than 2.5 million twenty dollar gold pieces at 900 Thous. fineness were struck between March and October, 1853 — effectively ending the usefulness of fifty dollar gold slugs, and providing much needed relief for the ongoing shortage of circulating coinage in West Coast commerce.

This is a sharply struck Uncirculated 1853 Assay Office gold piece, with nearly full details on the eagle and shield, plus a crisp strike throughout the peripheral legends and intricate reverse design. A solitary reeding mark near the eagle's right (facing) wing is the sole notable mark, with scattered lesser abrasions visible under a loupe. Vibrant orange-gold color and plentiful mint luster provide great eye appeal. Listed on page 405 of the 2020 *Guide Book*. NGC ID# ANHD, PCGS# 10013

1852 Wass, Molitor Ten, K-4, XF40
Large Head, Wide Date, Ex: SSCA

- 3315** 1852 Wass Molitor, Large Head, Wide Date, XF40 PCGS. K-4, R.5. Ex: S.S. *Central America*. SSCA 7149. A surprising quantity of 60 Wass Molitor & Co. ten dollar Territorial gold pieces were recovered from the S.S. *Central America*. This K-4 variety has a "Short Neck," Pointed Bust, and a wide, uneven date. The coin retains nice detail and yellow-gold color, with an area of copper-orange at the date. As always, the reverse is slightly less detailed than the obverse on this popular, early California gold piece. Housed in its original gold-foil PCGS holder. Listed on page 410 of the 2020 *Guide Book*. NGC ID# 33ZM, PCGS# 10348

1855 Wass, Molitor Ten Dollar, AU50
K-6, Scarce Emergency Issue

- 3316** 1855 Wass Molitor AU50 NGC. K-6, High R.5. Hungarian emigres Samuel Wass and Agoston Molitor established themselves as reputable coiners and assayers in California during the early 1850s. They were petitioned to once again supply coinage in 1855 to satisfy the needs of commerce — needs that were not being met by the fledgling San Francisco Mint. It is likely that Wass, Molitor used a ten dollar die from 1852 to create their new 1855 issue, drilling out the last digit and replacing it with a 5. Kagan explains they had done this previously: "A close look at the obverse of their \$10 issues of 1852 reveals that the last digit, probably a '1,' had been drilled out of the original die and a '2' plugged into its space." The plugged 5 is clear on this minimally circulated yellow-gold representative. Both sides show a normal soft strike, especially the reverse. A deep, semicircular planchet flaw occurs on the upper part of the shield. It does not affect the grade, and this remains a nice example of a challenging and well-known Gold Rush emergency issue. Listed on page 410 of the 2020 *Guide Book*. NGC ID# ANJR, PCGS# 10354

S.S. CENTRAL AMERICA GOLD INGOT

Justh & Hunter Gold Ingot, 266.97 Ounces
Third Largest Marysville Office Ingot Recovered

3317 Justh & Hunter Gold Ingot. 266.97 Ounces. CAGB-360. This is the third-largest Justh & Hunter ingot from the Marysville office recovered from the S.S. *Central America*. It just misses the Extremely Large Size category, but takes top billing in the Very Large Size class. It is of nearly unparalleled historical and numismatic significance as a massive Gold Rush relic.

Marysville, California sits at the confluence of the Feather and Yuba rivers 40 miles north of Sacramento and 125 miles northwest of San Francisco in the heart of Gold Rush territory. It was founded in 1842 as New Mecklenburg by Theodore Cordua, who held a 19-year lease on the land from John Sutter. Cordua sold half his interest to Charles Covillaud in October 1848 and the other half to his brothers-in-law in 1849. By that time, gold fever had firmly taken hold in the surrounding areas. The enterprising Covillaud saw an opportunity and hired August LePlongeon to lay out plans for a new city named after his wife, Mary. A year later in February 1850 Marysville was home to roughly 500 inhabitants and 1,000 itinerants, according to Q. David Bowers' *A California Gold Rush History*. The town continued to develop rapidly and became an important depot for outfitting miners. Both the post office and local newspaper, the *Marysville Herald*, debuted in the summer of 1850. By 1852, the population had swelled to more than 4,000 people. The town's proximity to the northern gold mines made it an ideal location for San Francisco assayers like Harris, Marchand & Co., and Justh & Hunter to expand their businesses. The latter placed an advertisement in the *Marysville Herald* on May 27, 1856, as published in Dan Owens' *California Coiners and Assayers*:

Assay Office ... Of .. Justh & Hunter
First Street, 3d door from D, Marysville

At the solicitation of our customers in the interior, to save time in their returns, we have opened a branch of our Assay Office in this city. Our bars can be cashed at all the Banking Houses, either in Marysville or San Francisco, or at either of our offices.

Rates of charges as in San Francisco. All claims against the firm can be settled either in Marysville or San Francisco.

S. Hillen Hunter, Marysville.

E. Justh, San Francisco.

Additional advertisements in the May 29 issue announced: "The office is under the immediate supervision of Mr. Hunter, of the firm. The reputation of the San Francisco house is so well established as to preclude the necessity of any further remarks." Two days later, the *Herald* include another notice: "The reputation of our Bars being well established in San Francisco and New York, they can always be cashed on the most advantageous terms."

Thanks to the recovery of the S.S. *Central America* treasure, we now have a much better understanding of what was well-known to those in Gold Rush-era California - that Justh & Hunter was a preeminent assayer of the highest repute. The size and number of ingots included in the cache speak for themselves. The ingot measures 177 x 66 x 39 mm. All the imprints are on the top side and there are two company hallmarks: NO. 9434 / company hallmark left / 266.97 OZS. / company hallmark right / 906 FINE. / \$5000.00. The surfaces are bright yellow-gold with only the slightest trace of patina from the rusted ship's hull. An important and very scarce Very Large Size ingot from the Marysville office of Justh & Hunter.

From The Marcello Collection, Part VII.

CALIFORNIA FRACTIONAL GOLD

1853 Arms of California Half, MS61
Humbert Motif Reverse, BG-435

- 3318** 1853 Arms of California 50 Cents, BG-435, Low R.5, MS61 NGC. BG-435 ranks among the most significant die marriages of the entire California fractional gold series, as it is the sole variety that imitates the Great Seal of California, a design at the time only four years old. In addition, the reverse copies the eagle, ribbon, shield, and branch motif from the obverse of the then-current Humbert fifty dollar slugs. BG-435 is the first and last of nine varieties shown on the cover of the 2003 Jay Roe catalog. This butter-gold example is unabraded and attractive. Census: 1 in 61, 5 finer (4/19). NGC ID# 2BKU, PCGS# 10471

PATTERN

1879 Washlady Quarter in Copper
Judd-1591, PR66 Red and Brown Cameo

- 3319** 1879 Washlady Quarter Dollar, Judd-1591, Pollock-1784, Low R.7, PR66 Red and Brown Cameo NGC. The Society Lady, better-known as the Washlady, here in the quarter denomination. Charles Barber's obverse depicts a Liberty head with her hair bound up behind. IN GOD WE TRUST appears in small letters at the upper border with the date below and stars seven left, six right. An eagle on the reverse has wings displayed, holding an olive branch and three arrows in the dexter and sinister claws, respectively, with the wings passing in front of both. UNITED STATES OF AMERICA and E PLURIBUS UNUM are at the upper border with QUAR. DOLLAR below. Struck in copper with a reeded edge. The Washlady patterns are admired far more today than they were in the late 19th century; the pejorative moniker dates to the sale of the New York Coin & Stamp sale of Doughty Collection in April 1891, the term likely given by David Proskey. Perhaps 12 to 15 of the copper pieces survive today. Deep sea-green and cherry-red colors are seen over each side with strong mirroring evident when the piece is angled just so beneath a light. Thick mint frost over the devices also provides cameo contrast. PCGS# 535324

SO-CALLED DOLLAR

1826 Erie Completion Medal, AU55
Struck in Silver, HK-1000

- 3320 1826 Erie Canal Completion Medal, Silver, HK-1000, R.6, AU55 PCGS. The white metal Erie Canal completion medal is the first entry in the classic Hibler-Kappen reference, listed as HK-1. The medal is rarer in silver, and was given the first number in the post-thousand "unique and near-unique issues" section of the 1963 first edition. The Erie Canal was vital to East Coast commerce at a time when railroads were not yet extensive in the United States. This lightly circulated but problem-free example displays attractive golden-brown, powder-blue, lilac-red, and straw-gold toning. NGC ID# 2FCY, PCGS# 643756

End of Session One

SESSION TWO

COLONIALS

1652 Large Planchet Pine Tree Shilling, XF45
Noe-1, W-690, Salmon 1-A

- 3321** 1652 Pine Tree Shilling, Large Planchet XF45 PCGS. Noe-1, W-690, Salmon 1-A, R.2. Pellets at trunk. This smooth and pleasing olive-brown representative has a crisp, even strike and nearly intact peripheral legends. Mildly wavy as always due to its rocker press emission. Ghostly clashmarks on the lower obverse are characteristic of Noe-1. A slender flan flaw is noted at 6:30, and a serrated clip (also as made) is at 12 o'clock. Listed on page 41 of the 2020 *Guide Book*.

Ex: ANA Signature (Heritage, 8/2010), lot 3750. NGC ID# BFMC, PCGS# 23

St. Patrick Farthing, Choice XF
Well-Defined Martin 1c.8-Ba.13

- 3322** (1670-75) St. Patrick Farthing XF45 PCGS. W-11500, M. 1c.8-Ba.13. St. Patrick farthings were made for circulation in Ireland, but Mark Newby brought a hoard of the coppers to New Jersey in 1681, where they were deemed legal tender by the colonial legislature. This walnut-brown representative is richly detailed for the type, though we note a dull mark near 9 o'clock on the reverse. Listed on page 43 of the 2020 *Guide Book*. NGC ID# AUAR, PCGS# 42

1778-79 Rhode Island Ship Token, XF45
Important Pewter Emission

- 3323** 1778-79 Rhode Island Ship Token, Wreath Below, Pewter, XF45 NGC. W-1745, High R.6. Two varieties are known in pewter, W-1735 with VLUGTENDE removed, and W-1745 with a branch placed in the position of that word. The *Whitman Encyclopedia of Colonial and Early American Coins* reports the respective rarities as URS-3 (three to four known) and URS-5 (nine to 16 known) for the two varieties. This Choice XF example features pleasing surfaces with dark brownish-gray patina and respectable eye appeal. Very slight corrosion on each side is typical of these pewter pieces. Listed on page 52 of the 2020 *Guide Book*. Census: 3 in 45, 1 finer (4/19). NGC ID# 2AUN, PCGS# 585

1787 Connecticut Copper, XF40
Rare Miller 47-a.3 Variety

- 3324** 1787 Connecticut Copper, Draped Bust Left, XF40 PCGS. M. 47-a.3, W-4310, R.6. A rare die marriage most interesting for its ornament beneath the bust tip, which resembles a plus sign with four small dots in each quadrant. Both sides have two or three sets of plus signs bookended by dashes. Whitman also assigned 4310 to Miller 49.1-Z.1. Approximately 246 varieties exist for the date; an imposing task for the specialist to acquire. This is a pleasing deep brown example with unmarked and microgranular surfaces. Listed on page 64 of the 2020 *Guide Book*. NGC ID# 2B33, PCGS# 370

- 3325** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, AU53 PCGS. N. 8-X, W-6750, R.3. An intermediate die state with a heavy break through YOUR and BUSINESS, but all letters in the motto are still legible. Sharply struck, even on the sundial numerals and peripheral elements. Slightly off center toward 2 o'clock, and deeply toned in lavender-brown and steel-blue. Ex: Central States Signature (Heritage, 4/2008), lot 26, which realized \$2,300. NGC ID# AX5E, PCGS# 883

**1787 Fugio Cent, MS63 Brown
STATES UNITED, Cinquefoils
Pointed Rays, Newman 12-X**

- 3326** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS63 Brown NGC. N. 12-X, W-6820, R.3. A deep mahogany-brown example with unmarked surfaces. Unevenly struck, but most design details are clear. Uncirculated Fugio cents with the X reverse are very likely from the Bank of New York holdings, distributed over many years. Listed on page 89 of the 2020 *Guide Book*.

Ex: Wayte Raymond, 10/1961; John J. Ford, Jr. Collection, Part I (Stack's, 10/2003), lot 278; FUN Signature (Heritage, 1/2005), lot 6940, which realized \$3,450. NGC ID# AX5E, PCGS# 883

**1787 Fugio Cent, VF35
N. 19-Z, Scarce Raised Rim Variety**

- 3327** 1787 Fugio Cent, STATES UNITED, Raised Rim VF35 PCGS. N. 19-Z, W-6975, R.5. The stop between MIND YOUR is centered above IN on this scarce Raised Rim variety. This piece saw extensive circulation, but the major design elements remain clear. Chocolate-brown surfaces show areas of roughness and planchet flaws through the G in FUGIO and the rings at 3 and 9 o'clock. Listed on page 90 of the 2020 *Guide Book*. NGC ID# 2B8F, PCGS# 895

**Bar 'Cent', VF Details
Iconic Colonial Type Coin**

- 3328** (1785) Bar Copper — Environmental Damage — PCGS Genuine. VF Details. Breen-1145, W-8520, R.4. The November 12, 1785 *New Jersey Gazette* discusses this famous variety, which circulated in New York City bearing designs similar to the buttons on the uniforms of Revolutionary War soldiers. The diagnostic for the variety is a spur from the end of the second horizontal bar. This example has golden-brown high points and darker brown fields. The surfaces are evenly granular, and close inspection reveals a few unobtrusive pin scratches between the bars. Listed on page 76 of the 2020 *Guide Book*.

- 3329** 1795 Talbot, Allum, & Lee Cent MS65+ Brown PCGS. Fuld-1, W-8620, R.1. An outstanding mahogany-brown of this popular 18th century merchant token. The strike is full and no contact or carbon is readily apparent. The obverse field exhibits clash marks, as issued. Many Talbot, Allum & Lee cents were cut down and used as planchets for 1795 Cohen-6 half cents. Listed on page 78 of the 2020 *Guide Book*. Population: 15 in 65 (1 in 65+) Brown, 1 finer (4/19). NGC ID# 2B63, PCGS# 640

- 3330** 1791 Washington Large Eagle Cent AU58 PCGS. Baker-15, W-10610, Musante GW-15, R.2. Deep gunmetal-gray hues dominate, though aquamarine and rose-red undertones emerge when the piece is rotated beneath a light. A crisply struck and problem-free Borderline Uncirculated example. The Large Eagle cents were an attempt to secure an American coinage contract by the Westwood Mint in Birmingham, England. Listed on page 83 of the 2020 *Guide Book*. NGC ID# 2B6Z, PCGS# 702

**1795 Washington Grate Halfpenny, MS65
Baker-29B, Red and Brown Surfaces**

- 3331** 1795 Washington Grate Halfpenny, Large Buttons, Reeded Edge, MS65 Red and Brown PCGS. Baker-29B, W-10955, GW-49, R.2. Large Buttons, with a reeded edge that slopes down to the right. This delightful Gem exhibits sharply detailed design elements, with fine definition on Washington's hair. The well-preserved surfaces are mostly chocolate-brown and crimson, with traces of original red at the peripheries. Listed on page 85 of the 2020 *Guide Book*. Population: 2 in 65 Red and Brown, 0 finer (4/19). NGC ID# 2B7M, PCGS# 747

HALF CENTS

- 3332** 1793 C-2, B-2, R.3 — Environmental Damage — NGC Details. VG. A deep gunmetal-gray example. The surfaces are lightly and evenly granular, save for a piece out on each side, near the R in LIBERTY and the IC in AMERICA. The rims show faint evidence of filing. Struck during the first year of coinage at the Philadelphia Mint, and the only year of the Head Left Liberty Cap design. Our EAC grade Good 4.

- 3333** 1793 C-3, B-3, R.3 — Environmental Damage — PCGS Genuine. VG Details. The 1793 half cent is a single year type from the introductory year of coinage at the fledgling U.S. Mint. This deep mahogany-brown example has bold legends and considerable wreath detail. The surfaces are evenly granular, and the obverse displays a few unimportant hair-thin marks. Our EAC grade AG3.

- 3334** 1794 Normal Head, C-2a, B-2b, High R.2, Fine 12 NGC. Manley Die State 1.0, "rare." No clash marks are present on this nicely defined golden-brown example. Close inspection reveals scattered minor abrasions. An impressive collector coin of the scarce early copper type. Our EAC grade VG8. NGC ID# 2223, PCGS# 35024 Base PCGS# 35015

- 3335** 1795 Lettered Edge, C-1, B-1, R.2, VF20 PCGS. Manley Die State 1.0. The N in CENT leans right, and the 1 in the date was entered by a punch for the letter I. This Liberty Cap type coin has bold legend and dentil definition. Close examination of the tan-brown surfaces reveals delicate thin marks near HALF CENT and on the left obverse field. Our EAC grade Fine 12. NGC ID# 2224, PCGS# 35067 Base PCGS# 1009

3336 1797 Plain Edge, 1 Above 1, C-1, B-1, R.2 — Scratched — ANACS. XF Details. Manley Die State 3.0, “rare.” A die crack extends from 2 o’clock to Liberty’s eye. A nicely defined medium brown example with minimally granular surfaces. Close examination reveals several individually unobtrusive thin marks, along with a prominent scratch through the final A in AMERICA into the wreath. Our EAC grade Fine 12. NGC ID# 2228, PCGS# 35101 Base PCGS# 1042

3337 1803 C-1, B-1, R.1, AU53 NGC. Manley Die State 3.0 with lengthy slender cracks across the reverse. A medium brown half cent with relatively unabraded surfaces, though we note a couple of ticks on the reverse rim near the D in UNITED. The portrait displays a whisper of granularity. Our EAC grade VF35. NGC ID# 222E, PCGS# 35128 Base PCGS# 1060

**1804 Half Cent, MS63+ Brown
Plain 4, No Stems, C-13, B-10**

3338 1804 Plain 4, No Stems, C-13, B-10, R.1, MS63+ Brown PCGS. This plentiful variety is an excellent choice for type collectors as it is available in high grades. The only other similar issue in the Draped Bust half cent series is the 1806 Cohen-4 Large 6 variety. This is a frosty example with mostly olive-brown surfaces that are accompanied by traces of original mint red. The design elements are somewhat bluntly struck as usual. Our EAC grade MS60. This is the only example that PCGS has graded MS63+ with only 50 finer examples (4/19). NGC ID# 222F, PCGS# 35176 Base PCGS# 1063

3339 1855 C-1, B-1, R.1, MS66 Brown PCGS. The sole die marriage for this low mintage date. An attractive sea-green and chocolate-brown Premium Gem. The satiny surfaces are essentially carbon-free, and contact is confined to a few tiny, scattered ticks. Population: 11 in 66 Brown, 1 finer as 66 Red and Brown (4/19). Our EAC grade MS60. NGC ID# 26YZ, PCGS# 35333 Base PCGS# 1233

LARGE CENTS

**1793 Chain Cent, Fine Details
AMERICA, S-3, Bold Date**

3340 1793 Chain, AMERICA, S-3, B-4, Low R.3 — Corroded — NCS. Fine Details. The date is rather closely spaced and the bust line is nearly straight, the latter characteristic diagnostic of the variety. The date, profile, and chain are sharp, and portions of LIBERTY and ONE CENT are clear. The medium brown surfaces are unevenly pitted and without noticeable marks. Our EAC grade Good 6.

3341 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3 — Damaged — NCS. Fine Details. The edge is concealed by the holder, and the one leaf after DOLLAR edge variant is presumed. This Wreath cent is sharper than most survivors. The mottled medium brown and walnut-brown surfaces are lightly burnished and show occasional granularity. The obverse field is tooled near 3 o’clock and Liberty’s nose, and the rims have a few small knocks. Still a desirable example of this first-year, single-year type. Our EAC grade Good 5.

3342 1794 Head of 1794, S-22, B-6, R.1, VF30 PCGS. CAC. S-22 is the “Mounds” variety, named after the die failure above the N in ONE. Despite the sinking reverse, apparently many were struck, given the number in collector holdings. An attractive chocolate-brown example despite minor hairlines and a pair of unobtrusive reverse knocks at 2 and 5 o’clock. Our EAC grade Fine 15. NGC ID# 223P, PCGS# 35531 Base PCGS# 901374

3343 1795 Plain Edge, S-76b, B-4b, R.1 — Curved Clip at 1:00 — VF25 NGC. A 3% clip is centered above the right ribbon end and the RT in LIBERTY. The strike is sharp on the left-side borders, while the right-side borders are lightly brought up and lack dentils. Apart from these mint-made attributes, this is a glossy tan-brown Liberty Cap type coin without any noticeable marks. A moderate spot is east of the ear. Our EAC grade Fine 15. NGC ID# 223T, PCGS# 35723 Base PCGS# 1380

3344 1796 Reverse of 1794, S-110, B-16, R.3 — Damaged — NGC Details. AU. Breen Die State VII with breaks near the Es in UNITED and ONE. A glossy olive-green example with lilac-red tints in protected areas. Luster glimmers from the legends, curls, and wreath. Both sides exhibit many distributed small abrasions. Del Bland graded this coin VF25. Noyes gave it XF40 for sharpness, net VF25. Our assessment is XF40 details, net VF20.
Ex: Anderson Dupont Collection, Part I (Stack’s, 9/1954), lot 144; Eugene Exman Collection / Long Beach Signature (Heritage, 6/2015), lot 3073, which realized \$1,997.50.

**1800/79 S-194, B-8 Cent, AU50
Ex: Adam Mervis Collection**

3345 1800/79 Style Two Hair, S-194, B-8, R.3, AU50 PCGS. Breen Die State V, with reverse rim breaks from the fraction to the final A, and over the C of AMERICA. In this die state, these are separate rim breaks that join together in later states. Tan and olive-brown are blended together with lighter gold, faded from mint red, in the protected areas. Both sides exhibit numerous tiny spots. Our EAC grade VF35.
Ex: Dallas Signature (Heritage, 11/2005), lot 100; ANA Signature (Heritage, 8/2010), lot 3831; The Adam Mervis Large Cent Collection / FUN Signature (Heritage, 1/2014), lot 2710. NGC ID# 2U57, PCGS# 36161 Base PCGS# 1455

**1803 S-255, B-14 Large Cent, AU58
Small Date, Small Fraction**

- 3346 1803 Small Date, Small Fraction, S-255, B-14, R.1, AU58 PCGS.** Luster glimmers from Liberty's hair, the wreath, and the legends. The deep walnut-brown surfaces are only moderately abraded, with two thin lines on the upper neck noted for pedigree purposes. A few specks of debris are present near STATES. Our EAC grade VF20. Population: 24 in 58 (1 in 58+), 33 finer (4/19). NGC ID# 224G, PCGS# 36380 Base PCGS# 1482

**1810 S-283 Cent, AU53
Conditionally Rare Classic Variety**

- 3347 1810 S-283, B-4, R.2, AU53 NGC.** Breen Die State II. Problematic or well-worn examples of S-283 are fairly common, but the variety is difficult to secure in nice AU condition, even by the conditionally challenging standards of the Classic Head type. This deep brown example was struck from misaligned dies, with a sharp impression on right-side elements while the left-side stars and legends are lightly brought up. Relevant marks are relegated to the field between the rim and stars 11 to 13. Our EAC grade XF40. NGC ID# 224S, PCGS# 36478 Base PCGS# 1549

- 3348 1812 Small Date, S-290, B-2, R.1, AU53 NGC. CAC.** Breen Die State III. Block 8. The date digits are nearly level, unlike S-291, which has a high first 1. This ebony-brown cent exhibits light high point wear on the leaves and curls, but luster emerges from the motifs, stars, and legends when the coin is rotated beneath a light. Carbon is absent and the surfaces are only minutely granular. Our EAC grade XF40.
Ex: Eric P. Newman Collection, Part V (Heritage, 11/2014), lot 3123; FUN Signature (Heritage, 1/2019), lot 3889, which realized \$2,400. NGC ID# 224W, PCGS# 36499 Base PCGS# 1561

- 3349 1821 N-2, R.1, XF45 PCGS.** The 1821 has less than one-tenth the mintage of its 1820 predecessor, and is much rarer in better grades since none emerged from the Randall Hoard. This glossy chestnut-brown and steel-blue representative displays a small field dig near the lips but otherwise shows minimal contact. Our EAC grade VF30. NGC ID# 2258, PCGS# 36709 Base PCGS# 1621

- 3350 1830 Large Letters, N-4, R.2, MS64 Brown PCGS.** Noyes Die State E/C. Lengthy die cracks across both borders allow ready attribution. This medium to deep brown cent is refreshingly void of detractions. A few stars are incompletely impressed, but the strike is generally bold. An important example of a conditionally challenging date. Our EAC grade MS60. NGC ID# 225L, PCGS# 36946 Base PCGS# 1672

- 3351 1831 Large Letters, N-7, R.1, MS64 Brown PCGS. CAC.** Noyes Die State C/B. A lovely golden-brown Choice cent with blushes of gunmetal toning at the centers. Marks are limited to a graze on the nose and a couple of hair-thin lines above the date. The left-side stars are incompletely brought up, but the remainder of the strike is bold. Our EAC grade MS60. NGC ID# 225M, PCGS# 36976 Base PCGS# 1678

- 3352 1837 Plain Cords, Medium Letters, N-3, R.1, MS62 Brown PCGS.** Both sides have weak but complete borders, with reverse die cracks as always. The reversed "L"-shaped die scratch from the left end of the bar below the denomination is constant and permits immediate attribution. The surfaces are glossy steel and olive with full luster and sharp design details. Traces of mint red remain on each side. A tiny rim nick appears at star 3. Our EAC grade MS60. Ex: Wayte Raymond (8/23/1938), lot 724; Henry C. Hines; Dr. William H. Sheldon; Floyd Starr (Stack's, 6/1984), lot 332; Stuart Snyder via John Nicholas; R.E. Naftzger, Jr.; Early American Coppers Sale (5/1990), lot 224; Al Boka (Heritage 9/2011), lot 3054. NGC ID# 225U, PCGS# 37153 Base PCGS# 1735

**1838 N-1 Cent, MS66 Brown
Exemplary Young Head Type Coin**

- 3353 1838 N-1, R.1, MS66 Brown PCGS.** The 1 in the date is recut, as is the I in UNITED and the E in AMERICA. A magnificent example with ample hints of faded red in design recesses, though the majority of the coin is lightly toned tan-brown. The essentially unabraded and carbon-free surfaces are lustrous and pleasing. Our EAC grade MS63.
Ex: Long Beach Signature (Heritage, 5/2009), lot 79, which realized \$2,530. NGC ID# 225V, PCGS# 37180 Base PCGS# 1741

- 3354 1839 Silly Head, N-9, R.2, AU55 PCGS.** Ex: Halpern-Boka. The later die state with a rim break over stars 7 and 8 and over star 10. The attractive steel-brown surfaces are pleasing despite a single shallow nick inside star 3. Graded AU55 in Starr and Halpern, and AU50 in the 1990 EAC catalog and in Mendelson. **Plated on page 138 of Al Boka's Provenance Gallery of the Year 1794.** Our EAC grade AU50.
Ex: Henry C. Hines; Dr. William H. Sheldon; Numismatic Gallery; Floyd Starr (Stack's, 12/1984), lot 1780; C. Douglas Smith; Herman Halpern (Stack's, 3/1988), lot 535; March Wells; Early American Coppers Sale (5/1990), lot 260; Dennis Mendelson (Superior, 2/1991), lot 585; Jon Alan Boka; Long Beach Signature (Heritage, 9/2011), lot 3061, which realized \$1,840. NGC ID# 225Y, PCGS# 37234 Base PCGS# 1748

- 3355 1850 N-7, R.2, MS66 Red and Brown PCGS. CAC.** Grellman Die State b, with many Mint State examples known from a "large, well-dispersed hoard," per Bob Grellman. This piece has substantial original red mint color that is slightly subdued with brown toning. Devoid of contact, and a lens reveals only infrequent minuscule carbon. Our EAC grade MS64. CAC: 9 in 66 Red and Brown, 0 finer (4/19). NGC ID# 226G, PCGS# 405881 Base PCGS# 1890

- 3356 1851 N-5, R.2, MS66 Brown PCGS. CAC.** Grellman Die State a. A splendid high-grade type coin with predominantly olive-brown surfaces. Fire-red lingers in protected regions. No marks are apparent, and carbon is confined to a subtle spot or two near the CE in CENT. N-5 and N-45 were struck from the same obverse die, and have the date entered furthest right of any 1851 die variety. Our EAC grade MS62. NGC ID# 226H, PCGS# 406659 Base PCGS# 1892

FLYING EAGLE CENTS

1857 Flying Eagle Cent, MS65 'Very Scarce' Snow-17

- 3357 1857 MS65 NGC. Snow-17.** Minor die doubling is apparent on the obverse legend. Rick Snow calls Snow-17 "a very scarce variety." The present Gem is possibly the finest certified example, since Snow lists the condition census as {63, 62, 58}. The unmarked pumpkin-gold surfaces display minor carbon on the lower obverse field. The tip of the eagle's tail and the tobacco leaf opposite show blending of impression. Certified in a circa-2000 holder. NGC ID# 226P, PCGS# 2016

- 3358 1857 Doubled Die Obverse, Snow-4, FS-101, MS64 PCGS. CAC.** Eagle Eye Photo Seal, card included. Snow-4 is has a widely die doubled obverse, with the spread plainly visible on the border legend, the eagle's beak and eye, and the tailfeathers. CAC has endorsed this coin in its MS64 grade, although its eye appeal rivals that of finer pieces. The coin is well-struck and frosty with natural tan-gold, peach, and delicate greenish hues. NGC ID# 2276, PCGS# 37378 Base PCGS# 2016

- 3359 1857 Doubled Die Obverse, Snow-15, FS-102, MS64 PCGS. CAC.** Eagle Eye Photo Seal, card included. Snow-15 is a strong Doubled Die Obverse variety, showing a spread on all border lettering as well as the eagle's beak and eye. Offered here is a CAC-approved near-Gem example with satiny tan-gold and chestnut patina. Minor strike softness is noted on the eagle's breast. PCGS# 37379 Base PCGS# 2016

- 3360 1857 Obverse Die Clash with Seated Half, Snow-9, FS-402, MS64 PCGS. CAC.** The prominent clash marks of a Seated half dollar obverse appear on the obverse of this important Flying Eagle cent variety. The consensus is that the multidenominational clashing occurred during a die swap procedure on a coining press. A reverse half dollar die was removed from the anvil position of the press and an obverse Flying Eagle cent die was installed. Then the press was allowed to cycle one stroke, possibly to seat the new die, during which the new cent die struck the still-installed half dollar obverse that was in the hammer position. About 100 Flying Eagle cents are known from this clashed die, according to Rick Snow. This near-Gem is CAC endorsed and well-detailed. Satiny tan-gold mint luster exhibits delicate chestnut overtones on each side. Eye appeal is pleasing. NGC ID# 2276, PCGS# 37375 Base PCGS# 2016

1858/7 Flying Eagle Cent, AU58 Snow-1 Overdate

- 3361 1858/7 Large Letters, Snow-1, FS-301, AU58 PCGS. CAC.** High Leaves, Closed E in ONE. This is the popular *Guide Book* variety. The prominent serif of a 7 is visible in the field at the top right of the final 8 in the date. A Large Letters variety, the AM in AMERICA are joined at their bases. This near-Mint coin displays satiny olive-gold and tan surfaces with good eye appeal. The usual strike weakness affects the eagle's tailfeathers and the upper right portion of the reverse wreath. NGC ID# 2277, PCGS# 37383 Base PCGS# 2022

- 3362 1858 Large Letters MS64 PCGS. CAC.** High Leaves Reverse. Closed E in ONE. A crisply struck Choice cent that has mark-free surfaces and coruscating chestnut-gold surfaces. Minor specks are west of the O in OF, and at the base of the front wing. Only a small percentage of certified MS64 examples are confirmed by CAC. NGC ID# 2277, PCGS# 2019

1858 Flying Eagle Cent, MS66 Large Letters Type Coin

- 3363 1858 Large Letters MS66 NGC.** Students of the Flying Eagle cent will want to acquire both a Small Letters 1858 coin and a Large Letters example, the latter of which is offered here in seldom-seen Premium Gem condition. However, for the collector of dates only, or type collectors seeking a single example of the Flying Eagle design, a Large Letters 1858 is an ideal candidate as well. This piece is sharp and satiny with tan-gold mint luster. A streak of deeper amber toning stretches horizontally across the upper obverse. Census: 4 in 66, 0 finer (4/19). NGC ID# 2277, PCGS# 2019

**1858 Flying Eagle Cent, MS66
Large Letters Motif**

- 3364 1858 Large Letters MS66 PCGS.** High Leaves Reverse. Closed E in ONE. A high-grade example of the short-lived introductory small cent type. Flying Eagle cents are notorious for softness on the eagle's tail and the upper leaves of the reverse wreath, but the present piece approaches a full strike. The coin is devoid of apparent abrasions. The obverse legends are lightly strike doubled. Population: 48 in 66 (6 in 66+), 3 finer (4/19). NGC ID# 2277, PCGS# 2019

INDIAN CENTS

- 3365 1859 MS65 NGC.** The well-detailed design elements of this attractive first-year Gem show just a trace of softness on some feather tips and the well-preserved copper-red surfaces radiate vibrant mint luster, with outstanding eye appeal. NGC has graded 11 numerically finer examples (4/19). NGC ID# 227E, PCGS# 2052

**1859 Laurel Wreath Indian Cent, MS66
Tied for Finest at PCGS of This One-Year Type**

- 3366 1859 MS66 PCGS.** The mintage of the 1859 Laurel Wreath Indian cent exceeds 36 million coins, although this issue's status as a one-year type earns it tremendous popularity and makes it scarcer on the market in high grade than it otherwise would be for its survivorship. The Premium Gem offered here is scarce, and each side displays remarkably sharp definition. A hint of reflectivity combines with cartwheel luster in the fields, boosting the vibrancy of rich golden-orange and rose toning on each side. Eye appeal is outstanding. Population: 36 in 66 (5 in 66+), 0 finer (3/19). NGC ID# 227E, PCGS# 2052

- 3367 1868 MS65 Red and Brown PCGS. CAC.** The olive-green obverse center is framed by broad rose-red and orange-gold borders. The reverse is predominantly Red, with a hint of lime-green about the left and lower periphery. Distributed pinpoint carbon limits the grade. CAC: 55 in 65, 6 finer (4/19). NGC ID# 227S, PCGS# 2092

- 3368 1869 MS65 Red and Brown PCGS. CAC.** This attractive Choice example exhibits sharply detailed design elements, with light clashing on both sides. The still-lustrous, well-preserved surfaces show a mix of original red, light brown, and crimson patina. The unlisted variety is interesting for its many parallel die lines near Liberty's neck and profile. CAC: 34 in 65, 3 finer (4/19). NGC ID# 227T, PCGS# 2095

- 3369 1869 MS65 Red and Brown PCGS. CAC.** This delightful Gem exhibits sharply detailed design elements and well-preserved surfaces that show a mix of original red and light-brown patina. The surfaces remain lustrous and appealing with just a few trivial flecks and excellent eye appeal. PCGS has graded only 10 numerically finer examples (4/19). CAC: 36 in 65, 3 finer (4/19). NGC ID# 227T, PCGS# 2095

- 3370 1872 MS64 Red and Brown PCGS. CAC.** Bold N in ONE. The 1872 ranks among the scarcer dates of the series, and near-Gems with plentiful orange-gold color are desirable. The sharply struck surfaces show only a single hair-thin diagonal mark on the field in front of the nose. NGC ID# 227W, PCGS# 2104

- 3371 1876 MS66 Red and Brown PCGS. CAC.** Eagle Eye Photo Seal, card not included. A splendid high-grade example of the lower mintage Centennial date. The reverse field below CENT is moderately mellowed, but most of the coin approaches full Red status. A loupe locates only a couple of pinpoint flecks. CAC: 8 in 66 Red and Brown, 0 finer (4/19). NGC ID# 229V, PCGS# 2125

- 3372 1877 XF40 PCGS.** Sharp detail remains on this 1877 Indian cent, although the high points are lightly worn per the grade. Each side has light scattered marks and deep reddish-brown patina. Problem-free examples of this key date in the upper circulated grades are highly sought-after. This piece is housed in a green label holder. NGC ID# 2284, PCGS# 2127

**1877 Indian Cent, AU58
Partly Lustrous**

- 3373 1877 AU58 NGC.** Hints of luster remain in the protected areas of this nearly Mint State 1877 Indian cent. The obverse displays copper-gold color with chestnut overtones, while the reverse is more deeply colored in olive-brown, green, and rose hues. Eye appeal is pleasing for the grade, where this key date is seldom seen. The shallow N in ONE is a diagnostic of the business strike issue and is not a product of the strike. This piece is generally sharp. NGC ID# 2284, PCGS# 2127

**1877 Cent, MS63 Red and Brown
Nearly Full Red Surfaces**

- 3374 1877 MS63 Red and Brown NGC.** A remarkably well-struck and appealing example of this key Indian cent issue, showing satiny copper-orange mint luster with a few faint chestnut overtones. The coin appears full Red at first glance. No major abrasions are seen and eye appeal is pleasing. The shallow N in ONE confirms the circulation strike origin of this coin. NGC ID# 2284, PCGS# 2128

- 3375 1878 MS66 Red and Brown PCGS. CAC.** Rare in Gem Uncirculated condition, the 1878 is an extremely challenging issue at the Premium Gem and no pieces are certified numerically finer than the MS66 grade level. This lustrous, fire-orange example displays faint brownish-tan overtones at its high points to account for the Red and Brown designation. The strike is razor-sharp, and CAC endorsement bespeaks its overall quality. Population: 16 in 66 Red and Brown, 0 finer. CAC: 6 in 66, 0 finer (3/19). NGC ID# 2285, PCGS# 2131

**1880 Cent, Sharp MS66 Red
Few Known This Fine**

- 3376 1880 MS66 Red PCGS.** Satiny original mint luster illuminates copper-red hues on the obverse of this Premium Gem Red Indian cent, while the reverse has a more golden appearance. Each side is sharply struck and free of obvious abrasions. The 1880 Indian cent is rarely offered this fine, and just three pieces are reported finer. An important Registry Set contender. Population: 24 in 66 (2 in 66+) Red, 3 finer (4/19). NGC ID# 2287, PCGS# 2138

- 3377 1887 MS65 Red PCGS. CAC.** A satiny Gem, this 1887 Indian cent features brilliant orange mint luster with cherry-red accents. A few scattered carbon specks are visible under a loupe. While the lower obverse exhibits brief strike weakness, the balance of the strike is crisp. Population: 62 in 65 (1 in 65+) Red, 30 finer. CAC: 15 in 65, 14 finer (4/19). NGC ID# 228F, PCGS# 2159

**1896 Indian Cent, MS66+ Red
Great as a 19th Century Type Coin**

- 3378 1896 MS66+ Red PCGS. CAC.** This is a simply beautiful Indian cent. The surfaces are thickly frosted, and both sides exude cherry-red and reddish-rose colored luster. We can find no areas of mentionable striking incompleteness, and both sides are equally devoid of distracting impairments. Surprisingly elusive at the present level of preservation. Population: 35 in 66 (8 in 66+) Red, 2 finer. CAC: 16 in 66, 1 finer (4/19).
Ex: Long Beach Signature (Heritage, 6/2002), lot 5178. NGC ID# 228R, PCGS# 2195

**1898 Indian Cent, MS66+ Red
Beautiful Original Mint Luster**

- 3379 1898 MS66+ Red PCGS.** A fully struck, frosty copper-orange Premium Gem with sharp detail throughout and no carbon spotting. Eye appeal is spectacular, as is essential for a high-end type coin. This Plus-graded Red Indian cent is the ideal 19th century type coin for this series. It is scarce in this grade, and finer pieces are rare. Population: 74 in 66 (6 in 66+) Red, 13 finer (3/19). NGC ID# 228T, PCGS# 2201

**1908-S Indian Cent, MS66 Red
Inaugural Branch Mint Coinage**

- 3380 1908-S MS66 Red PCGS.** The 1908-S Indian cent is the first minor coin issue struck by a mint facility other than Philadelphia, excluding the 1851-O three cent silver piece which has a 75% silver alloy. The San Francisco Mint produced slightly more than 1.1 million Indian cents in 1908, marking the lowest mintage in the series since 1877. This Premium Gem Red example displays frosty golden luster and no abrasions. Trivial strike softness is only apparent on the uppermost headdress feather and the wreath bow. Population: 71 in 66 (12 in 66+) Red, 1 finer (4/19). NGC ID# 2296, PCGS# 2234

- 3381 1909-S MS63 Red PCGS. CAC.** This low-mintage, key date Indian cent has bright straw-gold surfaces that exhibit well-struck devices. Lightly scattered marks do not overly detract. Excellent eye appeal. NGC ID# 2298, PCGS# 2240

**1909-S Indian Cent, MS65 Red
Low-Mintage Branch Mint Key**

- 3382 1909-S MS65 Red NGC.** Although many 1909-S Indian cents were put aside both for the low mintage of 309,000 pieces and as the final year of the design, surprisingly few pieces exist at the Gem level with full red color. This is a sharp and attractive example, with strong mint red color mellowed by an overlay of reddish-tan patina. The lustrous surfaces are free of any significant marks or abrasions, and the few scattered carbons that exist are small and inconspicuous. NGC has certified just 9 numerically finer examples (4/19). NGC ID# 2298, PCGS# 2240

**1909-S Indian Cent, MS65 Red
Rare This Fine With CAC Endorsement**

- 3383 1909-S MS65 Red PCGS. CAC.** The 1909-S Indian Head cent boasts the lowest mintage of the series at 309,000 pieces. The issue is always in demand as the last date of the series, as well. The present coin features blazing golden surfaces and outstanding eye appeal. The feather tips are always weakly struck on the 1909-S, and this specimen shows the usual softness in this area, but the remaining details are sharp. PCGS has seen 36 numerically finer submissions. CAC: 29 in 65, 10 finer (4/19). NGC ID# 2298, PCGS# 2240

PROOF INDIAN CENTS

- 3384 1859 PR64 PCGS. CAC.** Fully struck, satiny devices contrast against mirrored fields on this CAC-endorsed near-Gem proof. Each side has mainly tan-gold color, although wisps of cottonwood-green and light rose appear in the fields when tilted beneath a light. The Laurel Wreath reverse was used only in 1859 for production coinage, making this an important one-year type for the Indian cent collector. NGC ID# 2299, PCGS# 2247

**1860 Indian Cent, PR65
Scarcer Proof Die Pairing**

- 3385 1860 PR65 PCGS. CAC. Snow PR-3.** Eagle Eye Photo Seal. This is a scarce proof variety, characterized by a minute die lump over the fifth and sixth pearls. The fields are moderately reflective and the copper-nickel composition has taken on a reddish hue, most easily seen around the margins. Sharply defined throughout with no mentionable contact marks. Population: 42 in 65, 17 finer. CAC: 15 in 65, 5 finer (4/19). NGC ID# 229A, PCGS# 2253

- 3386 1862 PR65 Cameo NGC. CAC. Snow-PR2.** Eagle Eye Photo Seal, card included. A Civil War date that is much scarcer in proof format than suggested by its *Guide Book* estimated mintage of 1,500 to 2,000 pieces. A sharply struck and dusky wheat-gold Gem that boasts unabraded surfaces. CAC: 11 in 65, 15 finer (4/19). *Ex: Boston ANA Signature (Heritage, 8/2010), lot 3916, which realized \$1,610.* NGC ID# 229C, PCGS# 82259

- 3387 1864 Copper-Nickel PR65 PCGS.** The Shield Reverse copper-nickel cent is a scarce proof type, coined only between 1860 and 1864. This fully struck orange-gold Gem has mirrored fields and a mark-free surfaces. A few small field flecks are noted near the date and shoulder curl. NGC ID# 229E, PCGS# 2265

- 3388 1864 Bronze No L PR65 Red and Brown PCGS. CAC. Snow-PR2.** Eagle Eye Photo Seal, card not included. The orange-gold surfaces are only slightly dusky. The borders display blushes of apple-green. A desirable Gem with unmarked and virtually carbon-free surfaces. A low mintage proof variety with a *Guide Book* mintage of 150+ pieces. Certified in a green label holder. CAC: 8 in 65 Red and Brown, 7 finer (4/19). NGC ID# 229F, PCGS# 2277

- 3389 1864 Bronze No L PR65 Red and Brown PCGS. CAC.** A scarce Gem proof example of this inaugural bronze issue, showing copper-pink and golden surfaces with some burgundy toning on the obverse. The strike is sharp and modest field-device contrast is apparent on both sides. Few coins in this grade are CAC endorsed. Population: 42 in 65 (1 in 65+) Red and Brown, 17 finer. CAC: 8 in 65, 7 finer (4/19). NGC ID# 229F, PCGS# 2277

- 3390 1873 Closed 3 PR65 Red PCGS.** An exquisite caramel-gold Gem that boasts a bold strike and contact-free surfaces. Carbon is confined to a solitary speck beneath the O in ONE. Low relief areas of the headdress are lapped away, as made. Population: 44 in 65 (1 in 65+) Red, 3 finer (4/19). NGC ID# 229S, PCGS# 2308

**1877 Indian Cent, PR64 Red and Brown
Considerable Mint Red Remains**

- 3391 1877 PR64 Red and Brown PCGS.** While a Red and Brown coin, there is considerable remaining mint red on each side of this near-Gem. Most of the red luster is seen in the fields with blue-brown mellowing mostly restricted to the devices. The 1877 cent is of obvious interest to collectors because of the scarcity of circulation strikes, especially those in grades comparable to this coin. NGC ID# 229W, PCGS# 2319

- 3392 1883 PR67 Brown PCGS. CAC.** Iridescent colors vacillate between vivid-blue and violet shades, with blue hues claiming the most territory on both sides of this Superb Gem proof. Carefully preserved and likely stored in its original Mint wrapper, the coin displays a razor sharp strike. There are no distracting hairlines or marks. A single carbon on the reverse nestles up against the upright of E in CENT. Eye appeal is extraordinary, and the quality is confirmed by CAC. Population: 29 in 67 (5 in 67+) Brown, 0 finer. CAC: 8 in 67, 0 finer (4/19). NGC ID# 842U, PCGS# 2336

LINCOLN CENTS

- 3393 1909 VDB MS67+ Red PCGS.** Radiant, peach-orange surfaces are essentially free of any marks or signs of carbon, while the finely grained surfaces amplify light in flashy swaths of vibrant mint luster. A pinpoint-sharp strike adds to the technical quality and high eye appeal. Just two 1909 VDBs are numerically finer at PCGS. Population: 46 in 67+ Red, 2 finer (3/19). *From The ACW Collection.* NGC ID# 22AZ, PCGS# 2425

- 3394 1909 VDB MS67+ Red PCGS.** A stunning, high-end Superb Gem, this radiant 1909 VDB reverberates with lilac, blue, and pale-yellow highlights that compete for territory throughout the vivid-orange surfaces. Rich, satin mint luster gleams from every angle. A Registry-quality VDB, with just two pieces certified finer at PCGS and one at NGC. Sharply struck, and essentially mark-free. Population: 46 in 67+ Red, 2 finer (3/19). NGC ID# 22AZ, PCGS# 2425

**1909 VDB Lincoln Cent, MS67+ Red
Prohibitively Rare Any Finer**

- 3395 1909 VDB MS67+ Red PCGS. CAC.** The 1909 VDB Lincoln cent is available in MS67 Red, but Plus-graded coins are scarce. PCGS has seen only two finer examples of this important first-year variety. The coin offered here is among the finest examples of the issue with CAC endorsement. It is well-struck and frosty with varied peach-orange, gold, and lilac-yellow hues. A faint cluster of pepper specks is visible by the date with a loupe. Eye appeal is outstanding. Population: 46 in 67+ Red, 2 finer. CAC: 62 in 67, 0 finer (4/19). *From Charlie O's Collection.* NGC ID# 22AZ, PCGS# 2425

- 3396 1909-S VDB — Altered Color — NGC Details. Unc.** A lustrous and boldly struck example of the introductory and low-mintage key date. NGC regards the pumpkin-gold surfaces as recolored, but they are nonetheless attractive to most collectors. A powerful loupe shows only nearly imperceptible carbon. NGC ID# BYKW, PCGS# 2426

- 3397 1909-S VDB MS64 Red and Brown PCGS.** This lustrous Choice cent is much closer to Red than Brown, though the right reverse field has moderately mellowed. The lustrous surfaces show only a few small freckles above the 09 in the date, and a tick or two beneath the M in AMERICA. As usual for this low mintage key date, the strike is bold throughout. NGC ID# 22B2, PCGS# 2427

- 3398 1909-S VDB MS65 Red and Brown PCGS.** An impressive Choice example of this sought-after, first-year key, with well-detailed design elements and bold VDB. The well-preserved red surfaces have mellowed to light brown in some areas, with vibrant mint luster on both sides. NGC ID# 22B2, PCGS# 2427

**1909-S VDB Cent, MS65 Red and Brown
Less-Often-Seen CAC Example**

- 3399 1909-S VDB MS65 Red and Brown PCGS. CAC.** A mostly Red example of this key San Francisco issue, showing blended golden-olive, amber-orange, and copper-red hues on each side. A shimmering cartwheel effect is easily produced in-hand. This frosty coin is free of abrasions and has only a few small specks. CAC has endorsed just 26 higher-grade representatives (4/19). NGC ID# 22B2, PCGS# 2427

**1909-S VDB Key-Date Cent
MS66 Red and Brown**

- 3400 1909-S VDB MS66 Red and Brown PCGS.** The 1909-S VDB is the most famous issue of the Lincoln cent series, with the possible exception of the 1922 No D and the 1955 Doubled Die. Fortunately for collectors, many examples were set aside, but the low mintage issue becomes conditionally rare at the MS66 level. This crisply struck and practically pristine Premium Gem shows moderate mellowing toward Brown on the high points and open fields. NGC ID# 22B2, PCGS# 2427

- 3401 1909-S VDB MS64 Red NGC.** Fiery orange-gold color is seen over frosty surfaces, with just a minute degree of contact on each side that keeps this key coin out of the Gem category. It is nonetheless a pleasing example of this key date. *Ex: FUN Signature (Heritage, 1/2005), lot 5295, which realized \$3,277.50.* NGC ID# 22B2, PCGS# 2428

**1909 Lincoln Cent, MS67+ Red
Among the Finest**

- 3402 1909 MS67+ Red PCGS.** This piece will appeal to the many fans attempting Registry Sets of this popular series, as one of only two at this top grade level. The obverse is bright, uniform sunset-orange with a fine-grained mattelike texture, while the reverse shows a more golden hues with hints of pale green in the center. Marks are few and minimal. Population: 91 in 67 (14 in 67+) Red, 0 finer (4/19).

Ex: Central States Signature (Heritage, 4/2013), lot 1249.

From Charlie O's Collection. NGC ID# 22B3, PCGS# 2431

- 3403 1909-S MS66 Red PCGS.** Sharply struck with full, vibrant luster and beautiful copper-orange color. The coin is nearly devoid of carbon save for a few obscure specks on the reverse, and eye appeal is outstanding. PCGS lists only 11 finer Red examples (4/19).

Ex: Long Beach Bullet (Heritage, 9/2004), lot 155, which realized \$2,587.50.

From Charlie O's Collection. NGC ID# 22B4, PCGS# 2434

- 3404 1909-S/S S Over Horizontal S, FS-1502, MS66 Red PCGS.** Remnants of the first mintmark impression are apparent near the upper serif of the primary S. A sharply struck Premium Gem that boasts dynamic luster and unabraded olive-green and orange-gold surfaces. A solitary fleck is west of the N in CENT. NGC ID# 22B4, PCGS# 37645 Base PCGS# 92434

**1909-S/S Lincoln Cent, MS66+ Red
FS-1502, S Over Horizontal S**

- 3405 1909-S/S S Over Horizontal S, FS-1502, MS66+ Red PCGS. CAC.** The mintmark is repunched on this *Guide Book* variety, although the first impression was positioned horizontally. On this coin, the mintmark feature is faint but evident with a 10x loupe. PCGS has only certified three FS-1502 representatives finer (4/19), making this Plus-graded Premium Gem Red coin a contender for even the finest Registry Sets. The coin is boldly struck and vibrantly lustrous with original golden-orange mint luster. Neither side exhibits abrasions or carbon.

From The ACW Collection. NGC ID# 22B4, PCGS# 37645 Base PCGS# 92434

- 3406 1910 MS67 Red PCGS.** Beautifully lustrous, frosted surfaces display tan-gold mint luster and sharply struck design elements. Delicate peach-orange hues emerge around portions of the peripheries. A lone fleck is visible between the LI in LIBERTY, and a faint graze in the right obverse field is all that denies perfection for this eye-catching Registry coin. Population: 49 in 67 (12 in 67+) Red, 0 finer (4/19).

From The ACW Collection. NGC ID# 22B5, PCGS# 2437

- 3407 1910 MS67 Red PCGS.** Fully Red 1910 cents are plentiful. However, Red Superb Gems such as the current offering are decidedly scarce. Bright orange-gold luster cascades over each side and the design elements are sharply impressed. Moreover, a few tiny contact marks do not disturb, and carbon spots are lacking. Great overall eye appeal. Population: 50 in 67 (13 in 67+) Red, 0 finer (4/19).

Ex: Long Beach Signature (Heritage, 6/2014), lot 4304, which realized \$4,406.25.

From Charlie O's Collection. NGC ID# 22B5, PCGS# 2437

- 3408 1910 MS67 Red PCGS.** A beautifully colored Superb Gem, showing rich rose-red and coppery hues around the obverse borders with silvery-gold across the center. The reverse displays copper-rose, gold, and lemon-yellow hues. Neither side has bothersome abrasions and the strike is sharp. This Registry coin is among the finest 1910 Lincoln cents certified. Population: 50 in 67 (13 in 67+) Red, 0 finer (4/19). NGC ID# 22B5, PCGS# 2437

- 3409 1910-S MS66 Red PCGS.** Lustrous, light-orange surfaces indicate original Red color throughout both sides of this attractive Premium Gem cent. The finely textured surfaces are sharply struck, with Lincoln's shoulder fully brought up and no signs of weakness at any of the legends. There are no marks to report, and carbon flecks are limited to a few microscopic, light-gray flakes that are invisible to the unaided eye. PCGS reports just eight numerically finer examples (4/19). NGC ID# 22B6, PCGS# 2440

- 3410 1911-D MS66+ Red PCGS.** A spectacular, high-end Premium Gem, this 1911-D displays well-preserved original Red surfaces and vivid mint luster throughout both sides. The reverse is rotated 20° counterclockwise, perhaps accounting for a small area of strike weakness at PLURIBUS, where some tiny marks are visible from the lightly struck planchet. All else is sharp, and carbon is limited to two or three pinpoint specks in the left obverse field above LIBERTY. Population: 10 in 66+ Red, 2 finer (3/19).

From The ACW Collection. NGC ID# 22B8, PCGS# 2446

**1911-D Lincoln Cent, MS66+ Red
Strong Registry Set Contender**

- 3411 1911-D MS66+ Red PCGS. CAC.** 30th Anniversary Green Label Holder. A Plus-graded Premium Gem, this cent exhibits brilliant light orange color and satin luster with an exceptional strike, although the mintmark is weak. PCGS and NGC have each graded one finer piece, but we have never offered a finer example. This lovely cent is an excellent Registry Set candidate as few similarly graded pieces have been certified. The reverse is rotated about 30 degrees counterclockwise on this piece, as it is on many others. Population: 66 in 66 (10 in 66+) Red, 2 finer. CAC: 15 in 66, 0 finer (4/19).

From Charlie O's Collection. NGC ID# 22B8, PCGS# 2446

- 3412 1912 MS66+ Red PCGS.** Lustrous and attractive brick-red surfaces display faint blue overtones and dramatic eye appeal. A sharp strike complements nearly mark-free fields and devices, which are devoid of even microscopic carbon. The finely textured surfaces are smooth and vibrant in-hand, and appropriately Plus-graded by PCGS at the Premium Gem level. The 1912 was produced in large quantity, but it is seldom found so well-preserved. Population: 34 in 66+ Red, 15 finer (4/19).

From The ACW Collection. NGC ID# 22BA, PCGS# 2452

1912-D Cent, MS66 Red
Smooth, Luminous Mint Luster
Among the Finest Certified

- 3413 1912-D MS66 Red PCGS.** Satiny copper-orange mint luster takes on a pinkish hue at certain angles on this Premium Gem Red 1912-D Lincoln cent. Each side is sharply struck and devoid of bothersome abrasions. Eye appeal is exceptional. The 1912-D cent is rarely offered this fine with full Red color, and no numerically finer Red pieces are reported. Registry Set collectors will want to pay attention to this offering. Population: 35 in 66 (4 in 66+) Red, 0 finer (4/19).

From Charlie O's Collection. NGC ID# 22BB, PCGS# 2455

- 3414 1912-S MS65+ Red PCGS.** The 1912-S is a semikey early issue that was seldom located in the 1950s and 1960s when the great roll search was on. This is a high-end Gem with intact mint red luster. Sharply struck throughout. Population: 90 in 65 (11 in 65+) Red, 7 finer (4/19). NGC ID# 22BC, PCGS# 2458

- 3415 1913-D MS65 Red PCGS.** An intricately impressed Gem. The orange-gold surfaces display hints of lilac-red and apple-green. Carbon is virtually absent, and contact is limited to a tiny tick or two near the O in ONE. An early and better Denver issue. Certified in a green label holder. NGC ID# 22BE, PCGS# 2464

1913-D Cent, MS66 Red
Registry Grade Condition Rarity

- 3416 1913-D MS66 Red PCGS.** Ex: Jerald L. Martin Collection. This butter-gold Premium Gem is sharp save for the top of the O in ONE. Each side is unabraded and lustrous with only a few tiny flecks. In MS66 Red, the 1913-D Lincoln cent is rare, and no numerically finer representatives are known. Population: 28 in 66 (5 in 66+) Red, 0 finer (4/19). NGC ID# 22BE, PCGS# 2464

1913-S Cent, MS65 Red
Few Known Finer

- 3417 1913-S MS65 Red PCGS.** Red 1913-S cents are scarce, particularly in Gem condition. Finer than this level, and the date becomes a major rarity that few collectors will be able to acquire. This MS65 Red coin displays attractive satin luster and lovely peach-gold color that has a rose tint throughout. Sharp design elements complement a lack of carbon spotting. Eye appeal is excellent. Population: 88 in 65 (25 in 65+) Red, 4 finer (3/19). *From The ACW Collection.* NGC ID# 22BF, PCGS# 2467

1913-S Cent, MS65 Red
Better Early Branch Issue

- 3418 1913-S MS65 Red PCGS.** A conditionally challenging early branch issue, the 1913-S is seldom seen with seamless orange-gold color. The lustrous surfaces appear unabraded and display only trivial carbon. The strike is generally bold, though the top of the O in ONE shows minor softness. Population: 90 in 65 (27 in 65+) Red, 4 finer (4/19). NGC ID# 22BF, PCGS# 2467

- 3419 1914 MS66 Red PCGS.** Lincoln's portrait is remarkably well-defined, as are the reverse legends. Shades of copper-orange and rose grace each side with splashes of cobalt-blue near the tie, date, and right wheat stalk. Softly frosted luster glows from this early-date Premium Gem. The Mint struck more than 75 million cents in 1914, yet the issue remains very scarce in this grade, and is practically unobtainable any finer.

Ex: Central States Signature (Heritage, 4/2017), lot 3550, which realized \$1,645.

From The ACW Collection. NGC ID# 22BG, PCGS# 2470

- 3420 1914-D MS61 Brown PCGS.** Smooth, deep-brown surfaces show few marks and a sharp strike across pleasing, glossy fields and devices. A small area of old build-up is seen at the forehead of this 1914-D — a rare coin in all grades, and the most challenging of the key Lincoln cent issues.

From The ACW Collection. NGC ID# 84BX, PCGS# 2471

1914-D Cent, MS64 Red
Only 1.1 Million Pieces Struck

- 3421 1914-D MS64 Red PCGS.** A key date to the Lincoln cent series, and one of the most difficult to secure with a sharp strike and enough red to qualify for this designation from the grading services. The color is an attractive red, although faded a tad from the blazing bright seen on fresh-minted copper, as expected for this issue. A loupe finds a trace of a fingerprint on Lincoln's head, and tiny flecks of carbon in the obverse fields. Sharply impressed throughout, with no weakness on the wheat ears or peripheral lettering.
Ex: Long Beach Signature (Heritage, 2/2006), lot 295; Central States Signature (Heritage, 4/2012), lot 3275.
From Charlie O's Collection. NGC ID# 22BH, PCGS# 2473

1914-S Cent, MS65 Red
Seldom Offered So Fine

- 3422 1914-S MS65 Red PCGS.** Barely more than 10% of the 1914-S cents certified by PCGS are designated Red, and a minority of those coins qualify for Gem classification. The piece offered here easily earns that grade with unabraded pumpkin-gold mint luster and sharp devices. Both sides are satiny with pleasing eye appeal. A small fleck near the tip of the left wheat ear serves as a pedigree marker. Only a few finer 1914-S cents are reported. Population: 48 in 65 (5 in 65+) Red, 3 finer (3/19). NGC ID# 22BJ, PCGS# 2476

1915-D Cent, MS66 Red
Color and Condition Rarity

- 3423 1915-D MS66 Red PCGS. CAC.** The obverse is boldly detailed while the reverse of this lovely Premium Gem shows just a touch of peripheral weakness. Both sides have satin luster with bright orange mint color, faintly streaked by time with a few flecks. Though the previous year's Denver cent issue gets far more attention, Lincoln specialists know the challenge the 1915-D poses in high grades. Population: 43 in 66 (5 in 66+) Red, 1 finer. CAC: 17 in 66, 0 finer (4/19).
Ex: October ANA Signature (Heritage, 10/2012), lot 3253; Long Beach Signature (Heritage, 6/2015), lot 3784.
From Charlie O's Collection. NGC ID# 22BL, PCGS# 2482

- 3424 1915-S MS65 Red and Brown PCGS. CAC.** A strong Registry Set candidate, this Gem Red and Brown 1915-S is lustrous and sharply struck, with attractive, finely granular, brick-red surfaces. The strike is razor-sharp through the centers, with only nominal weakness at UNUM. There are virtually no obverse marks seen. Two or three trivial ticks on ONE exist on the reverse, visible under a loupe. CAC endorsement is an important confirmation of high quality. Population: 37 in 65 Red and Brown, 1 finer. CAC: 10 in 65, 0 finer (4/19). NGC ID# 22BM, PCGS# 2484

- 3425 1916-D MS65 Red PCGS. CAC.** The surfaces on this piece are a blazing orange-red, although a loupe reveals scattered, minor carbon and some of the signs of die fatigue that this issue is well-known for. The softness on some of the high points — Lincoln's beard, the left wheat ear — are more a function of the state of the dies than the sharpness of the strike. Population: 68 in 65 (3 in 65+) Red, 22 finer. CAC: 10 in 65, 2 finer (4/19).
Ex: Rosemont Signature (Heritage, 8/2013), lot 3156.
From Charlie O's Collection. NGC ID# 22BP, PCGS# 2491

1916-S Lincoln Cent, MS65 Red
Conditionally Rare This Fine

- 3426 1916-S MS65 Red PCGS.** Ex: Jerald L. Martin Collection. A rather dramatic increase in production at the San Francisco Mint to more than 22.5 million pieces did not noticeably alter this issue's scarcity at the Gem level. Although generally well-struck, other inconsistencies in production keep most Mint State survivors out of the Gem ranks. The strike on this outstanding representative is razor-sharp, and bright golden-tan surfaces display just a few scattered specks of carbon on the obverse. As is characteristic of the issue, the mintmark is more of a blob than an S. Much underrated in relation to its lower-mintage S-mint predecessors. Population: 27 in 65 Red, 0 finer (4/19). NGC ID# 22BR, PCGS# 2494

1917 Cent, Rare MS67 Red
Registry Set Contender

- 3427 1917 MS67 Red PCGS.** Ex: Jerald L. Martin Collection. This early Philadelphia issue is conditionally rare in MS67 Red and nearly uncollectible finer. The present coin offers glowing fire-orange luster and frosty surfaces. The strike is sharp. Under a loupe, only a few tiny specks are discernible. We have not offered a higher-grade Red example of this issue since 2012. Population: 21 in 67 (2 in 67+) Red, 2 finer (4/19). NGC ID# 22BS, PCGS# 2497

**1917 Cent, MS67 Red
Conditionally Rare Registry Coin**

- 3428 1917 MS67 Red PCGS.** Luminous satin surfaces displays shades of yellow-gold, rose, and peach color across this overall Red 1917 Lincoln cent. The coin is fully struck and devoid of mentionable abrasions. The 1917 is rarely offered this fine, and higher-grade Red pieces are virtually uncollectible. Population: 21 in 67 (2 in 67+) Red, 2 finer (4/19).

From The ACW Collection. NGC ID# 22BS, PCGS# 2497

- 3429 1917 Doubled Die Obverse, FS-101, AU55 PCGS.** Lincoln's jaw shows a hint of wear, but this satiny golden-brown cent is well struck and smooth except for a minor field tick near the nose. This early Lincoln variety is listed in the *Guide Book*, and features nice die doubling on the date and IN GOD WE TRUST.

From The ACW Collection. NGC ID# 22BS, PCGS# 37673 Base PCGS# 92495

- 3430 1917-S MS64+ Red PCGS.** The Plus designation separates this high-end 1917-S cent from the majority of near-Gems, and finer examples are rarely seen. Each side is satiny with copper-orange luster and a sharp strike. Only a few insignificant abrasions and specks are discernible with a loupe. Population: 76 in 64 (3 in 64+) Red, 26 finer (4/19).

From The ACW Collection. NGC ID# 22BU, PCGS# 2503

- 3431 1918 MS67 Red PCGS.** Dynamic mint luster adorns each side of this fully struck Superb Gem 1918 Lincoln cent. Save for a couple of faint, linear planchet laminations in the left obverse field, the coin appears flawless, and the copper-orange surfaces just glow beneath a light. A visually finer example will be almost impossible to locate. Population: 37 in 67 (6 in 67+) Red, 1 finer (3/19).

Ex: Anaheim ANA Signature (Heritage, 8/2016), lot 3197, which realized \$1,292.50.

From The ACW Collection. NGC ID# 22BV, PCGS# 2506

**1918 Cent, MS67 Red
Great Color, Impressive Strike**

- 3432 1918 MS67 Red PCGS.** A beautifully preserved Superb Gem, this coin possesses numerous attributes. Gorgeous apricot-gold color with highlights of yellow-gold and orange-red provide this example with exceptional eye appeal. In addition, this piece exhibits bold design definition. The surfaces of both sides are virtually pristine, with only a couple of tiny marks present. A wonderful representative. Population: 37 in 67 (6 in 67+) Red, 1 finer (4/19).

Ex: Long Beach Signature (Heritage, 9/2013), lot 6245.

From Charlie O's Collection. NGC ID# 22BV, PCGS# 2506

- 3433 1919 MS67+ Red PCGS. CAC.** Brilliant copper-orange color flashes brightly throughout both sides of this Plus-graded Superb Gem cent. Sharply struck, the obverse displays near-perfect surfaces even under scrutiny with a strong loupe — a solitary carbon fleck at the point of the first 9 is visible with magnification, but tiny. The reverse is equally vibrant, with a faint planchet lamination above ONE and a couple of minuscule abrasions. CAC endorsement confirms the outstanding quality and eye appeal. Population: 13 in 67+ Red, 18 finer. CAC: 18 in 67, 5 finer (4/19).

From The ACW Collection. NGC ID# 22BY, PCGS# 2515

- 3434 1919 MS67+ Red PCGS. CAC.** A gorgeous and fully struck Superb Gem. Peach-red dominates, although sea-green is also present. Lustrous and virtually free from contact. A few minute toning spots do not detract. Population: 77 in 67 (13 in 67+) Red, 18 finer. CAC: 18 in 67, 5 finer (4/19).

From Charlie O's Collection. NGC ID# 22BY, PCGS# 2515

- 3435 1919-D MS65+ Red PCGS. CAC.** Razor-sharp definition is evident on all design elements of this Plus-graded Gem and the well-preserved original red surfaces show no trace of carbon. Vibrant mint luster adds to the outstanding eye appeal. Population: 73 in 65 (5 in 65+) Red, 21 finer. CAC: 8 in 65, 4 finer (4/19).

From Charlie O's Collection. NGC ID# 22BZ, PCGS# 2518

- 3436 1920-D MS65 Red PCGS.** This Denver issue will never win many prizes for strike or surface quality, although the Gem surfaces of this example exceed expectations for the issue. Original deep, mint red color is plentiful on both sides, with reddish-tan accents and a scattering of pale-gray patina, plus occasional pinpoint carbons. The strike is sharp except at L of LIBERTY and at IN. A few tiny abrasions exist, mostly confined to the reverse — there are no heavy marks. PCGS has certified just eight numerically finer pieces (4/19).

From The ACW Collection. NGC ID# 22C4, PCGS# 2527

- 3437 1920-S MS65 Red and Brown PCGS. CAC.** Both sides are equally luminous and satiny, showing attractive copper-orange undertones beneath chestnut, lilac, and olive-green toning. The obverse is sharply struck from a fresh die, while the reverse shows moderate erosion and weakened detail from die wear. Eye appeal is outstanding, as the important CAC endorsement confirms. Population: 36 in 65 (1 in 65+) Red and Brown, 1 finer. CAC: 18 in 65, 0 finer (4/19). NGC ID# 2547, PCGS# 2529

- 3438 1922 No D, Strong Reverse, FS-401, XF45 PCGS.** Die Pair 2. The Philadelphia Mint was too busy striking silver dollars during 1922 to produce Lincoln cents that year. Thus, Denver Mint examples without any sign of a mintmark are of interest to collectors. The present chocolate-brown cent has a sharp TRUST and second 2 in the date, characteristic of the coveted FS-401 variety. Minimally marked and free from spots.

From Charlie O's Collection. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

**1922 No D Lincoln Cent, AU50
FS-401, Strong Reverse**

- 3439 1922 No D, Strong Reverse, FS-401, AU50 PCGS.** Die Pair 2, with a sharp second 2 in the date and a strong reverse. This AU coin shows little wear, although considerable weakness from a worn die is present on Lincoln's portrait. There is no trace of the Denver mintmark. Each side has satiny smooth chocolate-brown patina and attractive eye appeal. Only the Denver Mint struck cents in 1922. This issue is a better date even when the mintmark is visible. No D coins such as the present are important keys.
From The ACW Collection. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

**1922 No D Lincoln Cent, AU50
Die Pair 2, Strong Reverse**

- 3440 1922 No D, Strong Reverse, FS-401, AU50 PCGS.** Die Pair 2. The 1922 Lincoln cents were all struck at the Denver Mint, but the D mintmark was effaced by polishing (to a greater or lesser degree) on some dies, resulting in the No D and Weak D *Guide Book* varieties for the date. This impressive AU specimen is from Die Pair 2, with the Strong Reverse, the only universally recognized No D die pair. The well-detailed design elements of this coin show only light wear and the pleasing olive-brown surfaces are lightly abraded. Hints of luster remain in the protected fields. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

- 3441 1923 MS67 Red PCGS.** The present Superb Gem is fully struck and exhibits lovely cherry-red and sea-green peripheral color. Only the most minute imperfections emerge beneath a loupe. The upper right obverse field displays mint-made lathe lines, reminiscent of grooves on a phonograph record. Population: 25 in 67 (4 in 67+) Red, 2 finer (4/19).
Ex: Long Beach Signature (Heritage, 6/2013), lot 4348, which realized \$4,700.
From Charlie O's Collection. NGC ID# 22CA, PCGS# 2545

- 3442 1923-S MS64 Red PCGS.** A satiny fire-red Choice cent that lacks any indication of contact. A good strike except on TRUST. A challenging branch mint issue in full Red. Housed in a green label holder. Population: 62 in 64 Red, 16 finer (7/12).
Ex: Long Beach Signature (Heritage, 9/2002), lot 5574; Fred Yee Collection / Long Beach Signature (Heritage, 9/2012), lot 3550, which realized \$2,115.
From Charlie O's Collection. NGC ID# 22CB, PCGS# 2548

- 3443 1924 MS66+ Red PCGS. CAC.** Vibrant peach-gold color and brilliant, lustrous surfaces provide this high-end Premium Gem with stunning eye appeal. A streak of silver appears at portions of PLURIBUS. The design elements are well-defined overall. The surfaces exhibit as-made areas of orange-peel texture. PCGS has graded 12 numerically finer examples (4/19).
Ex: Central States Signature (Heritage, 4/2013), lot 1271.
From Charlie O's Collection. NGC ID# 22CC, PCGS# 2551

- 3444 1924-S MS64 Red PCGS.** Rich mint luster is largely apricot and copper-gold with a few streaks of caramel-honey, particularly across the reverse. This Red near-Gem has the typically blurry appearance of this issue on the obverse, a lack of detail that should not be mistaken for wear. Population: 89 in 64 (2 in 64+) Red, 10 finer (4/19).
From Charlie O's Collection. NGC ID# 22CE, PCGS# 2557

- 3445 1925 MS67+ Red PCGS.** A Plus-graded Superb Gem representative of this popular issue, with sharply detailed design elements and virtually pristine original red surfaces. Vibrant mint luster adds to the terrific eye appeal. Population: 85 in 67 (10 in 67+) Red, 1 finer (4/19).
From Charlie O's Collection. NGC ID# 22CF, PCGS# 2560

**1925 Cent, MS67+ Red
Pristine Conditional Rarity**

- 3446 1925 MS67+ Red PCGS. CAC.** It is true that PCGS has certified a solitary 1925 cent as MS68 Red, but the beholder of the present lot could be forgiven for believing that it is the finest example of the issue. Fully struck and unabraded, lustrous and carbon-free, and the pastel lime-green and peach-gold color is ideal. One of 10 coins certified as MS67+ by PCGS. CAC: 17 in 67, 0 finer (4/19). NGC ID# 22CF, PCGS# 2560

**1925-D Lincoln Cent, MS65 Red
Lovely Color, Early Die State**

- 3447 1925-D MS65 Red PCGS.** Occasionally seen in MS65 Red, the 1925-D Lincoln cent is a major rarity any finer. This piece is exceptional for the grade. Each side is razor-sharp and satiny with a blend of copper-red and lighter rose hues. The fields on each side have faint die striations, indicating an early die state for this piece. With more than 22 million coins struck, early die state examples of the 1925-D cent are difficult to find. Population: 81 in 65 (6 in 65+) Red, 2 finer (3/19).
From The ACW Collection. NGC ID# 22CG, PCGS# 2563

**1925-S Cent, MS64 Red
Seldom Seen Finer**

3448 1925-S MS64 Red PCGS. CAC. The 1925-S Lincoln cent issue is notable, as are the 1924-S, 1926-S, and 1927-S, for being elusive in Gem Red condition. (The 1926-S is far and away the rarest.) This near-Gem Red example of the 1925-S shows largely brick-red color with a few streaks of light-brown, well within the Red context. The strike is sharp on the obverse, adequate on the reverse. Carbon is absent. Population: 57 in 64 Red, 12 finer. CAC: 3 in 64, 4 finer (4/19).

Ex: PNG Dallas Signature (Heritage, 2-3/2015), lot 3415.

From Charlie O's Collection. NGC ID# 22CH, PCGS# 2566

**1926 Cent, MS67+ Red
Tied for the Finest Certified**

3449 1926 MS67+ Red PCGS. CAC. Thickly frosted amber-gold surfaces reveal elements of sun-gold, rose, and mint-green. Two ticks occur above O(NE) and on the C(ENT) and serve as pedigree markers. Sharply struck with great eye appeal. From a mintage of more than 157 million coins, this Superb Gem is tied for finest at both services. Population: 21 in 67+ Red, 0 finer. CAC: 39 in 67, 0 finer (4/19).

Ex: Central States Signature (Heritage, 4-5/2016), lot 3834, which realized \$3,055.

From Charlie O's Collection. NGC ID# 22CJ, PCGS# 2569

**1926-S Lincoln Cent, MS64 Red
Only Two Finer Coins at PCGS**

3450 1926-S MS64 Red PCGS. If the 1922 No D Strong Reverse is excluded, the 1926-S is the rarest Lincoln cent issue in MS65 Red. The present near-Gem comes close to the Holy Grail grade, held back only by a few inconsequential ticks on the EN in CENT and a slightly subdued appearance. The satiny pumpkin-gold fields and devices are impressively free from spots or marks, and the strike is crisp. Specialists are well aware of the rarity of the 1926-S in full Red, and are certain to compete vigorously for this Choice representative. Population: 83 in 64 (5 in 64+) Red, 2 finer (4/19). *Ex: Long Beach Signature (Heritage, 5/2003), lot 5378; Long Beach Signature (Heritage, 9/2003), lot 5694; Long Beach Signature (Heritage, 9/2008), lot 420; Long Beach Signature (Heritage, 9/2016), lot 5382.* *From Charlie O's Collection.* NGC ID# 22CL, PCGS# 2575

**1926-S Cent, MS64 Red
Smooth, Satiny Surfaces**

3451 1926-S MS64 Red PCGS. The 1926-S Lincoln cent is scarce in Red grades, and it is nearly uncollectible finer than the current MS64 coin. This piece is satiny and largely unabraded, showing a sharp strike and no carbon spotting. Each side displays deep chestnut-red color that bleeds to green-gold around the borders. Population: 83 in 64 (5 in 64+) Red, 2 finer (4/19). NGC ID# 22CL, PCGS# 2575

**1927 Lincoln Cent, MS67+ Red
Tied for Finest Certified**

3452 1927 MS67+ Red PCGS. A sharp coin with bright copper-pink mint luster that includes a few peach-orange hues in the margins. Neither side has carbon or abrasions. The 1927 Lincoln cent is scarce this well-preserved, and such coins are important for Registry Set collectors. This Plus-graded coin is tied for the finest 1927 cent certified. Population: 69 in 67 (15 in 67+) Red, 0 finer (3/19). *From The ACW Collection.* NGC ID# 22CM, PCGS# 2578

3453 1927 MS67 Red PCGS. CAC. Most examples of the 1927 Lincoln cent remain uncertified and in low circulated grades, a byproduct of the vast mintage exceeding 144 million coins. Mint State examples are often plagued by abrasions, carbon, or weak strikes, but this Superb Gem shows no such afflictions. The surfaces are apricot-gold with few imperfections, and the strike is razor-sharp throughout. Population: 69 in 67 (15 in 67+) Red, 0 finer. CAC: 29 in 67, 0 finer (4/19).

Ex: *Long Beach Signature* (Heritage, 2/2013), lot 3191, which realized \$3,290.

From *Charlie O's Collection*. NGC ID# 22CM, PCGS# 2578

3454 1928 MS67+ Red PCGS. Brilliant and exceedingly sharp, this high-end Superb Gem 1928 sees its copper-red color mellow to a natural pinkish-gold, with finely grained surfaces that hide only a few tiny marks, visible under a loupe. The coin is highly lustrous and free of carbon. No examples are certified any finer by either service. Population: 16 in 67+ Red, 0 finer (3/19).

From *The ACW Collection*. NGC ID# 22CR, PCGS# 2587

1928 Lincoln Cent, MS67+ Red Never Found Finer

3455 1928 MS67+ Red PCGS. CAC. There has never been a finer 1928 Lincoln cent certified at PCGS or NGC. This delightful Superb Gem has frosty and highly lustrous orange mint brilliance with delicate peripheral gold accents. It is sharply struck and highly appealing. Population: 85 in 67 (18 in 67+) Red, 0 finer (4/19).

Ex: *Central States Signature* (Heritage, 4/2013), lot 1280; *Summer FUN Signature* (Heritage, 7/2016), lot 3134.

From *Charlie O's Collection*. NGC ID# 22CR, PCGS# 2587

1931 Cent, MS67 Red High-End and Conditionally Rare

3456 1931 MS67 Red PCGS. The 1931 Lincoln cent is rare in MS67 Red, and such coins are on the want lists of most Registry Set collectors. No numerically finer pieces are reported. This example displays a sharp strike despite some die wear in the fields. Both sides have vivid peach-orange, gold, and copper-red hues across unabraded surfaces. Population: 37 in 67 (6 in 67+) Red, 0 finer (3/19).

From *The ACW Collection*. NGC ID# 22D2, PCGS# 2614

1931 Cent, MS67 Red Among the Finest Known

3457 1931 MS67 Red PCGS. A conditional rarity and strong Registry Set candidate, tied with 36 others as the finest at PCGS (with six Plus coins certified also). This Superb Gem Red 1931 Lincoln cent displays bold relief elements and rich pumpkin-orange luster. There are no discernible abrasions, although a few small flecks appear on each side when studied beneath a loupe. Numerically equal to the example in the current highest-rated Registry Set.

From *Charlie O's Collection*. NGC ID# 22D2, PCGS# 2614

1931-D Cent, MS66 Red Only One Coin Numerically Finer at PCGS

3458 1931-D MS66 Red PCGS. The 1931-D Lincoln cent is challenging to locate in Gem Red condition, and MS66 Red pieces are especially scarce. This example is within the scope of Registry Set inclusion, with only five MS66+ Red coins and one MS67 Red coin finer at PCGS. It shows a bold strike and natural copper-orange luster, which lightens to a golden hue around the borders. Eye appeal is outstanding. Population: 53 in 66 (5 in 66+) Red, 1 finer (3/19).

From *The ACW Collection*. NGC ID# 22D3, PCGS# 2617

1931-D Cent, MS66 Red Outstanding Overall Quality

3459 1931-D MS66 Red PCGS. A sharply struck Gem with undisturbed cartwheel luster and rich orange-gold color. Well preserved and problem-free. Although long overshadowed by the low-mintage 1931-S, the 1931-D is actually much more elusive in Mint State. A scarce issue with full Red color, the 1931-D is undeniably rare as a Premium Gem. Population: 53 in 66 (5 in 66+) Red, 1 finer (4/19).

Ex: *Chicago Signature* (Heritage, 8/2013), lot 3198.

From *Charlie O's Collection*. NGC ID# 22D3, PCGS# 2617

3460 1931-S MS66 Red PCGS. Scarce in Premium Gem condition, this San Francisco cent is unknown in a numerically finer grade with Full Red color at either PCGS or NGC. A scant mintage (in Lincoln cent terms) of just 866,000 pieces makes the 1931-S an important semikey to the series. This example radiates peach-gold and pumpkin-orange shades, with a sharp strike and few marks, none of which are distracting at all. One or two tiny carbon flecks are of pinpoint size, easily unnoticed.

From The ACW Collection. NGC ID# 22D4, PCGS# 2620

3461 1931-S MS66 Red PCGS. Demand for coins in commerce was diminished by the Great Depression, and San Francisco struck only 866,000 cents that year, the second-lowest mintage of the series. Fortunately for today's collectors, speculators hoarded the issue, and high-grade examples are affordable. This lustrous Premium Gem has rich peach color throughout the obverse. The reverse shows lighter shades of lime and apricot with a dollop of deeper hues at the center.

Ex: New York Signature (Heritage, 2/2014), lot 3165, which realized \$1,880.

From Charlie O's Collection. NGC ID# 22D4, PCGS# 2620

3462 1932 MS67 Red PCGS. *Ex: Jerald L. Martin Collection.* With more than 9 million coins produced, the 1932 is anything but rare in an absolute sense. At the MS67 Red level, however, this date is elusive, and collectors who are assembling PCGS Registry sets of this series should take note that there are no coins certified as MS68 Red or finer. The reddish-orange surfaces are smooth from rim to rim with virtually no carbon to report. Sharply struck and fully lustrous, both sides possess eye appeal to spare. Population: 43 in 67 (3 in 67+) Red, 0 finer (3/19).

From The ACW Collection. NGC ID# 85ZB, PCGS# 2623

3463 1932 MS67 Red PCGS. The Dow-Jones Industrial Average hit an all-time low in 1932, and so did the Philadelphia mintage of Lincoln cents, with barely over 9 million pieces struck. Superb Gem survivors are elusive, and numerically finer coins are nonexistent at either PCGS or NGC. Pumpkin-gold and lilac accents accompany original copper-orange color throughout this smooth and attractive cent. A handful of microscopic marks and two or three tiny carbon flecks are unseen without magnification and inconsequential in size. Population: 43 in 67 (3 in 67+) Red, 0 finer (4/19). NGC ID# 85ZB, PCGS# 2623

3464 1932 MS67 Red PCGS. With more than 9 million coins produced, the 1932 is anything but rare in an absolute sense. At the MS67 Red level, however, this date is elusive, and collectors who are assembling PCGS Registry sets of this series should take note of this top-grade example. The reddish-orange surfaces are smooth from rim to rim with no carbon to report. Sharply struck and fully lustrous, both sides possess eye appeal to spare. Population: 43 in 67 (3 in 67+) Red, 0 finer (4/19).

Ex: Atlanta Signature (Heritage, 8/2001), lot 5464; New York Signature (Heritage, 7/2002), lot 6206.

From Charlie O's Collection. NGC ID# 85ZB, PCGS# 2623

**1932-D Cent, MS67 Red
Bright Mint Luster**

3465 1932-D MS67 Red PCGS. Impeccably preserved, frosty surfaces display vibrant rose-gold luster that illuminates boldly rendered devices. Invisible to the naked eye are a few trivial pepper specks on the obverse, although there are no other mentionable surface imperfections. The 1932-D Lincoln cent is available in most grades, but few achieve Superb Gem status. This Registry-grade example is tied with 19 others as the finest at PCGS (4/19).

Ex: FUN Signature (Heritage, 1/2016), lot 4627.

From Charlie O's Collection. NGC ID# 22D6, PCGS# 2626

3466 1933 MS67+ Red PCGS. The 1933 Lincoln cent is a scarce issue in MS67 condition, with the Red designation. This Plus-graded Superb Gem exhibits sharply detailed design elements and impeccably preserved original red surfaces that radiate vibrant mint luster throughout. The overall eye appeal is terrific. Population: 78 in 67 (11 in 67+) Red, 0 finer (3/19).

From The ACW Collection. NGC ID# 22D7, PCGS# 2629

**1934 Cent, MS68 Red
Tied for Finest Known**

3467 1934 MS68 Red PCGS. A small number of 1934 Lincoln cents qualify for the nearly impossible grade of MS68 Red — 25 coins at PCGS, four at NGC. None are Plus-graded, and none are finer. These top-grade coins are heavily sought-after as Registry Set candidates. The piece offered here displays frosty original luster and essentially flawless surfaces. Rich copper-orange interior hues cede to brighter golden margins. Eye appeal is outstanding. Population: 25 in 68 Red, 0 finer (3/19).

From The ACW Collection. NGC ID# 22D9, PCGS# 2635

**1934 Cent, MS68 Red
Top-Grade Registry Coin**

- 3468** 1934 MS68 Red PCGS. A spectacular fire-orange Superb Gem with unrivaled satin luster and sharp relief elements. No carbon spotting is visible. The 1934 Lincoln cent's availability declines at the Superb Gem Red level, and MS68 Red coins are rare. This is among the finest pieces certified and a Registry Set contender. Population: 25 in 68 Red, 0 finer (4/19).

From Charlie O's Collection. NGC ID# 22D9, PCGS# 2635

**1934-D Cent, MS67 Red
None Numerically Finer**

- 3469** 1934-D MS67 Red PCGS. The 1934-D cent is usually available in most Mint State grades, but pieces grading as high as the Superb Gem level are seldom seen. This piece is one of just 51 MS67 examples at PCGS (5 in 67+), with none finer, and is an excellent choice for a high-quality Registry Set. Satiny coppery-orange luster illuminates crisply struck design elements, with excellent overall preservation. No carbon specks are observed upon close examination.

Ex: Long Beach Signature (Heritage, 6/2014), lot 3212.

From Charlie O's Collection. NGC ID# 22DA, PCGS# 2638

**1934-D Cent, Luminous MS67 Red
Among the Finest Pieces Certified
One of a Dozen in This Grade at CAC**

- 3470** 1934-D MS67 Red PCGS. CAC. A Superb Gem, this Red 1934-D Lincoln cent is among the finest pieces certified. Examples in this condition are important Registry Set acquisitions, and they are scarce. This piece is CAC endorsed — one of just a dozen top-grade coins so recognized. Luminous copper-orange surfaces complement satiny mint luster, while neither side has obvious carbon spotting. The coin is well-struck with outstanding visual appeal. Population: 50 in 67 (4 in 67+) Red, 0 finer (3/19). NGC ID# 22DA, PCGS# 2638

**1935 Cent, MS68 Red
Few Known This Fine**

- 3471** 1935 MS68 Red PCGS. A Condition Census example of this Philadelphia issue, essential for a high-ranking Registry Set. PCGS and NGC combined report only 13 coins in MS68 and MS68+ Red, with none finer (4/19). This piece displays essentially flawless satin surfaces and rich color. On the obverse, the hue is peach-gold, while the reverse is fire-orange. Population: 12 in 68 (1 in 68+) Red, 0 finer (4/19).

From Charlie O's Collection. NGC ID# 22DB, PCGS# 2641

**1936 Cent, MS64 Red and Brown
FS-101, Doubled Die Obverse**

- 3472** 1936 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS. CAC. FS-101 is the most prominent doubled die obverse of 1936, the variety referenced by the *Guide Book* listing. Die doubling is prominent on all obverse lettering, the date, and Lincoln's bowtie. This is a particularly luminous and satiny coin with chestnut toning over rich copper-orange mint luster. A few green and rose accents are also visible with a loupe. Neither side has bothersome abrasions.

From The ACW Collection. NGC ID# 22DE, PCGS# 37749 Base PCGS# 82649

**1936-S Cent, MS67+ Red
The Only Plus-Graded Coin This Fine at NGC**

- 3473** 1936-S MS67+ Red NGC. A virtually flawless coin with satiny copper-orange and golden mint luster, sharp devices, and carbon-free surfaces. Eye appeal is spectacular. This is the sole finest 1936-S cent at NGC, even if only by the margin of the Plus designation. PCGS also lists a single MS67+ Red example with none finer (4/19). This is an unsurpassed and nearly unequaled Registry coin.

From The ACW Collection. NGC ID# 22DG, PCGS# 2656

3474 1940-D MS67+ Red PCGS. CAC. Riotous red color greets the eye on this spectacular Superb Gem 1940-D. Cherry-red centers yield to lustrous, lilac accents at the borders. Remarkably free of marks or carbon, the strike is sharp and the eye appeal is terrific. Plus-graded by PCGS with CAC endorsement. Population: 23 in 67+ Red, 1 finer. CAC: 30 in 67, 0 finer (3/19).
From The ACW Collection. NGC ID# 22DU, PCGS# 2689

3475 1940-D MS67+ Red PCGS. CAC. This Plus-graded Superb Gem exhibits well-detailed design elements and impeccably preserved original red surfaces, with vibrant mint luster and outstanding eye appeal. PCGS has certified one numerically finer example (4/19).
From Charlie O's Collection. NGC ID# 22DU, PCGS# 2689

3476 1941 Doubled Die Obverse, FS-101, MS65 Red PCGS. Unmistakable die doubling exists on the obverse at IN GOD WE TRUST, LIBERTY, and the date (especially visible at 4). This is a brilliant, flame-orange example with hints of powder-blue near the top of Lincoln's head. Dynamic cartwheel luster illuminates virtually mark-free surfaces. A lens reveals only scattered pinpoint flecks.
From The ACW Collection. NGC ID# 22DW, PCGS# 37780 Base PCGS# 92695

1943 Steel Cent, Top-Grade MS68 Important Registry Coin

3477 1943 MS68 PCGS. The strike sharpness on this high-end Superb Gem is incredible, and neither side has a single notable abrasion. Satiny luster has the faintest bluish tint that complements the cartwheel effect. Philadelphia steel cents of 1943 are plentiful in most grades, but they become scarce in this Registry-level condition. None are certified numerically finer. Population: 55 in 68, 0 finer (3/19).
From The ACW Collection. NGC ID# 22E4, PCGS# 2711

3478 1943 MS68 PCGS. This Superb Gem example exhibits a fine horizontal die crack across Lincoln's coat and light clash marks on each side. The coin is sharp and satiny with brilliant silver-white luster. No finer 1943 steel cents are certified, making this piece important Registry collectors. Population: 58 in 68, 0 finer (4/19).
Ex: Baltimore Signature (Heritage, 7/2003), lot 5678, which realized \$718.75; Long Beach Signature (Heritage, 6/2013), lot 3750, which realized \$1,880.
From Charlie O's Collection. NGC ID# 22E4, PCGS# 2711

3479 1943 MS68 PCGS. A spectacular MS68 specimen of the famous wartime "steel" cent, with sharp definition on the design elements and impeccably preserved surfaces, with vibrant mint luster on both sides. Some interesting die striations and die polish lines are evident on the reverse. Population: 56 in 68, 0 finer (4/19). NGC ID# 22E4, PCGS# 2711

3480 1943-D MS68 PCGS. Sharply struck with exceptional mint luster and splendidly preserved surfaces. A loupe reveals light die striations and die polish lines (as struck) on each side, but no marks that require mention and vibrant eye appeal. Neither service has certified a numerically finer example (4/19).
From The ACW Collection. NGC ID# 22E6, PCGS# 2714

1943-D Cent, MS68 Nearly Perfect One-Year Type Coin

3481 1943-D MS68 PCGS. CAC. A virtually perfect silver-white representative of this single-year type that shows no obvious or distracting marks. A small light gray spot is barely visible on the T in CENT. None have been certified finer at either major service (4/19).

Ex: Central States Signature (Heritage, 4/2013), lot 1288.

From Charlie O's Collection. NGC ID# 22E6, PCGS# 2714

3482 1943-S MS68 PCGS. High-grade 1943-S steel cents have survived in quantity, but relatively few are known as fine as MS68, and none are certified finer (3/19). This top-grade Registry coin displays a sharp strike despite heavy metal flowlines in the fields. Not a single abrasion is seen. The undisturbed and lustrous surfaces offer pleasing eye appeal.

From The ACW Collection. NGC ID# 22E8, PCGS# 2717

3483 1943-S MS68 PCGS. This fully struck and untuned steel cent lacks even the slightest contact, and is immaculate save for a small spot on the field near the profile. None have been certified finer by either leading service.

Ex: Dallas Bullet Sale (Heritage, 11/2003), lot 332; Davis Conway Collection / Long Beach Signature (Heritage, 9/2008), lot 438; Rosemont Signature (Heritage, 8/2013), lot 3208, which realized \$3,055.

From Charlie O's Collection. NGC ID# 22E8, PCGS# 2717

3484 1944-D/S FS-511 MS66 Red NGC. The top of an S looms over the Denver mintmark. The upper curve and serif are delicate but readily apparent. A portion of the lower curve also appears inside the upper portion of the D. The *Guide Book* FS-511 is not to be confused with the less popular and more available FS-512 overmintmark, which shows the remnant of an S mostly within the loop of the D. This is a lovely fire-red Premium Gem, sharply struck, with minimal contact and a tiny spot concealed on Lincoln's suit. Seldom seen this fine, it is an important *Cherrypickers'* and *Guide Book* variety. NGC ID# 2734, PCGS# 37834 Base PCGS# 2728

3485 1944-D/S FS-511 MS66 Red PCGS. The *Cherrypickers'* reference states: "This variety is the 1944-D/S that is generally quoted in various price guides. This variety is much rarer than [FS-512]." FS-511 shows the upper portion of an S protruding from the top of the primary D mintmark. The S is quite prominent, earning the variety increased popularity. This Premium Gem example displays a bold strike and frosty copper-orange mint luster. A few small flecks do not detract. Population: 17 in 66 (6 in 66+) Red, 2 finer (3/19).
From The ACW Collection. NGC ID# 2734, PCGS# 37834 Base PCGS# 2728

3486 1945 MS67+ Red PCGS. Vibrantly lustrous mint Red color dominates both sides of this Plus-graded Superb Gem 1845, although attractive lilac accents are nearly as compelling across the smooth, nearly flawless surfaces. Some tiny ticks on the shoulder are seemingly unavoidable for the issue, which is otherwise sharply struck throughout both sides. More than one billion pieces were struck, yet remarkably few pieces are available for top-tier Registry collectors. PCGS has certified just a dozen such pieces in Red format, and none finer. Population: 12 in 67+ Red, 0 finer (4/19).
From The ACW Collection. NGC ID# 22EG, PCGS# 2734

3487 1945 MS67+ Red PCGS. Struck from lightly clashed dies but showing pristine preservation and rich fire-orange mint luster. This top-grade 1945 Lincoln cent is well-struck and highly appealing. The finest PCGS-certified 1945 cents grade MS67+ Red, and these are rarely available. Population: 12 in 67+ Red, 0 finer (4/19).
From Charlie O's Collection. NGC ID# 22EG, PCGS# 2734

3488 1946-S MS67+ Red PCGS. CAC. Trumpet Tail S. Given that its mintage approaches 200 million pieces, the 1946-S will never be rare in typical Mint State. But in the MS67+ Red grade, the issue acquires conditional significance, since only 12 pieces have attained that level at PCGS (as of 3/19) with none finer. A sharply struck and unabraded orange-red Superb Gem. CAC: 36 in 67, 0 finer (4/19).

From The ACW Collection. NGC ID# 22EM, PCGS# 2749

3489 1947-D MS67+ Red PCGS. Tied for the finest-certified at either PCGS or NGC in full Red format, this exceptional 1947-D approaches an even finer grade with finely textured fields and rich, flame-orange color. A few tiny ticks on the Lincoln's high points are visible under a lens, but unseen in-hand. Eye appeal is off the charts. Population: 8 in 67+ Red, 0 finer (3/19).

From The ACW Collection. NGC ID# 22EP, PCGS# 2755

3490 1947-S MS67+ Red PCGS. CAC. Sans Serif S. A remarkable orange-red Superb Gem whose dynamic luster and precise strike contribute further to the immense eye appeal. As of (4/19), PCGS has certified 14 examples as MS67+ and none finer. CAC: 49 in 67, 0 finer (4/19).

Ex: *Chicago ANA Signature (Heritage, 8/2014), lot 3152, which realized \$1,292.50.*

From Charlie O's Collection. NGC ID# 22ER, PCGS# 2758

1948 Lincoln Cent, MS67 Red Registry-Grade Example

3491 1948 MS67 Red PCGS. CAC. Wisps of lilac and rose accent fiery copper-red mint bloom on each side, while the devices are well-defined and the surfaces are essentially free of abrasions. A couple minute carbon specks are observed with a lens, though the appeal is uninhibited to the unaided eye. Population: 31 in 67 (2 in 67+) Red, 0 finer. CAC: 7 in 67, 0 finer (4/19).

From Charlie O's Collection. NGC ID# 22ES, PCGS# 2761

1950 Lincoln Cent, MS67+ Red Tied for Finest at PCGS

3492 1950 MS67+ Red PCGS. CAC. This is the plate coin for the CoinFacts website. Glowing luster blends with copper-orange and sunburst-gold color over immaculately preserved surfaces. Lincoln's hair and the wheat ears showcase needle-sharp definition. There are no mentionable carbon spots on either side of this Registry-quality piece, while a microscopic fleck adjacent to the O in ONE serves as a pedigree marker. Amazing eye appeal. PCGS reports just two examples with the coveted Plus designation (4/19).

Ex: *Central States Signature (Heritage, 4/2015), lot 3388.*

From Charlie O's Collection. NGC ID# 22LA, PCGS# 2779

3493 1950-D MS67+ Red PCGS. Blushes of gold, fire-orange, and rose-red adorn the frosty, untouched surfaces of this high-end Superb Gem 1950-D cent. A few faint flecks are seen only with a loupe. No 1950-D cents are finer at PCGS or NGC, making this Plus-graded coin a must-have for the Registry Set collector. Population: 62 in 67 (14 in 67+) Red, 0 finer (4/19).

From The ACW Collection. NGC ID# 83XR, PCGS# 2782

3494 1950-D MS67+ Red PCGS. Fiery-orange and rose-gold hues intermingle over each side of this high-end Superb Gem, one of the finest certified by either service. Lincoln's portrait is boldly defined, and the pristine surfaces display radiant cartwheel luster that is devoid of carbon spotting. Light clash marks appear on the obverse before and behind Lincoln's neck. Population: 62 in 67 (14 in 67+) Red, 0 finer (4/19).

From Charlie O's Collection. NGC ID# 83XR, PCGS# 2782

1951-S Cent, MS67+ Red Top-Grade PCGS Registry Coin Scarce With CAC Endorsement

3495 1951-S MS67+ Red PCGS. CAC. The 1951-S Lincoln cent is plentiful in MS67 Red, although Plus-graded coins are rarely seen. Just as scarce are CAC-approved coins. This piece combines those attributes and is tied for the finest 1951-S at PCGS, a litmus test for the perfect Registry coin. Each side showcases fire-orange copper-red hues across satiny mint luster. The devices are sharp and no carbon spotting is present. Population: 28 in 67+ Red, 0 finer. CAC: 42 in 67, 0 finer (3/19).

From The ACW Collection. NGC ID# 22F5, PCGS# 2794

3496 1952-D MS67+ Red PCGS. This Plus-graded Superb Gem exhibits well-detailed design elements and virtually flawless original red surfaces, with a single minor tick on the obverse rim, above the second T in TRUST. Population: 96 in 67 (9 in 67+) Red, 0 finer (4/19).

From Charlie O's Collection. NGC ID# 22F7, PCGS# 2800

3497 1952-S MS67+ Red PCGS. CAC. Plus-graded by PCGS and CAC-endorsed, this attractive 1952-S displays lustrous, blaze-orange color and carbon-free surfaces. The strike is sharp throughout. An interesting, tornado-shaped die break connects the S mintmark to 5 in the date — a scarce anomaly we have seen before on a few 1952-S cents. The mintage of nearly 138 million pieces has yielded fewer than three dozen Plus-graded Superb Gem 1952-S cents, none of which grade any finer than MS67+ at either service. PCGS population: 25 in 67+ Red, 0 finer. CAC: 61 in 67, 0 finer (3/19).

From The ACW Collection. NGC ID# 22F8, PCGS# 2803

3498 1953 MS67 Red PCGS. Visually arresting fire-red and olive-green coloration is the hallmark of this lustrous and boldly impressed Superb Gem. A lens reveals contact on the R in PLURIBUS and the O in ONE. PCGS has graded just 25 coins in MS67 with none finer (4/19), making the present lot an excellent opportunity for the Registry Set specialist.

Ex: *Chicago ANA Signature (Heritage, 8/2014), lot 3159; Dallas PNG Signature (Heritage, 2/2015), lot 3435, which realized \$3,525.*

From Charlie O's Collection. NGC ID# 22LD, PCGS# 2806

- 3499 1953-D MS67 Red PCGS. CAC.** Dynamic luster sweeps unabraded orange-gold surfaces. The strike is bold, and carbon is minimal. Ideal for the Registry collector who also seeks CAC confirmation. Population: 70 in 67 (7 in 67+) Red, 0 finer. CAC: 24 in 67, 0 finer (4/19).

Ex: Rosemont Signature (Heritage, 8/2013), lot 3226, which realized \$3,055.

From Charlie O's Collection. NGC ID# 22FA, PCGS# 2809

- 3500 1954-D MS67+ Red PCGS.** Lincoln cents manufactured at the Denver Mint in 1954 can still be found with little searching through MS67 Red. However, an elite group enjoy the added Plus designation from PCGS. In fact, this is one of 11 such pieces at that service, and none are graded higher (4/19). A strong strike and light copper-orange color define each side. The PL in PLURIBUS and the O in ONE are minutely soft. A carbon fleck under the I in LIBERTY identifies this particular Superb Gem.

Ex: Central States Signature (Heritage, 4/2017), lot 3580, which realized \$1,762.50.

From Charlie O's Collection. NGC ID# 22FD, PCGS# 2818

- 3501 1954-D MS67+ Red PCGS. CAC.** A vibrant and attractive example with outstanding orange-gold color. Well struck as usual, with full hair, beard, and wheat details. More than a quarter-billion 1954-D cents were coined, but in the MS67+ Red grade, PCGS has certified only 11 examples, with none finer (3/19). CAC: 24 in 67, 0 finer (3/19).

Ex: Central States Signature / Tom Mereshon #2 All-Time PCGS Registry Set of Lincoln Wheat Cents (Heritage 5/2005), lot 5436; Houston Signature / Jack Lee Estate Lincoln Cent Registry Set (Heritage, 12/2008), lot 275, which realized \$2,530.

From The ACW Collection. NGC ID# 22FD, PCGS# 2818

- 3502 1955 MS67+ Red PCGS. CAC.** The 1955 was saved in roll quantity by collectors, yet Superb Gems are scarce, and PCGS has certified a mere four examples as MS67+ Red with none finer (4/19). The lustrous and nicely struck present piece exhibits outstanding eye appeal. The brick-red and mint-green surfaces appear immaculate. CAC: 13 in 67, 0 finer (4/19).

Ex: FUN Signature (Heritage, 1/2017), lot 3320, which realized \$3,525.

From Charlie O's Collection. NGC ID# 22FE, PCGS# 2824

- 3503 1955 Doubled Die Obverse, FS-101, MS62 Brown NGC.** Despite its Brown designation, this is a colorful representative that exhibits variegated lavender-red and olive-gold shades. We note a couple of minor field marks on the reverse, but the obverse is unblemished. Spectacular doubling on the date, LIBERTY, and IN GOD WE TRUST confirms the celebrated variety. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3504 1955 Doubled Die Obverse, FS-101, MS63 Brown PCGS.** The celebrated 1955 doubled die cent exhibits a remarkable spread throughout the obverse legends, and the first hubbing is as strong as the second. This Select example is distinctive for its rich apple-green and ruby-red toning. The lustrous surfaces appear unblemished.

From Charlie O's Collection. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3505 1955 Doubled Die Obverse, FS-101, MS63 Brown NGC.** The obverse legends show spectacular die doubling, the hallmark of the famous 1955 FS-101 cent. This smooth and satiny Select representative displays dusky sea-green toning, with traces of the initial Red color lingering in design crevices. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3506 1955 Doubled Die Obverse, FS-101, MS63 Brown PCGS. CAC.** The date, LIBERTY, and IN GOD WE TRUST display remarkable die doubling. A lustrous chocolate-brown Select cent with powder-blue undertones. Nicely struck and virtually void of marks or carbon. The obverse exhibits traces of retained laminations, as made. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1955 Cent, MS63 Red and Brown
Doubled Die Obverse**

- 3507 1955 Doubled Die Obverse, FS-101, MS63 Red and Brown PCGS.** All obverse design elements are heavily die doubled on this important Guide Book variety, although the doubling on the date and legends is the most readily apparent. This Select Red and Brown coin displays a bold strike and satiny mint luster. Burgundy toning on each side leaves original copper-orange color in the protected portions of the fields. Housed in a green label holder. NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

**1955 Cent, MS64 Red and Brown
FS-101, Doubled Die Obverse**

- 3508 1955 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS. CAC.** While the 1955 Double Die Obverse cent is almost invariably seen in high grades, examples are undeniably elusive at this level and with this degree of eye appeal. Marks are limited to about five or six ticks. Glossy brown surfaces exhibit steel-blue tones and considerable mint red color around the devices. PCGS has seen 10 finer submissions in the color category (5/19). NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

**1957 Lincoln Cent, MS67 Red
Conditionally Rare
None Numerically Finer**

- 3509 1957 MS67 Red PCGS.** Ex: Jerald L. Martin Collection. Vivid, fire-red and rose color blazes from both sides of this sharply struck, highly lustrous Superb Gem. Only the smallest of marks are seen on either side with 10x magnification. A lovely, conditionally scarce Lincoln cent, among the finest 1957s certified. Population: 25 in 67 (1 in 67+) Red, 0 finer (4/19). Ex: ANA Signature (Heritage, 7/2005), lot 5349; The Jerald L. Martin Collection/FUN Signature (Heritage, 1/2019), lot 4123.

From The ACW Collection. NGC ID# 22FM, PCGS# 2842

**1957 Cent, MS67 Red
Tied for Finest, Scarce CAC Example**

- 3510 1957 MS67 Red PCGS. CAC.** A top-graded Registry Set contender, this Superb Gem Red 1957 Lincoln cent displays glowing lemon-gold and rose-orange mint frost over carbon-free surfaces. The strike is sharp, and eye appeal is outstanding. Tied with 24 others as the finest at PCGS and one of only five in this grade with CAC approval (2/16).

From Charlie O's Collection. NGC ID# 22FM, PCGS# 2842

**1957-D Cent, MS67+ Red
One of Finest Pieces Certified**

- 3511 1957-D MS67+ Red PCGS. CAC.** The certified population of the 1957-D Lincoln cent plummets in MS67 Red, and the four Plus-graded coins — the finest examples of the date at PCGS — are on the radar of numerous Registry Set collectors who seek only the best coins. This is one of those top-four coins, and it easily earns CAC recognition. Satiny copper-red surfaces are without blemishes and luster glistens beneath a light. The strike is sharp, although parts of Lincoln's head are indistinct, likely struck through a thin layer of die grease. CAC: 23 in 67, 0 finer (4/19). NGC ID# 22FN, PCGS# 2845

- 3512 1958-D MS67+ Red PCGS. CAC.** Ex: Jerald L. Martin Collection. The original red surfaces of this high-end Superb Gem are impeccably preserved, with radiant mint luster on both sides. The design elements are well-detailed and eye appeal is exceptional. No finer coins have been graded at either of the leading grading services (3/19). CAC: 35 in 67, 0 finer (4/19).

From The ACW Collection. NGC ID# 22FR, PCGS# 2851

**1959 Lincoln Cent, MS67+ Red
Tied for Finest Certified**

- 3513 1959 MS67+ Red PCGS.** The debut Memorial Reverse Lincoln cent and something of a rarity in Registry Set condition. PCGS and NGC have each seen 31 MS67 Red coins and none finer, but this piece is only one of three with a Plus designation, tying it for finest known (4/19). The coin is sharply struck from fresh dies, with beautiful, carbon-free surfaces. Copper-orange and ruby-red hues blend over each side, creating incredible eye appeal.

From Charlie O's Collection. NGC ID# 22FS, PCGS# 2854

**1961-D Cent, MS67 Red
Exceptional Color**

- 3514 1961-D MS67 Red PCGS.** A magnificent orange-red Superb Gem. Free from contact aside from a single minuscule tick near the E in ONE. The strike is sharp aside from slight blending on the cheekbone and jaw of Lincoln and the central steps of the memorial. A strong lens is required to locate the nearly imperceptible carbon. Lincoln cent Registry Set demand is strong for the finest certified pieces. Population: 14 in 67 (1 in 67+) Red, 0 finer (4/19).

Ex: *Houston Signature (Heritage, 12/2013), lot 3523.*

From Charlie O's Collection. NGC ID# 22G2, PCGS# 2875

- 3515 1971-S MS67+ Red PCGS.** Uniform pumpkin-orange color greets the viewer of this pristine San Francisco cent. The lustrous surfaces are without either carbon or contact. The quality is remarkable. An essential addition to the advanced Registry holding. Population: 45 in 67 (7 in 67+) Red, 0 finer (4/19).

Ex: *FUN Signature (Heritage, 1/2016), lot 4653, which realized \$3,055.*

From Charlie O's Collection. NGC ID# 22GS, PCGS# 2947

**1972 Lincoln Cent, MS67 Red
Doubled Die Obverse**

- 3516** 1972 Doubled Die Obverse, FS-101, MS67 Red PCGS. Strong doubling is evident on the date, LIBERTY and IN GOD WE TRUST, identifying this extremely popular *Guide Book* and *Cherrypickers* variety. The design elements of this spectacular Superb Gem are sharply detailed and the original red surfaces are impeccably preserved. Vibrant mint luster adds to the terrific eye appeal. Population: 71 in 67 (2 in 67+) Red, 1 finer (4/19). NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

1979 Cent, Shimmering MS68 Red

- 3517** 1979 MS68 Red PCGS. Fire-orange color adorns the rims, progressing to lilac-gold patina over the central devices and fields. This exceptionally preserved, Registry-grade Superb Gem boasts shimmering mint luster and a bold strike. Tiny ticks on the shoulder and one in front of Lincoln's mouth are noted for accuracy. Population: 9 in 68 Red, 0 finer (4/19).
From Charlie O's Collection. NGC ID# 22HD, PCGS# 2995

- 3518** 1992-D Close AM, FS-901, AU58 PCGS. The AM in AMERICA touch at the bases, identifying this scarce *Guide Book* and *Cherrypickers'* variety. This example has barely a trace of high-point friction on the Lincoln portrait, delivering the overall first impression of a full Red Mint State coin, at least to the unaided eye. Cartwheel luster illuminates golden-orange surfaces and sharp motifs. NGC ID# 22JJ, PCGS# 391427 Base PCGS# 83099

**1995 FS-101 Cent, MS69 Red
Doubled Die Obverse, Tied for Finest**

- 3519** 1995 Doubled Die Obverse, FS-101, MS69 Red PCGS. This is one of the top-graded 1995 Double Die Obverse cents at both services combined. According to the *Cherrypickers' Guide*, this well-known variety was, at one time, featured on the front page of *USA Today*, heightening its appeal. Doubling is strongest on LIBERTY and IN GOD, although it is visible elsewhere. Flawless with copper-orange color and a full strike. Population: 9 in 69 Red, 0 finer (4/19). NGC ID# 22JS, PCGS# 38105 Base PCGS# 3127

- 3520** 2000 MS69 Red PCGS. An incredible Registry grade Lincoln cent, with fully struck design elements and original red surfaces that are just one tick away from perfection. Vibrant mint luster radiates from both sides. Population: 6 in 69 Red, 0 finer (4/19).
From Charlie O's Collection. NGC ID# 2WFL, PCGS# 3160

- 3521** 2005 Satin Finish SP70 Red PCGS. A perfectly preserved satin finish cent from a 2005 Uncirculated Mint Set. PCGS has graded only 20 pieces in SP70 Red (4/19). The strike and preservation are flawless, and the coppery-pink surfaces are mint-fresh.
From Charlie O's Collection. NGC ID# 27KH, PCGS# 93190

PROOF LINCOLN CENTS

**1909 Lincoln Cent, PR67 Brown
Attractive Multicolor Toning
The Finest Brown Coin at NGC**

- 3522** 1909 PR67 Brown NGC. The fine matte texturing of the surfaces on this Superb Gem proof accentuates the sharpness of the fully struck design elements. Both sides have attractive olive-green, gold, lilac, and rose-red toning and no blemishes. The 1909 proof Lincoln cent is rare so well-preserved. The variety without the designer's initials has a population of only three coins in Superb Gem condition at NGC — this PR67 Brown, a PR67 Red and Brown, and a PR68 Red (4/19). NGC ID# 22KS, PCGS# 3303

**1909 Cent, PR66+ Red and Brown
Great Array of Colors, Finely Textured**

- 3523** 1909 PR66+ Red and Brown PCGS. CAC. Finely textured surfaces, broad, square rims, and a full strike identify this first-year Lincoln cent as a matte proof, one of 2,618 pieces struck. Those features makes this an eye-appealing Premium Gem, but the fantastic array of colors sets it apart. A lovely example for the grade. Population: 55 in 66 (4 in 66+) Red and Brown, 7 finer. CAC: 32 in 66, 5 finer (4/19). NGC ID# 22KS, PCGS# 3304

- 3524** 1911 PR66 Red and Brown PCGS. CAC. A fully struck example with rich matte luster. Copper-orange gives way to green and violet toning on this Premium Gem, earning the Red and Brown designation. The CAC endorsement is an added appeal. Population: 27 in 66 (2 in 66+) Red and Brown, 1 finer; 13 in 66 (2 in 66+) Red, 0 finer. CAC: 21 in 66, 1 finer (4/19). NGC ID# 22KU, PCGS# 3310

- 3525** 1912 PR65 Red and Brown PCGS. CAC. A beautifully preserved Gem matte proof with sharp detail and luminous surfaces. Much of each side is copper-orange, and a Red designation might have been achieved were it not for a splash of rose and olive toning in the right obverse field. Population: 59 in 65 Red and Brown, 17 finer. CAC: 13 in 65, 8 finer (4/19). NGC ID# 22KV, PCGS# 3313

3526 1914 PR66 Red and Brown PCGS. Rich, evenly dispersed blue toning overlays glowing mint red hues across immaculate, finely textured surfaces of this outstanding Premium Gem matte proof cent. The strike is unfailingly sharp throughout both sides, and we can find nary a problem of any consequence on either side of this exceptional Red and Brown proof. Population: 46 in 66 (3 in 66+) Red and Brown, 8 finer (4/19). NGC ID# 22KX, PCGS# 3319

3527 1936 Type Two — Brilliant Finish PR65 Red PCGS. CAC. This Gem Red proof is from the Brilliant Finish dies, being deeply mirrored in the fields and equally reflective on the devices. Each side is well-struck and shows primarily greenish-gold color. The CAC endorsement will carry heavy weight with Registry Set collectors. NGC ID# 22L3, PCGS# 3335

1936 Lincoln Cent, PR66 Red Popular Type Two Issue

3528 1936 Type Two — Brilliant Finish PR66 Red PCGS. The Mint resumed its commercial proof offerings in 1936, with coins in (Type One) Satin and (Type Two) Brilliant finish. This Type Two Premium Gem exhibits sharply detailed design elements and deeply reflective fields throughout. The original red surfaces are impeccably preserved and eye appeal is terrific. Population: 70 in 66 (5 in 66+) Red, 2 finer (4/19). NGC ID# 22L3, PCGS# 3335

1937 Cent, PR67 Red Scarce Second-Year Issue

3529 1937 PR67 Red PCGS. CAC. Second year of modern proof issues after a 20-year hiatus, the 1937 proof cents still had a small mintage of only 9,320 coins. This is a spectacular full red example. The fields are deeply reflective, and as one can expect from the grade there are no apparent contact marks on either side. Population: 32 in 67 Red, 0 finer. CAC: 15 in 67, 0 finer (4/19). NGC ID# 22L7, PCGS# 3338

1990 No S Cent, PR68 Red Deep Cameo Famous Missing Mintmark Variety

3530 1990 No S, FS-101, PR68 Red Deep Cameo PCGS. The last major missing mintmark variety in U.S. proof coinage is the No S 1990 cent, represented here by a Superb Gem. Pale copper-gold surfaces have outstanding contrast and intriguing "orange-peel" texture through the fields, a feature plain to the unaided eye. NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

TWO CENT PIECES

1865 Two Cent Piece, MS66+ Red and Brown Surfaces

3531 1865 Fancy 5, MS66+ Red and Brown PCGS. This Plus-graded Premium Gem exhibits sharply detailed design elements and original red surfaces that have mellowed to light brown and crimson in selected areas. The virtually flawless surfaces are lustrous and appealing. A small die crack travels through the bottom of the date. Population: 10 in 66 (1 in 66+) Red and Brown, 0 finer (4/19). NGC ID# 8HFV, PCGS# 38257 Base PCGS# 3583

3532 1872 Doubled Die Obverse, FS-101 — Altered Color — NGC Details. Unc. TRUST is die doubled north. The 1872 business issue has a mintage of only 65,000 pieces, and is a series key in Mint State. This example displays uniform orange-red color and appears unabraded, though strike-throughs (as issued) accompany the left and right shield borders.

PROOF TWO CENT PIECES

1864 Large Motto Two Cent Piece Nicely Reflective PR66 Red and Brown

- 3533** 1864 Large Motto PR66 Red and Brown PCGS. CAC. While the most common date as a business strike, the Large Motto proofs from 1864 are remarkably scarce. Only 100 or so were struck in proof format. This piece is called Red and Brown, but there is little brown evident, mostly it takes the form of multicolored speckles of color on each side. The surfaces are mostly bright mint red with strong mirrors in the fields. Population: 13 in 66 Red and Brown, 1 finer. CAC: 7 in 66, 0 finer (3/19).
Ex: FUN Signature (Heritage, 1/2015), lot 3421, where it brought \$6,462.50. NGC ID# 274T, PCGS# 3622

1866 Two Cent, PR65 Red CAC Approval, Old Green Holder

- 3534** 1866 PR65 Red PCGS. CAC. The *Guide Book* reports a mintage of 725+ proof two cent pieces in 1866. Flashy fields and partly frosted devices grace coppery surfaces. Carbon spots on the upper right shield corner and in the field left of the denomination are the only ones of note. Housed in an old green label holder. Population: 32 in 65 Red, 6 finer. CAC: 6 in 65, 2 finer (4/19). NGC ID# 274V, PCGS# 3632

- 3535** 1870 PR65 Red PCGS. A radiant orange-gold Gem whose intricate strike and mark-free surfaces exude eye appeal. Patience and magnification are required to locate even the most minuscule carbon. Population: 43 in 65 (2 in 65+) Red, 19 finer (4/19). NGC ID# 274Z, PCGS# 3644

1873 Closed 3 Two Cent Piece, PR66 Pleasing Red and Brown Surfaces

- 3536** 1873 Closed 3 PR66 Red and Brown NGC. Faded mint red on both sides with light tan to brown elsewhere. The surfaces are clean and attractive, with no distracting specks or spots. This is the final year of issue for the Two Cent piece, with the reported mintage of 600 pieces. It is believed that at least a portion of these were melted on July 10, 1873 once sales dwindled. Census: 41 in 66 (1 in 66★) Red and Brown, 3 finer (4/19). NGC ID# 2753, PCGS# 3652

1873 Two Cent, PR64 Red and Brown Satin Open 3 Proof Type Coin

- 3537** 1873 Open 3 PR64 Red and Brown PCGS. A razor-sharp Open 3 proof with soft, satiny fields and uniform burnt-orange patina that balances between copper-red and light chestnut. Neither side has a mentionable contact mark or other imperfection. Only proof two cent pieces were struck dated 1873. Closed 3 coins are original strikings, while many numismatists consider Open 3 coins to be restrikes. NGC ID# 2754, PCGS# 3655

THREE CENT SILVER

1857 Three Cent Silver, MS66 Near-Flawlessly Preserved

- 3538** 1857 MS66 PCGS. Struck from heavily clashed dies, this all-brilliant three cent silver coin displays good definition on the central star and denomination, while the border elements are slightly soft. The surfaces are virtually flawlessly preserved; There are no marks to report. Population: 15 in 66 (2 in 66+), 2 finer (4/19). NGC ID# 22Z6, PCGS# 3673

1861 Three Cent Silver, MS67 Among the Finest at PCGS

- 3539** 1861 MS67 PCGS. While three cent silver pieces were coined from 1851 to 1873, the last decade of business strikes and the final year's proof-only issue rarely appear on the market. This delightful Superb Gem comes from the later years of the readily collectible issues. The sharp strike and fresh, original luster complement practically pristine surfaces that have a hint of silver-gray over each side. Population: 31 in 67, 0 finer (4/19).
Ex: ANA Signature (Heritage, 3/2007), lot 171, which realized \$3,450. NGC ID# 22ZA, PCGS# 3679

**1865 Three Cent Silver, Prooflike MS64
Attractively Toned**

3540 1865 MS64 PCGS. From a mintage of only 8,000 pieces, this near-Gem 1865 three cent silver displays attractive prooflike fields with satiny devices that show only slight strike softness in the centers. Much of each side has deep sea-green and lilac-blue toning, although the borders feature brighter yellow-gold color. Eye appeal is outstanding. Population: 20 in 64 (1 in 64+), 28 finer (4/19). NGC ID# 22ZF, PCGS# 3685

3541 1866 MS64 Prooflike NGC. As of (4/19), NGC has certified only three 1866 trimes as Prooflike. Due to hoarding of silver coins initially caused by the Civil War, trimes did not circulate during 1866, and only 22,000 pieces were struck for commerce. This sharply struck and essentially brilliant near-Gem has the appearance of a proof, and likely traded as such in its past. Minor obverse field marks emerge beneath a lens. PCGS# 83686 Base PCGS# 3686

3542 1871 MS64 PCGS. CAC. Only 3,400 business-strike three cent silver pieces were struck in 1871. This attractive Choice example is well-detailed and lightly marked, with traces of prooflike reflectivity, under shades of powder-blue and sea-green toning. Population: 29 in 64 (1 in 64+), 64 finer. CAC: 14 in 64, 26 finer (4/19). NGC ID# 22ZM, PCGS# 3692

3543 1871 MS65 NGC. Brilliant and prooflike, this Gem 1871 three cent silver piece is well-preserved and appealing. A loupe reveals strike weakness in the centers as usual. Only 3,400 pieces were struck, yet Mint State examples of this issue are collectible as type coins. Census: 18 in 65 (1 in 65★), 54 finer (4/19). NGC ID# 22ZM, PCGS# 3692

PROOF THREE CENT SILVER

3544 1868 PR66 NGC. Lilac-red and ocean-blue centers are framed by butter-gold borders. The strike is good, though not needle-sharp. No detractions are apparent. A mere 600 proofs were issued in 1868, and the associated business issue was limited to 3,500 pieces. Census: 18 in 66, 6 finer (4/19). NGC ID# 2U25, PCGS# 3718

3545 1869/'8' PR63 PCGS. This variety is identical to the die that PCGS identifies as an 1869/'8' at PCGS Coin Facts (www.pcgs.com/coinfacts). The variety features appear inside the 6 and within the lower curve of the 9. Die lines are noted within the shield on the obverse, and all of those characteristics are found on circulation strikes and proofs of this variety. Coin Facts numismatist Jaime Hernandez writes: "The 3 Cent Silver of 1869/8 is considered very rare. Less than a handful are believed to exist. A very tough coin for any collector to acquire." NGC ID# 22ZR, PCGS# 3719

**1873 Three Cent Silver, PR66
Final Year of Issue**

3546 1873 PR66 PCGS. The 1873 three cent silver was the final issue of the denomination in this composition, and the only date of the series that was struck only in proof format. This Premium Gem has obvious field-to-device contrast, though its toning precludes a Cameo designation. The obverse displays intermingled lime-green and straw-gold, and the deeper reverse shows cobalt-blue and lilac-red shades. Population: 19 in 66, 4 finer (4/19). NGC ID# 27CJ, PCGS# 3724

**1873 Three Cent Silver, PR67
Flashy Fields Under Colorful Toning**

3547 1873 PR67 NGC. The Mint closed out the three cent silver series in 1873 with a small proof-only production of 600 pieces, all showing a Closed 3 in the date. This spectacularly toned Superb Gem displays flashy fields under variegated shades of gold, orange, blue, and violet patina. Phenomenal all-around quality. Census: 8 in 67 (3 in 67★), 0 finer in non-Cameo (4/19). NGC ID# 27CJ, PCGS# 3724

PROOF THREE CENT NICKELS

**1866 Three Cent Nickel, PR66 Deep Cameo
Profound White-on-Black Contrast**

3548 1866 PR66 Deep Cameo PCGS. CAC. A sharply struck Premium Gem, this untoned proof displays exceptional cameo contrast between the deeply mirrored fields and the frost-white devices. The surfaces are virtually flawless, and a few faint flecks of carbon on the portrait are all that seem to keep this beautiful specimen from an even finer grade. Population: 9 in 66 (1 in 66+) Deep Cameo, 7 finer. CAC: 13 in 66, 3 finer (4/19).
Ex: FUN Signature (Heritage, 1/2005), lot 5607; Summer FUN Signature (Heritage, 7/2014), lot 3621. NGC ID# 275L, PCGS# 93762

**1877 Three Cent Nickel, PR65
Rarest Proof-Only Date of Series**

- 3549 1877 PR65 NGC. CAC.** The 1877 is rarest among the three proof-only dates of the three cent nickel series. The *Guide Book* states a mintage of only 900 pieces, only twenty pieces greater than the 1895 silver dollar. This wheat-gold and powder-blue Gem is fully struck and appears free from contact. One delicate lint mark (as made) inside the wreath at 9 o'clock. Certified in a former generation holder. NGC ID# 275X, PCGS# 3773

**1877 Three Cent Nickel, PR65 Cameo
Only 900 Proofs Coined**

- 3550 1877 PR65 Cameo PCGS. CAC.** A sharp Gem proof, golden toned, and showing deeply reflective fields. This CAC-endorsed Cameo shows no bothersome contact marks or other imperfections. The 1877 three cent nickel was produced only in proof format. Just 900 pieces were struck, and an example is essential for a complete date set of this underrated series. NGC ID# 275X, PCGS# 83773

**1877 Three Cent Nickel, PR66 Cameo
Subtle Field Iridescence**

- 3551 1877 PR66 Cameo PCGS.** Popular as a proof-only issue, the 1877 three cent nickels had a mintage of 900 pieces. Many of the pieces are certified with the Cameo designation, but few examples exceed the Premium Gem grade seen here. Iridescent colors interplay across the mirrored fields, while the frosted devices are unblemished save for tiny flecks on the cheek and nose. Population: 70 in 66 (4 in 66+) Cameo, 17 finer (4/19). NGC ID# 275X, PCGS# 83773

- 3552 1888 PR67 Cameo PCGS. CAC.** This Superb Gem is tied for the numerically finest 1888 three cent nickel at PCGS and carries the important CAC endorsement as part of its resume. Nearly flawless, nickel-gray surfaces contrast boldly with the smoothly frosted portrait and raised elements. The strike is pinpoint-sharp. NGC ID# 276B, PCGS# 83785

SHIELD NICKELS

- 3553 1870 MS65+ PCGS. CAC.** Satiny slate-gray luster is free of abrasions on this Plus-graded Gem, and the preservation is recognized by CAC. Some strike weakness is seen beneath a loupe, although the eye appeal remains pleasing. Finer 1870 Shield nickels are rare. Population: 50 in 65 (4 in 65+), 23 finer. CAC: 22 in 65, 7 finer (4/19). NGC ID# 22PA, PCGS# 3797

**1883 Shield Nickel, MS67
Top-Graded Final-Year Representative**

- 3554 1883 MS67 PCGS.** The final issue in the Shield nickel series (1866-1883) claims a mintage of 1.4 million coins. Many rolls were saved and examples are plentiful through MS66, but Superb Gems are scarce and none are numerically finer. Unmarked and highly lustrous surfaces are totally brilliant with the usual die cracks. The olive leaves, shield lines, and star radials are crisp. Die polish lines appear in the reverse field. Population: 20 in 67 (2 in 67+), 0 finer (4/19). NGC ID# 22PH, PCGS# 3813

PROOF SHIELD NICKEL

- 3555 1867 No Rays PR65 Cameo NGC. CAC.** Incredibly deep mirroring glimmers in the fields of this Gem first-year No Rays proof. The strike is sharp and the devices provide modest cameo contrast. Neither side has significant toning. Eye appeal is exceptional, as the CAC green label suggests. Census: 22 in 65 Cameo, 17 finer. CAC: 12 in 65, 13 finer (4/19). NGC ID# 5EB6, PCGS# 83821

LIBERTY NICKELS

- 3556 1884 MS66 PCGS.** Despite the mintage of 11.2 million pieces, the 1884 Liberty nickel is an elusive issue in MS66 condition. This impressive Premium Gem exhibits well-detailed design elements, with just a touch of softness on the lower wreath and star centers. The well-preserved, lustrous surfaces are accented by highlights of lavender-gray and pale gold toning. Population: 82 in 66 (41 in 66+), 5 finer (4/19). NGC ID# 22PJ, PCGS# 3845

**1885 Liberty Nickel, MS64
The Series Key**

- 3557 1885 MS64 PCGS.** Satiny mint luster glistens on each side of this near-Gem 1885 Liberty nickel, illuminating a tinge of warm golden toning. The obverse stars are sharp, although strike weakness does affect the corn ear to the left of the wreath bow, as usual. The 1885 is the primary key date in the series, boasting a minimal mintage of less than 1.5 million coins. Although the 1912-S has a lower production total (238,000 coins), the 1885 is significantly scarcer. NGC ID# 2773, PCGS# 3846

- 3558 1895 MS66 PCGS. CAC.** Frosty, original mint luster illuminates undertones of lavender, gold, and powder-blue beneath a dusting of olive-gold patina. The corn ear to the left of the wreath bow is slightly soft, but the stars and hair details are well brought up. The 1895 nickel is rare in Premium Gem condition and almost unknown numerically finer. CAC endorsement adds to the appeal. Population: 36 in 66 (6 in 66+), 1 finer. CAC: 16 in 66, 1 finer (4/19). NGC ID# 277A, PCGS# 3856

**1912-D Liberty Nickel, MS66
Registry-Grade Example**

- 3559 1912-D MS66 PCGS.** The Denver Mint began striking cents in 1911, and followed with nickels in 1912. The 1912-D Liberty nickel is the only D-mint issue in this series. Although more than 8.4 million pieces were struck, that is still a small mintage for the type, and the 1912-D Liberty nickel is a better date in all grades. In MS66, this issue is scarce. The present coin is well-struck save for on the lower-left wreath, and the champagne-tinted surfaces display softly frosted mint luster. PCGS has seen only a single numerically finer example. Population: 65 in 66 (7 in 66+), 1 finer (4/19). NGC ID# 277P, PCGS# 3874

- 3560 1912-S MS64 PCGS.** From a low mintage of 238,000 pieces, the 1912-S is the final Liberty nickel from the San Francisco Mint and a key issue in the series. This well-detailed Choice example offers well-preserved, lustrous surfaces, under shades of lavender-gray and pale gold toning. NGC ID# 277R, PCGS# 3875

- 3561 1912-S MS65 PCGS.** A key-date, final-year issue in the Liberty series, the 1912-S is also the only Liberty nickel struck at the San Francisco Mint. The mintage was only 238,000 pieces, the lowest of the series. Gem condition is the highest grade one can usually expect to encounter. This Gem displays warm olive-gold toning with slight hints of mottled russet and deep bluish-violet on each side. The design is uncommonly well-defined for the issue, including nearly full detail on the ear of corn left of the bow. Both sides are minimally marked.
Ex: Dallas Signature (Heritage, 10/2006), lot 476, which realized \$5,750; Long Beach Signature (Heritage, 2/2007), lot 2590, which realized \$5,922.50; Long Beach Signature (Heritage, 6/2014), lot 4347, which realized \$3,818.75. NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

- 3562 1884 PR67 Cameo PCGS.** An amazing Superb Gem Cameo proof, this 1884 Liberty nickel has brilliant surfaces shining through a thin layer of gold toning. The strike is nearly complete, lacking slight detail at the lower left part of the wreath. Both sides have excellent field-to-device contrast. Population: 19 in 67 (6 in 67+) Cameo, 0 finer (4/19). NGC ID# 22PV, PCGS# 83882

**1885 Nickel, PR67 Cameo
Popular Date, Conditionally Rare**

- 3563 1885 PR67 Cameo PCGS. CAC.** This CAC-approved Superb Gem is among the finest Cameos certified, with only one Deep Cameo as fine at PCGS. Fully struck design elements are frosty and offer modest field-motif contrast amid varying shades of champagne toning. There are no distractions or hairlines. Population: 17 in 67 (2 in 67+) Cameo, 0 finer. CAC: 15 in 67, 0 finer (4/19). NGC ID# 277T, PCGS# 83883

- 3564 1911 PR67 Cameo PCGS.** Light honey-gold toning visits this prominently mirrored and sharp Superb Gem proof. Frosty motifs ensure exemplary cameo contrast. A strong lens reveals a few pinpoint flecks on the portrait. Population: 21 in 67 (4 in 67+) Cameo, 0 finer (4/19). NGC ID# 278M, PCGS# 83909

BUFFALO NICKELS

- 3565 1913-D Type One MS67 PCGS.** With an original mintage of 5.3 million pieces, there is no shortage of 1913-D Type One nickels; however, as one might expect, there are few examples known in Superb condition. This sharply struck coin has thick mint luster and lovely gray-rose toning over each side. Population: 90 in 67 (11 in 67+), 3 finer (3/19).
Ex: Dallas Signature (Heritage, 11/2003), lot 5794; Philadelphia Signature (Heritage, 8/2012), lot 3820, which realized \$2,232.50. NGC ID# 22PX, PCGS# 3916

- 3566 1913-D Type One MS67 PCGS.** The Type One Denver issue is scarce in MS67 and nearly uncollectible finer. This Registry-grade coin displays luminous, frosted mint luster with delicate champagne iridescence. The strike is sharp and neither side has discernible abrasions. Population: 91 in 67 (11 in 67+), 3 finer (4/19).
Ex: Long Beach Signature (Heritage, 6/2015), lot 3362, which realized \$1,997.50.
From Charlie O's Collection. NGC ID# 22PX, PCGS# 3916

- 3567 1913-D Type One MS67 PCGS. CAC.** Top-notch surface quality and rich satin luster combine with a bold strike and attractive toning to define this Superb Gem nickel. The obverse is well produced, lustrous, and appealing with golden accents over pearlescent gray fields and motifs. The reverse displays dramatic, steel-blue tones with lilac highlights and nearly full details on the bison. An excellent Type One nickel in all ways. Population: 91 in 67 (11 in 67+), 3 finer. CAC: 38 in 67, 0 finer (4/19). NGC ID# 22PX, PCGS# 3916

- 3568 1913-D Type Two MS66 PCGS. CAC.** The 1913-D Type Two is one of the key regular issues in the Buffalo nickel series. This is an attractive MS66 example with nice luster, a sharp strike, and attractive golden-gray coloration that is well matched on each side. Impeccably preserved surfaces reveal no significant abrasions. Population: 90 in 66 (4 in 66+), 16 finer. CAC: 34 in 66, 6 finer (4/19).
Ex: Long Beach Signature (Heritage, 5/2008), lot 1252, which realized \$2,721.99; ANA Signature (Heritage, 8/2015), lot 3508, which realized \$2,361.75.
From Charlie O's Collection. NGC ID# 254M, PCGS# 3922

**1914-D Nickel, Luminous MS66
Spectacular Mint Luster**

- 3569 1914-D MS66 PCGS. CAC.** A spectacular Premium Gem example of this early Denver issue, showing remarkably sharp detail and luminous satin luster. A hint of iridescence adorns each side. No mentionable die erosion is evident in the fields or design recesses, but this piece does have several die cracks. On the obverse, radial breaks appear through the tip of the upper feather and through the R in LIBERTY, while thinner, crisscrossing cracks are visible near the braid knot. The reverse exhibits an irregular die crack on the bison's head. The 1914-D is conditionally scarce this fine and rare finer. Housed in a green label holder. Population: 56 in 66 (6 in 66+), 10 finer. CAC: 26 in 66, 3 finer (4/19).
From Charlie O's Collection. NGC ID# 22R5, PCGS# 3925

- 3570 1915 MS67 PCGS.** A particularly sharp example with little evidence of die erosion. This Superb Gem 1915 Buffalo nickel is among the finest certified. Mattelike luster glows beneath light golden toning, and the surfaces are devoid of abrasions. Eye appeal is exceptional. Population: 73 in 67 (7 in 67+), 0 finer (4/19).
From Charlie O's Collection. NGC ID# 22R7, PCGS# 3927

**1915-D Nickel, Sharp MS66
Conditionally Elusive**

- 3571 1915-D MS66 PCGS.** Champagne-tinted, satiny luster illuminates the pristinely preserved surfaces of this Premium Gem 1915-D Buffalo nickel. The strike is sharp, and the eye appeal is excellent. The 1915-D is conditionally scarce in MS66 and is a notable rarity any finer. The quality of this coin will surely impress even the most discerning collector. Population: 47 in 66 (8 in 66+), 4 finer (4/19).
From Charlie O's Collection. NGC ID# 22R8, PCGS# 3928

1915-S Nickel, Lustrous and Well-Struck MS66

- 3572 1915-S MS66 PCGS. CAC.** High quality 1915-S Buffalo nickels are easier to locate in mint condition than the relatively low mintage of 1.5 million pieces would suggest, especially through near-Gem. Gems will take more searching and the two major grading services have seen fewer than 60 examples finer. The lustrous, essentially untoned surfaces of this MS66 specimen exhibit well-struck design elements, a major attribute of this date. Neither side reveals mentionable abrasions. Population: 37 in 66 (2 in 66+), 4 finer. CAC: 15 in 66, 1 finer (4/19).

Ex: Central States Signature (Heritage, 4/2014), lot 3320.

From Charlie O's Collection. NGC ID# 22R9, PCGS# 3929

- 3573 1916-S MS65 PCGS.** Rated R.4 in Gem condition by David W. Lange in his Buffalo nickel reference, and although the book is 19 years old the assessment still seems accurate. This example is satiny with nice mint luster on both sides. Slight peripheral strike weakness of is seen at the feather tips and the bison's tail curl, although the main motifs are reasonably sharp. Hints of rose and lilac overtones flash across the smooth surfaces for great eye appeal. PCGS has graded 46 numerically finer examples (4/19).

From Charlie O's Collection. NGC ID# 22RC, PCGS# 3933

**1917-S Nickel, Lightly Toned MS66
A Conditional Rarity**

- 3574 1917-S MS66 PCGS.** Elements of gold and light-blue toning appear across this high-end 1917-S nickel, complementing mattelike luster that is devoid of abrasions. A touch of strike softness is seen only on the bison's shoulder and the hair above the Indian's braid. The 1917-S is rare this fine and unknown finer in a PCGS holder. Population: 27 in 66 (3 in 66+), 0 finer (4/19).

From Charlie O's Collection. NGC ID# 22RF, PCGS# 3936

- 3575 1919-D MS64 PCGS. CAC.** Dusky antique-gold and ice-blue toning enriches both sides of this luminous near-Gem. Minor softness is noted on the far right edge of the portrait's hair, though the bison is better-defined than usually seen.

Ex: Houston Signature (Heritage, 12/2013), lot 3295.

From Charlie O's Collection. NGC ID# 22RM, PCGS# 3942

1919-D Buffalo Nickel, MS65
Impressively Sharp, Early Die State

3576 1919-D MS65 PCGS. This better-date Denver issue seldom comes sharply struck, which makes the current example highly important. A Gem, this satiny nickel-gray coin is struck from fresh dies, without erosion in the fields. The devices are sharp save for the tip of the upper obverse feather, and no abrasions are noted. The 1919-D is scarce in this grade but rare so well struck. Numerically finer coins are out of reach for many collectors. Population: 86 in 65 (4 in 65+), 20 finer (4/19). NGC ID# 22RM, PCGS# 3942

3577 1919-S MS64 PCGS. A challenging early branch issue, the 1919-S is scarce as a near-Gem and a rarity any finer. This unabraded Choice example displays evenly distributed pinpoint carbon, along with medium lilac, gold, and aqua shades. The mintmark is sharp. Ex: *Long Beach Signature (Heritage, 6/2013)*, lot 3912, which realized \$2,820.
From Charlie O's Collection. NGC ID# 22RN, PCGS# 3943

3578 1919-S MS64 PCGS. CAC. Like other early Type Two branch mint issues, the 1919-S is scarce and desirable in quality Mint State. This lustrous Choice example displays iridescent light fire-red and aquamarine toning. The borders show occasional incompleteness. Coined from long-in-use dies, the fields exhibit an orange-peel texture but are virtually void of carbon and contact. NGC ID# 22RN, PCGS# 3943

3579 1921 MS66+ PCGS. Extremely sharp for a 1921 despite finely grained fields and light flowlines at the margins, this high-end Premium Gem displays sharp hair definition and a well-defined braid knot. Iridescent toning adds eye appeal to the lustrous surfaces, which flash reddish-gold, ice-blue, and lemon-yellow highlights over the minimally abraded, nearly mark-free fields and crisp devices. Population: 18 in 66+, 35 finer (3/19). NGC ID# 22RT, PCGS# 3947

1924-D Nickel, Satiny MS65
Lightly Toned

3580 1924-D MS65 PCGS. The 1924-D is one of the most important strike rarities in this "strike challenged" series. There actually may be no fully struck examples. This Gem displays delicate steel-gray patina over satiny surfaces that, while solidly Gem quality, still displays some of the expected mushiness over the high points of the design. NGC ID# 22RY, PCGS# 3952

1924-D Nickel, Toned MS65
Seldom Offered in Gem or Finer Grades

3581 1924-D MS65 NGC. The Connecticut State Library hoard of 1924-D nickels is responsible for most of the high-grade Uncirculated examples known. NGC, in particular, has certified only a few Gem or finer coins. This sharply struck Gem lacks full definition only on the bison's shoulder and the lowest hair strands above the braid knot. The surfaces are essentially mark-free and toned a regal steel-gray color with gold and ice-blue accents across the satin-smooth fields and motifs. Housed in a third generation, pre-hologram NGC holder. Census: 20 in 65 (1 in 65+), 1 finer (4/19). NGC ID# 22RY, PCGS# 3952

1924-S Buffalo Nickel, MS62
Elusive in High Grade

3582 1924-S MS62 PCGS. From a small mintage of 1.4 million pieces, the 1924-S Buffalo nickel is a challenging issue in Mint State grades. This attractive MS62 specimen exhibits lightly marked surfaces under shades of golden-brown and lavender-gray toning. The design elements are well-detailed, with some of the typical softness on the bison's head.
From Charlie O's Collection. NGC ID# 22RZ, PCGS# 3953

1927-D Nickel, Lightly Toned MS65

3583 1927-D MS65 PCGS. The 1927-D is virtually unknown with full details, with most coins struck from widely spaced or worn dies (or both). This Gem example is far better than most, but still the strike above the braid knot is soft and the bison's shoulder lacks definition. The fields are remarkably smooth and pristine — lustrous and satiny, with lilac and pale-gold overtones for excellent eye appeal. PCGS reports just 11 numerically finer pieces (4/19). NGC ID# 22S9, PCGS# 3961

**1927-D Nickel, MS65
Conditionally Scarce**

- 3584 1927-D MS65 PCGS. CAC.** Attractive light gold toning graces the obverse and reverse of this Gem 1927-D Buffalo nickel that exhibits an above average strike and pristine surfaces. Wisps of light blue appear along the obverse border. PCGS has only certified 11 numerically finer examples (4/19). CAC: 27 in 65, 2 finer (4/19). NGC ID# 22S9, PCGS# 3961

- 3585 1927-S MS64 PCGS.** Satin luster and appealing toning create lovely eye appeal for this near-Gem specimen. Shades of gold, orange, and red are present. Die wear is evident and though not fully struck, the level of design detail is pleasing. Housed in a first generation holder. The population drops dramatically above the MS64 level, with PCGS having awarded higher grades to only 45 examples (4/19).

*Ex: Central States Signature (Heritage, 4/2014), lot 3362.
From Charlie O's Collection.* NGC ID# 22SA, PCGS# 3962

- 3586 1927-S Doubled Die Obverse, FS-101, AU58 PCGS.** The die doubling is minor on this variety, mainly visible on the date numerals. The present coin has moderate die erosion in the fields and recesses, which slightly blurs the doubling. Satiny surfaces have golden-olive toning and no measurable wear, although some high-point friction prevents a Mint State grade. PCGS# 569449 Base PCGS# 3962

- 3587 1928-D MS66 PCGS. CAC.** The 1928-D nickel can be located through Gem condition with relatively little trouble. The population drops significantly, however, at the Premium Gem level. The lustrous surfaces of this offering are nearly untuned, and the strike is above average, though the bison's tail and the hair above the braid are incomplete. Exceptionally preserved throughout. Population: 65 in 66 (3 in 66+), 1 finer (4/19).

Ex: Long Beach Signature (Heritage, 6/2014), lot 4363, which realized \$3,407.50.

From Charlie O's Collection. NGC ID# 22SC, PCGS# 3964

**1934 Nickel, Frosty MS67
Among the Finest Certified**

- 3588 1934 MS67 PCGS.** Delicate champagne and ice-blue hues tint the silvery surfaces of this rare Superb Gem. The centers are slightly weak, but the strike is yet pleasing. Faint metal flowlines on the obverse suggest a long-used die, while the reverse is fresh. The 1934 Buffalo nickel, a plentiful issue overall, is conditionally scarce in this top grade. Population: 41 in 67 (4 in 67+), 0 finer (4/19).

From Charlie O's Collection. NGC ID# 22SL, PCGS# 3972

- 3589 1937-D Three-Legged, FS-901, MS62 NGC.** Among the most famous 20th century varieties, the 1937-D Three-Legged nickel results from excessive die polishing. This iridescent MS62 representative show lovely glints of rainbow color and bold strike characteristics throughout. One thin vertical mark noted on the bison's upper back. Certified in a prior generation holder. *Ex: New York Signature (Heritage, 10-11/2016), lot 3867, which realized \$2,232.50.* NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1937-D Three-Legged Buffalo, Attractive MS63
Far Finer Than Usual**

- 3590 1937-D Three-Legged, FS-901, MS63 PCGS.** This Select Mint State Three-Legged nickel is especially well struck and exhibits lovely, satinlike mint luster. Each side is covered with pale lilac toning and a touch of olive over the high points. Along with the 1918/7-D and the 1916/1916, the 1937-D is the third most popular variety in the Buffalo nickel series. As one might imagine from the late date of issue, it is by far the most available of the three varieties and is occasionally offered at public auction in the better grades of Mint State.

Ex: Ron W. Keeney Collection, Part Two / Denver Signature (Heritage, 8/2006), lot 718; Long Beach Signature (Heritage, 6/2015), lot 3828.

From Charlie O's Collection. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 3591 1938-D/S FS-511 MS67 PCGS. CAC.** The *Cherrypickers' Guide* lists five die varieties of overmintmarked 1938-D/S nickels, but FS-511 is certainly the most dramatic among those. It is also the variety photographed in the 2020 *Guide Book*, on page 137. The top of the undermintmark S looms above the Denver mintmark, which is also strongly repunched south. This lustrous high-grade example displays lavish sea-green and rose-red toning. Many 1938-D nickels were saved as the final year of the type, but the variety becomes scarce in the present quality. CAC: 46 in 67, 0 finer (4/19).

From Charlie O's Collection. NGC ID# 22T3, PCGS# 38476 Base PCGS# 3985

**1938-D/S Buffalo Nickel, MS67+
FS-511 Overmintmark Variety**

- 3592 1938-D/S FS-511 MS67+ PCGS. CAC.** The upper serif of an S is visible atop of the primary D mintmark. Closer study reveals repunching of the D also, although on this coin it is faint from die wear near the rim. Moderate die erosion affects the devices and fields, although the strike is still sharp. Warm golden toning encompasses the reverse and cedes to a delicate greenish-silver border on the obverse. Eye appeal is outstanding. NGC ID# 22T3, PCGS# 38476 Base PCGS# 3985

PROOF BUFFALO NICKELS

1913 Buffalo Nickel, PR65 Sole Type One Issue

- 3593 1913 Type One PR65 PCGS. CAC.** This is a fully struck matte proof with satin luster and outstanding eye appeal. The coin is essentially as made save for light tan toning, a few microscopic flecks on the lower obverse, and one small spot on the N in UNUM. This is the sole year for the Type One design subtype, since mint officials worried that FIVE CENTS would wear too quickly in circulation. Type One shows the bison standing on raised ground (or, as some say, on a mound).
Ex: Houston Signature (Heritage, 12/2009), lot 300; National Money Show Signature (Heritage, 2-3/2014), lot 4472. NGC ID# 278R, PCGS# 3988

1913 Buffalo Nickel, PR67 Popular Type One Motif

- 3594 1913 Type One PR67 PCGS. CAC.** A delightful Superb Gem specimen of the short-lived Type One design, with sharply detailed design elements and impeccably preserved textured surfaces that show a few subtle hints of ice-blue and pale gold toning. Strong matte luster radiates from both sides. From a matte proof mintage of 1,520 pieces. Population: 70 in 67 (15 in 67+), 5 finer. CAC: 43 in 67, 1 finer (4/19). NGC ID# 278R, PCGS# 3988

1913 Buffalo Nickel, PR67 Type Two Matte Proof

- 3595 1913 Type Two PR67 PCGS. CAC.** A spectacular Superb Gem proof with CAC approval, this coin exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces radiate strong matte luster on both sides. Attractive highlights of pale jade and ice-blue toning add to the outstanding eye appeal. From a mintage of 1,514 pieces, the Type Two proof is scarcer than its Type One counterpart. Population: 76 in 67 (7 in 67+), 10 finer. CAC: 36 in 67, 8 finer (4/19). NGC ID# 278S, PCGS# 3990

1936 Type One Nickel, PR68 Satin Finish

- 3596 1936 Type One — Satin Finish PR68 NGC.** A stunning Superb Gem, this Satin Finish proof is essentially flawless with bright, satiny luster and nickel-gray surfaces that exhibit faint gold and lavender toning on each side. Census: 31 in 68 (1 in 68+, 2 in 68★, 1 in 68+★), 0 finer (4/19). NGC ID# 278X, PCGS# 3994

1936 Brilliant Finish Nickel, PR67

- 3597 1936 Type Two — Brilliant Finish PR67 NGC.** Although presenting an untuned appearance, a few subtle splashes of rose patina are noticed here and there. The mirrored brilliance is truly dazzling and the design elements are fully detailed. NGC has certified 22 numerically finer examples (5/19). NGC ID# 278Y, PCGS# 3995

- 3598 1937 PR67+ PCGS. CAC.** Ice-blue motifs rise above glassy butter-gold fields. A solidly struck Superb specimen from the final year of proof Buffalo nickel production. A minuscule fleck below the chin of the Indian serves as the sole perceptible imperfection. NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

- 3599 1939 Doubled Monticello, FS-801, MS67 PCGS.** FIVE CENTS and MONTICELLO exhibit dramatic clockwise die doubling. Breen (1988) credits the variety discoverer as Malcolm O.E. Chell-Frost, who reported his find in the November 1942 *Numismatist*. This lustrous and untuned Superb Gem is virtually void of contact, though the fields exhibit an orange-peel texture consistent with long-in-use dies. Population: 11 in 67 (2 in 67+), 0 finer (4/19). NGC ID# 22T8, PCGS# 38481 Base PCGS# 4004

- 3600 1939 Doubled Monticello, FS-801, MS67 PCGS.** Strong doubling on MONTICELLO and FIVE CENTS provides immediate identification of the FS-801 variety — a key *Guide Book* variety in the series, and eagerly sought by all Jefferson nickel collectors. Rare in Mint State grades, this Superb Gem example is numerically unsurpassed at either service. The lustrous, gleaming surfaces are sharply struck, with sharp definition on Jefferson's uppermost hair strands. The finely grained surfaces show virtually no marks of any consequence. Population: 11 in 67 (2 in 67+), 0 finer (4/19). NGC ID# 22T8, PCGS# 38481 Base PCGS# 4004

PROOF JEFFERSON NICKELS

- 3601** 1942-P Type Two PR66 Cameo PCGS. The Type Two 1942 proof Jefferson nickel is the only proof struck in the 35% silver war alloy. Proof set production was halted after 1942, and it did not resume again until 1950. The 1942-P Type Two proof is readily available in most grades, but remarkably few pieces are known with a Cameo designation. This Premium Gem is among just 17 such coins at PCGS, and a lone Deep Cameo is also reported at that service. Liquidlike fields show off razor-sharp, satiny devices beneath a hue of light golden toning. Cameo contrast is immediately apparent on the reverse, but also present on the obverse. Population: 9 in 66 Cameo, 3 finer (4/19). NGC ID# 27A4, PCGS# 84180 Base PCGS# 4180

1971 No S Nickel, PR68 Deep Cameo Missing Mintmark Variety, FS-501

- 3602** 1971 No S, FS-501, PR68 Deep Cameo PCGS. It is believed that 1,655 Jefferson nickel proofs were struck in 1971 inadvertently lacking the S mintmark. The severity of the slip-up and the scarcity of the issue explain why the 1971 No S proof nickel holds the 30th position on the list of the *100 Greatest U.S. Modern Coins*. This PR68 Deep Cameo specimen is totally brilliant with depthless mirrors and a thick layer of frost over the devices. Population: 17 in 68 (1 in 68+) Deep Cameo, 18 finer (5/19). NGC ID# 22YN, PCGS# 94204

EARLY HALF DIMES

1795 Flowing Hair Half Dime, VF35 V-2, LM-3 Die Marriage

- 3603** 1795 V-2, LM-3, R.5, VF35 NGC. The crack from the R in LIBERTY down through the portrait is one of the primary diagnostic markers for the V-2, LM-3 die variety. This example shows incompleteness between 6 and 9 o'clock on the obverse and the corresponding area on the reverse. Silver-gray surfaces include golden accents, and they maintain good detail for the grade. There are a few file marks at the upper left reverse and thin linear abrasions on each side. NGC ID# 22ZV, PCGS# 38587 Base PCGS# 4251

1797 Half Dime, AU Details V-4, LM-2, 16 Stars Obverse

- 3604** 1797 16 Stars, V-4, LM-2, R.4 — Surfaces Smoothed — PCGS Genuine. AU Details. LM-2 is the more plentiful of two 16 Stars half dime varieties for the 1797 date. The obverse die exhibits wide repunching of stars 10 and 11, and the reverse has a heavy radial die crack through the E in UNITED. Little wear is present on this example, although the surfaces are finely granular due to the smoothing noted by PCGS. Nonetheless, clash marks diagnostic of the die state are still visible. Each side displays olive-gray patina and is evenly struck, with typical weakness at the centers.

1797 16 Stars Half Dime, VF30 Scarce V-3, LM-3 Die Marriage

- 3605** 1797 16 Stars, V-3, LM-3, R.5, VF30 PCGS. Two different punch sizes were used for the 7s in the date on this obverse, and the border shows 16 stars. This die was employed for two die marriages, of which LM-3 is the scarcer. This high-end VF example displays pleasing detail for the grade with only minor strike softness on Liberty's central hair curls. Hints of lilac and rose toning accent otherwise slate-gray surfaces. The right-hand reverse dentils are weak from an uneven strike. NGC ID# 22ZZ, PCGS# 38599 Base PCGS# 4259

BUST HALF DIME

1834 V-1, LM-2 Half Dime, MS66 Prooflike Fields, Original Toning

- 3606** 1834 V-1, LM-2, R.1, MS66 NGC. Few 1834 half dimes of any variety are finer than this LM-2 coin, which shows prooflike fields from die polishing and lovely sea-green, gold, and rose toning. Small areas of unpolished die face appear at Liberty's profile and around the eagle. There is some minor weakness along the left edge of the shield, but the coin is otherwise sharply struck and beautiful. Census: 38 in 66 (1 in 66★, 2 in 66+), 10 finer (4/19). NGC ID# 232G, PCGS# 38702 Base PCGS# 4281

SEATED HALF DIMES

1837 Seated Liberty Half Dime, MS66
No Stars, Large Date, V-1
Blundered Date

- 3607** 1837 No Stars, Large Date (Curl Top 1) MS66 NGC. V-1, Flynn MPD-001 and RPD-001. This is one of the Mint's most peculiar blundered dates, which qualifies both as a Repunched Date and as misplaced digits. Numeral 1 is repunched at the base, the 8 is triple-punched — first widely left, then too low and wide right in the dentils — while 3 and 7 are repunched south. The date style is Large and curved, with Curl Top 1 and Script 8. This is a sparkling Premium Gem example with a frosted mint luster. The brilliant obverse is paired with a lightly toned, pale steel-blue reverse. Census (all varieties combined): 80 in 66 (1 in 66+, 1 in 66★), 12 finer (4/19). NGC ID# 232M, PCGS# 4311

1837 Seated Half Dime, MS66+
No Stars, Small Date

- 3608** 1837 No Stars, Small Date (Flat Top 1) MS66+ PCGS. Block 8 in the date. This inaugural-year Seated Liberty half dime is marvelously toned in original cobalt-blue, sea-green, and lavender patina with splashes of golden-orange color on each side. The motifs exhibit a full strike, and the lustrous surfaces are spectacularly preserved. Population: 17 in 66 (4 in 66+), 7 finer (4/19). NGC ID# 232M, PCGS# 4312

- 3609** 1838 Large Stars, No Drapery, MS66 PCGS. This stunning Premium Gem is an exceptional example representing the second design sub-type, from the second year of issue for the Seated Liberty design. An obverse die crack extends through Star 13 toward Liberty's leg. This piece has brilliant and frosty silver luster with delicate peripheral gold toning. Population: 31 in 66 (3 in 66+), 11 finer (4/19). NGC ID# 2TXX, PCGS# 4317

- 3610** 1857 MS67 PCGS. A relatively available date, the 1857 Seated half dime becomes conditionally rare in MS67, and no numerically finer coins are reported by PCGS. This Superb Gem displays luminous mint luster and delicate gold, olive, and lilac toning. The central devices are sharp while the border dentils exhibit minor weakness. The eye appeal is exceptional. Population: 15 in 67 (2 in 67+), 0 finer (4/19). NGC ID# 233S, PCGS# 4365

- 3611** 1865 XF45 PCGS. This low-mintage half dime has a mintage of only 13,000 pieces and it is collectible in all grades. This Choice XF is one of the more affordable examples. Each side displays deep gray patina with faint traces of mint luster still visible around the devices. Population: 6 in 45, 62 finer (4/19). NGC ID# 234G, PCGS# 4386

PROOF SEATED HALF DIMES

1858 Half Dime, PR66
Ex: Gardner

- 3612** 1858 PR66 NGC. CAC. Pinkish-rose and ice-blue patina generates terrific eye appeal for this bold Premium Gem. The 1858 half dime represents the first year that the Mint went from striking proof delicacies for the well-connected (and well-to-do, largely) to equitably marketing proof coins to the public. Housed in a former generation holder. Census: 13 in 66 (1 in 66★), 2 finer. CAC: 5 in 66, 0 finer (4/19).

Ex: U.S. Coins and Paper Money (*Stack's*, 3/1998), lot 349; Eugene H. Gardner Collection, Part I (*Heritage*, 6/2014), lot 30220; Long Beach Signature (*Heritage*, 6/2018), lot 3867; Long Beach Signature (*Heritage*, 1-2/2019), lot 3266. NGC ID# 235N, PCGS# 4437

- 3613** 1865 PR66 Cameo NGC. CAC. A needle-sharp Gem that provides dazzling field reflectivity and outstanding eye appeal. Dappled aquamarine and chestnut-gold toning confirms the originality. Only 500 proofs were produced for this final Civil War date. Census: 6 in 66 Cameo, 1 finer. CAC: 10 in 66 Cameo, 0 finer (4/19). NGC ID# 2362, PCGS# 84448

EARLY DIMES

- 3614** 1796 JR-1, R.3 — Obverse Graffiti, Repaired — NGC Details. VG. The usual rim cud is visible at star 1 on the obverse. A few old, short X-shaped scratches are visible on the Liberty portrait, although they are partially effaced by some crude repair work that has been performed. This characteristic is only obvious under a loupe. To the unaided eye, this JR-1 dime has evenly worn lilac-gray surfaces and strong borders.

1798/97 Large Eagle Dime, AU53
16 Stars Reverse, JR-1

- 3615** 1798/97 16 Stars Reverse, JR-1, R.3, AU53 NGC. All four die varieties of 1798-dated dimes receive separate *Guide Book* listings due to distinctive differences in the date logotype or a different star count on the reverse. JR-1 is curious in that it has 13 obverse and 16 reverse stars. The reverse die was presumably made prior to the obverse die, despite the fact that no 1797 varieties have a Heraldic Eagle reverse. This is a lavender-gray and almond-gold example with minor inexactness of strike at the centers and one faded slender mark on the right obverse field. NGC ID# 236F, PCGS# 38750 Base PCGS# 4468

BUST DIMES

1831 JR-5 Dime, MS64 Toned Capped Bust Type Coin

- 3616** 1831 JR-5, R.1, MS64 PCGS. The flag of the second 1 in the date is curved, and the T is over the I in PLURIBUS. The 1831 dime serves as an appropriate Capped Bust type-coin issue without any die marriage rated higher than R.3. About 3,500 to 5,500 pieces survive in all, according to Zack, Scuderi, and Sherrill (2015). When tilted at an angle this near-Gem shows gold and blue patina with splashes of rose-violet. Strike detail is mostly strong, and bar clash marks appear under the ear. Population (all varieties): 50 in 64, 32 finer (4/19). NGC ID# 237B, PCGS# 38853 Base PCGS# 4520

1832 JR-5 Dime, Toned MS65

- 3617** 1832 JR-5, R.2, MS65 NGC. Star 1 points to the bust, and the second T in STATES is over RI in PLURIBUS. The reported mintage for the 1832 is 522,500 pieces, of which several thousand survive. However, the date becomes rare at this high grade level. Beautifully toned and softly lustrous surfaces showcase lavender-gray centers with vibrant shades of fire-orange and magenta within the recesses of the devices. Well-struck with rust lumps over the obverse and spindly cracks on each side. Census: 9 in 65, 5 finer (4/19). PCGS# 38859 Base PCGS# 4521

SEATED DIMES

1843 F-106 Dime, MS66 Single Finest at NGC

- 3618** 1843 Repunched Date, F-106, R.3, MS66 NGC. The present lot is the single-finest NGC-certified business strike 1843 dime. The virtually unabraded surfaces display rich silver-gray, golden-brown, and stone-white toning. A lustrous and desirable high-grade representative. Fortin-106 displays minor repunching on the crossbar of the 3 in the date. Census: 1 in 66, 0 finer (4/19). PCGS# 537815 Base PCGS# 4583

- 3619** 1858 F-103, R.3, MS65+ NGC. A lustrous stone-white Gem with essentially immaculate preservation. Liberty's head and portions of the wreath are lightly brought up. The 1 is entered high, and the date slopes down. The reverse, though, matches F-106 with parallel die lines through AMERICA. For all Fortin business varieties, Census: 17 in 65 (2 in 65+), 11 finer (4/19). PCGS# 538120 Base PCGS# 4616

- 3620** 1891-O/S Repunched Date, F-111, R.3, MS65 NGC. CAC. A Top 100 Variety. The 89 in the date is nicely repunched within the lower loops, but the mintmark area is of even greater interest. Kamal Ahwash (#8), Walter Breen (#3464), and Gerry Fortin state that the die fill within the mintmark corresponds to an undermintmark S. The upper obverse rim displays a lengthy, narrow die break. A lustrous, smooth, and intricately struck Gem with medium peripheral golden-brown and aquamarine patina. PCGS# 538927 Base PCGS# 4707

PROOF SEATED DIMES

- 3621** 1876 PR65 Cameo PCGS. CAC. F-101, R.4. Type One Reverse. The right borders display light russet-brown toning, but most of this nicely struck Gem is brilliant. The frosty devices are nicely struck, and no imperfections emerge upon close evaluation. NGC ID# 23CZ, PCGS# 84773

- 3622** 1885 PR67 Cameo NGC. This is a magnificent Superb Gem, with sharply detailed design elements and deeply mirrored fields that create intense cameo contrast with the frosty design elements. The surfaces are impeccably preserved and brilliant. Census: 19 in 67 Cameo (1 in 67+, 1 in 67★), 8 finer (4/19). NGC ID# 23DA, PCGS# 84782

BARBER DIMES

1905-O Dime, MS66+ Pale Pastel Toning

- 3623** 1905-O MS66+ PCGS. CAC. While the 1905-O is readily available in circulated grades, it is seldom found in the higher levels of Uncirculated, especially with a strong strike. This satiny example has a slight accent of pale pastel toning over each side. As one would expect from the grade, there are no mentionable or even noticeable abrasions. Population: 22 in 66 (3 in 66+), 7 finer. CAC: 8 in 66, 8 finer (4/19). NGC ID# 23EU, PCGS# 4836

- 3624** 1906-D MS66 PCGS. CAC. Ex: Lily Nicole Collection. Common in lower grades, the 1906-D Barber dime is a rarity at the Premium Gem level, and only a few finer pieces are known. This Registry-grade coin displays original satin luster with attractive rainbow toning around much of the obverse margin. The reverse border has golden-orange patina, and both centers are light champagne-gray. Well-struck and eye-appealing. Population: 14 in 66 (2 in 66+), 4 finer. CAC: 8 in 66, 7 finer (4/19). NGC ID# 23EY, PCGS# 4839

**1907-S Dime, Delicately Toned MS66
Numerically Unsurpassed**

3625 1907-S MS66 PCGS. CAC. Ex: Lily Nicole Collection. While the issue is generally found in nice condition, there are few 1907-S dimes in Gem or better grades. Strike is a fairly consistent problem with this issue, and this particular coin demonstrates that. It is not weak, as one might expect, but the devices on each side show a uniform softness of high point definition; one might theorize that the dies were set too far apart. Overall, however, this is a splendid coin and well-above average for the issue in terms of eye appeal. The surfaces are notably free from abrasions, and the mint luster enhances the rich aquamarine and golden toning seen on each side. Population: 8 in 66, 0 finer (4/19).

Ex: Long Beach Signature (Heritage, 5/2009), lot 509; Lily Nicole Collection / Central States Signature (Heritage, 4/2015), lot 3950. NGC ID# 23F6, PCGS# 4845

3626 1908-D MS66+ PCGS. Satiny mint luster and a sharp strike contribute to the quality of this high-end Premium Gem. The central obverse is untoned, although the majority of the coin displays deep blue-green and olive-gold patina. Finer 1908-D Barber dimes are rare. Population: 13 in 66 (3 in 66+), 8 finer (4/19). NGC ID# 23F8, PCGS# 4847

3627 1911 MS67 PCGS. This spectacular Superb Gem exhibits sharp design elements and beautifully preserved surfaces, under pleasing shades of sea-green, sun-orange, and lavender-gray toning. Both sides of this stunning Registry-grade coin radiate vibrant mint luster. Eye appeal is terrific. The 1911 Barber dime is a rarity this fine, and only a few higher-grade pieces exist. Population: 25 in 67 (3 in 67+), 2 finer (4/19). NGC ID# 23FJ, PCGS# 4857

PROOF BARBER DIMES

**1895 Dime, Border-Toned PR67
Rare With CAC Endorsement**

3628 1895 PR67 PCGS. CAC. This sharp Superb Gem proof is among the finest non-Cameos at PCGS, and it is conditionally rare as such. Modest field-motif contrast is discernible on each side, with brilliant interiors and borders that show daubs of lavender and blue toning. The eye appeal is excellent. Population: 14 in 67 (2 in 67+), 0 finer. CAC: 12 in 67, 3 finer (4/19). NGC ID# 23G8, PCGS# 4879

**1898 Barber Dime, PR67+
Attractive Multicolor Toning**

3629 1898 PR67+ PCGS. CAC. Only 735 proof Barber dimes were struck in 1898. This Plus-graded Superb Gem displays razor-sharp definition on all the design elements and the virtually pristine surfaces include deeply reflective fields, with subtle traces of cerulean-blue and pale green toning. The eye appeal is outstanding. Population: 12 in 67 (2 in 67+), 0 finer. CAC: 4 in 67, 2 finer (4/19). NGC ID# 23GB, PCGS# 4882

MERCURY DIMES

3630 1916-D Fine 15 PCGS. From a series-low mintage of 264,000 pieces, the 1916-D Mercury dime is an important first-year key. This Fine 15 example retains much interior detail on the sticks in the fasces, but the bands are heavily worn. The lightly abraded surfaces show highlights of ice-blue and sea-green toning. NGC ID# 23GY, PCGS# 4906

**1916-D Mercury Dime, AU Sharpness
Well-Detailed Key Denver Issue**

3631 1916-D — Improperly Cleaned — NCS. AU Details. Lightly hairlined, this 1916-D retains pleasing surfaces with soft mint luster and a sharp strike. Traces of light-gold toning add eye appeal. The finely textured obverse is virtually mark-free, while one or two tiny ticks visit the reverse, visible under a loupe. Just 264,000 pieces were struck, and few survive as nice as this coin despite the past cleaning.

**1916-D Mercury Dime, AU58
Rare CAC-Approved Example**

- 3632 1916-D AU58 PCGS. CAC.** Dime coinage at Denver was sporadic in the years leading up to 1916. In 1913, no dimes were struck at the Colorado branch mint, then nearly 12 million pieces were coined the following year. No dimes were struck again in 1915, and in 1916, just 264,000 pieces were produced. The 1916-D mintage represents the first issuance of Mercury dimes from the Denver Mint, and an important key date in this series. No Barber dimes were struck at Denver in 1916. This CAC-approved near-Mint 1916-D Mercury displays lustrous fields and barely a trace of wear on the devices. A russet toning spot in the reverse olive branch left of the fasces serves as a pedigree marker. This coin has nearly full band separation. CAC: 8 in 58, 9 finer (4/19). NGC ID# 23GY, PCGS# 4906

**1917-D Dime, MS65 Full Bands
Conditionally Scarce Early D-Mint**

- 3633 1917-D MS65 Full Bands NGC.** This overlooked strike rarity lives in the shadow of the key 1916-D but most examples found in mint condition are weakly struck either in the center of around the peripheries. This is a uniformly well brought up 1917-D that displays bright satin luster beneath subtly variegated toning seen over each side. Census: 17 in 65 Full Bands, 7 finer (4/19). NGC ID# 23H3, PCGS# 4913
- 3634 1918-D MS66+ PCGS. CAC.** This Plus-graded Premium Gem is sharply detailed in most areas, but the central bands on the fasces show some blending. The well-preserved surfaces are lustrous and lightly toned in shades of ice-blue and pale gold. Population: 23 in 66 (1 in 66+), 2 finer. CAC: 9 in 66, 0 finer (4/19). NGC ID# 23H6, PCGS# 4918

**1919-D Dime, MS64+ Full Bands
Lustrous and Well Preserved**

- 3635 1919-D MS64+ Full Bands PCGS.** A brilliant and beautiful Choice Denver dime. The strike is bold aside from minor occasional peripheral fadeaway. Perhaps of interest to the specialist, the obverse exhibits three radial die cracks, including a vertical crack from Liberty's jaw to 12 o'clock. As of (4/19), PCGS has certified 10 coins as MS64+ Full Bands, and only 22 pieces finer. NGC ID# 23H9, PCGS# 4925

**1919-S Dime, MS67
Sole Finest at CAC**

- 3636 1919-S MS67 PCGS. CAC.** This is the sole finest CAC-approved 1919-S dime with or without Full Bands. Mostly brilliant and carefully preserved, this Superb Gem exhibits hints of yellow-gold, green, and magenta color on the obverse. Well-struck despite the lack of complete band separation. Population: 6 in 67 (1 in 67+), 0 finer. CAC: 1 in 67, 0 finer (4/19). NGC ID# 5LLM, PCGS# 4926
- 3637 1920-S MS64 Full Bands PCGS.** The design elements of this attractive Choice example are sharply detailed throughout, with fully split and rounded bands on the fasces. The lustrous surfaces are lightly toned and a long pinscratch on Liberty's neck and jaw is the only mark of note. PCGS has graded 55 numerically finer examples (4/19). NGC ID# 23HD, PCGS# 4933
- 3638 1923 MS67+ Full Bands PCGS. CAC.** Exquisite peach-gold, cherry-red, and apple-green toning endow the borders of this well struck, coruscating, and pristine Superb Gem. An outstanding representative of this high mintage yet underappreciated Philly issue. Conditionally rare, since PCGS (as of 4/19) has certified just 7 pieces as MS67+ with only 7 finer. NGC ID# 23HG, PCGS# 4939
- 3639 1923 MS67+ Full Bands PCGS. CAC.** Luminous, frosty surfaces reveal absolute preservation on this CAC-approved, Plus-graded Superb Gem. Strike sharpness spans both sides. On the obverse, tinges of russet toning cling to the border crevices, while the open areas are light golden. The reverse is imbued with aquamarine margins. Population: 99 in 67 (7 in 67+) Full Bands, 7 finer. CAC: 28 in 67, 4 finer (4/19). NGC ID# 23HG, PCGS# 4939
- 3640 1924-D MS66 Full Bands PCGS. CAC.** This Denver issue is more plentiful with Full Bands than not in high grade, although Premium Gems are inherently scarce, and few are CAC endorsed. This piece displays brilliant, frosty mint luster and satiny surfaces, struck from fresh dies. The sharpness throughout each side is outstanding. Population: 45 in 66 (1 in 66+) Full Bands, 9 finer. CAC: 11 in 66, 0 finer (4/19). NGC ID# 23HK, PCGS# 4945

**1924-S Mercury Dime, MS66
Rare This Fine, With CAC Approval**

- 3641 1924-S MS66 PCGS. CAC.** Vivid highlights of sea-green toning visit the peripheries of this delightful Premium Gem, with more delicate ice-blue and brilliant hues in the centers. The design elements are sharply detailed, aside from some minimal blending on the central bands of the fasces. The well-preserved surfaces radiate vibrant mint luster. Population: 1 in 66, 1 finer. CAC: 1 in 66, 0 finer (4/19). NGC ID# 23HL, PCGS# 4946

- 3642 1927-S MS64 Full Bands PCGS.** The 1927-S is a lower mintage branch issue that is much scarcer in Mint State than its Philadelphia cousin. This lustrous and well struck Choice dime appears free from contact. The reverse is close to brilliant, but the obverse exhibits lightly dappled blue-green toning, with hints of golden-brown across the periphery. The fields display prominent die polish lines, as made. NGC ID# 23HW, PCGS# 4965

**1929-D Mercury Dime, MS68
Registry-Grade Example**

- 3643 1929-D MS68 PCGS. CAC.** This spectacular MS68 Mercury dime exhibits sharply detailed design elements in most areas, with just the slightest trace of blending on the central bands on the fasces. The virtually flawless surfaces radiate vibrant mint luster, with subtle highlights of lime-green and magenta toning. Population: 3 in 68 (1 in 68+), 0 finer. CAC: 3 in 68, 0 finer (4/19). NGC ID# 23J3, PCGS# 4974

- 3644 1934 MS68 Full Bands PCGS.** Iridescent apple-green, ruby-red, and peach-gold toning endows the peripheries of this lustrous and well struck Great Depression type coin. The fields are pristine, and Liberty's cheek and neck show only delicate contact. Population: 32 in 68 (2 in 68+) Full Bands, 0 finer (4/19). NGC ID# 5BZ8, PCGS# 4989

**1935-D Dime, MS67+ Full Bands
Tied for the Finest Certified**

- 3645 1935-D MS67+ Full Bands PCGS. CAC.** Registry Set collectors will find this Denver issue difficult to locate in Superb Gem Full Bands condition, especially with CAC endorsement. The current coin offers all these attributes, as well as a Plus designation, which further sets it apart from the majority of 1935-D Mercury dimes. A patch of sea-green, lavender, and russet toning on the upper obverse wraps over onto the lower reverse, but the majority of each side is brilliant. Well-struck in the centers and satiny with no bothersome abrasions. Population: 58 in 67 (11 in 67+) Full Bands, 0 finer. CAC: 22 in 67, 0 finer (4/19). NGC ID# 23JD, PCGS# 4995

**1945 Dime, MS64 Full Bands
Key Strike Rarity in the Series**

- 3646 1945 MS64 Full Bands PCGS.** In the mid-1970s Harold Kritzman discovered fully split bands were the key to a fully struck Mercury dime. Then he quickly discovered that no one had any 1945-P dimes with split bands across the center of the fasces on the reverse. Word quickly spread and today the 1945-P is the key strike rarity in the series, even though more than 159 million pieces were struck. This is an all-brilliant example with strong separation evident on the central bands. Population: 45 in 64 (1 in 64+) Full Bands, 60 finer (4/19). NGC ID# 5A98, PCGS# 5057

PROOF ROOSEVELT DIME

- 3647 1983 No S PR70 Deep Cameo PCGS.** A flawless Deep Cameo example of this modern proof mint error. Each side is sharp and frosted on the devices, with endless depth of mirroring in the fields. No toning is present. Merely 16 proof 1983 No S dimes are certified this fine at PCGS and NGC combined. Population: 9 in 70 Deep Cameo (4/19). NGC ID# 28ZN, PCGS# 95265

TWENTY CENT PIECES

- 3648 1875-CC MS62 PCGS. BF-2, R.1** As the only collectible Carson City issue of the short-lived twenty cent denomination, the 1875-CC is requisite for every type set of the legendary Old West facility. This satiny ocean-blue and gunmetal-gray representative is nicely struck, with only the highest portions of the breast features incomplete. The reverse is well preserved and the obverse exhibits just a few minor marks. NGC ID# 23R6, PCGS# 5297

**1875-S Twenty Cent Piece, MS65+
Frosty, Untoned Type Coin**

- 3649** 1875-S MS65+ PCGS. CAC. BF-6, R.4. Weakness on the S in CENTS and the date placement confirm this variety of the plentiful 1875-S twenty cent piece. This San Francisco issue is a popular type coin, and it is the only issue in the short-lived series from this mint. More than 1.1 million coins were struck. Nonetheless, high-end Uncirculated examples are scarce. This Plus-graded Gem displays frosty mint luster and untuned surfaces. The upper edge of the eagle's left (facing) wing has characteristic strike softness. NGC ID# 23R7, PCGS# 5298

PROOF TWENTY CENT PIECES

**1875 Twenty Cent, PR64
Light Peach-Gold Toning**

- 3650** 1875 PR64 PCGS. BF-1, R.1. The usual die pair for proofs and circulation strikes with the shield point over the left side of the upright of the 1. Surfaces lightly toned in peach-gold patina with occasional violet accents maintain a degree of field reflectivity, but not enough to generate significant cameo contrast. A few minor hairlines are seen but no obvious contact marks. From a first-year mintage of 1,200 proofs. NGC ID# 27GZ, PCGS# 5303

**1875 Twenty Piece, Choice Proof
CAC Seal, Old Green Label Holder**

- 3651** 1875 PR64 PCGS. CAC. BF-1. Rich aquamarine and almond-brown toning encompasses this well struck and undisturbed Choice proof. A delightful and desirable specimen. The twenty cent denomination was coined for only four years, and proofs of the series are subject to strong demand. Housed in an old green label holder. CAC: 6 in 64, 10 finer (4/19). NGC ID# 27GZ, PCGS# 5303

**1876 Twenty Cent Piece, PR63 Cameo
Lavender and Blue Toning**

- 3652** 1876 PR63 Cameo NGC. BF-4, R.4. Rich ocean-blue toning surrounds the borders on this Select Cameo proof, and delicate lavender color across the interiors lightens gradually toward the centers. Appreciable contrast and mirrored fields produce strong eye appeal despite scattered light marks that limit the numeric grade. The 1876 is one of only four proof issues in the series and is elusive in Cameo grades.

This is the first known proof discovered of the BF-4 die pair. The authors of *Double Dimes* (2014) write of BF-4: "Discovered jointly by the authors and Heritage Auctions in autumn 2014. ... It may exist as a proof as well as a circulation strike, but this is not yet known for certain. If so, proofs are very rare." The present coin confirms the existence of proofs. Census: 16 in 63 Cameo (1 in 63+), 53 finer (4/19). NGC ID# 27H3, PCGS# 85304

**1878 Twenty Cent Piece, PR64
Final Proof-Only Issue**

- 3653** 1878 PR64 PCGS. BF-1, R.3. The short-lived twenty cent denomination came to an end in 1878, with a final proof-only mintage of 600 pieces. This impressive Choice specimen offers sharply detailed design elements and reflective fields, under vivid shades of greenish-gold, lavender-gray, and violet toning. The well-preserved surfaces add to the attractive overall presentation. PCGS has graded 41 numerically finer examples (5/19). NGC ID# 27H5, PCGS# 5306

**1878 Twenty Cent, Border-Toned PR64
Final-Year Proof Type Coin**

- 3654** 1878 PR64 PCGS. BF-1, R.3. Only one die pair was used for this issue, the final date in the twenty cent series. Coinage amounted to 600 proofs. This Choice representative displays sharp, satiny devices with a hint of cameo contrast. The fields are deeply mirrored. Untoned in the centers, this proof type coin has rich amber and sea-green border hues. NGC ID# 27H5, PCGS# 5306

EARLY QUARTERS

3655 1806/5 B-1, R.2, Fine 15 PCGS. CAC. Tompkins Die State 2/3. An obvious overdate with the curve and ball of the 5 evident near the loop of the 6. Rich forest-green and lilac-red toning blankets both sides. Marks are inconsequential aside from a tick on the eagle's head and a couple of wispy marks near the profile.
Ex: Long Beach Signature (Heritage, 6/2013), lot 3300; Long Beach Signature (Heritage, 9/2016), lot 3881, which realized \$1,292.50. NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

3656 1807 B-1, R.2, VF35 PCGS. Tompkins Die State 5/2, heavily clashed reverse, lapped obverse. B-1 is the slightly more plentiful of the two 1807 Draped Bust quarter varieties, although this date as a whole is a popular choice for type collections. The present coin has strong central sharpness that earns the Choice VF grade from PCGS, complemented by lilac-gray and olive toning. The borders are weakly defined, as is often the case with early type coins struck on a screw press from worn dies. NGC ID# 23RE, PCGS# 38939 Base PCGS# 5316

BUST QUARTER

1825/4/(2) Capped Bust Quarter, MS63
 Popular B-2 Variety

3657 1825/4/(2) B-2, R.2, MS63 PCGS. Tompkins Die State 1/1. This attractive Select specimen represents the popular B-2 variety, with star 8 placed low in relation to the cap and 25 C high above the dentils. The design elements are sharply detailed and the lightly marked surfaces retain significant amounts of original mint luster, under pleasing shades of lavender-gray and pale gold toning. Population: 6 in 63, 14 finer (4/19). NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336

SEATED QUARTERS

1841-O Quarter, MS64
 Medium Tan Toning

3658 1841-O MS64 PCGS. Briggs 1-A. From the second year of New Orleans quarter production, the 1841-O is readily obtained in well circulated grades. Mint State examples are very scarce, and the issue is rare as a near-Gem. This satiny example exhibits tan-brown and stone-gray toning. The reverse is close to pristine, while the obverse field displays delicate grazes. The left-side stars and portions of the eagle show softness of impression. Population: 7 in 64, 1 finer (4/19). NGC ID# 23SL, PCGS# 5400

1857 Quarter, MS66 ★
 Brilliant With Semireflective Fields

3659 1857 MS66★ NGC. Brilliant and semiprooflike, a combination that earned a ★ from NGC. Well preserved aside from a concealed mark on star 1. A flashy No Motto type coin with peripheral incompleteness of strike. Census: 1 in 66+, 3 in 66★, 4 in 66+★, 19 finer (4/19).

Ex: West Palm Beach Signature (Heritage, 6/2008), lot 832. NGC ID# 23TE, PCGS# 5442

1858-S Quarter Dollar, XF45
 Sharp for the Grade

3660 1858-S XF45 PCGS. Briggs 2-B, with the upper serif of the mintmark touching the branch stem. This Choice XF 1858-S quarter is a pleasing collector example of the challenging San Francisco issue. Wear is trivial, and were more luster present an AU grade might have been considered. As it stands, this coin displays deep gunmetal-gray and olive patina with lighter accents on the devices. Population: 11 in 45, 9 finer (4/19). NGC ID# 23TK, PCGS# 5447

1860-S Quarter Dollar, VF20
 Elusive San Francisco Issue

3661 1860-S VF20 PCGS. Briggs 1-A. The San Francisco Mint struck only 56,000 quarter dollars in 1860, and this issue circulated extensively. Surviving examples in any condition are worthy acquisitions. For the more advanced collector, this attractive VF coin has sharp detail and well-balanced pewter-gray coloration. The surfaces are slightly glossy with scattered minute marks. Population: 5 in 20, 32 finer (4/19). NGC ID# 442R, PCGS# 5453

1872-S Quarter, VG8
Key Branch Mint Issue, Seldom Offered

- 3662 1872-S VG8 PCGS.** Rare in all grades, the 1872-S is arguably as challenging to obtain as even the rarest Carson City quarters, and far rarer than the 83,000-piece mintage suggests. This is a pleasing VG example, with silver-gray surfaces that deepen slightly at the borders. Smooth wear softens the high points, although the rims are strong and the central motifs are sharp for the assigned grade. All letters of LIBERTY are at least partially visible, strongest at BERT. Expect eager competition for this solid, unimpaired 1872-S. NGC ID# 23UT, PCGS# 5483

1873 Seated Quarter, MS65
Open 3, No Arrows

- 3663 1873 Open 3, No Arrows, MS65 PCGS.** Struck prior to the weight change, this issue is far scarcer than its With Arrows counterpart. Appealing satin luster and border-toned surfaces provide a strong degree of eye appeal. The attractive toning includes hues of red-orange, olive-green, and tan, with blue accents at the margins. Light clash marks do not interfere with a sharp strike that exists throughout both sides. Population: 6 in 65, 4 finer (4/19). NGC ID# 23UV, PCGS# 5485

1876 Quarter, Originally Toned MS66

- 3664 1876 MS66 PCGS. CAC. Type Two Reverse.** The 1876, with a mintage of nearly 18 million pieces, is one of the most frequently encountered Seated Liberty quarters. Gem and finer examples become somewhat more challenging; fewer than 50 coins have been graded MS66 (the condition of the coin offered here) by PCGS and NGC (minus how many crossovers and resubmissions?). Medium intensity smoky-gray toning, accented with cobalt-blue, bathes both sides, and the design elements are sharply defined. The surfaces exhibit soft mint luster, and just a few minute marks are seen on the portrait of Liberty. Population: 24 in 66 (3 in 66+), 10 finer. CAC: 18 in 66, 6 finer (4/19).
Ex: Central States Signature (Heritage, 4/2006), lot 1511. NGC ID# 23V2, PCGS# 5501

1882 Seated Liberty Quarter, MS67
Brilliant Cartwheel Luster

- 3665 1882 MS67 PCGS. Briggs 1-A, Flynn-RPD-001.** The faint remnant of a repunched 1 is evident to the left of the primary 1's base. The 1882 Seated Liberty quarter boasts a small mintage of 15,200 coins, but many pieces were preserved at the time of issue for numismatic purposes. This Superb Gem is conditionally rare. Brilliant, radiant luster engulfs this frosty type coin with a remarkable degree of eye appeal. A few stars are incompletely struck, but the devices are sharp. No abrasions are observed. Population: 19 in 67, 2 finer (4/19). NGC ID# 23VE, PCGS# 5514

- 3666 1888 MS66 PCGS. Briggs 1-A.** Silver dollar mintages exceeded 30 million pieces during 1888, but Seated quarters for commerce were confined to 10,000 pieces. This immaculate and satiny Premium Gem has a dusky fire-red obverse. The reverse is richly patinated ocean-blue and tan-gold. Population: 48 in 66 (3 in 66+), 12 finer (4/19). NGC ID# 23VL, PCGS# 5520

1889 Quarter Dollar, MS67
Lovely Luster, CAC Endorsement

- 3667 1889 MS67 PCGS. CAC. Briggs 1-A.** The 1889 is a collectible Seated Liberty quarter despite its mintage of only 12,000 pieces. Nonetheless, Superb Gem examples are seldom offered. This CAC-endorsed coin displays a sharp strike and nearly flawless mint luster. The fields are semireflective. Both sides have original olive-green, gold, and rose-orange toning. Population: 30 in 67 (5 in 67+), 2 finer. CAC: 16 in 67, 2 finer (4/19). NGC ID# 23VM, PCGS# 5522

- 3668 1891 MS65 NGC. Gold CAC.** CAC considers this Gem 1891 Seated quarter, housed in a prior generation holder, to be undergraded. However, the eye appeal is outstanding even for a higher grade. Prooflike obverse fields create a cameo effect with the frosted central figure, while the reverse is vibrantly lustrous throughout. Both sides are brilliant in the centers and vividly toned in multicolor hues around the borders. This is a truly incredible Seated Liberty quarter. Census: 60 in 65, 60 finer. Gold CAC: 2 in 65, 0 finer (4/19). NGC ID# 23VR, PCGS# 5524

PROOF SEATED QUARTER

1872 Quarter, PR66 Cameo Rarely Offered With Field-Device Contrast

- 3669 1872 PR66 Cameo PCGS. Briggs 3-C.** An irregular die scratch on the left edge of the reverse shield confirms the proof die pair. This piece is sharp and deeply mirrored with satiny relief elements. Cameo contrast is apparent on each side, and a minority of the 1872 proof survivorship is so designated. This high-end coin is outstanding for type purposes. Each side has a hint of light russet-gold border toning that lightens to full brilliance in the centers. Population: 7 in 66 Cameo, 5 finer; 1 in 66 (1 in 66+) Deep Cameo, 0 finer (4/19). NGC ID# 23X5, PCGS# 85571

BARBER QUARTERS

1892-S Barber Quarter, MS65 Elusive in Gem Condition

- 3670 1892-S MS65 NGC.** While the Philadelphia coinage of this year is plentiful because it was saved as the first-year Barber issue, the San Francisco coin is much scarcer. In Gem condition, the 1892-S Barber quarter is rare. This piece displays sharp detail and satiny mint luster. Mottled golden toning covers much of the obverse with ocean-blue along the upper border. The reverse has light golden patina. Census: 8 in 65, 2 finer (4/19). NGC ID# 23XV, PCGS# 5603

- 3671 1895-S MS65 PCGS. DL-101.** Ex: Friend-R.S.D. Collection. The mintmark is repunched west on this variety. As a date, the 1895-S Barber quarter is rare in this condition, and few pieces are known finer. This Gem displays a sharp strike and satiny mint luster. Attractive rainbow toning forms concentric rings around each side. Population: 9 in 65, 7 finer (4/19).
Ex: ANA Signature (Heritage, 7-8/2008), lot 267, which realized \$2,645. NGC ID# 23Y6, PCGS# 5612

1896-S Barber Quarter, Choice XF Early San Francisco Key

- 3672 1896-S XF45 PCGS.** The 1896-S is one of the three major key dates in the Barber quarter series. It is especially rare in the higher circulated grades, where collectors heavily seek this issue. Offered here is a lightly worn coin that retains its design sharpness and has remnants of luster in the protected areas of the fields. Each side displays a hint of light golden toning over otherwise satiny silver surfaces. Eye appeal is pleasing. Population: 15 in 45, 65 finer (4/19). NGC ID# 23Y9, PCGS# 5615

- 3673 1898 MS66+ PCGS.** This Plus-graded Premium Gem exhibits sharp definition on all design elements and the well-preserved, lustrous surfaces are visited by shades of lavender, bluish-gray, and pale gold toning. Population: 23 in 66 (7 in 66+), 9 finer (4/19). NGC ID# 23YD, PCGS# 5619

1900-O Barber Quarter, MS66 Rarely Seen This Fine

- 3674 1900-O MS66 PCGS.** This lightly toned, lustrous Premium Gem displays bold definition on most of the design features, including the hair over Liberty's ear, but a touch of the usual softness is evident on the eagle's claw and arrow fletchings. A couple of trivial marks on Liberty's cheek do not detract from the outstanding overall eye appeal. Population: 8 in 66 (1 in 66+), 5 finer (4/19). NGC ID# 23YL, PCGS# 5626

- 3675 1903-S MS64 PCGS. CAC.** This attractive Choice Barber quarter exhibits sharply detailed design elements in most areas, with just a trace of softness on some star centers. The well-preserved, lustrous surfaces are visited by shades of lavender and sea-green toning. Population: 24 in 64 (1 in 64+), 29 finer. CAC: 7 in 64, 7 finer (4/19). NGC ID# 23YX, PCGS# 5636

- 3676 1905-O MS64 PCGS.** Ex: John Whitney Walter Collection. Scarce in most Mint State grades, the 1905-O Barber quarter becomes rare finer than MS64. This near-Gem collector coin displays satiny luster and an above-average strike with weakness only on a few obverse stars and the eagle's right (facing) talons. Light champagne toning graces each side, yielding to daubs of olive-green and russet around the borders. Population: 27 in 64 (1 in 64+), 24 finer (4/19). NGC ID# 23Z3, PCGS# 5640

- 3677 1905-S MS64 PCGS.** Concentric rainbow toning on each side of this near-Gem 1905-S Barber quarter earns it high marks for eye appeal, even while a few trivial surface grazes are visible on Liberty's cheek. The strike is sharp throughout. Finer 1905-S quarters are rarely encountered. Population: 26 in 64 (2 in 64+), 18 finer (4/19). NGC ID# 23Z4, PCGS# 5641

- 3678 1908-S MS64 PCGS. CAC.** The 1908-S is surprisingly scarce in Mint State grades and rare at the near-Gem or finer level. This is a brilliant Choice Uncirculated example with vibrantly lustrous, frosted surfaces and an overall sharp strike, although the right (facing) talons and arrow fletchings are soft. A loupe reveals faint roller marks that run diagonally across Liberty's cheek, virtually invisible in-hand. Population: 21 in 64 (1 in 64+), 25 finer. CAC: 6 in 64, 15 finer (4/19). NGC ID# 23ZF, PCGS# 5652

**1908-S Barber Quarter
Gem Uncirculated Example, CAC Endorsed**

- 3679 1908-S MS65 PCGS. CAC.** Flashy mint luster illuminates the unmarked, well-produced surfaces of this collector-favorite San Francisco issue. Although it is seldom available in Gem or finer conditions, the 1908-S is known for outstanding eye appeal and a sharp strike. This example certainly fills the bill, with attractive copper-gold toning and dazzling, frosty surfaces. Slight blending at the right shield corner and at the right (facing) talon is minor, as the coin is exceedingly bold in all other areas. A slight mint-made flaw above the 1 in the date at the bust edge is visible with a glass but of no consequence. Population: 14 in 65 (1 in 65+), 11 finer. CAC: 7 in 65, 8 finer (4/19). NGC ID# 23ZF, PCGS# 5652

PROOF BARBER QUARTERS

- 3680 1893 PR66+ Cameo PCGS. CAC.** Second year of issue in the Barber series, proof production dropped significantly after the initial demand for first-year coins wore off. Production quality, at least for this coin, did not diminish. The devices are chalky-white and set against deeply mirrored fields. Most of each side is brilliant with just the slightest touch of peripheral golden toning present. Population: 19 in 66 (3 in 66+) Cameo, 23 finer. CAC: 13 in 66, 15 finer (4/19). NGC ID# 2428, PCGS# 85679
- 3681 1899 PR66 PCGS. CAC.** Exquisite peach-gold, lilac-red, powder-blue, and apple-green toning consumes both sides of this fully impressed and undisturbed specimen. Although the patina precludes a Cameo designation, the originality and eye appeal are substantial. CAC: 4 in 66, 3 finer (4/19). NGC ID# 242E, PCGS# 5685
- 3682 1903 PR65+ Cameo PCGS. CAC.** A splendid Gem Cameo with a Plus grade and a CAC green label. This proof Barber type coin shows no toning, and each side is magnificently contrasted. Every minute design element is needle-sharp. Population: 20 in 65 (3 in 65+) Cameo, 35 finer. CAC: 12 in 65, 27 finer (4/19). NGC ID# 242J, PCGS# 85689
- 3683 1906 PR66 PCGS. CAC.** There is minimal contrast evident on either side, but the surfaces are well-preserved with no obvious contact marks or hairlines. The mint brilliance flashes strongly through the thin veil of patina that is just barely seen on both obverse and reverse. Population: 43 in 66 (6 in 66+), 30 finer. CAC: 19 in 66, 25 finer (4/19). NGC ID# 242M, PCGS# 5692

STANDING LIBERTY QUARTERS

- 3684 1917 Type One MS66 Full Head PCGS.** Golden-brown and forest-green toning embraces the peripheries of this lustrous, fully struck, and virtually immaculate example. The No Stars Below Eagle design was coined for just two years, and since the 1916 is a great rarity, type collectors are compelled to purchase a 1917-dated example. NGC ID# 242Z, PCGS# 5707

**1917 Type One Quarter, MS67 Full Head
Rare Top-Grade CAC Example**

- 3685 1917 Type One MS67 Full Head PCGS. CAC.** Brilliant, blazing mint luster engulfs this Superb Gem type coin, illuminating sharp details and unabraded surfaces. Eye appeal is spectacular. The 1917 Philadelphia issue is the most popular Type One Standing Liberty quarter for type collectors, although its availability shrinks in MS67 Full Head, and no numerically finer pieces are known. CAC-endorsed coins in this grade are rare, and they are highly sought-after by Registry Set collectors. Population: 94 in 67 (8 in 67+) Full Head, 0 finer. CAC: 39 in 67, 0 finer (4/19). NGC ID# 242Z, PCGS# 5707

- 3686 1917-D Type Two MS65 Full Head PCGS.** The Denver Type Two issue is scarce in Gem Full Head condition, and finer coins are out of reach for many collectors of this popular series. The present coin displays bold definition of the head, shield, and date, and each side has warm golden toning over satiny mint luster. Population: 76 in 65 (1 in 65+) Full Head, 30 finer (4/19). NGC ID# 2435, PCGS# 5717

- 3687 1917-D Type Two MS65 Full Head PCGS.** The Denver Type Two issue of this date is scarce in high grade Full Head. Gem or finer Full Head coins appear at auction less than half as often as those of the Philadelphia Type Two issue. This coin displays an impressively sharp strike and golden-toned satin mint luster. Sharp definition on Liberty's head complements a bold date, while the shield rivets a trifle indistinct. Population: 77 in 65 (1 in 65+) Full Head, 30 finer (4/19).
Ex: FUN Signature (Heritage, 1/2005), lot 6591, which realized \$2,875. NGC ID# 2435, PCGS# 5717

- 3688 1918-D MS65 Full Head PCGS.** A pleasing Gem Full Head example, cast in mottled olive-gold and russet toning on the obverse with light champagne color across the reverse. Shield rivets are weak, but Liberty's hairline is complete. The date numerals are sharp. Population: 67 in 65 (3 in 65+) Full Head, 34 finer (4/19). NGC ID# 3TWU, PCGS# 5723

- 3689 1918/7-S FS-101 — Surfaces Smoothed — PCGS Genuine. VF Details.** The downstroke of the underdigit 7 is blatant within the 8. The 1918/7-S is a key to the series, and examples that clearly show the overdate are desirable. This cream-gray representative lacks mentionable marks, or evidence of tooling, but has minutely granular surfaces and a charcoal-colored spot below the eagle's tail.

**1918/7-S Quarter Dollar, VF30
Well-Detailed for the Grade**

3690 1918/7-S FS-101 VF30 PCGS. Detail is sharp for the grade on this overdate quarter, including a clear date. Liberty's head is typically soft, as are the shield rivets, but actual wear is minimal. Each side has deeply mottled lilac-gray and olive toning over satiny surfaces that retain tiny glimpses of luster in the most protected places. A pleasing collector-grade example of this important *Guide Book* variety. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

3691 1918-S MS64 Full Head PCGS. A collector-grade Full Head example of this challenging San Francisco issue, showing satiny slate-gray surfaces that have a hint of light golden color. The sharpness of Liberty's head is shared by the date numerals, although this 1918-S quarter maintains the issue's reputation for weakness in the central areas, including the shield rivets. NGC ID# 2439, PCGS# 5725

3692 1919 MS67 PCGS. CAC. The 1919 Standing Liberty quarter is rare in MS67, even without Full Head detail. This piece displays luminous surfaces and original russet and peach-gold toning. Eye appeal is excellent. Typical of the 1919, this coin shows bold shield definition, although Liberty's temple and the first 1 in the date are weak, as is characteristic. Population: 36 in 67 (3 in 67+), 3 finer. CAC: 10 in 67, 3 finer (4/19). NGC ID# 243B, PCGS# 5728

3693 1919-S MS63 PCGS. A faint golden-tan sheen enhances the silver surfaces of this Select Uncirculated 1919 quarter. Satiny mint luster flows across smooth, minimally abraded fields and reasonably well-struck devices, although Liberty's head is flat at the cheekbone and temple. The date is complete and partially rounded, weakening only at the tail of the 9s and a the bottom-left serif of the first 1. Likewise, only shield rivets 3 and 4 are incomplete. Pleasing for the grade, with excellent eye appeal. NGC ID# 243D, PCGS# 5732

3694 1921 MS62 Full Head PCGS. This impressive MS62 specimen offers sharply detailed design elements, with Full Head definition and only a trace of softness on some shield rivets. The lustrous, lightly marked surfaces are blanketed in shades of violet and golden-brown toning. NGC ID# 243H, PCGS# 5741

**1923-S Quarter, MS64 Full Head
Well-Recognized Series Semikey**

3695 1923-S MS64 Full Head PCGS. This is one of the well-recognized semikeys to the Standing Liberty quarter dollar series. The San Francisco branch mint produced a relatively small quantity of 1.3 million coins. Lightly toned with dusky violet and crimson accents, this lustrous near-Gem exhibits Full Head definition and similarly crisp detail most everywhere else, save for rivets 3 and 4 and the eagle's breast. NGC ID# 243K, PCGS# 5745

3696 1924-D MS67 PCGS. CAC. A plentiful date overall, the 1924-D Standing Liberty quarter is difficult to locate with good eye appeal and a good strike. This CAC-endorsed MS67 coin decidedly meets requirements for good eye appeal, showing untuned, lustrous surfaces and no distracting abrasions. Liberty's head is not sharp, but the remainder of the design has above-average definition. The rarity of this issue in such fine condition should make collectors pay attention when this piece crosses the auction block. Population: 13 in 67 (1 in 67+), 0 finer. CAC: 12 in 67, 0 finer (4/19). NGC ID# 243M, PCGS# 5748

**1924-S Standing Liberty Quarter, MS66
Brilliant Surfaces and Vibrant Mint Luster**

3697 1924-S MS66 PCGS. CAC. This spectacular Premium Gem exhibits a better-than-average strike that falls just short of Full Head definition and shows a touch of the usual softness on a few shield rivets. The brilliant surfaces are impeccably preserved and radiate blazing mint luster from both sides. The eye appeal is extraordinary. Population: 39 in 66 (3 in 66+), 10 finer. CAC: 14 in 66, 7 finer (4/19).

Ex: *ANA Signature (Heritage, 8/2016)*, lot 3868. NGC ID# 243N, PCGS# 5750

3698 1924-S MS64 Full Head PCGS. The 1924-S is semikey when sought in high grade with Full Head detail, being particularly scarce as a Gem. This Choice coin is more collectible and displays nearly the same level of quality. Satiny luster cast in a delicate champagne overlay illuminates remarkably sharp head detail and date numerals, leaving only the shield rivets a trifle weak. A few light hair-thin scratches in the reverse fields only appear under magnification.

Ex: *Central States Signature (Heritage, 5/2005)*, lot 7047, which realized \$3,220. NGC ID# 243N, PCGS# 5751

3699 1926-S MS65 NGC. The lustrous silver surfaces show little other color beyond some suggestions of gold, and frosty areas alternate with some brilliant patches. No mentionable marks appear even under a loupe, but some heavy raised die polishing lines appear on the upper reverse. Well-struck overall but not close to Full Head status. Non-Full Head Standing Libertys seem underrated in this market. Census: 26 in 65, 12 finer (4/19).

Ex: *Central States Signature (Heritage, 4/2012)*, lot 4232, which realized \$1,840. NGC ID# 4462, PCGS# 5758

3700 1926-S MS65+ PCGS. The 1926-S is a slightly better date in Gem or better grades, even without a Full Head. This MS65 coin shows slightly above-average definition on Liberty's torso but lacks sharpness on the head and eagle. Unabraded surfaces display faintly iridescent champagne toning over fine die striae in the fields. The remnants of partially effaced clash marks are visible in the recesses around Liberty and above the eagle. Population: 80 in 65 (3 in 65+), 26 finer (4/19).

Ex: *New York Signature (Heritage, 10-11/2015)*, lot 4316, which realized \$2,532.13. NGC ID# 4462, PCGS# 5758

3701 1928 MS66 Full Head PCGS. The PCGS population of MS66 Full Head 1928 quarters could include duplication, as NGC reports but a fraction of that total in this grade. PCGS and NGC combined list fewer than 100 surviving coins in MS66 and finer Full Head grades. This piece displays well-balanced sharpness throughout frosty, golden-toned surfaces. The preservation is outstanding. Population: 65 in 66 (5 in 66+) Full Head, 10 finer (4/19). NGC ID# 243X, PCGS# 5767

- 3702 1928-D MS67 NGC.** The 1928-D is only marginally scarce in MS66, but it becomes a major rarity at the MS67 grade level. Nonetheless, coins in this condition are often overlooked due to a greater focus on the rarer Full Head pieces, which are often sought for Registry Sets. Non-Full Head coins in MS67 are underappreciated. This example is vibrantly lustrous and untuned, showing the usual touch of strike weakness on Liberty's head and the shield rivets. Eye appeal is outstanding for this issue, which seldom comes visually pleasing. Census: 9 in 67, 0 finer (4/19). NGC ID# 243Y, PCGS# 5768

**1928-D Quarter, MS65 Full Head
Rarely Offered Finer**

- 3703 1928-D MS65 Full Head PCGS.** Denver issues from the late part of the Standing Liberty quarter series are challenging to acquire in high grade with Full Head sharpness. The 1928-D is even scarcer in this condition than its San Francisco counterpart. Offered here is a brilliant Gem example with frosty mint luster. Liberty's head has a faint but complete hairline, while the shield rivets are predictably soft. Population: 36 in 65 (1 in 65+) Full Head, 23 finer (4/19). NGC ID# 243Y, PCGS# 5769

**1929-D Quarter, MS65 Full Head
Golden-Toned and Lustrous**

- 3704 1929-D MS65 Full Head PCGS.** In recent years, the 1929-D Standing Liberty quarter has been gaining popularity as a scarce issue in high-grade Full Head. This Gem example is well-struck with good head detail and above-average definition on the shield rivets. Frosty surfaces display light golden toning, and a few minor ticks are not out of line for the grade. Population: 52 in 65 Full Head, 20 finer (4/19). NGC ID# 2443, PCGS# 5775
- 3705 1930 MS67 Full Head NGC.** The 1930 is a favorite type coin in the Standing Liberty quarter series, as it is generally available with Full Head detail. However, such coins are scarce in MS67, and none are finer at NGC. This piece is brilliant and satiny. Liberty's head is unquestionably full, although the shield rivets remain weak. The eagle is notably sharp on the breast and the leading edge of its left (facing) wing. Census: 33 in 67 (1 in 67+ Full Head, 1 in 67★), 0 finer (4/19). NGC ID# 2445, PCGS# 5779

WASHINGTON QUARTERS

- 3706 1932 MS66+ PCGS. CAC.** The first-year 1932 is key to a date set of Washington quarters. Although the issue was set aside as a novelty by Great Depression collectors, examples become very scarce at the MS66+ level. This smooth, sharply struck, and lustrous representative displays pastel rose and aqua toning. Ex: Atlanta ANA Signature (Heritage, 2-3/2014), lot 4589, which realized \$4,259.38. From Charlie O's Collection. NGC ID# 2447, PCGS# 5790

**1932-D Quarter, Original MS65
Key, Low-Mintage Issue**

- 3707 1932-D MS65 PCGS.** The Denver Mint inaugurated Washington quarter production in 1932 with a limited mintage of 436,800 pieces. Although the S-mint from this initial year was produced in smaller numbers, the '32-D has long been considered the more challenging coin to locate in Choice and better condition. Gems are of the utmost scarcity and importance. This high-grade representative is untuned save for a few whispers of charcoal tinting at the top of the obverse, and the devices are boldly detailed. A few minute obverse marks preclude an even higher grade. Population: 91 in 65 (5 in 65+), 2 finer (4/19). Ex: FUN Signature (Heritage, 1/2008), lot 2816. From Charlie O's Collection. NGC ID# 2448, PCGS# 5791

- 3708 1932-S MS65 PCGS.** Very few 1932-S quarters are attractively toned, and fewer still combine a razor-sharp strike with outstanding eye appeal. This Gem coin has both attributes, with attractive, light iridescence on the obverse and a whisper of pale champagne color on the reverse. We doubt the strike can be any sharper, and a loupe reveals only a few tiny marks and pinpoint freckles. PCGS has certified just four numerically finer pieces (5/19). NGC ID# 2449, PCGS# 5792
- 3709 1932-S MS65 NGC.** The 1932-S is the lowest mintage issue in the series, and MS65 is the finest grade most collectors can aspire to own. Lustrous surfaces display splashes of deep russet around the obverse border and pale freckles of tan toning on the reverse. Well-struck and exceptionally unabraded. Census: 76 in 65 (3 in 65+, 1 in 65★), 7 finer (4/19). NGC ID# 2449, PCGS# 5792
- 3710 1932-S MS65 PCGS.** From a low mintage of 408,000 pieces, the 1932-S Washington quarter is an important first-year key to the series. This attractive Gem exhibits sharply detailed design elements and well-preserved, lustrous surfaces, with a few hints of golden-tan toning. PCGS has graded four numerically finer examples (4/19). From Charlie O's Collection. NGC ID# 2449, PCGS# 5792
- 3711 1932-S MS65 PCGS.** Plentiful in lower grades, the key-date 1932-S Washington quarter begins to make its scarcity known at the Gem level, and fewer than a dozen higher-grade coins are reported at PCGS (four) and NGC (seven) (4/19). This piece is sharp and clean — a true Gem. Satiny luster displays wisps of lilac and russet, although the underlying silver brilliance is dominant. Ex: FUN Signature (Heritage, 1/2002), lot 6872, which realized \$4,611.50. NGC ID# 2449, PCGS# 5792
- 3712 1935-S MS67+ PCGS.** Pastel ice-blue and straw-gold shades visit this lustrous and intricately struck Superb Gem. The preservation is ideal save for a few microscopic specks on the central obverse. As of (4/19), one of just seven 1935-S quarters to reach the MS67+ grade, and none are certified finer. From Charlie O's Collection. NGC ID# 244F, PCGS# 5799

**1936-D Quarter Dollar, MS67
Among the Finest Certified**

- 3713 1936-D MS67 PCGS. CAC.** Satiny mint luster displays delicate iridescent toning and exceptional preservation. The strike is sharp, and this CAC-endorsed Superb Gem is among the finest 1936-D Washington quarters certified. The 1936-D is rarely seen this fine at PCGS or NGC. Fewer than a dozen CAC-endorsed coins are known in MS67. Housed in an old green label holder. Population: 27 in 67 (4 in 67+), 0 finer. CAC: 10 in 67, 0 finer (4/19).
From Charlie O's Collection. NGC ID# 244H, PCGS# 5801

- 3714 1937 MS67+ PCGS.** A brilliant and pristine Superb Gem. The lustrous surfaces are well struck. An ideal candidate for the advanced Registry collector. As of (4/19), PCGS has certified 15 coins as MS67+ with none finer.
Ex: Long Beach Signature (Heritage, 6/2014), lot 3833, which realized \$3,818.75.
From Charlie O's Collection. NGC ID# 244K, PCGS# 5803

**1939 Quarter, MS68
Low-Availability Issue in High Grade**

- 3715 1939 MS68 PCGS. CAC.** *Ex: George's Army Collection.* With a mintage exceeding 33.5 million pieces, the 1939 quarter is not at the forefront of collectors' minds when they consider conditional rarities in the Washington quarter set. However, such is the case with the present 1939-dated piece in MS68, one of only 17 coins so graded at PCGS with none finer (4/19).

This piece offers splendid eye appeal, with booming cartwheel luster throughout pristine surfaces. Lightly toned overall with stone-white centers and honey-gold margins. A miraculous coin for the top-notch Registry Set.

Ex: Baltimore ANA (Heritage, 7/2008), lot 1656; Central States Signature (Heritage, 4/2012), lot 4280.
From Charlie O's Collection. NGC ID# 44KU, PCGS# 5808

**1939-S Quarter, MS67+
Tied for Finest Known**

- 3716 1939-S MS67+ PCGS. CAC.** This Plus-graded, CAC-endorsed 1939-S quarter displays glimmering satin luster that is virtually perfect. Traces of champagne toning appear over each side, and the strike is sharp. This is as fine as the 1939-S is known to exist. Population: 89 in 67 (8 in 67+), 0 finer. CAC: 39 in 67, 0 finer (4/19).
From Charlie O's Collection. NGC ID# 244T, PCGS# 5810

**1940-D Quarter, MS67+
Fifth Lowest Mintage**

- 3717 1940-D MS67+ PCGS. CAC.** The 1940-D is an important condition rarity in the Washington quarter series, and this example is an impressive Superb Gem. The 1940-D had the fifth lowest mintage of any Washington quarter. The present Superb Gem has lovely powder-blue and pale gold toning over frosty silver luster with pristine surfaces. Population: 65 in 67 (6 in 67+), 0 finer. CAC: 29 in 67, 0 finer (4/19).

Ex: National Money Show Signature (Heritage, 2-3/2014), lot 4610.
From Charlie O's Collection. NGC ID# 244V, PCGS# 5812

- 3718 1941-S MS67+ PCGS. CAC.** Freckles of green, red, and gold adorn the obverse border, and accompany random portions of the reverse. A well-struck and carefully preserved Superb Gem of this wartime West Coast issue. As of (4/19), PCGS has graded only 15 coins as MS67+ and none finer. CAC: 45 in 67, 0 finer (4/19).

Ex: Central States Signature (Heritage, 4/2015), lot 4304, which realized \$2,820.

From Charlie O's Collection. NGC ID# 244Z, PCGS# 5816

- 3719 1942 MS67+ PCGS. CAC.** Lavender-red and jade-green visit the margins of this lustrous World War II quarter. A bold strike and booming luster proclaim the eye appeal. Thorough evaluation reveals only incidental grazes on the right obverse field. Population: 61 in 67 (11 in 67+), 0 finer. CAC: 31 in 67, 0 finer (4/19).

Ex: FUN Signature (Heritage, 1/2017), lot 4771, which realized \$1,703.75.

From Charlie O's Collection. NGC ID# 2452, PCGS# 5817

- 3720 1943-D MS67+ PCGS. CAC.** Cherry-red and lemon-gold patina accompanies the right obverse margin. The remainder of both sides displays light sea-green toning. Careful evaluation reveals delicate obverse field grazes. A coin with Registry Set credentials based on the PCGS Plus designation and CAC endorsement. Population: 91 in 67 (16 in 67+), 1 finer. CAC: 37 in 67, 0 finer (4/19).

Ex: Central States Signature (Heritage, 4/2016), lot 4251, which realized \$1,527.50.

From Charlie O's Collection. NGC ID# 2456, PCGS# 5821

- 3721 1944 MS67+ PCGS.** Crescents of rainbow patina form at the upper obverse border and, to a lesser extent, the upper reverse border. The remaining surfaces are fully brilliant with blazing mint frost. Razor-sharp design definition and unsurpassed technical quality make this a must-have Washington quarter for the Registry collector. PCGS has certified 21 pieces as MS67+, and none are graded finer by that service (4/19).

From Charlie O's Collection. NGC ID# 2458, PCGS# 5824

- 3722 1946 MS67+ PCGS. CAC.** Narrow bands of cherry-red and apple-green alternate across most of the peripheries. Washington is mostly brilliant, but is surrounded by blushes of golden-brown patina. A lustrous and well-struck Superb Gem with minor grazes on the right obverse field. Population: 52 in 67 (10 in 67+), 0 finer. CAC: 18 in 67, 0 finer (4/19).

From Charlie O's Collection. NGC ID# 245E, PCGS# 5830

- 3723 1948-S MS67+ PCGS. CAC.** 30th Anniversary Green Label Holder. Lavish fire-red and sea-green toning consumes the obverse. The reverse is brilliant. A lustrous and immaculate Superb Gem. As of (4/19), PCGS has certified 20 pieces as MS67+ and only two finer as MS68. CAC: 59 in 67, 2 finer (4/19).

From Charlie O's Collection. NGC ID# 245N, PCGS# 5838

**1950 Quarter, MS67+
None Certified Finer**

- 3724 1950 MS67+ PCGS. CAC.** Light chestnut-gold toning accompanies the borders of this thoroughly lustrous and essentially immaculate Superb Gem. The strike is sharp except across the lower left obverse margin. As of (4/19), PCGS has certified 11 pieces as MS67+. Neither leading grading service has certified a commercial 1950 quarter finer. NGC ID# 245S, PCGS# 5841

**1950 Washington Quarter, MS67+
One of the Finest Certified at PCGS**

- 3725 1950 MS67+ PCGS. CAC.** The frosty silver surfaces are impeccably preserved and highly lustrous throughout both sides. A loupe reveals a light sprinkling of moss and russet toning flecks, more prevalent on the obverse. As expected of the grade, no relevant marks appear on either side. Population: 70 in 67 (11 in 67+), 0 finer. CAC: 38 in 67, 0 finer (4/19).

Ex: Chicago Signature (Heritage, 8/2013), lot 3857.

From Charlie O's Collection. NGC ID# 245S, PCGS# 5841

**1950-D/S Quarter, MS65
Early Generation Holder**

- 3726 1950-D/S FS-601 MS65 PCGS.** The upper portion of an S is visible at the top of the primary D mintmark on this *Guide Book* variety. Gem and finer examples are scarce. This piece displays a hint of iridescence across softly frosted, unabraded surfaces. The coin is well-struck and appealing. Housed in a first generation "rattler" holder.

From Charlie O's Collection. NGC ID# 245T, PCGS# 145638
Base PCGS# 5843

-
- 3727 1950-S/D FS-601 MS66 PCGS.** Something must have gone wrong in 1950, for there are several varieties of repunched and over-mintmarks among the Washington quarters for the year. The most dramatic include this S over D variety and the opposite D over S variety. Both are highly collectible, listed in the *Guide Book*, and recognized by the grading services as important varieties for certification purposes. This specimen is a frosty Gem with sharp design features and only a hint of lime-green patina. The curve and stand of the undermintmark are readily evident. Population: 47 in 66 (8 in 66+), 8 finer (4/19).

From Charlie O's Collection. NGC ID# 245V, PCGS# 145639
Base PCGS# 5845

**1952-D Washington Quarter, MS67
Richly Toned Obverse**

- 3728 1952-D MS67 PCGS. CAC.** *Ex: Michael Fuller Collection.* The deep peach and golden-brown toning that saturates the obverse occupies only the rims on the reverse. Suitably struck with lovely mint luster and no distracting abrasions to report. Only a handful of infinitesimal ticks bar the way to an even higher grade. Population: 22 in 67 (1 in 67+), 0 finer. CAC: 12 in 67, 0 finer (4/19).

Ex: FUN Signature (Heritage, 1/2007), lot 4284; Houston Signature (Heritage, 11/2007), lot 60904, which realized \$5,175.

From Charlie O's Collection. NGC ID# 2462, PCGS# 5850

1954 Quarter, Splendidly Toned MS67+

- 3729 1954 MS67+ PCGS. CAC.** The toning on both sides of this exceptional Washington quarter includes colors from a palette of gold, jade, violet, orange, and fuchsia. Neither side shows any mentionable abrasions, and the off-the-charts eye appeal separates this piece from the pack both at PCGS and CAC. Population: 85 in 67 (9 in 67+), 0 finer. CAC: 44 in 67, 1 finer (4/19).
From Charlie O's Collection. NGC ID# 2467, PCGS# 5855

1960-D Quarter, Colorful MS67
Tied for Finest Certified

- 3730 1960-D MS67 PCGS. CAC.** Both sides of this Superb Gem display intense toning over frosty silver luster, with bold design motifs. The obverse is mostly deep gold, with burnt orange and sea-green near the border. The reverse shows intermingled russet, lilac, green, and blue toning. Population: 16 in 67, 0 finer. CAC: 10 in 67, 0 finer (4/19).
Ex: Houston Signature (Heritage, 12/2008), lot 1417.
From Charlie O's Collection. NGC ID# 3TEX, PCGS# 5869

- 3731 1961 MS67 PCGS.** This Registry grade Washington quarter displays sharply detailed design elements throughout and the virtually pristine surfaces are lustrous and appealing. A few subtle hints of golden-tan toning accent the outstanding eye appeal. Population: 35 in 67 (2 in 67+), 0 finer (4/19).
From Charlie O's Collection. NGC ID# 246M, PCGS# 5870

1961-D Quarter, Lustrous MS67
A Significant Condition Rarity

- 3732 1961-D MS67 PCGS.** Despite many rolls set aside in the 1960s, only a few 1961-D quarters qualify for the Superb Gem level, and none are numerically finer at either service. This brilliant MS67 is satin-smooth and virtually without fault, with a pinpoint-sharp strike. The obvious Registry quality will attract many interested bidders, while the impeccably lustrous surfaces undoubtedly will inspire vigorous competition. Population: 8 in 67 (1 in 67+), 0 finer (4/19).
From Charlie O's Collection. NGC ID# 246N, PCGS# 5871

1962 Quarter, MS67
Rainbow-Toned Obverse

- 3733 1962 MS67 PCGS.** The radiant, nearly flawless obverse is further enhanced by splendid multicolored toning. The reverse shows only a hint of peripheral gold at the borders, with an otherwise brilliant-white surface. MS65 and MS66 examples are readily available, but Superb pieces are elusive. Population: 34 in 67 (2 in 67+), 0 finer (4/19).
Ex: Central States Signature (Heritage, 5/2004), lot 7291; Houston Signature (Heritage, 12/2008), lot 1420.
From Charlie O's Collection. NGC ID# 246P, PCGS# 5872

1962-D Quarter, Blazing MS67
Registry-Quality

- 3734 1962-D MS67 PCGS.** An incredible lack of virtually any detectable surface disturbances, coupled with vibrant, essentially brilliant mint bloom and boldly struck design elements, gives this remarkable Superb Gem truly exceptional visual appeal. As a date, this issue is readily available in grades through MS66, but finer pieces are genuinely rare and highly sought-after by Registry Set collectors. Firmly at the uppermost-end of the assigned grade, this coin is tied with just 12 others as the finest certified 1962-D quarter at PCGS.
Ex: Summer FUN Signature (Heritage, 7/2014), lot 3745.
From Charlie O's Collection. NGC ID# 246R, PCGS# 5873

- 3735 1963-D MS67 PCGS. CAC.** Lustrous and appealing, with a bold strike, this Superb Gem displays tremendous eye appeal. Very subtle hints of toning appear when the coin is rotated. Only a few contact marks appear and they are minor. A few drops of translucent residue are noted near 8 o'clock on the reverse. Population: 25 in 67 (3 in 67+), 0 finer. CAC: 9 in 67, 0 finer (4/19).
Ex: FUN Signature (Heritage, 1/2013), lot 4848.
From Charlie O's Collection. NGC ID# 44B3, PCGS# 5875

1968 Quarter, MS68
Significant Registry Coin

- 3736 1968 MS68 PCGS.** For the Registry collector of clad Washington quarters, this MS68 example offers an important opportunity. It is one of only eight coins so graded by PCGS with none finer (4/19). Toning is minimal, luster strong, and eye appeal high all-around. Ex: *Long Beach Signature* (Heritage, 9/2013), lot 6414.
From *Charlie O's Collection*. NGC ID# 246Z, PCGS# 5881

1968-D Quarter, MS68
Registry Set Prize

- 3737 1968-D MS68 PCGS.** Ideal for Registry Set purposes, the present 1968-D quarter is one of just 13 pieces certified by PCGS as MS68 (3/19) with none finer. The NGC Census summit is similarly at the MS68 level. As demanded by the lofty grade, the lustrous surfaces appear devoid of contact. The sole imperfection is a small fleck west of the 6 in the date. NGC ID# 2472, PCGS# 5882

1968-D Quarter, Toned MS68
Incredible Coloration

- 3738 1968-D MS68 PCGS.** A top-grade Registry coin with intense coloration and immaculate preservation. Lavender and powder-blue interiors yield to deep olive-gold, crimson, and lemon-yellow peripheral hues. Eye appeal is superb. PCGS reports only 13 coins this fine and none finer (4/19). The Registry Set competitor will find this acquisition a must.
From *Charlie O's Collection*. NGC ID# 2472, PCGS# 5882

1969 Quarter, MS67
An Important Post-Silver Registry Key

- 3739 1969 MS67 PCGS.** Advanced collectors of Washington quarters have precious few opportunities to acquire a 1969 quarter at the MS67 level. At present, just 15 such pieces are certified at PCGS and NGC combined. Nor are there any finer examples at either service. This exceptional Superb Gem displays faint iridescence around a subtle swath of golden-brown toning. The sharply struck surfaces are entirely free of meaningful marks or distractions. Population: 9 in 67 (1 in 67+), 0 finer (4/19).
From *Charlie O's Collection*. NGC ID# 2473, PCGS# 5883

- 3740 1970 MS67+ PCGS.** Infrequent minuscule autumn-brown freckles deny full brilliance, but this thoroughly lustrous Superb Gem is virtually void of contact. Tied with one other example as the single-finest certified, and thus an important acquisition for the Registry collector. Population: 27 in 67 (2 in 67+), 0 finer (4/19). Ex: *New York Signature* (Heritage, 11/2013), lot 3480, which realized \$2,115.
From *Charlie O's Collection*. NGC ID# 2475, PCGS# 5885

- 3741 1970-D MS68 PCGS.** Ex: Michael Fuller Collection. An immaculate and well-struck example. Late-in-life dies provide an orange-peel texture. The obverse field displays myriad die polish lines. Population: 7 in 68, 0 finer (4/19). Ex: *Gary Kramer Collection / Central States Signature* (Heritage, 5/2005), lot 7752; *Michael Fuller Collection / Houston Signature* (Heritage, 11/2007), lot 60915, which realized \$1,626.10.
From *Charlie O's Collection*. NGC ID# 25ZA, PCGS# 5886

1971-D Washington Quarter, MS68
Among the Finest Certified

- 3742 1971-D MS68 PCGS.** To date, neither PCGS nor NGC has graded any example of this issue in higher numeric grade (4/19). This spectacular MS68 specimen exhibits razor-sharp definition on all design elements and the pristine brilliant surfaces radiate vibrant mint luster on both sides. Population: 2 in 68, 0 finer (4/19). Ex: *Long Beach Signature* (Heritage, 9/2013), lot 6415.
From *Charlie O's Collection*. NGC ID# 2478, PCGS# 5888

**1976-S Bicentennial Quarter, MS69
Silver Clad Issue**

- 3743** 1976-S Silver MS69 PCGS. Ex: Michael Fuller Collection. Even under magnification, the exquisite preservation of this modern silver clad piece is highly impressive. The subtlest hints of champagne patina are seen over the obverse, while the reverse is essentially untuned. Though the net mintage for the 1976-S silver clad business strike is speculative, its rarity in MS69 is undeniable. Population: 3 in 69, 0 finer (4/19).
Ex: *Houston Signature (Heritage, 11/2007)*, lot 60916.
From *Charlie O's Collection*. NGC ID# B765, PCGS# 5898

**1982-P Quarter, MS68
Sole Finest at PCGS**

- 3744** 1982-P MS68 PCGS. Consider this: Out of more than 500 million Washington quarters struck at the Philadelphia Mint in 1982, only a single coin — the one offered here — has been awarded an MS68 grade by PCGS. Radiant pearl-gray surfaces are fully struck and effectively flawless with occasional powder-blue and tan accents. This is a phenomenal opportunity for Registry enthusiasts that should generate plenty of excitement when it crosses the block. Population: 1 in 68, 0 finer (4/19).
From *Charlie O's Collection*. NGC ID# 247U, PCGS# 5912

- 3745** 1982-D MS67+ PCGS. This Plus-graded Superb Gem exhibits razor-sharp definition on all design elements and the virtually flawless surfaces radiate vibrant mint luster throughout. Overall eye appeal is terrific. Population: 47 in 67 (5 in 67+), 0 finer (4/19).
From *Charlie O's Collection*. NGC ID# 247V, PCGS# 5913

- 3746** 1991-D MS67 PCGS. This magnificent Superb Gem is among the finest specimen certified at PCGS. The design elements are razor-sharp and the impeccably preserved surfaces are enhanced by delicate highlights of pale gold toning. Vibrant mint luster adds to the outstanding eye appeal. Population: 4 in 67, 0 finer (4/19).
From *Charlie O's Collection*. NGC ID# 248F, PCGS# 5931

**1995-P Quarter, MS68
Top-Graded Registry Coin**

- 3747** 1995-P MS68 PCGS. This is the first PCGS-graded 1995-P Washington quarter in MS68 condition that we have ever offered. It should elicit spirited competition among Registry players. Both sides remain unmarked and all-brilliant with cartwheel luster. The motifs are fully struck. Population: 4 in 68, 0 finer (4/19).
From *Charlie O's Collection*. NGC ID# 248N, PCGS# 5938

EARLY HALF DOLLARS

**1794 Flowing Hair Half, Fine Details
O-101, T-7, Collectible Example**

- 3748** 1794 O-101, T-7, High R.3 — Scratch — PCGS Genuine. Fine Details. Tompkins Die State 1/3. Struck from an intermediate die state, this silver-gray example is well-defined for the assigned Details grade. The rims and dentils are bold, the date is sharp, and a generous amount of wing feather definition remains. Myriad tiny marks exist on both sides, including a few remnant adjustment marks on the portrait. A short scrape near the eagle's beak accounts for the Scratch designation, while an old cleaning shows signs of recovery with faint golden-gray toning at the rims.

**1794 Flowing Hair Half, VG Details
Late Die State O-101a**

- 3749** 1794 O-101a, T-7, High R.3 — Scratches — NGC Details. VG. Tompkins Die State 1/5, with a perfect obverse and a blurry die crack between the uppermost olive leaf and the second S in STATES on the reverse. This impressive specimen exhibits VG sharpness, with all design elements complete in outline and some interior detail intact on the hair and eagle's feathers. Aside from some long, thin pinscratches on the obverse, the pleasing lavender-gray surfaces are lightly abraded. The lower obverse rim is worn flat, but the reverse rim is bold. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1795 O-109 Half Dollar, VF25

- 3750** 1795 2 Leaves, O-109, T-16, R.4, VF25 NGC. 9-8 berry arrangement with a die defect line through the top inside berry on of the right side of the wreath, and twin segments to the left of OF. Both sides of this silver-gray display balanced wear and bits of russet toning at the margins. Possible Condition Census for the die pairing.

Ex: Long Beach Signature (Heritage, 6/2004), lot 7236. NGC ID# 24E7, PCGS# 39227 Base PCGS# 6052

- 3751** 1795 2 Leaves, A Over E in STATES, O-113a, T-14, R.4, VG8 PCGS. CAC. Tompkins Die State 5/2. Designated as O-113 by PCGS, but this is an example of the later Overton die state, O-113a. The die break beneath the bust tip allows immediate identification, though the A over E engraving blunder (within STATES) causes the variety's mention on page 201 of the 2020 Guide Book. This example has dove-gray fields and lighter stone-white motifs. The right obverse displays a few thin marks, and the reverse is moderately granular. NGC ID# 24E7, PCGS# 39254 Base PCGS# 39252

1795 Two Leaves Half Dollar, VF30
Scarce O-130, 7x10 Berries Variety

- 3752** 1795 2 Leaves, O-130, T-8, Low R.5, VF30 NGC. Tompkins Die State 3/3. A heavy diagonal die crack crosses Liberty's face on the obverse, and peripheral die cracks are apparent on the reverse. Overton-130 is a scarce variety, distinctive for the 7x10 berry count on the reverse wreath, which is shared by no other variety. The VF coin offered here displays glossy pewter-gray surfaces and even wear. Some parallel adjustment marks (mint made) are seen in the upper portion of Liberty's hair behind the temple. NGC ID# 24E7, PCGS# 39242 Base PCGS# 6052

- 3753** 1803 Large 3, Small Reverse Stars, 12 Arrows, O-101, T-1, R.3, XF40 PCGS. Tompkins Die State 2/2. The obverse is stone-white, while the reverse displays dusky gunmetal-gray shades. All letters in E PLURIBUS UNUM are bold, but Liberty's cheek and shoulder show wear. Smooth aside from a thin mark near Liberty's neck. NGC ID# 24E7, PCGS# 39270 Base PCGS# 6066

- 3754** 1805/4 O-101, T-4, R.3, XF40 NGC. Tompkins Die State 1/2. Charcoal-gray borders cede to dove-gray fields and pearl-white high points. This is a deeply toned, well-defined Overton-101 with scattered minor obverse marks and an unabraded reverse. O-101 is an obvious overdate, with the crosslet, diagonal, base, and upright of the 4 all partly visible beneath 5. Struck from an early die stage, lacking the reverse cud above R and I of AMERICA that represents the later die states.

Ex: Long Beach Signature (Heritage, 6/2015), lot 4455, where it brought \$2,820. NGC ID# 24EH, PCGS# 39290 Base PCGS# 6070

- 3755** 1805 O-111, T-3, R.2 — Reverse Damage — NGC Details. AU. Tompkins Die State 3/2. A partially lustrous cream-gray Draped Bust type coin. A prominently clashed die state with lines from the shield near Liberty's ear. A reverse edge nick at 12 o'clock, and a scuff on UNUM and the stars above, combine to account for the NGC designation.

1806/5 O-101 Half Dollar, AU55
Guide Book Overdate, Early Die State

- 3756** 1806/5 Large Stars, O-101, T-6, R.3, AU55 PCGS. Tompkins Die State 1/2. This Choice AU early die state piece displays flashes of luster in the fields and is only lightly worn on the high points of the devices. Both sides show sharp central detail, although the obverse border stars are incompletely brought up. This Guide Book overdate is scarce in high grade and highly sought-after. NGC ID# 24EK, PCGS# 39296 Base PCGS# 6077

- 3757** 1806 Pointed 6, No Stem, O-109a, T-15, R.3, AU53 PCGS. Tompkins Die State 6/4. The T-15 die pair is the sole Pointed 6 variety without a branch stem; an engraver's oversight. This example shows ample remaining mint luster and attractive steel-blue and wheat-gold toning. As usual for the late die state, the coin is somewhat lightly impressed at the centers, but better struck at the peripheries. Few marks appear across the colorful, appealing surfaces. An important Guide Book variety. NGC ID# 24EJ, PCGS# 39311 Base PCGS# 6073

1806 O-115a Half Dollar, AU53
Attractively Toned

- 3758** 1806 Pointed 6, Stem, O-115a, T-17, R.2, AU53 NGC. CAC. Tompkins Die State 4/2. A readily encountered die marriage, but the condition and eye appeal of the current coin is anything but common. Light gray toning on the obverse is framed by a delicate array of blue, chartreuse and russet toning at the peripheries, while the lustrous reverse possesses a lovely amber iridescence. NGC ID# 24EJ, PCGS# 39318 Base PCGS# 6071

- 3759** 1806 E Over A in STATES, O-124, T-22, R.6, VG10 PCGS. Tompkins Die State 1/1. The rare E Over A in STATES Guide Book variety (Overton-124) is easily identified. None are known above the AU Details grade level, and probably no more than 25 or so piece exist. Most show various surfaces problems. This cream-gray representative is minimally marked and minutely granular. The shield lines are nicely separated, though Liberty's curls and the eagle's plumage show wear commensurate with the grade. NGC ID# 24EJ, PCGS# 39330 Base PCGS# 6071

3760 1807 Draped Bust, O-105, T-4, R.1, AU50 ANACS. Hints of golden-brown and gunmetal-gray patina adorn portions of the obverse, but this lightly circulated representative is mostly untoned. Plentiful bright luster fills the legends. Marks are absent aside from a hair-thin line on Liberty's neck. A transitional year for the half dollar denomination.

Ex: Long Beach Signature (Heritage, 9/2008), lot 2032; Rosemont Signature (Heritage, 8/2013), lot 3879, which realized \$2,875. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

3761 1807 Draped Bust, O-105a, T-4, R.4, XF45 NGC. Tompkins Die State 4/4. A fairly large die break between the ED in UNITED confirms the very scarce late die stage of Overton-105. This silver-gray example displays substantial peripheral luster though the high points confirm a stint in early American commerce. The surfaces show multiple sets of clash marks but abrasions are mostly limited to a few thin lines on Liberty's chin. NGC ID# 24EM, PCGS# 39344 Base PCGS# 6079

1807 Draped Bust Half, AU55 O-109a, Dramatic Die State

3762 1807 Draped Bust, O-109a, T-2, R.3, AU55 NGC. Tompkins Die State 4/2. Predominately pearl-gray surfaces cover both sides of this Overton-109a example, although freckles of deep-gray and forest-green reside in the peripheral recesses. The coin is impressively devoid of abrasions, struck from an intermediate-to-late die state with a reverse die crack through STA. A heavy diagonal crack across the portrait ranges from the hair ribbon to the drapery — undescribed in the Overton fifth edition, but documented in the more recent Tompkins' reference. The lower left obverse field is buckled, which contributes to weakness of strike on the neck curls and, on the reverse, in the vicinity of the eagle's beak and central field stars. The remainder of the design is bold. This coin is a Tompkins plate coin, where it illustrates obverse Die State-4 for the T-2 variety. NGC ID# 24EM, PCGS# 39350 Base PCGS# 6079

BUST HALF DOLLARS

3763 1810 O-101, R.1, AU58 PCGS. Light almond-gold toning visits this briefly circulated and partly lustrous representative. Marks are absent save for a thin line near the left (facing) wingtip. Clashed multiple times, with letters from LIBERTY readable beneath the eagle's right wing.

Ex: Central States Signature (Heritage, 4-5/2016), lot 3443, which realized \$2,585. NGC ID# 24ET, PCGS# 39404 Base PCGS# 6095

3764 1813 O-107a, R.1, AU58 PCGS. Both dies are shattered and clashed on this late stage of the O-107 variety. Heavy metal flowlines around the peripheries and a die bulge at the eagle's beak further attest to the deteriorated state of the dies. Luster remains in the fields of this near-Mint coin, and each side has attractive ocean-blue, gold, amber, and lavender toning. Little high-point friction is apparent beneath a loupe. NGC ID# 24EZ, PCGS# 39468 Base PCGS# 6103

1813 Half Dollar, MS63 Toned O-108 Representative

3765 1813 O-108, R.3, MS63 NGC. A centering dot in the upper-left portion of the shield confirms this unique reverse. Deep olive-gray patina overall includes iridescent glints of golden-orange, rose, and violet color that heighten the appeal. Marks are difficult to discern, and the central strike is crisp. Liberty's profile is widely strike doubled. NGC ID# 24EZ, PCGS# 39469 Base PCGS# 6103

3766 1814 E Over A in STATES, O-108a, R.1, AU58 NGC. The sole 1814 die marriage with a blundered E in STATES. The E is over a letter A, indicating the difficulties involved with punching a legend backwards into a die. This smooth silver-gray and wheat-gold Borderline Uncirculated Bust half dollar displays the many delicate cracks associated with the late die state of the variety. NGC ID# 24F3, PCGS# 39490 Base PCGS# 6107

3767 1815/2 O-101, R.2 — Cleaned — PCGS Genuine. Fine Details. The overdate feature is clear beneath a loupe, despite the cleaning that gives this 1815/2 half dollar a glossy appearance. Each side has bright slate-gray patina, although wisps of olive toning emerge from the peripheral regions. A few old hair-thin pinscratches are also visible on the obverse. Only one die variety is known for the 1815 half dollar. Coinage of this issue reached only 47,150 pieces.

3768 1820/19 Curl Base 2, O-102, R.1, AU55 PCGS. Overton-102 commands its own *Guide Book* listing, since it is the sole overdated Curl 2 die variety. Forest-green and autumn-brown patina graces the obverse periphery, though the rest of this minimally marked example is stone-white. NGC ID# 24FE, PCGS# 39574 Base PCGS# 6126

1820 O-108 Half Dollar, MS62 Square Base 2, Large Date, No Knob

3769 1820 Square Base 2, Large Date, No Knob, O-108, R.2, MS62 PCGS. Star 5 is recut, the Square Base, Curl Top 2 leans left, and the olive leaves are doubled. This piece may qualify for the low end of the Condition Census. Whether it does or does not, it remains an impressive Uncirculated example with mostly brilliant, nicely frosted centers and blushes of blue and golden color around the borders. The curls, stars, and feathers display razor-sharp definition. NGC ID# 24FD, PCGS# 39570 Base PCGS# 6123

3770 1821 O-106, R.1, AU58 PCGS. A tine in the lower part of the shield is diagnostic. A few areas of friction appear on the high points of this original and delightful near-Mint half dollar. Both sides display attractive golden-brown and iridescent toning. NGC ID# 24FF, PCGS# 39584 Base PCGS# 6128

1830 O-103 Half Dollar, MS64
Small O, Softly Lustrous

3771 1830 Small O, O-103, R.1, MS64 PCGS. The upright of the 5 in the denomination is recut, and so is the first A in AMERICA. Soft mint luster radiates though pleasing lavender-gray and sea-green patina. While we note points of softness on the right-side stars, the highest curls, and the eagle's neck feathers, the impression on this Choice Uncirculated 1830 Capped Bust half dollar is generally strong. There are a few thin, shallow marks but none merit mention. NGC ID# 24FU, PCGS# 39812 Base PCGS# 6156

3772 1831 O-114, R.3, MS63 NGC. Potent luster sweeps the smooth surfaces of this attractive Capped Bust half. Light rose-red toning visits the borders, but the surfaces are mostly white. A majority of the stars are softly defined, although the centers are sharply struck. Just outside the Condition Census for the moderately scarce variety. Certified in a circa-2000 holder. NGC ID# 24FV, PCGS# 39851 Base PCGS# 6159

3773 1836 Lettered Edge, O-101, R.1, MS63 NGC. Rich cobalt-blue and lilac-red toning encompasses coruscating and carefully preserved surfaces. The strike is good, though the neck curls display minor blending. An impressive example of a distinctive die pairing, often attributed by a repunched star 6 and a recut N in UNITED. NGC ID# 4EKF, PCGS# 39937 Base PCGS# 6169

SEATED HALF DOLLARS

1839 Seated Half Dollar, AU55
Single-Year No Drapery Issue

3774 1839 No Drapery, WB-101, Die Pair 4, R.4, AU55 NGC. The date is distinctive, and two die lines appear in the recess behind Liberty's foot. Examples of the 1839 No Drapery Seated Liberty half dollar remain perennially popular as first and single-year type coins. They are scarcer than their With Drapery counterparts, especially in high grades. Normal softness occurs at the upper obverse and on the eagle's left (facing) wing and leg feathers. Partial luster glows from the subdued silver-gray surfaces. Remarkably smooth. Census (all varieties): 20 in 55, 54 finer (4/19). NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

1839 No Drapery Half Dollar, AU58
Original Toning and Luster

3775 1839 No Drapery, WB-101, Die Pair 2, R.3, AU58 NGC. A faint die line in the lower recesses of the reverse shield aids in identifying this No Drapery Seated half dollar variety. As a type, No Drapery coins are scarce in high grade and are highly sought-after in the collector-essential upper-AU levels. This piece is partially lustrous and shows warm olive-golden toning over each side with good design sharpness. A crescent of sea-blue toning graces the left obverse border. NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

1844-O Doubled Date Half, AU50
WB-103, FS-301

3776 1844-O Doubled Date, WB-103, Die Pair 22, R.4, FS-301 AU50 NGC. Round Medium O. One of the most famous varieties of Seated half dollars, the 1844 is widely and boldly repunched and overlaps Liberty's rock. Featured on the cover of the classic 1993 Wiley-Bugert reference. This better grade example displays flashy luster and pleasing design detail. Light almond-gold toning visits minimally abraded and mildly granular surfaces. Census: 2 in 50, 7 finer (4/19).
Ex: FUN Signature (Heritage, 1/2013), lot 4315. NGC ID# 24H2, PCGS# 145817 Base PCGS# 6247

**1844-O Doubled Date Half Dollar, MS61
WB-103, Broadly Doubled All Four Digits
Rare Mint State Example**

3777 1844-O Doubled Date, WB-103, Die Pair 22, R.4, FS-301, MS61 PCGS. This pleasing Mint State example displays slightly prooflike fields and is struck from an early die state. All four digits of the date were entered far too high (one-fourth in the rock support, three-fourths out) and then repunched in a more correct position with only a halfhearted attempt to efface the wayward numbers. The errant digits are bolder than on many examples, most evident at the final 4. The obverse shield outline and vertical stripes show slight doubling near the scroll. The fields are faintly iridescent with predominant shades of olive-brown plus gold and blue overtones. As typical for this New Orleans issue, the strike is a trifle weak on some of the star centers and the eagle's left talon. A small dig and a pair of shallow scrapes in the right obverse field serve as hallmarks to identify this attractive, softly lustrous Seated half. Population: 1 in 61, 0 finer (4/19). NGC ID# 24H2, PCGS# 145817 Base PCGS# 6247

3778 1856-O Repunched Date, WB-104, Die Pair 13, R.3, MS64 PCGS. The base of the 6 in the date is lightly repunched. Die lines from the upper leaf pair to the left (facing) wing provide a secondary diagnostic of the variety. This lustrous and impressively unabraded Choice New Orleans Seated half has golden-brown centers that cede to lavender-red and blue-green margins. A good strike except on the eagle's left claw. PCGS# 572097 Base PCGS# 6288

**1871-CC Half Dollar, XF45
Elusive Carson City Issue**

3779 1871-CC WB-101, Die Pair 1, R.4, XF45 PCGS. A couple of faint die lines connect the D in UNITED to the dentils, and a die crack runs through the MER in AMERICA on this variety. The 1871-CC half dollar is scarce overall, and it is highly sought-after in the upper circulated grades. This Choice XF coin displays warm golden-gray surfaces and it retains all major design elements. Eye appeal is pleasing. Population: 23 in 45, 26 finer (4/19). NGC ID# 646D, PCGS# 572196 Base PCGS# 6331

**1873-CC Half Dollar, XF45
Toned No Arrows Coin**

3780 1873-CC No Arrows, Small CC, WB-101, Die Pair 1, R.3, XF45 PCGS. The more plentiful of the two documented No Arrows die pairs, ideal for type or date purposes. This lightly circulated 1873-CC half dollar displays attractive lilac-gray, yellow-gold, and sea-green toning on each side, with bold detail on the devices. Eye appeal is excellent for the grade and the toning is original. Population: 11 in 45, 28 finer (4/19). NGC ID# 24KC, PCGS# 572214 Base PCGS# 6338

**1875-S Half Dollar, Frosted Gem
'Spiked 5' Variety**

3781 1875-S Very Small S, WB-101, Die Pair 17, R.3, MS65 PCGS. The "Spiked 5" variety. A small tine opposite the intersection of the bottom flag of the 5 in the date protrudes from the left upright and confirms the variety. The coin is struck from an early die state, before die clashing appears in Liberty's lap and before a faint crack develops above the reverse legend. This is a smooth and sharply struck Gem with scattered areas of almond-gray toning over lustrous, frosted silver surfaces. We note a hair-thin abrasion along Liberty's shoulder that is enhanced by the toning. NGC ID# 24KF, PCGS# 572229 Base PCGS# 6351

**1876 Seated Half, Frosty MS66
WB-104, Open Bud, Repunched 6**

3782 1876 Open Bud, Repunched Date, WB-104, MS66 PCGS. The lower loop of a repunched 6 is visible between the primary 76 in the date. The reverse is the Open Bud Type One. This coin is immensely frosty and well-struck with splashes of orange-gold, lavender, and olive-green over otherwise champagne-tinted luster. Population: 5 in 66 (2 in 66+), 1 finer (4/19). NGC ID# 645R, PCGS# 572237 Base PCGS# 6352

3783 1876-CC Medium CC, WB-102, Die Pair 42, R.7, MS62+ PCGS. A scarce die pair discovered by Mike Clark of Bozarth Coins, here in a later die state with numerous obverse die cracks — one below the date, and others through the stars and above Liberty's head. Original and attractive silver-gray surfaces display soft mint luster and pleasing slate-blue accents. The strike is sharp throughout both sides. NGC ID# 645S, PCGS# 572239 Base PCGS# 6353

3784 1879 Closed Bud, WB-102, MS64 NGC. The advent of the Morgan dollar slashed mintage of Seated denominations, and only 4,800 business strike halves were coined in 1879. This brilliant near-Gem has a good strike and semiprooflike surfaces. Few marks emerge beneath a lens, and are mostly relegated to the field beneath the eagle's beak.

Ex: Richmond Collection, Part III (David Lawrence, 3/2005), lot 1771, which realized \$2,990. NGC ID# 24KS, PCGS# 572260 Base PCGS# 6361

PROOF SEATED HALF DOLLARS

3785 1863 PR63 PCGS. CAC. Golden-brown, lavender-red, and navy-blue peripheral patina embraces this well-struck Select specimen. The mirrored fields are minimally hairlined. The white-on-black contrast is incontrovertible, though a Cameo designation is absent due to the age of the former generation holder. Just 460 proofs were struck for this Civil War date. CAC: 3 in 63, 9 finer (4/19). NGC ID# 27TP, PCGS# 6417

1863 Half Dollar, PR64 Cameo
460 Proofs Struck

3786 1863 PR64 Cameo PCGS. Probably 300 or so of the 460 Seated half dollar proofs struck in 1863 survive, most of which lack Cameo contrast and only one or two of which show Deep or Ultra Cameo contrast. Representatives in this category are scarce. The surfaces of this near-Gem are brilliant with reflective fields and moderately frosted relief elements. Thin golden accents appear on each side, and a few dark toning spots occur on the obverse. Population: 13 in 64 Cameo, 7 finer (4/19). NGC ID# 27TP, PCGS# 86417

3787 1871 PR65 NGC. The Mint produced 960 proof half dollars for collectors in 1871, the same year it struck 1.2 million coins for circulation. This expectedly pinpoint-sharp Gem shows light olive and red-gold patina with blue and green accents. The fields flash when the coin is rotated under a lamp, and there are no significant contact marks to report. Census: 20 in 65, 10 finer (4/19). NGC ID# 27U6, PCGS# 6429

3788 1871 PR65 ANACS. The proof 1871 is scarcer than implied by its mintage of 960 pieces. Perhaps a few hundred coins were melted by the Mint, though Breen (1988 and 1989) omits such mention. Peach-gold borders frame pearl-white centers. A well struck and pleasing Gem. No hairlines emerge when the coin is rotated beneath a light. Housed in a small-sized holder. NGC ID# 27U6, PCGS# 6429

3789 1878 PR65 PCGS. Type Two Reverse with a closed bud above the H in HALF. Both borders exhibit splendid bands of electric-blue and sun-gold patina. A small spot above the eagle's right (facing) claw, but otherwise exemplary. The strike is good, although shy of complete. NGC ID# 27UD, PCGS# 6439

3790 1883 PR65 PCGS. Proof 1883 half dollars, with a mintage of 1,039 pieces, are relatively available, though they become more difficult to locate in Gem and better condition. This PR65 coin displays daubs of cobalt-blue and mauve toning, as well as sharply defined design features that are highlighted by reflective fields. Both sides are well-preserved. NGC ID# 27UJ, PCGS# 6444

BARBER HALF DOLLARS

3791 1906-D MS65 PCGS. A dusting of golden toning covers this satiny Gem 1906-D Barber half dollar. The preservation is outstanding, including on Liberty's cheek. The usual strike softness affects the top right corner of the shield and the eagle's right (facing) talons. In MS65, this Denver issue is conditionally scarce, and finer pieces are rarely seen. Population: 18 in 65, 10 finer (4/19). NGC ID# 24MV, PCGS# 6505

3792 1907 MS65 PCGS. *Ex: Pryor Collection.* Light butter-gold patina accompanies lustrous and well-struck surfaces. The reverse is practically pristine, and obverse contact is trivial save for light grazes on the neck. Population: 32 in 65 (2 in 65+), 6 finer (4/19). *Ex: Joel Rettew, 2/1976; James Bennett Pryor Collection (Bowers and Merena, 1/1996), lot 301, which realized \$2,970. NGC ID# 24MY, PCGS# 6508*

1907 Half Dollar, Frosty MS66
Condition Census Registry Coin

3793 1907 MS66 PCGS. Frosted original mint luster covers this Premium Gem 1907 Barber half dollar, and each side has a hint of delicate champagne toning. Other than some trivial softness on the eagle's right (facing) shoulder, the coin is sharp. Neither side has a mentionable abrasion. The 1907 Barber half is a rarity this well-preserved, and only one coin is reported numerically finer. Population: 5 in 66 (2 in 66+), 1 finer (4/19). NGC ID# 24MY, PCGS# 6508

3794 1912-D MS65 PCGS. CAC. Collectible in MS65, the 1912-D Barber half is still elusive at this level. Finer coins are rare. The CAC-approved Gem offered here has luminous satin luster and light golden toning. The eagle's right (facing) wing junction shows the usual strike weakness, although such is almost unavoidable on this Denver issue. Population: 70 in 65, 20 finer. CAC: 18 in 65, 14 finer (4/19). NGC ID# 24NH, PCGS# 6525

PROOF BARBER HALF DOLLARS

1893 Half Dollar, PR66 Cameo Beautiful Contrast

- 3795 1893 PR66 Cameo PCGS. CAC.** A beautifully struck, deeply contrasted Premium Gem proof with frosty motifs and liquidlike fields. The interiors are brilliant, ceding to amber-gold toning around the borders. The usual strike softness is seen on the right shield corner. Cameo proof 1893 halves are scarce this fine, and higher-grade pieces are rare. Population: 25 in 66 (3 in 66+) Cameo, 9 finer; 6 in 66 Deep Cameo, 4 finer. CAC: 21 in 66, 7 finer (4/19). NGC ID# 6UKV, PCGS# 86540

1893 Barber Half Dollar, PR66 Cameo Lightly Toned, Bold Contrast

- 3796 1893 PR66 Cameo PCGS. CAC.** As the second proof date in the Barber half dollar series, the 1893 mintage of proofs dipped by 36% to just 792 pieces. The surfaces this Premium Gem example are delicately veiled in silver-gray and golden iridescence that cedes to brilliance in the open fields and over the frosted devices. Stark cameo contrast is readily evident at all angles, and the surfaces are free of even minor distractions. Both major grading services have seen few finer proofs in Cameo format. Housed in a previous generation blue label holder with barcode on the back, CAC-endorsed. Population: 25 in 66 (3 in 66+) Cameo, 9 finer. CAC: 21 in 66, 7 finer (4/19). NGC ID# 6UKV, PCGS# 86540

- 3797 1894 PR65 NGC.** This fully struck Gem proof almost qualifies for a Cameo designation, showing modest field-motif contrast on each side. The devices are satiny white, and the mirrored fields have a few stray lines that determine the grade. Other than a hint of light golden peripheral toning, there is no discernible color. Census: 40 in 65 (1 in 65★), 47 finer (4/19).
Ex: ANA Signature (Heritage, 8/2016), lot 4818, which realized \$1,762.50. NGC ID# 24NW, PCGS# 6541

- 3798 1898 PR65 Cameo PCGS. CAC.** The design elements of this delightful Gem proof exhibit razor-sharp definition throughout and the frosty devices contrast boldly with the deeply mirrored fields. The mostly brilliant surfaces are virtually flawless, with a few hints of pale gold toning. From a proof mintage of 735 pieces. Population: 13 in 65 (1 in 65+) Cameo, 21 finer. CAC: 6 in 65, 14 finer (4/19). NGC ID# 24P2, PCGS# 86545

- 3799 1900 PR64 NGC. CAC.** Light to medium wheat-gold and cherry-red toning adorn the fields. The obverse border also shows blue-green freckles. The sharply struck motifs are frosty, though the coin is undesignated as Cameo due to its prior generation holder. CAC: 14 in 64, 8 finer (4/19). NGC ID# 24P4, PCGS# 6547

1911 Half, Bright PR66★ Cameo

- 3800 1911 PR66★ Cameo NGC.** A beautifully contrasted piece, virtually black-and-white but for subtle whispers of cloud-white toning in the fields. Boldly struck and impressively preserved with undeniable eye appeal, a top-notch specimen from this issue of just 543 proofs. NGC has graded just nine numerically finer Cameo coins (4/19).
Ex: Central States Signature (Heritage, 4/2008), lot 1320. NGC ID# 6UPG, PCGS# 86558

WALKING LIBERTY HALF DOLLARS

- 3801 1916-D MS65 PCGS.** A bold strike and areas of original, dark charcoal toning enhance the appearance of this lustrous Gem half. The eagle's trailing leg is a touch soft, but this attractive half is especially well-struck on Liberty's branch hand and head. Ideal for a Gem set of lustrous, toned Walking Liberty halves. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

1916-D Walking Liberty Half, MS66 Exceptional Luster and Originality

- 3802 1916-D MS66 PCGS.** With a mintage of just over 1 million pieces, the 1916-D Walking Liberty half dollar is surprisingly available in high grade, making it a favorite choice of first-year branch mint type collectors. This impressive Premium Gem exhibits well-detailed design elements and vibrant mint luster throughout. Attractive shades of champagne-gold and light russet toning warm each side. Population: 78 in 66 (2 in 66+), 4 finer (3/19). NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

1916-S Half Dollar, MS63
Attractive Collector-Grade Mint State Coin

3803 1916-S MS63 PCGS. Satiny mint luster and light golden toning illuminate this Select 1916-S Walker. The strike is strong on the obverse, although the reverse eagle has some weakness on its trailing leg and breast. The San Francisco Mint struck only 508,000 half dollars during the first year of this type, the lowest output by any active mint that year. NGC ID# 24PN, PCGS# 6568

3804 1917-D Reverse Mintmark MS64 PCGS. Although more Half Dollars were minted in 1917 with the mintmark on the reverse, few were saved from circulation, hence, the conditional rarity of this piece. The '17-D Reverse is also a strike rarity among early Walkers, but this piece is well-defined on each side. The surfaces are satiny and generally untuned in the centers with deep russet toning around the margins. PCGS has graded 56 numerically finer examples (4/19). NGC ID# 24PS, PCGS# 6571

1917-S Walking Liberty Half, MS63
Toned Obverse Mintmark Coin

3805 1917-S Obverse Mintmark MS63 PCGS. This is a satiny, well-struck example of the Obverse Mintmark issue, showing mottled olive-green, gold, and amber toning over each side. Any light, grade-limiting abrasions are hidden by the patina on this attractive coin. The San Francisco Mint struck 952,000 Obverse Mintmark half dollars in 1917, followed by a run of more than 5.5 million Reverse Mintmark coins. The earlier issue is understandably scarcer in Mint State. NGC ID# 26G7, PCGS# 6572

3806 1917-S Reverse Mintmark MS63 PCGS. Delicate lilac and champagne hues warm the frosty surfaces of this Select 1917-S Reverse Mintmark half dollar. The usual strike weakness affects Liberty's branch hand and the eagle's trailing leg, but Liberty's head is better defined. No major abrasions are present. NGC ID# 24PU, PCGS# 6573

3807 1917-S Reverse Mintmark MS64 PCGS. The 1917-S Reverse Mintmark half dollar is much more collectible in Mint State than its Obverse Mintmark counterpart. Nevertheless, it proves challenging at this near-Gem level and it is scarce any finer. Light golden toning and softly frosted luster adorn minimally marked surfaces on this coin. Incompletely struck over the high points. NGC ID# 24PU, PCGS# 6573

3808 1918-D MS63 PCGS. A satiny example of this early Denver Walker, showing luminous fields and a hint of light golden toning. The strike is weak in the centers, although Liberty's head shows better definition. Eye appeal is pleasing for the grade. NGC ID# 24PW, PCGS# 6575

3809 1918-D MS63 PCGS. CAC. Satiny mint luster and a hint of delicate champagne toning characterize this CAC-approved 1918-D half dollar. There are no distracting abrasions, and a finer grade might have been achieved were the coin better-struck — considerable weakness affects the centers, which is often seen on this issue. NGC ID# 24PW, PCGS# 6575

1918-D Walking Liberty Half, MS64
Conditionally Challenging in Finer Grades

3810 1918-D MS64 PCGS. Although the 1918-D Walking Liberty half dollar can be found in MS64 condition with some patience, the issue is quite elusive in higher grades. This attractive Choice example exhibits a typical strike, with some localized softness on the centers. The well-preserved surfaces are blanketed in shades of greenish-gold and lavender-gray toning, with satiny mint luster underneath. PCGS has graded 33 numerically finer examples (4/19). NGC ID# 24PW, PCGS# 6575

1918-D Half Dollar, Lustrous MS64

3811 1918-D MS64 PCGS. A shimmering, near-Gem quality representative of a D-mint issue that is scarce in any Mint State grade. Nearly all of the 3.8 million half dollars produced by the Denver Mint in 1918 entered the channels of commerce and stayed there for decades. This satiny Gem is boldly struck and shows light toning on the left side of the obverse, but the overall appearance is one of flashy brilliance. A couple of shallow marks are seen on the reverse, but these hardly detract. NGC ID# 24PW, PCGS# 6575

1919 Half Dollar, MS64
Attractive for the Grade

3812 1919 MS64 PCGS. Soft, satiny mint luster illuminates light golden toning on each side of this Choice 1919 Walking Liberty half dollar. There are remarkably few abrasions of note on this coin, only a few faint hairlines in the fields that prevent Gem classification from PCGS. Liberty's head and branch hand show the expected strike softness, which is shared on the reverse by the eagle's trailing leg. Higher-grade 1919 Walkers are elusive. NGC ID# 24PY, PCGS# 6577

- 3813 1927-S MS63 PCGS.** One of many strike rarities in the Walking Liberty series, the 1927-S is almost always weak through the centers on both obverse and reverse. This Select Uncirculated coin is sharper than usual at Liberty's head, but weak at the branch hand and along Liberty's forward leg. The eagle's shoulder through the trailing leg shows similar incompleteness. Satiny and original silver-gray surfaces are lustrous, with vertical die polish lines and a speckling of deep-gray patina. NGC ID# 24RA, PCGS# 6587

**1927-S Walking Liberty Half, MS64
Well-Preserved, Lustrous Surfaces**

- 3814 1927-S MS64 PCGS.** The 1927-S Walking Liberty half dollar was produced in adequate numbers (2.3 million pieces), but the issue experienced extensive circulation. In addition, the 1927-S has uniformly poor striking characteristics. This impressive Choice example displays a better-than-average strike, but still shows some softness on the wreath hand, head, and eagle's leg. The surfaces are well-preserved, with vibrant mint luster and terrific eye appeal. NGC ID# 24RA, PCGS# 6587

**1928-S Walking Liberty Half, MS64
Elusive Issue in High Grade**

- 3815 1928-S MS64 PCGS.** The 1928-S Walking Liberty half dollar claims a smallish mintage of 1.9 million pieces and the issue is known as a strike-rarity in the series. This attractive Choice example exhibits a typical strike for the issue, with some softness noted on the wreath hand and eagle's leg. The strike is bold in other areas, however. The well-preserved surfaces radiate vibrant mint luster, with outstanding eye appeal. PCGS has graded 74 numerically finer examples (4/19). NGC ID# 24RB, PCGS# 6588
- 3816 1929-D MS65 PCGS.** Among post-1921 issues, only the 1938-D has a lower mintage than the 1929-D. But the 1929-D is much scarcer as a Gem than the 1938-D, which was saved in roll quantity. The present well struck '29-D Walker exhibits vibrant cartwheel sheen and light peripheral obverse russet toning. Smooth save for contact on Liberty's face. NGC ID# 24RC, PCGS# 6589

1933-S Half Dollar, Fully Struck MS66

- 3817 1933-S MS66 PCGS.** Dabs of gold toning appear over the upper obverse of this frosty S-mint half dollar, while the reverse exhibits complete brilliance. The strike is crisp with a fully outlined and rounded thumb in the center of the obverse. PCGS has only certified 18 finer examples of this important issue (4/19). NGC ID# 24RE, PCGS# 6591
- 3818 1934-S MS66 PCGS.** A scarce Premium Gem example of the 1934-S half dollar, second to a small group of just 10 finer coins at PCGS (5/19). This Registry candidate displays a bold strike and shimmering luster. Mottled russet, gold, and deep lavender toning covers much of each side. NGC ID# 24RH, PCGS# 6594
- 3819 1934-S MS66 PCGS.** Lightly toned in apricot and pearl-gray colors, this thoroughly lustrous Premium Gem exhibits a crisp strike. A couple of tiny marks on the upper left obverse quadrant deny an even higher third party assessment. A splendid representative of this scarce Depression-era issue. PCGS has graded 11 numerically finer examples (4/19).
Ex: Long Beach Signature (Heritage, 6/2005), lot 6460; FUN Signature (Heritage, 1/2006), lot 4059. NGC ID# 24RH, PCGS# 6594
- 3820 1935 MS67 PCGS.** A scarce Superb Gem example of this otherwise plentiful Philadelphia issue, showing gold-tinted satin luster and outstanding preservation in the fields. Moderate strike weakness is seen by Liberty's branch hand and on the eagle's trailing leg. Population: 64 in 67 (7 in 67+), 2 finer (4/19). NGC ID# 24RJ, PCGS# 6595
- 3821 1935-S MS66 PCGS.** Smooth surfaces and vibrant silver luster give this Premium Gem outstanding eye appeal. A trace of pale-champagne toning confirms the original surfaces, which are nearly free of marks or abrasions on the obverse, and show just a few small marks hidden in the eagle's feathers. The strike lacks sharpness only at the centers. PCGS reports just four numerically finer 1935-S halves (4/19). NGC ID# 24RL, PCGS# 6597
- 3822 1938-D MS66 PCGS.** The 1938-D is well-known among Walking Liberty collectors as the third-lowest mintage issue of the series, behind only the 1921 and 1921-D keys. Yet the issue is affordable in better Mint State grades, and the present coin provides one such opportunity for acquisition. This lustrous and nearly pristine piece has a good strike and a hint of russet toning near the rims. NGC ID# 24RV, PCGS# 6605
- 3823 1938-D MS66 NGC.** The 1938-D has less than half the mintage of any other post-1921 Walking Liberty issue. Similar to the 1931-S cent, speculators took action and set examples aside. Nonetheless, the 1938-D is rarely seen above the MS66 level. The present brilliant and lustrous half dollar has a good strike on the skirt lines, and displays only wispy marks. NGC ID# 24RV, PCGS# 6605

**1945-S Walking Liberty Half, MS67
Among the Finest Certified**

3824 1945-S MS67 PCGS. This available late-series issue survives in quantity in grades through MS66, but becomes impressively scarce in MS67. This piece shows exceptionally preserved surfaces combined with sharply detailed strike definition. A blush of gold toning lightens toward the center on each side, while the obverse also exhibits deeper sea-green and amber toning around the borders. Population: 51 in 67 (2 in 67+), 0 finer (4/19). NGC ID# 24SH, PCGS# 6626

3825 1946 Doubled Die Reverse, FS-801, MS65 NGC. The only Guide Book die variety for the series exhibits a prominent spread on the feathers, sapling, and E PLURIBUS UNUM. A highly lustrous Gem with hints of chestnut toning near the obverse rim. A fairly sharp strike, though Liberty's branch hand shows blending. The preservation is exemplary. NGC ID# 24SJ, PCGS# 145152 Base PCGS# 6632

**PROOF WALKING LIBERTY
HALF DOLLARS**

**1938 Walking Liberty Half, PR68
Brilliant Registry Coin**

3826 1938 PR68 NGC. Brilliant and deeply mirrored, this high-end Superb Gem is among the finest proof 1938 half dollars certified. A touch of strike softness on Liberty's branch hand is hardly noticed. The 1938 proof is scarce in this grade and unknown finer. Registry Set collectors should bid accordingly for this piece. Census: 56 in 68 (1 in 68+, 8 in 68★), 0 finer (4/19). NGC ID# 27V6, PCGS# 6638

3827 1939 PR68 NGC. This piece displays sharply struck, satiny devices set against watery fields that are seemingly devoid of flaws. Vivid sun-gold and amber peripheral hues yield to lighter pastel shades of lavender and ice-blue in the centers, granting this high-end Superb Gem impeccable visual appeal. Census: 99 in 68 (2 in 68+, 20 in 68★), 1 finer (4/19).
Ex: Long Beach Signature (Heritage, 6/2015), lot 4675, which realized \$3,055; ANA Signature (Heritage, 8/2015), lot 5258, which realized \$2,350. NGC ID# 5ESU, PCGS# 6639

FRANKLIN HALF DOLLARS

3828 1949-S MS67 PCGS. CAC. Among the finest 1949-S halves certified without the Full Bell Lines attribute, this CAC-approved Superb Gem is an outstanding coin. Frosty and virtually flawless in its preservation, it also shows nearly full lines on the lower bell — just not quite enough to warrant an FBL designation. Both sides have mottled russet, gold, and olive-green toning. Population: 17 in 67 (1 in 67+), 0 finer. CAC: 13 in 67, 0 finer (4/19). NGC ID# 24SV, PCGS# 6655

3829 1952 MS67 Full Bell Lines NGC. CAC. The impeccably preserved, lustrous surfaces of this spectacular Superb Gem are blanketed in shades of lavender and sea-green toning, with most of the color on the reverse. The design elements are well-detailed, with Full Bell Lines. Census: 6 in 67 Full Bell Lines, 0 finer. CAC: 14 in 67, 0 finer (4/19). NGC ID# 6L2U, PCGS# 86661

3830 1953 MS66 Full Bell Lines PCGS. CAC. This delightful Premium Gem exhibits sharply detailed design elements, with Full Bell Lines definition. The impeccably preserved, lustrous surfaces are blanketed in vivid shades of lavender, pale gold, and amber toning. Population: 62 in 66 (7 in 66+) Full Bell Lines, 0 finer. CAC: 16 in 66, 0 finer (4/19). NGC ID# 89XB, PCGS# 86664

3831 1957-D MS67 Full Bell Lines NGC. CAC. Both sides display dramatic yet distinct toning. The obverse is mostly ocean-blue with a sun-gold periphery. The reverse exhibits rich fire-red and forest-green shades. The strike is sharp, and cartwheel luster is prevalent across both sides. NGC ID# 24TF, PCGS# 86673

3832 1961-D MS66 Full Bell Lines NGC. CAC. The impeccably preserved surfaces of this delightful Premium Gem radiate vibrant mint luster, under delicate shades of gunmetal-gray, lilac-red, and straw-gold toning. The sharply detailed design elements exhibit full definition on the bell lines. Encased in a circa-2000 holder. Census: 6 in 66 Full Bell Lines, 0 finer. CAC: 4 in 66, 0 finer (4/19). NGC ID# 24TP, PCGS# 86681

PROOF FRANKLIN HALF DOLLARS

3833 1952 PR67 Cameo PCGS. A magnificent two-sided Cameo in every respect. The obverse devices show the usual die polishing lines. Brilliant throughout, the fields are deeply mirrored and provide a strong "black" background against the frosted devices. Population: 86 in 67 (7 in 67+) Cameo, 5 finer (4/19).
Ex: FUN Signature (Heritage, 1/2003), lot 7714; Long Beach Signature (Heritage, 9/2003), lot 7375. NGC ID# 27VC, PCGS# 86693

**1955 Half Dollar, PR68 Ultra Cameo
White-on-Black Beauty**

3834 1955 PR68 Ultra Cameo NGC. Frosty devices and legends confirm the Ultra Cameo status of this brilliant and pristine specimen. Though the '55 Franklin has a high proof mintage relative to prior years, only a vanishingly small percentage of examples can boast the dramatic white-on-black contrast of the present lot. Census: 42 in 68 Ultra Cameo (2 in 68+, 3 in 68★), 7 finer (4/19). NGC ID# 27VF, PCGS# 96696

KENNEDY HALF DOLLARS

- 3835 1968-D MS67★ NGC.** One of the finest-certified 1968-D Kennedy half dollars, this Star-designated Superb Gem displays beautiful sun-gold, sea-green, blue, and lilac toning in concentric circles on each side. The strike is sharp and the satiny luster is unabraded. Few 1968-D halves are known this fine. Census: 15 in 67 (1 in 67+, 3 in 67★), 0 finer (4/19). NGC ID# 24U7, PCGS# 6711

1969-D Kennedy Half Dollar, MS67★ Attractive Toning, Registry Set Quality

- 3836 1969-D MS67★ NGC.** A fully struck Registry coin, this Star-designated Superb Gem is among the finest-certified 1969-D Kennedy halves. Satiny mint luster illuminates the fully struck devices, and only a few microscopic ticks are seen beneath a loupe. Amber, yellow-gold, sea-green, blue, and violet toning forms concentric circles on each side, earning the NGC Star designation. Census: 10 in 67 (5 in 67★), 0 finer (4/19). NGC ID# 24U8, PCGS# 6712

- 3837 1971-D MS68 PCGS.** Registry Set collectors will need this coin — a top-grade MS68 example of the 1971-D Kennedy half dollar. Just four pieces are this fine at PCGS and five at NGC, with none finer (4/19). Each side is sharp and carries this issue's signature satin luster with a natural nickel-gray hue. The fields are finely striated from die polishing, and as a result they produce a subtle bit of reflectivity when tilted in hand. Population: 4 in 68, 0 finer (4/19). NGC ID# 24UB, PCGS# 6717

PROOF KENNEDY HALF DOLLAR

1964 Half Dollar, PR67 Ultra Cameo FS-401, Accented Hair

- 3838 1964 Accented Hair, FS-401, PR67 Ultra Cameo NGC.** This is a popular *Guide Book* and *Cherrypickers'* variety with a well-known backstory that enhances its historic and numismatic appeal. This Superb Gem proof with Ultra Cameo contrast enjoys profoundly reflective, watery fields and completely struck, frosted devices. NGC ID# 24WG, PCGS# 145627 Base PCGS# 96801

EARLY DOLLARS

1795 Flowing Hair Dollar, Fine 12 Three Leaves Reverse, B-6, BB-25

- 3839 1795 Flowing Hair, Three Leaves, B-6, BB-25, R.3, Fine 12 NGC.** The first-year 1794 dollar is outside the budgets of most collectors, but the final-year 1795 Flowing Hair dollar is relatively affordable. This is a refreshingly unabraded pewter-gray example with hints of charcoal toning in design recesses. Traces of mint-made adjustment marks accompany the date area and central obverse. NGC ID# 24WZ, PCGS# 39975 Base PCGS# 6852

1795 Flowing Hair Dollar, AU Details Scarce B-6, BB-25 Variety

- 3840 1795 Flowing Hair, Three Leaves, B-6, BB-25, R.3 — Obverse Scratched — NGC Details. AU.** Ex: Pedram Collection. Bowers Die State III. A deeply toned and narrow horizontal depression on Liberty's cheek is the source of the NGC designation, although it is probably a Mint-made planchet flaw instead of a scratch. The tan-brown and steel-gray surfaces are otherwise attractive despite a small tadpole-shaped mark on the reverse near 9:30. Satin luster accompanies design elements.
Ex: *Long Beach Signature* (Heritage, 9/2015), lot 3989, which realized \$4,112.50.

- 3841 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Repaired — PCGS Genuine. Fine Details.** Bowers Die State II, as often seen. BB-27 is a plentiful Three Leaves variety, suitable as a type coin. This piece lies at the more accessible end of the grade spectrum for most collectors. The central devices offer good detail and the rims are mostly complete, although heavy tooling in the lower obverse and upper reverse margins prevents a numeric designation from PCGS. Each side is glossy and largely untuned.

1795 Draped Bust Dollar, Fine 12
Off-Center Bust, B-14, BB-51

- 3842** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, Fine 12 PCGS. Bolender-14 is considered the first Draped Bust die variety of any denomination. Engraver inexperience with the new Liberty punch is blamed for the off-center impression of Liberty, which nearly touches star 1 and the B in LIBERTY. The other 1795 Draped Bust variety, B-15, has a properly centered bust. The present B-14 dollar displays wear appropriate for the Fine level, and the pewter-gray surfaces show fewer than the expected number of minor marks. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

1798 Large Eagle Dollar, XF40
B-6, BB-96, 10 Arrows, 5 Stripes

- 3843** 1798 Large Eagle, Knob 9, 5 Vertical Lines, 10 Arrows, B-6, BB-96, R.3, XF40 ANACS. Bowers Die State II. An early die state of this collectible Heraldic Eagle variety. The present example displays noticeable glimmers of luster along with medium wheat-gold and slate-gray toning. The surfaces are mildly granular and exhibit a few thin marks near UNUM. The obverse shows a small rim nick at 9:30. Housed in a small-sized holder.
Ex: Chicago Signature (Heritage, 8/2013), lot 4178, which realized \$3,278.25. NGC ID# 24X6, PCGS# 40011 Base PCGS# 40008

1798 Heraldic Eagle Dollar, XF45
Pointed 9, B-11, BB-111

- 3844** 1798 Large Eagle, Pointed 9, B-11, BB-111, R.3, XF45 PCGS. Bowers Die State I. Rare in this early state without the raised mound or crack below Liberty's chin. The coin displays strong detail on the peripheral relief elements. The centers are a touch softer but still well-defined. Light friction is also noted. Richly toned in in olive-gray and golden-brown patina. NGC ID# 24X6, PCGS# 40028 Base PCGS# 40018

1798 Large Eagle, Pointed 9 Dollar
B-27, BB-113, AU Details

- 3845** 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2 — Improperly Cleaned — NGC Details. AU. Bowers Die State III. Subjected to a light cleaning long ago, the coin has recovered to some extent with a trace of faint, golden-tan toning across the obverse and at the reverse margin. A few adjustment marks obscure two or three of the field stars above the eagle's head. Elsewhere, AU details remain with a hint of silver luster.
Ex: FUN Signature (Heritage, 7/2015), lot 4080, which realized \$2,585.

1798 Draped Bust Dollar, XF45
Scarce B-31a, BB-115 Die Pair
Ex: Bolender (Plate Coin)

- 3846** 1798 Large Eagle, Pointed 9, Close Date, B-31a, BB-115, R.4, XF45 NGC. Bowers Die State IV. Struck from a near-terminal state of the reverse die, this Choice XF early dollar traces back to M.H. Bolender's collection, where it was the plate coin for his B-31a variety (BB-115) — then thought to be an R.7 variety, although more examples are known today (60+ years later). This coin still approaches the Condition Census for the die pair. Haseltine was unaware of the die marriage, which features a sole use of the reverse die.

High rims and broad obverse denticles indicate an especially deep strike. The reverse is sharper than usual, with all of the field stars visible and crisp definition of the other motifs despite numerous cracks that foreshadow a shattered die. Smooth, attractive surfaces are richly iridescent with traces of mint luster. Only the expected tiny marks and minor abrasions are seen under a loupe. This lot comes with a nice copy of Bolender's Second Revised Edition — including the confirming plate of the B-31a reverse — and the auction envelope from the coin's subsequent appearance in Part 3 of Superior's October, 1973 auction.

Ex: Auction Sale, Part 3 (Superior Stamp and Coin Co., 10/1973), lot 1245. (Total: 2 items) NGC ID# 24X6, PCGS# 40032 Base PCGS# 40018

1798 Wide Date Dollar, AU50
B-12, BB-120, Terminal Die State
Large Eagle, Pointed 9

- 3847** 1798 Large Eagle, Pointed 9, Wide Date, B-12, BB-120, R.4, AU50 PCGS. Bowers Die State V. A rare coin in this advanced die state, with obvious die failure above the date at Liberty's lower-most curl and drapery. Corresponding die failure on the reverse obliterates most of the field stars and some of the encircling clouds. Multiple die cracks radiate from the rims through the date and stars on the obverse, and a diagnostic crack curls through the denticles above ES OF AM. The coin shows little actual wear and smooth, unblemished fields. Lavender tones visit the iridescent surfaces with nice remaining luster, providing excellent visual appeal.
Ex: Beverly Hills Signature (Heritage, 11/2014), lot 3788; New York Signature (Heritage, 10/2015), lot 3371. NGC ID# 24X6, PCGS# 40037 Base PCGS# 40018

- 3848** 1798 Large Eagle, Pointed 9, B-24, BB-124, R.2 — Planchet Flaw — PCGS Genuine. VF Details. Bowers Die State V with a crack through obverse stars 10 to 13. A midgrade Heraldic Eagle type coin with stone-gray high points and richly toned golden-brown, navy-blue, and lavender fields. A planchet flaw, or lamination, affects OF and shows evidence of tooling. The remainder of the coin is surprisingly unmarked.

1799 B-4, BB-153 Dollar, AU Details
15 Stars Reverse, Irregular Date

- 3849** 1799 Irregular Date, 15 Stars Reverse, B-4, BB-153, R.4 — Repaired — PCGS Genuine. AU Details. Bowers Die State II. As Mint blunders go, this one ranks among the most interesting in the early dollar series. Not only was the date entered out of kilter, but two extra field stars were engraved — pleasing to the eye, but incorrect as called for by the design. To salvage the die, the first and last clouds were enlarged. Even that was amiss, with the tips of the extra stars sticking out for all to see. This is a glossy example with pleasing, bronzelike toning and nearly Mint State sharpness. An area of repair in the right-hand obverse field accounts for the assigned net grade.

1799 B-23, BB-159 Dollar, VF35
8x5 Stars Guide Book Variety

- 3850** 1799 8x5 Stars, B-23, BB-159, R.3, VF35 PCGS. CAC. Bowers Die State I. BB-159 features the distinctive 8x5 obverse star arrangement listed in the *Guide Book*. This example is in an early die state without the crack that later forms through BE in LIBERTY. Antique violet-gray patina yields to gold accents over the high points. Well-centered with strong denticles, stars, and legends. NGC ID# 24X7, PCGS# 40063 Base PCGS# 6881

1799 B-12, BB-160 Dollar, XF45
Well-Defined and Attractively Toned

- 3851** 1799 7x6 Stars, B-12, BB-160, R.3, XF45 PCGS. CAC. Bowers Die State III. Attractive pewter-gray surfaces display deep, gunmetal-gray accents within recessed areas of the devices for excellent eye appeal. Struck from a mid-to-late die state, the coin shows several obverse die cracks that do not diminish a sharp strike that delivers bold definition to the raised devices throughout both sides. While the BB-160 die marriage is not scarce among 1799 7x6 Stars varieties, any Draped Bust dollar with Choice XF surfaces and CAC endorsement will attract immediate attention from early dollar enthusiasts. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

- 3852** 1799 7x6 Stars, B-17, BB-164, R.2, VF25 NGC. Bowers Die State III. Deep cream-gray toning blankets this evenly circulated and surprisingly unabraded Heraldic Eagle type coin. Strike-throughs (as coined) affect obverse stars 10 and 11, and parallel roller marks (as made) cross obverse star 13. All letters in E PLURIBUS UNUM are at least partially present. NGC ID# 24X7, PCGS# 40055 Base PCGS# 6878

**1799 7x6 Stars Dollar, VF30★
B-9, BB-166, Rainbow Border Toning**

- 3853** 1799 7x6 Stars, B-9, BB-166, R.1, VF30★ NGC. Bowers Die State II, with a short die crack extending out of the dentils below the 1 in the date. This is a well-detailed coin with little wear, sharp throughout the borders and interiors. The Star designation comes from the vivid rainbow toning that surrounds the peripheries, while the interiors are light golden. No adjustment marks are seen and eye appeal excels. A loupe reveals a couple of noteworthy characteristics — an old hair-thin scratch in the right obverse field and another hidden in the dentils above the TY in LIBERTY. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

**1800 Early Dollar, Choice VF
Scarce B-8, BB-188 Variety**

- 3854** 1800 B-8, BB-188, R.4, VF35 NGC. Bowers Die State III with a crack through AMER and a small “knob” break above the R in AMERICA. A midgrade representative of the scarce Bolender-8 variety. The steel-gray toning is lighter on the high points and deeper near the rims. Mentionable marks are limited to a small rim nick below the eagle's tail. NGC ID# 24X9, PCGS# 40074 Base PCGS# 6887

- 3855** 1800 Wide Date, Low 8, B-10, BB-190, R.3, VF20 PCGS. CAC. Bowers Die State VI. Advanced reverse cracks confirm a later die state. This cream-gray Heraldic Eagle dollar exhibits ample feather detail on the eagle's wings. Careful inspection yields wispy marks near the shield corners and on the left obverse field. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

**1800 Silver Dollar, AU Details
Wide Date, Low 8, B-10, BB-190**

- 3856** 1800 Wide Date, Low 8, B-10, BB-190, R.3 — Cleaned — NGC Details. AU. Bowers Die State IV. The surfaces are surprisingly free from abrasions, but appear lightly whizzed upon close study. The obverse has retoned in dusky gunmetal-gray and autumn-brown shades. The reverse displays moderately brighter golden-brown toning. A well-defined example with minimal indications of wear. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

**1800 AMERICA! Dollar, XF40
Scarce B-11, BB-191, Wide Date, Low 8**

- 3857** 1800 AMERICA!, B-11, BB-191, R.4, XF40 PCGS. Bowers Die State II. This is by far the scarcer of the two AMERICA! varieties, with a stray engraver's mark to the right of the final A in AMERICA, loosely resembling an “I.” The BB-191 shares the Wide Date, Low 8 obverse with the BB-190 variety. Rich purple-gray patina in the fields contrasts sharply against the light, silver-gray color on the devices for a pronounced “circulation cameo” effect. A few small, deep areas of toning visit each side of this crisply struck early dollar, most noticeably on Liberty's cheek and the reverse stars. Faint lines and a peppering of tiny marks are noted on the obverse and above eagle's head and neck. BB-191 is one of the more challenging issues for the year. Population (both AMERICA! varieties): 12 in 40, 37 finer (4/19). NGC ID# 24X9, PCGS# 40081 Base PCGS# 86888

- 3858** 1800 B-13, BB-193, R.3, VF25 PCGS. Bowers Die State III. Ocean-blue and chestnut-brown toning enriches both sides, while the portrait is stone-gray. Sharply defined for its designated grade, this Heraldic Eagle dollar shows minor field marks above the branch and near Liberty's profile. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

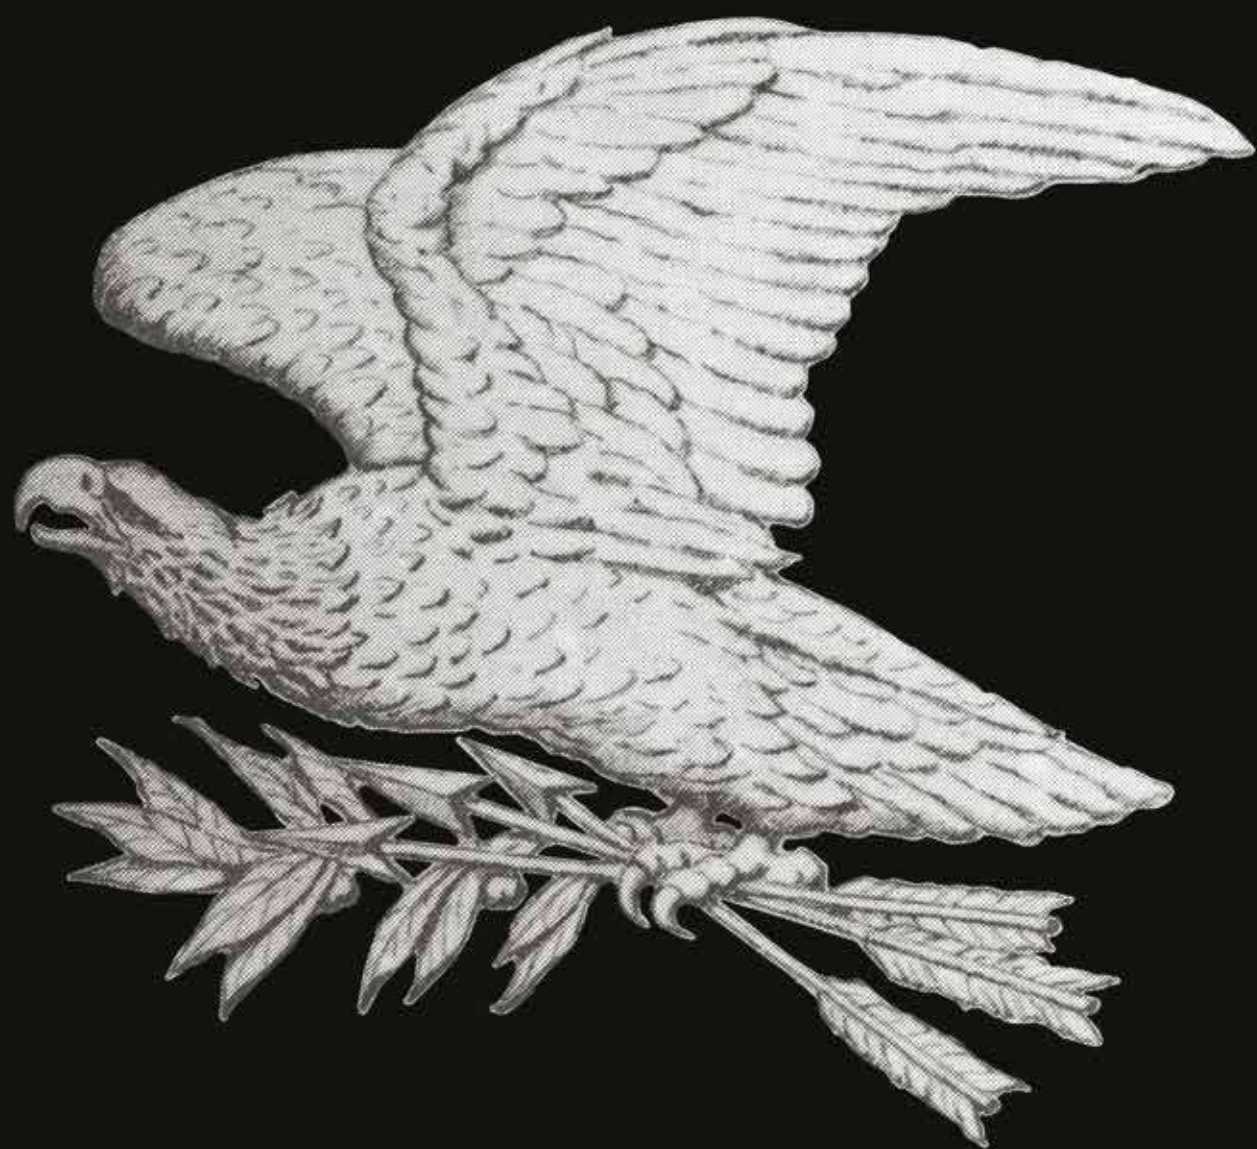

**1802 Narrow Date Dollar, XF45
B-6, BB-241, Well-Defined**

- 3859** 1802 Narrow Date, B-6, BB-241, R.1, XF45 PCGS. Bowers Die State III. The usually encountered lapped die state with incomplete detail on Liberty's shoulder curls. This is a stone-gray and almond-gold Heraldic Eagle type coin that shows surprisingly few abrasions. We note only a slight rim knock between the RI in AMERICA. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

- 3860** 1803 Small 3, B-5, BB-252, R.3 — Cleaning — PCGS Genuine. XF Details. Both sides are hairlined, but this early dollar is well-defined and displays glimmers of luster within the curls and wings. The stone-gray surfaces show undertones of powder-blue and butter-gold. The Small 3 variety is scarcer than its Large 3 counterpart.

End of Session Two

SESSION THREE

SEATED DOLLARS

1850-O Seated Dollar, AU53 Second of Four O-Mint Issues

- 3861 1850-O AU53 NGC. OC-1, R.3.** Ex: Dick Osburn Collection. OC Die State b/c. The New Orleans Mint produced Seated silver dollars in just four years, 1846, 1850, 1859, and 1860. While the latter two issues are common in Mint State grades, the 1846 and 1850 issues are rare in higher grades. This attractive AU shows light-gray surfaces with splashes of olive-gray toning near the obverse border, and dappled pale-blue shades on the reverse. A scattering of light marks dot the surfaces. Census: 13 in 53, 51 finer (4/19). NGC ID# 24YN, PCGS# 6938

- 3862 1859-O MS61 PCGS. OC-1, R.1.** Osburn-Cushing Die State c/a. The brilliant surfaces of this impressive Mint State New Orleans Seated dollar show prooflike reflectivity in sheltered areas. The design elements are well-detailed, with a touch of the typical softness on the upper stars and Liberty's head. NGC ID# 24YY, PCGS# 6947

- 3863 1859-O MS61 PCGS. CAC. OC-2, R.1.** Osburn-Cushing Die State d/a. One or more bags of 1859-O and 1860-O Seated silver dollars remained in Treasury vaults until they were released a little over 50 years ago. Today, most low level Mint State examples of these two issues are from that source. This brilliant silver example is likely one of those coins, featuring reflective fields and scattered grade-consistent surface marks. CAC: 18 in 61, 51 finer (4/19). Ex: Long Beach Signature (Heritage, 9/2016), lot 4324, which realized \$1,762.50. NGC ID# 24YY, PCGS# 6947

1859-O Seated Dollar, MS64 Exceptionally Lustrous, Rare This Fine

- 3864 1859-O MS64 PCGS. OC-3, R.2.** Osburn-Cushing Die State a/b. The 1859-O is a go-to issue for type collectors, as Mint State pieces can be found with relative ease. However, near-Gem examples are conditionally rare, and finer representatives are nearly uncollectible. This piece showcases frosty, luminous mint luster with traces of light golden toning. The strike is sharp and there are no bothersome abrasions. Population: 32 in 64 (2 in 64+), 2 finer (4/19). NGC ID# 24YY, PCGS# 6947

PROOF SEATED DOLLARS

1860 Seated Dollar, PR63 Almost Brilliant, Deeply Mirrored

- 3865 1860 PR63 PCGS. OC-P1.** Osburn-Cushing Die State a/a. The Mint famously overestimated the demand for proofs in 1860, particularly given the fact they had just implemented a premium for these special collector coins. Ultimately, only 527 examples of the 1,330 proofs struck were sold. The rest were melted. This largely brilliant Seated dollar has eye-catching, reflective surfaces with minor contact marks, but the overall effect is highly appealing. Population: 42 in 63, 57 finer (4/19). Ex: Long Beach Signature (Heritage, 9/2016), lot 5576. NGC ID# 252E, PCGS# 7003

1864 Seated Dollar, PR64 Only 470 Proofs Struck

- 3866 1864 PR64 NGC. OC-P2, High R.4.** Osburn-Cushing Die State a/a. Only 470 proof Seated dollars were struck in 1864, yet there are four die pairings known. The surfaces retain significant brilliance with just the slightest accent of golden patina present, mostly seen around the peripheries. The strike is pinpoint-sharp, as expected. Hairlines explain the grade. Census: 47 in 64 (1 in 64+★), 27 finer (4/19). NGC ID# 252J, PCGS# 7007

1866 Seated Dollar, PR64
Lightly Contrasted With Motto Proof

3867 1866 Motto PR64 NGC. OC-P1, Low R.4. Osburn-Cushing Die State a/a. This Choice proof is deeply reflective and boasts subtle cameo contrast, warmed by a light golden hue on each side. The strike is full, and a few trivial hairlines are invisible to the unaided eye. The 1866 was the first proof Seated dollar struck bearing the motto IN GOD WE TRUST on the reverse. The Philadelphia Mint coined 725 examples, with likely less than half of those known today. Census: 65 in 64, 22 finer (4/19). NGC ID# 5GDV, PCGS# 7014

3868 1867 PR61 NGC. OC-P1, Low R.3. Osburn-Cushing Die State a/a. Rich russet-red and olive-gold patina encompasses this solidly struck proof Seated type coin. The fields and rims display distributed contact appropriate for the grade. First use of the reverse die with faint lines through GOD and WE, which continued to strike proofs annually through 1870. NGC ID# 252N, PCGS# 7015

1870 Seated Dollar, PR64
Attractively Toned

3869 1870 PR64 PCGS. OC-P1, Low R.3. Osburn-Cushing Die State a/a. The fields display a remarkable depth of reflectivity despite moderate lavender-gray and reddish-golden overtones. A swath of lighter silver-gray color bisects the reverse in a diagonal fashion. There are no surface blemishes of note on either side and the devices are sharply defined. Population: 54 in 64, 24 finer (4/19). Ex: *Palm Beach Signature* (Heritage, 11/2004), lot 7626. NGC ID# 252S, PCGS# 7018

TRADE DOLLARS

1874-CC Trade Dollar, MS63
Challenging Branch Mint Issue

3870 1874-CC MS63 NGC. Micro CC, no period after FINE. Since most of the mintage was used in the China trade, the 1874-CC Trade dollar is one of the most challenging issues of the series in high grade. This impressive Select specimen offers well-detailed design elements, with some of the usual softness on the stars and peripheral die cracks on both sides. The lightly marked surfaces are blanketed in low-intensity shades of lavender-gray toning, with slightly subdued mint luster. Census: 29 in 63, 14 finer (4/19). NGC ID# 2532, PCGS# 7035

3871 1875 Type Two Reverse MS62 NGC. Period after FINE. The 1875 has a relatively low mintage, and is very scarce in Mint State. This lustrous representative has light straw-gold toning and is surprisingly free from abrasions. Several stars show a soft strike, and Liberty's hair and the eagle's right (facing) claw are also incompletely brought up. NGC ID# 2534, PCGS# 40107 Base PCGS# 7037

1875-CC Trade Dollar, MS62
Satiny Carson City Type Coin

3872 1875-CC Type One Reverse MS62 PCGS. Berry under claw. Rich original forest-green, orange-red, and gunmetal-gray toning encompasses this satiny Carson City type coin. Scattered minor marks fail to distract. A good strike save for softness on the eagle's right (facing) leg. From a mintage of 1.5 million coins, the 1875-CC has an average certified grade between AU50 and AU53. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

3873 1875-S Type One Reverse MS64 PCGS. Large S. The usual design subtype and mintmark size for the issue. Light butter-gold toning visits this lustrous and well struck Choice Trade type coin. The left reverse field has a tick or two, but the eye appeal is superior for the designated grade. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

1877-CC Trade Dollar, MS61
Crisp Strike

3874 1877-CC MS61 NGC. Daubs of russet and ice-blue toning adhere to the rims, leaving about 95% of this Carson City Trade dollar brilliant. Both sides display a crisp strike, save for a few strands of hair on Liberty's head and the eagle's right talon. Hairlines and peppered ticks explain the grade. NGC ID# 253D, PCGS# 7045

3875 1877-S MS63 PCGS. CAC. Large S. Peripheral golden-brown and forest-green toning graces lustrous, well struck, and unobtrusively abraded surfaces. 420 GRAINS is minutely die doubled south, most evident on the crossbar and 4 in 420. The variety is one of several unlisted '77-S doubled dies that differ from FS-801. CAC: 24 in 63, 52 finer (4/19). NGC ID# 253E, PCGS# 7046

PROOF TRADE DOLLARS

1876 Trade Dollar, PR63 Cameo
Brilliant Fields, Frosty Devices

3876 1876 PR63 Cameo NGC. Type One Obverse, Type Two Reverse. Icy motifs contrast with untoned, glassy fields. The borders display faint roller marks, as made, and thorough evaluation reveals minor obverse hairlines. The strike is good, though shy of complete on Liberty's hair and the eagle's right (facing) claw. A popular Centennial-year proof type coin. Census: 17 in 63 Cameo, 31 finer (4/19). NGC ID# 27YM, PCGS# 87056

1879 Trade Dollar, PR64
Popular Proof-Only Issue

3877 1879 PR64 NGC. Philadelphia Mint Trade dollars from 1878 through 1885 were struck only in proof format as that Mint was extremely busy producing Morgan dollars in accordance with the Bland-Allison Act. While Carson City and San Francisco also produced Trade dollars in 1878, only proofs were coined from 1879 onward. This Choice proof displays rich slate toning with lovely iridescent accents. NGC ID# 27YR, PCGS# 7059

MORGAN DOLLARS

1878 7/8 Tailfeathers Morgan Dollar
VAM-33A, Doubled Eagle Legs, MS66

3878 1878 7/8TF Weak, Doubled Legs, VAM-33A, MS66 PCGS. VAM-33A is the clashed die state of VAM-33, a 7/4 tailfeathers variety that shows the faint remnants of four tailfeathers from the old hub beneath the primary seven tailfeathers of the new hub. The reverse also shows die doubling on the eagle's legs, which is an additional pick-up point for the variety. This is a frosty Premium Gem example with bold design elements and near-brilliant surfaces that show golden toning only around the outer peripheries. Liberty's cheek and the fields are remarkably clean, even for this grade. NGC ID# 2TY3, PCGS# 134032 Base PCGS# 7074

3879 1878 7/8TF 7/4 Strong, VAM-37, MS65+ PCGS. CAC. Light butter-gold toning accompanies this thoroughly lustrous and nicely struck first-year Morgan dollar. A couple of small strike-throughs (as made) on the tip of Liberty's neck, but no marks are remotely worthy of comment. CAC: 50 in 65, 2 finer (4/19). NGC ID# 2TXZ, PCGS# 134034 Base PCGS# 7078

1878 Morgan Dollar, MS66
7 Tailfeathers, Reverse of 1878

3880 1878 7TF Reverse of 1878 MS66 PCGS. VAM-130. A virtually brilliant Superb Gem of this briefly issued Philadelphia subtype. The Third Reverse was introduced later the same year, but this coin is a Second Reverse example with a parallel top arrow feather. Fully struck and thoroughly lustrous with a smooth reverse and delicate obverse field grazes. Population: 59 in 66 (12 in 66+), 0 finer (4/19). NGC ID# 2TY3, PCGS# 7074

3881 1878-S MS64 Deep Mirror Prooflike PCGS. CAC. Deep Mirror Prooflike examples of the 1878-S Morgan dollar are scarce but generally collectible below the MS65 grade level. However, CAC-approved examples are rare in any grade. This piece is brilliant and a stark cameo coin, showing sharp devices and frosty motifs. A few light luster grazes do not detract. CAC: 20 in 64, 5 finer (4/19). NGC ID# 56ZC, PCGS# 97083

**1878-S Dollar, MS65 Deep Prooflike
All-White and Highly Reflective**

- 3882 1878-S MS65 Deep Prooflike NGC.** Frosty devices and glassy fields confirm the DMPL designation of this first-year Morgan dollar. The contrast on the reverse is especially notable. The coin overall is brilliant and boldly struck with a refreshingly unabraded appearance. Census: 26 in 65 Deep Mirror Prooflike, 3 finer (4/19).

Ex: Long Beach Signature (Heritage, 2/2011), lot 3874. NGC ID# 56ZC, PCGS# 97083

**1879 Morgan Dollar, MS66+
Attractive, Multicolor Toning**

- 3883 1879 MS66+ PCGS. CAC.** The obverse of this lovely Premium Gem has rich gold, blue, and iridescent toning, while the reverse has light champagne toning inside peripheral iridescence. Both sides exhibit frosty luster and sharp design motifs. PCGS has only certified seven finer examples of this issue (4/19). NGC ID# 253S, PCGS# 7084

- 3884 1879-CC Capped Die, VAM-3, AU50 PCGS.** A Top 100 Variety. Although the die chips about the mintmark provide the nickname for the "Capped Die" variety, the 18 in the date is repunched north, and is also of numismatic interest. Light steel-gray toning visits attractive and well-defined surfaces. Luster fills the borders, wings, and hair. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**1879-CC Capped Die Morgan, AU58
VAM-3, Top 100 Variety**

- 3885 1879-CC Capped Die, VAM-3, AU58 PCGS. CAC.** A Top 100 Variety. A cluster of die chips around the mintmark is believed to be caused by an attempt to efface errant repunching of the mintmark, earning VAM-3 prominence among Morgan dollar varieties. Called the "Capped Die," this issue is sought-after in all grades. The present CAC-endorsed near-Mint example displays excellent detail and smooth, partly lustrous surfaces. Each side has a dusting of light russet-gold toning. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**1879-CC Capped Die Dollar, MS62
VAM-3A, Sought by Many Collectors**

- 3886 1879-CC Capped Die, VAM-3A, MS62 NGC.** A Top 100 Variety. Silver bullion was in short supply in 1879, and only a few weeks passed before 1879 silver dollar production was halted at the Nevada Mint. Just 756,000 pieces were struck — some of which feature the famous Large CC over Small CC mintmark. The die gouge through the base of the first A in AMERICA confirms status as a VAM-3A. This is a brilliant, heavily frosted example of the famous Capped Die variant. The strike is a bit soft over the ear, and the minimally abraded stone-white surfaces clearly show the engraver's efforts to efface the under mintmark. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

- 3887 1879-S Reverse of 1878, VAM-52, MS64 PCGS.** A Top 100 Variety. Die polish lines below Liberty's nose and on the right (facing) wing identify the die pairing. Some VAM collectors aspire to own a complete set of '79-S Reverse of '78 varieties, a nearly impossible task due to the rarity of VAM-56 and selected other marriages. The present VAM-52 example is brilliant and crisply struck. The obverse has cartwheel luster and the reverse is prooflike. NGC ID# CBFS, PCGS# 133868 Base PCGS# 7094

- 3888 1879-S MS66 Deep Mirror Prooflike PCGS.** Deep Mirror Prooflike examples of this otherwise common San Francisco issue become scarce finer than MS65, and they are major condition rarities above MS66. This Premium Gem example is brilliant and deeply mirrored, showing also a radiant cartwheel effect. Frosty design elements benefit from a sharp strike and are well-preserved. Population: 62 in 66 (1 in 66+) Deep Mirror Prooflike, 8 finer (4/19).
Ex: Dallas Signature (Heritage, 12/2005), lot 2283, which realized \$1,840. NGC ID# 45PS, PCGS# 97093

**1880-CC Morgan Dollar, MS66
VAM-5, 8 Over High 7
A Top 100 Variety**

- 3889 1880-CC 8 Over High 7, VAM-5, MS66 PCGS.** A Top 100 Variety, showing the prominent remains of a 7 within the loops of the final 8 in the date. On the reverse, a short vertical die line between the olive branch and the fletchings confirms the attribution. This Premium Gem example is frost-white and unabraded, showing a radiant cartwheel effect and well-struck design elements. Its eye appeal matches its collector appeal as a high-end VAM-5 representative. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102

3890 1880-CC 8/7, Reverse of 1878, VAM-7A, MS65+ PCGS. A Hit List 40 Variety. The double-clashed die state of VAM-7, one of two Reverse of 1878 varieties for this widely collected Carson City issue. A brilliant and well struck Gem that boasts booming luster and minimal indications of contact. NGC ID# AP7P, PCGS# 134049 Base PCGS# 7110

3891 1880/79-O Crossbar, VAM-4, MS64 PCGS. A Top 100 Variety. The crossbar of a 7 is evident within the upper loop of the final 8 on VAM-4, a variety that also features the Micro O mintmark. This near-Gem example is brilliant and radiantly frosty. Trivial strike weakness above Liberty's ear is no more significant than a few unobtrusive abrasions that prevent Gem classification. Eye appeal is excellent for the grade. NGC ID# 2543, PCGS# 133880 Base PCGS# 7116

1880-S Dollar, MS68 Near-Flawless With Cartwheel Frost

3892 1880-S MS68 PCGS. Medium S. The famous Morgan dollar design is spectacular in nearly flawless MS68 condition with fully brilliant surfaces and glittering cartwheel mint frost. Strike detail is complete, as befits the grade. This mass-minted and well-saved San Francisco issue is one of the few in the series that survives to great extent through this high level. Five coins are graded finer at PCGS (5/19). NGC ID# 2544, PCGS# 7118

1880-S Morgan Dollar, MS68 Immaculate Silver Type Coin

3893 1880-S MS68 NGC. Large S. A wisp of gold patina visits the left obverse margin, but this high-grade Morgan type coin is virtually brilliant. Dynamic luster, a crisp strike, and practically pristine surfaces confirm the lofty quality. The 1880-S is often selected for type purposes, since it was a well-made issue saved in bag quantity in Mint State. NGC ID# 2544, PCGS# 7118

1880-S Silver Dollar, MS68 Exemplary Type Coin

3894 1880-S MS68 NGC. Large S mintmark. Dazzling, frost-white mint bloom cartwheels uninterrupted around each side of this high-end type coin. The eye appeal is superb and, save for a touch of weakness on the hair immediately above Liberty's ear, the strike is complete. NGC has encapsulated only five numerically finer representatives (4/19).
Ex: FUN Signature (Heritage, 1/2015), lot 5911, which realized \$2,820. NGC ID# 2544, PCGS# 7118

1880-S Dollar, MS67+ Prooflike Dramatic Contrast

3895 1880-S MS67+ Prooflike PCGS. CAC. Large S. Eye appeal is outstanding for this 1880-S, one of the most plentiful Morgan dollars in high grades. Jet-black mirrors around razor-sharp motifs covered in thick mint frost deliver stark Prooflike contrast. There are 22 finer Prooflike submissions at PCGS. CAC: 56 in 67, 5 finer (4/19). NGC ID# 2544, PCGS# 7119

3896 1881-CC MS66+ PCGS. VAM-2. The 1881-CC has the second-lowest mintage of the Carson City Morgan series, lower than the key 1889-CC, 1879-CC, and 1893-CC dollars. Collectors are fortunate that the GSA holdings provided many nice Uncirculated examples. The present brilliant and lustrous piece has a bold strike and virtually pristine fields. NGC ID# 2549, PCGS# 7126

**1881-CC Morgan Dollar, MS66
Elusive Prooflike Specimen**

3897 1881-CC MS66 Prooflike PCGS. Coinage operations were suspended at the Carson City Mint for six out of twelve months in 1881, resulting in a minuscule mintage of 296,000 Morgan dollars that year. Fortunately, many coins were held in government storage until the GSA sales of the 1970s, making the issue more available than the production total suggests. This impeccably preserved Premium Gem exhibits sharply detailed, frosty design elements and deeply reflective prooflike fields with terrific eye appeal. Population: 36 in 66 (4 in 66+) Prooflike, 2 finer (4/19). NGC ID# 2547, PCGS# 7127

3898 1881-S MS66 Deep Mirror Prooflike PCGS. Mirrorlike fields contrast boldly with thickly frosted central devices throughout both sides of this nearly brilliant Deep Mirror Prooflike dollar. A translucent band of reddish-gold toning at the margins confirms the originality of the surfaces. Although the 1881-S is widely known for its well-produced mintage, the issue is scarce in Deep Mirror Prooflike format. This exceptional Premium Gem is sure to attract advanced Morgan dollar specialists. VAM enthusiasts will note a dash below 8 in the date. NGC ID# 2549, PCGS# 97131

**1881-S Morgan, MS67★ Deep Prooflike
White-on-Black Cameo**

3899 1881-S MS67★ Deep Prooflike NGC. This Deep Prooflike 1881-S dollar is a stark cameo coin, showing frost-white devices and liquidlike fields. The coin is boldly struck and untuned with outstanding surface preservation. A textbook common date, the 1881-S Morgan dollar is popular as a type coin. However, Deep Prooflike pieces are rare at the Superb Gem grade level. Census: 9 in 67 (2 in 67★) Deep Prooflike, 2 finer (4/19). NGC ID# 2549, PCGS# 97131

3900 1882 MS66+ PCGS. CAC. Generous swaths of aquamarine and peach patina endow this lustrous and well struck silver dollar. Splendidly smooth and highly attractive. The 1882 is considered a common date, but in the present grade, it is scarcer than its Carson City cousin. CAC: 87 in 66, 4 finer (4/19). NGC ID# 254A, PCGS# 7132

3901 1882 MS66+ PCGS. CAC. Attractive sky-blue, rose, yellow-gold and champagne-gray toning adorns both sides of this frosty and lustrous Premium Gem. The coin is well-struck and has only a few faint surface grazes that are visible beneath a loupe. Plus-graded coins with CAC endorsement are scarce in this grade. PCGS lists only 14 finer 1882 Morgan dollars. CAC: 87 in 66, 4 finer (4/19). NGC ID# 254A, PCGS# 7132

3902 1882-CC MS66+ PCGS. CAC. A Plus-graded Premium Gem Morgan dollar from the famous Carson City Mint, this coin exhibits well-detailed design elements and impeccably preserved lustrous surfaces, under vivid shades of lavender-gray and pale gold toning. NGC ID# 254S, PCGS# 7134

**1882-O Dollar, Lightly Toned MS66
Finest Collectible Grade for the Issue**

3903 1882-O MS66 PCGS. Seldom is the 1882-O dollar found in this high grade, and most collectors can forget about trying to acquire a finer example in MS67. Those only come on the market once every four or five years. This Premium Gem is remarkably clean, showing a couple of microscopic ticks on the cheek and a small handful of shallow, undistracting grazes in the right obverse field — all in line with the grade. Although satiny and largely brilliant, traces of gold and lavender-gray patina appear over each side. Population: 91 in 66 (11 in 66+), 7 finer (3/19). NGC ID# 254C, PCGS# 7136

3904 1882-S MS67+ PCGS. CAC. Although often seen in attractive, Superb Gem grade, the 1882-S is surprisingly scarce with prooflike surfaces. This Plus-graded and CAC-endorsed example ranks at the high end of its grade, and nearly qualifies for a prooflike designation, with just a few fleeting areas of mint frost near the portrait that preclude that honor as well. Viewed at an angle, the sharply struck motifs contrast boldly with the reflective fields. This is an essentially untuned and unmarked example with terrific eye appeal. NGC ID# 254F, PCGS# 7140

**1883-CC Morgan Dollar, MS67
Outstanding Preservation, VAM-5B**

3905 1883-CC MS67 PCGS. VAM-5B. A magnificent Carson City type coin. The reverse periphery exhibits pastel straw-gold and powder-blue toning, but the thoroughly lustrous and nicely struck surfaces are otherwise brilliant. The fields are nearly pristine, and the cheek shows only trivial indications of contact. VAMWorld.com presents five stages of this marriage (VAM-5 through VAM-5D). VAM-5B is a middle die state from lightly clashed and lapped dies. NGC ID# 254J, PCGS# 7144

3906 1883-O MS67 PCGS. This delightful Superb Gem is among the finest 1883-O Morgan dollars certified at PCGS. The strike is much better-than-average for the issue, with just the slightest trace of blending on the hair above the ear. The impeccably preserved, lustrous surfaces show a few highlights of pale gold and amber toning. Population: 95 in 67 (10 in 67+), 0 finer (4/19). NGC ID# 254J, PCGS# 7146

3907 1883-S MS63 PCGS. Pastel sun-gold toning visits the margins, but this Select silver dollar is principally brilliant. The prooflike obverse is moderately marked, while the reverse displays cartwheel luster and is well preserved. The '83-S is intermediate in Mint State rarity between the common '82-S and the rare '84-S. NGC ID# 254K, PCGS# 7148

3908 1883-S MS63 PCGS. The first five years of San Francisco Morgan dollars (1878 through 1882) are readily collected in Select condition, but the 1883-S is much scarcer, despite a generous mintage. Evidently, most of the issue circulated. This brilliant and nicely struck representative has relatively few marks, and offers superior eye appeal for the designated grade. Certified in a green label holder. NGC ID# 254K, PCGS# 7148

3909 1883-S MS63 PCGS. Vivid shades of golden-brown and cobalt-blue toning enhance the outstanding eye appeal of this attractive Select Morgan dollar. The design elements are well-detailed and the lustrous surfaces are lightly marked for the grade. NGC ID# 254K, PCGS# 7148

3910 1883-S MS63 NGC. CAC. A lovely band of turquoise toning on the rims frames peripheral orange and golden shades that encroach upon brilliant centers of this Select Uncirculated 1883-S. An identical toning pattern graces the reverse, too. The strike lacks sharpness only briefly above the ear, while CAC endorsement is a valuable barometer of the overall quality and eye appeal. NGC ID# 254K, PCGS# 7148

1883-S Silver Dollar, MS64 Sharp Strike, Clean Cheek

3911 1883-S MS64 NGC. Peripheral golden-brown, rose-red, and forest-green toning cedes to brilliant fields and devices. The patina is reminiscent of LaVerre Redfield's 1883-S dollars, though the pedigree of the present piece is unknown. An intricately struck and highly lustrous Choice better-date silver dollar. Liberty's cheek displays minimal contact. Certified in a prior generation holder. NGC ID# 254K, PCGS# 7148

1884 Morgan Dollar, MS65 Cameo Deep Mirror Prooflike Coin

3912 1884 MS65 Deep Mirror Prooflike PCGS. CAC. Brilliant surfaces display attractive cameo contrast on each side of this CAC-approved Deep Mirror Prooflike Morgan dollar. The coin is well-struck and shows only a few light grazes on Liberty's cheek. The 1884 is scarce with Deep Mirror Prooflike surfaces, and examples are rarely seen finer than the present. Housed in an old green label holder. Population: 38 in 65 (1 in 65+) Deep Mirror Prooflike, 9 finer. CAC: 1 in 65, 0 finer (4/19). NGC ID# 45WD, PCGS# 97151

1884-CC Dollar, MS67 Colorful Border Toning

3913 1884-CC MS67 NGC. Dappled ice-blue, crimson, gold, and violet encompasses the rims, leaving the centers of this pinpoint-sharp Superb Gem virtually all-brilliant. Vibrant mint frost characteristic of the Carson City facility swirls over the unabraded surfaces. NGC lists two higher-graded submissions (5/19). NGC ID# 8BBF, PCGS# 7152

1884-O Dollar, MS67 CAC Brilliant and Fully Struck

3914 1884-O MS67 PCGS. CAC. VAM-4. Brilliant and lustrous with remarkable smooth surfaces. Despite the reputation of the New Orleans Mint for indifferent strikes, the present piece is fully impressed. Although not a celebrated die variety, VAM-4 is interesting for its repunched date, die-rusted obverse, and overlapping reeding. The latter feature is evident on the edge near 7 o'clock. NGC ID# 254N, PCGS# 7154

3915 1884-S AU58 NGC. Substantial luster illuminates the fields of this near-Mint 1884-S Morgan dollar. Only slight high-point friction is observed, mainly on the eagle's breast and the hair above Liberty's ear. Light grazes on the cheek hardly detract. The 1884-S is a semikey date in high grade, widely sought-after in the upper end of the AU spectrum. NGC ID# 254P, PCGS# 7156

1884-S Morgan Dollar, AU58+ Conditionally Rare

3916 1884-S AU58+ PCGS. CAC. Virtually full luster appears on both sides of this conditionally elusive Morgan silver dollar. Just a trace of wear is evident on the high points of Liberty's hair, and on the eagle's breast feathers. Wispy champagne toning enhances the eye appeal of this important dollar. NGC ID# 254P, PCGS# 7156

- 3917 1885 MS66 Deep Mirror Prooflike PCGS.** Ex: Midwest Mirrors. The fields of this Premium Gem 1885 Morgan dollar are so deeply mirrored that the coin delivers a stark white-on-black cameo appearance. The liquidity of the fields is reminiscent of liquid mercury, and it stands apart from the frost-white luster of the devices. A few faint grazes in the left obverse field are all that deny an even finer numeric grade. PCGS lists a single higher-grade Deep Mirror Prooflike 1885 Morgan (4/19). NGC ID# 45WM, PCGS# 97159

**1885 Morgan, MS66 Deep Mirror Prooflike
Among the Finest at CAC**

- 3918 1885 MS66 Deep Mirror Prooflike PCGS. CAC.** Deep Mirror Prooflike examples of this otherwise common date are scarce in Gem and finer condition, and PCGS reports only a single piece numerically finer than the current coin. This piece is essentially brilliant, although wisps of golden color are visible around the outer peripheries. Well-struck devices provide satiny luster and good cameo contrast, while the fields show no mentionable contact marks. CAC: 24 in 66, 0 finer (4/19). NGC ID# 45WM, PCGS# 97159

- 3919 1885-CC MS66+ PCGS. VAM-3.** A lustrous pearl-white Premium Gem of the lowest mintage Carson City Morgan issue. A good strike and a clean cheek ensure the eye appeal. A minor reed impression above the arrowheads merits only passing mention. NGC ID# 254S, PCGS# 7160

- 3920 1885-S MS65+ PCGS.** Orange-gold and sea-green patina enriches the peripheries of this lustrous and well struck Gem. The cheek is smooth and the fields display only delicate grazes. Much nicer than the typical '85-S dollar, and considerably more affordable than the few pieces graded finer. NGC ID# 254U, PCGS# 7164

- 3921 1886 MS67+ PCGS. CAC.** Plentiful overall, the 1886 Morgan dollar is typically thought of as a type coin. The issue often comes with satiny or dull mint luster, and few pieces are known with truly great eye appeal. This CAC-endorsed, Plus-graded Superb Gem is a stand-out exception with vibrant, frosty cartwheel luster. It features a bold strike and is almost flawlessly preserved. Neither side shows toning save for a halo of gold around the extreme outer peripheries. PCGS lists 14 finer non-Prooflike coins (4/19). NGC ID# 254V, PCGS# 7166

- 3922 1887/6 VAM-2, MS65+ PCGS.** A Top 100 Variety. A curved line bookends the bottom of the 7 in the date, confirming the scarce 1887/6 variety. This is a highly lustrous Gem with a pristine reverse and only incidental obverse grazes. The strike is good and the eye appeal is outstanding. NGC ID# 2552, PCGS# 133908 Base PCGS# 7174

**1887 Silver Dollar, MS67 Prooflike
Ex: PCGS Tour, NFL Set**

- 3923 1887 MS67 Prooflike PCGS.** Ex: PCGS Tour/NFL Set. Housed in a green label holder that bears two of the most famous silver dollar pedigrees. The PCGS Tour, which cycled through the 1990 and 1991 convention circuit, was a high grade set of Morgan dollars. Although the property of several different owners, all were labeled as PCGS Tour coins, and today are seldom encountered. Later, this 1887 dollar belonged to the NFL Set, an advanced PCGS Registry holding of the series formed by former Houston Oilers linebacker Gregg Bingham. The 1887 is a common date, but conditionally rare in the present grade. The lustrous and well struck Superb Gem offers pristine surfaces and a mere hint of golden toning. Ex: Gregg Bingham NFL Collection/FUN Signature (Heritage, 1/2001), lot 7943; Arno Collection/FUN Signature (Heritage, 1/2009), lot 4587, which realized \$4,312.50. NGC ID# 254Y, PCGS# 7173

**1887-S Morgan, MS63 Deep Mirror Prooflike
Cameo Contrast on Both Sides**

- 3924 1887-S MS63 Deep Mirror Prooflike PCGS.** The 1887-S Morgan dollar is scarce with Deep Mirror Prooflike fields, and rarely is such a coin seen finer than the present Select representative. Other than a couple of amber-colored toning areas on Liberty's neck and in the left field, the coin is brilliant and well-contrasted. Scattered abrasions are light and unobtrusive, and the design elements are sharp. Population: 26 in 63 Deep Mirror Prooflike, 27 finer (4/19). NGC ID# 2554, PCGS# 97181

**1888 Morgan Dollar, MS67
Fully Struck, Thick Mint Luster**

- 3925 1888 MS67 NGC.** Hints of gold toning adorn both sides, although many collectors would regard the present Superb Gem as fully brilliant. Bright mint luster sweeps across the well-preserved fields and devices. The strike is intricately detailed, and the eye appeal is commensurate with its third-party assessment. Census: 92 in 67 (3 in 67+, 3 in 67★), 1 finer (4/19). Ex: Sacramento Signature (Heritage, 3/2011), lot 3998. NGC ID# 26KE, PCGS# 7182

1888-S Dollar, MS66
Conditionally Scarce California Issue

- 3926 1888-S MS66 PCGS.** This is a relatively low-mintage San Francisco issue and one that is scarcely seen in Premium Gem condition. Each side showcases glowing golden patina, while the reverse displays additional blue, green, and magenta tones. Sharply struck from the rims to the centers. Population: 42 in 66 (4 in 66+), 3 finer (4/19). NGC ID# 2557, PCGS# 7186

1888-S Morgan Dollar, MS64
Remarkable Deep Mirror Prooflike Example

- 3927 1888-S MS64 Deep Mirror Prooflike PCGS.** From a small mintage of 657,000 pieces, the 1888-S Morgan dollar is seldom encountered with a sharp strike and lightly marked surfaces. This remarkable Choice specimen exhibits unusually sharp definition on all design elements and the fields are deeply reflective, with strong field/device contrast. The surfaces show a few minor abrasions and some vertical planchet striations in the obverse fields and on Liberty's cheek. Population: 48 in 64 (1 in 64+) Deep Mirror Prooflike, 4 finer (4/19). NGC ID# 27MY, PCGS# 97187
- 3928 1889 MS66+ PCGS.** The 1889 Morgan dollar is a plentiful issue in grades up to the MS66 level, but finer coins are condition rarities. This Plus-graded Premium Gem exhibits sharply detailed design elements and virtually flawless lustrous surfaces, with subtle highlights of pale gold and lavender toning. PCGS has graded seven numerically finer examples (4/19). NGC ID# 2558, PCGS# 7188
- 3929 1889-CC XF40 NGC.** The 1889-CC Morgan dollar is an important key to the series, from a low mintage of 350,000 pieces. This lightly abraded XF specimen shows only light wear on the design elements and the lightly toned surfaces exhibit a few traces of original mint luster. NGC ID# 2559, PCGS# 7190
- 3930 1889-CC — Cleaned — PCGS Genuine. AU Detail.** The 1889-CC is the rarest Carson City Morgan dollar issue, and the median grade of certified survivors is VF25. This example has AU sharpness but is bright from a wipe, and has an abrasion on the reverse field near the left (facing) wing. The obverse border exhibits hints of russet toning.
- 3931 1889-CC — Harshly Cleaned — NGC Details. AU.** The coin is bright and lightly abraded with extensive hairlines, but much of the reflectivity in the fields appears to be original to the coin, as struck. No significant wear is present, and there are traces of light golden toning near the borders. The 1889-CC is a major series key in any grade.

1889-CC Silver Dollar, AU53
Morgan Key

- 3932 1889-CC AU53 PCGS.** Carson City Morgan dollars form a widely collected subset of the greater Morgan series that is challenging to assemble both in Uncirculated and circulated condition. One issue that is a "stopper" in both circulated condition and Mint State is the 1889-CC. This key date comes from a mintage of 350,000 coins, but a large number of pieces were released into circulation during the 19th century. Remaining coins were likely melted in 1918. This AU example displays mostly untuned surfaces but does have some olive-gold daubs around the peripheries. Detail is strong and partial luster remains in the protected areas of the fields. NGC ID# 2559, PCGS# 7190
- 3933 1889-O MS63 Deep Mirror Prooflike PCGS.** A scarce Deep Mirror Prooflike example of this New Orleans issue, showing an above-average strike and stark cameo contrast on both sides. Brilliant interiors cede to thin ribbons of rainbow toning around the extreme outer peripheries. A few scattered abrasions account for the grade. Population: 37 in 63 Deep Mirror Prooflike, 30 finer (4/19). NGC ID# 45YN, PCGS# 97193
- 3934 1889-S MS65 NGC. CAC.** In 1889, the Philadelphia Mint struck 21,726,000 silver dollars for commerce, but its San Francisco cousin produced a much lower 700,000 pieces. This lustrous representative exhibits potent luster and a good strike. The fields are well preserved, and the borders display light autumn-brown toning. Certified in a former generation holder. CAC: 84 in 65, 24 finer (4/19). NGC ID# 255B, PCGS# 7194
- 3935 1889-S MS63 Deep Mirror Prooflike PCGS. CAC.** PCGS has certified only 69 Deep Mirror Prooflike examples of this issue in all grades, most of which are in MS62 to MS64. Gems are rare. This CAC-approved Select example displays a bold strike and deeply reflective fields. Modest cameo contrast is apparent on each side, and there are delicate wisps of iridescent toning. Population: 20 in 63 Deep Mirror Prooflike, 27 finer. CAC: 5 in 63, 8 finer (4/19). NGC ID# 255B, PCGS# 97195
- 3936 1890 MS65 PCGS. CAC.** A frosty, brilliant Gem example of this conditionally better Philadelphia issue, showing just a touch of strike weakness on the hair above Liberty's ear. This is among the finest coins with CAC endorsement. PCGS lists five numerically finer examples. CAC: 61 in 65, 0 finer (4/19). NGC ID# 255C, PCGS# 7196

**1890-CC Morgan Dollar, MS65
Rare Issue in Finer Grades**

- 3937 1890-CC MS65 PCGS.** The 1890-CC Morgan dollar is still collectible at the MS65 grade level, but finer coins are rare. This impressive Gem offers sharply detailed design elements, with some spidery peripheral die cracks on both sides. The well-preserved, lustrous surfaces show delicate highlights of golden-tan and lavender toning. PCGS has graded 20 numerically finer examples (4/19). NGC ID# 255D, PCGS# 7198

**1890-S Silver Dollar, MS66+
Peripheral Patina, Strong Mint Luster**

- 3938 1890-S MS66+ PCGS. CAC.** Dappled blue-green toning adorns the borders of this boldly struck and highly lustrous silver dollar. Careful examination reveals only delicate indications of contact. The 1890-S is readily available in bagmarked Mint State, but examples this close to Superb Gem are desirable. PCGS has certified 51 pieces as MS66+ and only 8 finer (4/19). NGC ID# 255F, PCGS# 7202

- 3939 1891 Doubled Ear, VAM-2, MS65 PCGS.** A Top 100 Variety. Although undesignated as such by PCGS, this is the well-known variety with die doubling to the south on Liberty's earlobe, and on the hair above the ear. Lightly toned and thoroughly lustrous with a practically pristine cheek and minor contact near the N in UNUM. The 1891 is considered a common date in grades up to MS62, but Gems are surprisingly elusive. NGC ID# 255G, PCGS# 133935 Base PCGS# 7204

**1891-CC Morgan Dollar, MS65
Popular Branch Mint Issue**

- 3940 1891-CC MS65 PCGS.** Vivid shades of violet and pale gold toning visit the well-preserved surfaces of this delightful Gem, with vibrant mint luster underneath. The design elements are well-detailed, with just a touch of blending on the hair strands above Liberty's ear. The overall eye appeal is imposing. The 1891-CC is a better Carson City issue, much scarcer in Mint State than the 1882-CC through 1884-CC. NGC ID# 255H, PCGS# 7206

**1891-CC Silver Dollar, MS65
Seldom Available Finer**

- 3941 1891-CC Spitting Eagle, VAM-3, MS65 PCGS.** A Top 100 Variety. The 1891-CC is among the scarcer Carson City issues in high grade, being especially elusive in grades finer than MS65. Gems are usually accessible, and this one is especially attractive with frosty cartwheel luster and an above-average strike. The interiors are brilliant, surrounded by warm rose-gold peripheral toning. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

**1891-O Dollar, MS65
Attractively Frosted Mint Luster**

- 3942 1891-O MS65 PCGS.** The original, frosty mint luster of this Gem 1891-O Morgan is quite appealing, being devoid of significant abrasions and showing only the slightest tint of light golden color. The centers are weakly struck on the eagle's breast and above Liberty's ear, as is commonplace on New Orleans dollars of this period. Overall, the 1891-O is scarce in Gem condition, and only one finer coin — an MS66 piece — is reported at PCGS. PCGS also lists two MS65 Deep Mirror Prooflike coins, although none are finer (4/19). NGC ID# 255J, PCGS# 7208

**1891-O Dollar, Brilliant Gem
Four Finer Submissions at Both Services**

- 3943 1891-O MS65 NGC.** The 1891-O is readily available in circulated and lower Uncirculated grades. It is scarce at the Gem grade level. Finer coins include three Premium Gem submissions at NGC and one at PCGS (5/19). This totally brilliant, vibrantly lustrous dollar enjoys mostly crisp detail with softness confined to the hair over Liberty's ear and the eagle's talons. NGC ID# 255J, PCGS# 7208

**1891-O Morgan Dollar, MS65
Almost Uncollectible Finer**

- 3944 1891-O MS65 NGC.** No Prooflike or Deep Prooflike 1891-O Morgan dollars are in Gem condition at NGC, and non-Prooflike coins are scarce this fine. This piece has luminous mint luster and a shimmering cartwheel effect. A dusting of champagne toning across each side yields to sea-green and amber around the extreme outer peripheries. The central high points of the design show strike weakness as usual. Census: 76 in 65 (1 in 65+, 2 in 65★), 3 finer (4/19). NGC ID# 255J, PCGS# 7208

**1891-S Dollar, MS66
Semiprooflike on Both Sides**

- 3945 1891-S MS66 PCGS.** Both sides display modest reflectivity in the fields, but a Cameo designation is just out of reach. This brilliant, satiny Premium Gem boasts sharp design elements and is free of major abrasions. The 1891-S is a better date in high grade, scarce in MS66, and rare finer. PCGS has seen eight higher-grade submissions (4/19). NGC ID# 255K, PCGS# 7210
- 3946 1892 MS65 NGC.** Nearly impossible to obtain in finer grades, this 1892 a full-fledged Gem with brilliant-white, frosted surfaces and an uncharacteristically sharp strike. The strike is one reason why few Premium Gem or finer coins exist. Only a few tiny marks are seen on this sparkling Gem, visible with magnification on the reverse. NGC reports just one numerically finer example (4/19). NGC ID# 255L, PCGS# 7212
- 3947 1892 MS65 PCGS.** The 1892 was generally kept out of circulation, explaining its former status as a rarity in the series. Bags were released during the middle part of the 20th century, but the issue remains scarce at the Gem level and is essentially unobtainable in higher grades. Smooth, frosty surfaces are brilliant with a hint of reddish-gold color near the left-hand stars. The centers show minor softness, as often encountered. PCGS reports 10 numerically finer submissions (4/19). NGC ID# 255L, PCGS# 7212
- 3948 1892-CC MS63 NGC.** Sharply struck from cracked and clashed dies, this Select Uncirculated 1892-CC shows few marks for the MS63 grade level. Brilliant, silver-white surfaces display occasional wisps of almond-gold toning. Both the obverse and reverse are triple-clashed. NGC ID# 255M, PCGS# 7214

- 3949 1892-CC MS63 PCGS.** Vibrant mint luster radiates from both this brilliant and attractive better-date Carson City dollar. The sharply struck surfaces exhibit smooth fields and only wispy contact on Liberty's cheek and neck. This is an ideal candidate for a Select Uncirculated set of Morgan dollars — challenging to achieve, but within reach of most collectors. NGC ID# 255M, PCGS# 7214
- 3950 1892-CC MS63 NGC. VAM-8A.** The 2 in the date is filled at its base, while die chips partially fill the lower loops of 8 and 9. This is a brilliant Select Uncirculated example of the Carson City Mint's penultimate Morgan dollar issue. Smooth, minimally abraded fields have a semireflective sheen, and the sharp strike weakens only slightly above the ear and at the eagle's talons. Faint die clashing is visible on both sides, characteristic of the die marriage. NGC ID# 255M, PCGS# 7214
- 3951 1892-CC MS63 NGC. CAC.** CAC endorsed and rightly so, this Select 1892-CC Morgan dollar has remarkably clean surfaces for the grade, especially in the fields. Only a few marks on Liberty's cheek prevent a finer grade. The luster is untuned and satiny with an appreciable cartwheel effect. Strike sharpness is above average for the issue. NGC ID# 255M, PCGS# 7214
- 3952 1892-CC MS63 PCGS. CAC.** An attractive Select Morgan dollar from the famous Carson City Mint, this coin displays well-detailed design elements and lustrous, lightly toned surfaces that show the minimum number of minor contact marks for the grade. NGC ID# 255M, PCGS# 7214
- 3953 1892-CC MS64 NGC. "VAM-14B."** A presently unlisted later die state of VAM-14A, with the N in IN and the ST in TRUST clashed near Liberty. VAM-14A is known for its heavy crack through the tops of STATES. The 1892-CC is a scarcer Carson City issue without appearances in the GSA holdings. This Choice silver dollar has a brilliant reverse, but the obverse displays magnificent peach-gold, fire-red, and ocean-blue toning. NGC ID# 255M, PCGS# 7214
- 3954 1892-CC MS64 PCGS.** This is a particularly attractive Choice specimen of an always-popular Carson City issue. Sharply struck, frosted design elements sit upon nearly unmarked, brilliant-yet-semireflective surfaces. Vibrant cartwheel mint luster adds to the outstanding visual appeal. NGC ID# 255M, PCGS# 7214
- 3955 1892-CC MS64 PCGS. VAM-10.** Semiprooflike fields and vivid original toning are the hallmarks of this near-Gem, complementing well-struck design elements. No major abrasions are seen. The borders show ocean-blue and violet color, with mottled orange-gold across the interiors. The 1892-CC is a better date among Carson City Morgans, and the availability declines significantly in grades finer than MS64. NGC ID# 255M, PCGS# 7214
- 3956 1892-CC MS63 Prooflike PCGS.** A brilliant, deeply reflective Prooflike example of this late Carson City Morgan, showing an above-average strike and fewer abrasions than expected. Eye appeal is outstanding. A vibrant cartwheel effect plays across each side. NGC ID# 255M, PCGS# 7215
- 3957 1892-S AU53 PCGS.** The 1892-S distinctively holds the series' second-lowest Mint State survivorship, trailing only the key-date 1893-S. About Uncirculated examples are typically the finest represented in date and mintmark collections. This piece displays lustrous margins and golden toning that lightens toward the centers. Wear is mainly restricted to the eagle's breast and the hair above Liberty's ear. NGC ID# 255P, PCGS# 7218
- 3958 1893-CC AU53 NGC.** An impressive AU53 Morgan dollar, from the final year of coinage operations at the Carson City Mint, this coin exhibits just a touch of high-point wear on the design elements. The lightly abraded surfaces show traces of original mint luster, under low-intensity shades of lavender toning. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, Unc Details
Scarce and Popular CC Issue**

- 3959 1893-CC — Cleaned — NGC Details. Unc.** The 1893-CC is primarily known as the final year of issue from the Carson City mint, but it is also a scarce issue in all grades because of its low mintage of only 677,000 pieces. Examples seem to fall into two categories, softy struck and fully struck, with little medium ground between the two. This is a fully struck coin whose surfaces are bright from cleaning. The obverse is peppered with numerous small abrasions. NGC ID# 255S, PCGS# 7222

**1893-O Morgan Dollar, MS62
Low-Mintage Branch Mint Issue**

- 3960 1893-O MS62 PCGS. CAC.** The 1893-O Morgan dollar claims a small mintage of just 300,000 pieces, all struck in the first half of the year, before the Panic of 1893 caused the repeal of the Sherman Silver Purchase Act. The 1893-O is the second-most elusive Morgan dollar from the New Orleans Mint. This well-detailed Select specimen displays lustrous, lightly marked surfaces, with subtle highlights of pale gold toning. NGC ID# 255T, PCGS# 7224

- 3961 1893-S Good 6 PCGS. VAM-1.** Every Morgan dollar collector has memorized the mintage of the key 1893-S dollar: 100,000 pieces. A luminous pearl-gray representative with peripheral indications of golden patina. All legends are bold, and marks are few for the grade. As an identifier, we note a horizontal hair-thin line on the eagle's chest. NGC ID# 255U, PCGS# 7226

**1893-S Silver Dollar, VG10
Famous Low-Mintage Key**

- 3962 1893-S VG10 NGC. VAM-1.** A charming silver-gray representative of the coveted business series key. All of the legends are bold, and the lower half of the wings are well-defined. The reverse rim near 3 o'clock displays a few ticks, but the remainder of the coin is surprisingly void of consequential contact. NGC ID# 255U, PCGS# 7226

**1893-S Morgan Dollar, VG10
Collector-Grade Example**

- 3963 1893-S VG10 PCGS.** A smooth collector-grade example of this key San Francisco issue, showing slate-gray interiors that cede to deeper amber-gold, russet, and lilac border toning. Wear is even, leaving the major design elements well-defined. Problem-free 1893-S dollars are in high demand, even in low grades. NGC ID# 255U, PCGS# 7226

- 3964 1893-S — Damage — PCGS Genuine. Fine Details. VAM-1.** Golden-brown toning accompanies the borders of this otherwise stone-gray key date silver dollar. The obverse is minimally marked, but the eagle's belly is gouged, and a scrape affects GOD WE and the eagle's head and neck.

**1893-S Dollar, XF Sharpness
VAM-2, Tilted Mintmark**

- 3965 1893-S — Cleaned — NGC Details. XF. VAM-2.** The mintmark leans to the right, and a gathering of die lines runs between the eagle's right (facing) wing and neck just above the wing junction. The coin's silver-gray surfaces are a bit subdued by cleaning, but marks are few and XF sharpness remains. The hair over Liberty's hear and the eagle's breast show a combination of soft strike and wear.

**1894 Morgan Dollar, MS61
Key P-Mint Issue**

- 3966 1894 MS61 PCGS.** The 1894 Morgan dollar is a low-mintage Philadelphia Mint key. Examples are elusive in all grades and most Uncirculated examples are in the lower ranges of Mint State. This attractive MS61 specimen is sharply detailed and lustrous, with the expected number of abrasions present for the grade. A few hints of golden toning enliven the peripheries. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS63
Low-Mintage Philadelphia Key

- 3967 1894 MS63 PCGS.** The 1894 Morgan dollar claims one of the smallest production totals of the series, at a meager 110,000 pieces. This attractive Select specimen exhibits sharply detailed design elements throughout and the lightly marked surfaces show faint highlights of pale gold and lavender toning. Vibrant mint luster adds to the outstanding visual appeal. NGC ID# 255V, PCGS# 7228

1894 Dollar, MS63
Challenging in Mint Condition

- 3968 1894 MS63 PCGS.** Due to its low mintage, the 1894 is sought after in all grades. The scarce issue perhaps provides the most value in the MS63 grade, since an MS64 will set back the buyer an additional \$3,000 to \$4,000. The present example is untoned and lustrous with an above-average strike. Faint obverse marks limit the grade but not the eye appeal.
Ex: Long Beach Signature (Heritage, 2/2010), lot 679, which realized \$4,600; ANA Signature (Heritage, 2/2014), lot 4045, which realized \$4,700. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS63
Key Philadelphia Business Strike

- 3969 1894 MS63 NGC. CAC.** The key Philadelphia issue in the business strike Morgan dollar series, the 1894 is always in demand and we are pleased to offer examples in our auctions. This Select Mint State piece has frosty silver luster with light rose toning that is concentrated near the borders.
Ex: Beverly Hills Signature (Heritage, 11/2011), lot 3878. NGC ID# 255V, PCGS# 7228

- 3970 1894-O MS62 PCGS. CAC. VAM-4.** The 1894-O is one of several New Orleans issues that is common in VF but rare in Mint State. The present lightly marked example is nicer than most Uncirculated survivors, and exhibits original golden-brown and blue-green patina. The date was initially entered with a slight upward slant, then corrected. Evidence of the repunched date is found below the flag of the 1, and above the 4. NGC ID# 255W, PCGS# 7230

1894-O Dollar, Sharp MS63
Conditionally Scarce O-Mint Issue

- 3971 1894-O MS63 PCGS.** Although some bags of 1894-O silver dollars were released from the Treasury in the 1950s and 1960s, this New Orleans issue is much scarcer than its 1.7 million-piece mintage suggests. Of the coins that survive, many are dull and lifeless. This Select Uncirculated example far exceeds the usual 1894-O both in grade and eye appeal. Semireflective surfaces radiate silver luster, and a sharp strike covers both sides. A touch of golden toning at the obverse rim confirms the original surfaces, which show a few small marks and grazes, yet the coin is exemplary for the assigned grade. NGC ID# 255W, PCGS# 7230

1894-S Morgan Dollar, MS65
Elusive Issue in High Grade

- 3972 1894-S MS65 PCGS.** This California issue is widely accessible in MS62 through MS64 before becoming scarce in MS65. Mottled gold, violet, and blue toning allows frosty cartwheel luster to emanate from the clean underlying surfaces. Soft over the ear but crisp elsewhere. PCGS reports 19 finer grading events (4/19). NGC ID# 255X, PCGS# 7232
- 3973 1895-O AU55 NGC.** From a low mintage of 450,000 pieces, the 1895-O Morgan dollar is a popular branch mint issue. This impressive Choice AU specimen shows just a trace of wear on the well-detailed design elements and the lightly abraded surfaces retain significant amounts of original mint luster. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, AU58
Elusive in All Mint State Grades

- 3974 1895-O AU58 PCGS.** The 1895-O Morgan dollar boasts a limited mintage of 450,000 pieces, making it the third-rarest issue of the series in Mint State grades. This attractive near-Mint example displays just a trace of high-point wear on the strongly impressed design elements and the lightly toned surfaces are lustrous and minimally marked. NGC ID# 255Y, PCGS# 7236

1895-O Silver Dollar, AU58
Challenging to Acquire Finer

- 3975 1895-O AU58 NGC.** Substantial luster remains on this 1895-O Morgan dollar, nearly earning it a Mint State grade. Only slight friction on Liberty's cheek prevents such a designation from NGC. The coin is well-struck and satiny with light golden toning. Eye appeal is pleasing and there are no significant abrasions. This New Orleans issue is scarce in Mint State and out of reach for many collectors. High-end AU pieces are highly sought-after alternatives. NGC ID# 255Y, PCGS# 7236

1895-O Dollar, AU58
Key New Orleans Issue

- 3976 1895-O AU58 PCGS.** In VF, the 1895-O is key to a date collection of Morgan dollars. The 1895-S is rarer in circulated grades, but in Mint State, the 1895-O is much more difficult to acquire than the '95-S. This Borderline Uncirculated '95-O Morgan is brilliant aside from small reverse spots at 3 and 6 o'clock. A band of bright luster fills the borders. Relevant contact is limited to a cluster of field marks near the forehead curl. NGC ID# 255Y, PCGS# 7236

1896-O Morgan Dollar, MS63
Seldom Seen Finer

- 3977 1896-O MS63 PCGS.** The 1896-O Morgan dollar is one of the most challenging dates of the series to locate in high grade. This impressive MS63 example offers well-detailed design elements, with the often-seen touch of softness above Liberty's ear. The surfaces are blanketed in shades of gray, gold, and lavender toning, with satiny mint luster underneath. PCGS has graded only 34 numerically finer examples (4/19). NGC ID# 27ZU, PCGS# 7242

1897-O Morgan Dollar, MS63
Challenging in Mid-to-High Mint State

- 3978 1897-O MS63 PCGS.** Several scarce New Orleans dollars — the 1893-O through 1896-O — preceded the 1897-O, which had a large mintage of more than 4 million pieces. Despite its reputation for easy availability, Mint State '97-Os remain surprisingly scarce. This near-brilliant example displays thickly frosted fields with strong underlying mint luster. The strike is typically soft over the ear and at the eagle's breast, yet marks are relatively few for the MS63 level. PCGS has certified just 60 numerically finer pieces (4/19). NGC ID# 2565, PCGS# 7248

1897-S Dollar, MS66+
Elusive CAC-Endorsed Example

- 3979 1897-S MS66+ PCGS. CAC. VAM-14.** The date is lightly repunched. Well-struck and radiantly lustrous, this high-end Premium Gem displays brilliant surfaces and has only a few microscopic luster grazes. The 1897-S Morgan dollar is occasionally available in MS66, but Plus-graded coins with CAC endorsement are scarce. CAC: 91 in 66, 6 finer (4/19). NGC ID# 2567, PCGS# 7250

- 3980 1898-O MS67 PCGS. CAC.** Although MS67 coins are occasionally seen, the 1898-O silver dollar is almost unknown any finer. This Registry-grade CAC coin displays frosty, brilliant luster and unabraded surfaces. The eagle's breast and the hair above Liberty's ear are slightly weak, as expected for the issue. PCGS shows no numerically finer certifications (4/19). NGC ID# 2569, PCGS# 7254

**1898-S Dollar, MS66
Satiny and Brilliant**

- 3981 1898-S MS66 PCGS.** The 1898-S dollar had a substantial mintage of 4.1 million pieces. Most were either released into circulation in the 1920s or paid out to Las Vegas casinos in the 1940s and 1950s. As a result, few high-grade pieces remained when silver dollar collecting really began to take off in the 1970s. This is an attractive piece that shows the satiny luster sometimes encountered on 1898-S dollars. The surfaces are remarkably clean and attractive with no singular abrasions. Brilliant and strongly struck throughout. The mintmark serifs are repunched, similar to VAM-4 but from a different die pair. NGC ID# 256A, PCGS# 7256

- 3982 1899 MS65 Deep Mirror Prooflike PCGS.** The 1899 is a challenging issue in Deep Mirror Prooflike grades. This Gem example displays a thin veneer of clear-gold over sharp devices and mirrored fields. Modest cameo contrast is apparent on each side. Just 330,000 silver dollars were struck in 1899 at the Philadelphia Mint, from which only a tiny portion can claim the Deep Mirror Prooflike designation. Population: 55 in 65 (1 in 65+) Deep Mirror Prooflike, 12 finer (4/19).
Ex: ANA Signature (Heritage, 8/2017), lot 4540, which realized \$1,410. NGC ID# 256B, PCGS# 97259

- 3983 1899-O MS67 PCGS.** Brilliant cartwheel luster engulfs the frosty surfaces of this Superb Gem 1899-O Morgan dollar, complementing sharp design elements. Eye appeal is exceptional, as only the most insignificant signs of surface contact are visible beneath a loupe, all on the obverse. PCGS lists only a single numerically finer representative (4/19). NGC ID# 256C, PCGS# 7260

- 3984 1899-O MS67 PCGS.** Beautiful two-sided toning forms concentric rings on this Superb Gem 1899-O dollar, with yellow-gold and blue around the outer peripheries, lilac and peach in the margins, dusky gray in the centers. This piece is well-struck for an O-mint dollar and neither side has bothersome abrasions. PCGS lists a single numerically finer non-Prooflike coin, plus two Deep Mirror Prooflike pieces in this same grade (4/19). NGC ID# 256C, PCGS# 7260

**1900-O Silver Dollar, MS67
Ex: Bermuda Collection**

- 3985 1900-O MS67 PCGS. Ex: Bermuda.** An outstanding New Orleans Superb Gem. Lustrous and practically pristine with a sharp strike and only a wisp of butter-gold toning. The issue is virtually unobtainable any finer. A high grade PCGS Registry Set of Morgan dollars, the Bermuda Collection was retired in July 2004, and privately disbursed shortly thereafter. NGC ID# 256F, PCGS# 7266

- 3986 1900-O/CC VAM-8, MS65 PCGS.** A Top 100 Variety. Iridescent rose-red, lime-green, and wheat-gold toning visits this thoroughly lustrous and crisply struck Gem. A loupe reveals only delicate grazes. There are six die marriages of 1900-O/CC dollars, VAM-7 through VAM-12. VAM-7 and VAM-9 are conditionally rarest, while VAM-8 and VAM-11 are the most available in Mint State. NGC ID# 256G, PCGS# 133960 Base PCGS# 7268

- 3987 1900-O/CC VAM-8, MS65 PCGS. CAC.** A Top 100 Variety. The underlying CC mintmark is clear on VAM-8. This Gem is CAC endorsed and shows brilliant cartwheel luster. Both sides are free of distinctive abrasions and the devices are well-struck. Housed in a green label holder. NGC ID# 256G, PCGS# 133960 Base PCGS# 7268

- 3988 1900-S MS66 PCGS.** A high degree of brilliant mint luster shines through a trace of gold toning, mostly on the obverse of this Premium Gem Morgan dollar. The 1900-S is a noted condition rarity, with only four numerically finer PCGS examples (4/19) — a fact that is often overlooked by even advanced collectors. NGC ID# 256H, PCGS# 7270

- 3989 1900-S MS66 PCGS.** Frosty cartwheel luster illuminates untuned surfaces on this Premium Gem 1900-S Morgan dollar, a conditionally scarce example of an otherwise plentiful issue. The strike is a tad soft on the eagle's breast and above Liberty's ear, but no major details are lacking. Some faint roller marks are visible on Liberty's jaw, being not fully struck out of the planchet. PCGS lists only four numerically finer non-Prooflike pieces (4/19). NGC ID# 256H, PCGS# 7270

**1901 Morgan Dollar, MS62
Brilliant, Lustrous Surfaces**

- 3990 1901 MS62 NGC.** New collectors to the Morgan dollar series may at first be unimpressed by the 1901, which records a plentiful production of nearly 7 million pieces. However, the issue is even more difficult in Uncirculated grades than the 1894, which had a scant mintage of 110,000 pieces. Perhaps coins not sent directly into circulation became part of the great 1918 Pittman Act melt. This nearly brilliant piece is sharply struck, and has a nearly unabraded reverse. Several small marks are apparent on Liberty's cheek and neck and in the left obverse field. NGC ID# 256J, PCGS# 7272

**1901-O Morgan Dollar, MS66+
Rarely Seen Finer**

3991 1901-O MS66+ PCGS. CAC. Ex: Gold River. Despite a large mintage of more than 13.3 million pieces, the 1901-O Morgan dollar is rare in grades above the MS66 level. This delightful Plus-graded Premium Gem exhibits a sharp strike for a New Orleans issue, with only the slightest trace of blending on the hair above the ear. The impeccably preserved surfaces radiate vibrant mint luster with outstanding eye appeal. NGC ID# 256K, PCGS# 7274

3992 1901-S MS65 PCGS. A well-struck Gem example of this popular San Francisco issue, showing tinges of golden in the margins with brilliant interiors. The fields are semiprooflike, and neither side has significant abrasions. Eye appeal is pleasing. NGC ID# 256L, PCGS# 7276

3993 1901-S MS65 PCGS. CAC. The 1901-S is a better date in AU and Mint State grades. As a Gem, the issue is surprisingly difficult to secure with CAC confirmation. The present lustrous example displays light to medium chestnut-gold toning. Marks are relatively minor, and the centers show only slight inexactness. Encapsulated in a green label holder. CAC: 30 in 65, 9 finer (4/19). NGC ID# 256L, PCGS# 7276

**1902-S Dollar, MS66
Merely Five Coins Graded Higher**

3994 1902-S MS66 PCGS. Ex: Vanderbilt. The 1902-S is many times scarcer in high grades than either the Philadelphia or New Orleans Morgan dollars struck that year. Dusky gold patina faintly accents the mostly brilliant surfaces of this frosty Premium Gem, deepening slightly around the borders. The strike is somewhat uneven with softness at the centers, the upper obverse, and lower reverse. Beautifully preserved. Population: 59 in 66 (9 in 66+), 5 finer (4/19). NGC ID# 256P, PCGS# 7282

**1902-S Morgan Dollar, MS66
Condition Rarity At This Level**

3995 1902-S MS66 PCGS. The 1902-S Morgan had a moderately low mintage of little more than 1.5 million pieces, and survivors are proportionately elusive in the finer Mint State grades. This piece displays a thin ring of lemon-gold peripheral toning, though the surfaces are otherwise brilliant. Semiprooflike reflectivity in the fields complements satiny devices. The central design elements show a touch of the usual softness. Population: 57 in 66 (8 in 66+), 5 finer (4/19). NGC ID# 256P, PCGS# 7282

3996 1903-O MS66+ PCGS. CAC. Softly frosted, radiant cartwheel luster is untuned on this high-end, CAC-approved 1903-O dollar. Only a few faint surface grazes are evident on the obverse, and the reverse is virtually flawless. The 1903-O is moderately plentiful in MS66, but the Plus designation and CAC endorsement earn this piece greater appeal. NGC ID# 256S, PCGS# 7286

**1903-O Dollar, MS67
Among the Finest at PCGS**

3997 1903-O MS67 PCGS. Only non-Prooflike 1903-O dollars have qualified for a Superb Gem grade at PCGS. This piece is among the finest. Glistening luster reveals wisps of light golden toning but is otherwise brilliant and vibrant. The design elements are well-defined, and the level of preservation is virtually unimprovable. The 1903-O is a scarce date this fine and important for Registry Set collectors. Population: 97 in 67 (2 in 67+), 0 finer (4/19). NGC ID# 256S, PCGS# 7286

**1904-S Morgan Dollar, MS62
Challenging Issue in Finer Grades**

3998 1904-S MS62 ANACS. Sharply struck for the issue (which often displays a mediocre strike), this mostly brilliant 1904-S is crisply struck over the ear and at the eagle's talons. A speckling of olive gray toning visits the reverse, while a few similar bands of patina are seen on the obverse. Bagmarks and light abrasions cluster at Liberty's cheek and the lower-obverse field, although the remaining surfaces are far above average at the MS62 grade. Strong eye appeal remains. NGC ID# 256W, PCGS# 7294

**1904-S Dollar, MS63
Reddish-Gold Rim Toning**

3999 1904-S MS63 NGC. CAC. Reddish-gold patina around the edges frames this frosty San Francisco dollar, one of 2.3 million examples struck during the final year of Morgan dollar production before what would be a long hiatus. A touch of softness over the centers is normal. Clean for the grade. Housed in a former generation holder. NGC ID# 256W, PCGS# 7294

4000 1921-D MS66+ PCGS. CAC. Satin-smooth, sharply struck surfaces coruscate with vibrant mint luster that illuminates brilliant, frost-white surfaces. Liberty's cheek is smooth and free of all but the most minor marks, as are the surrounding fields that show a few inconsequential grazes and tiny flecks. Plus-graded by PCGS with CAC endorsement. Population: 80 in 66+, 11 finer. CAC: 228 in 66, 6 finer (3/19). NGC ID# 256Y, PCGS# 7298

4001 1921-S MS66 PCGS. The 1921-S Morgan dollar is moderately scarce in MS66, and no finer pieces are reported at PCGS (4/19). This frosty example displays uniform light golden toning over each side, and distracting abrasions are entirely absent. There is some strike softness at the centers, which is typical of the issue. NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

**1880 Morgan Dollar, PR64
Minimally Toned**

4002 1880 PR64 PCGS. Mint employees coined a record total of 1,355 Morgan dollar proofs in 1880. If a collector wanted to target a single issue for type representation, this would be a good one. Slightly dusky surfaces are mainly silver with faint traces of bluish-green and golden color. Liberty's razor-sharp portrait and the surrounding fields create a subtle cameo effect. A smooth and appealing near-Gem proof. NGC ID# 27Z4, PCGS# 7315

4003 1885 PR62 PCGS. This PR62 Morgan dollar shows noticeable contrast between the sharply detailed, frosty design elements and the deeply reflective fields, but not quite enough to warrant a Cameo designation. The surfaces exhibit only minor signs of contact. NGC ID# 27ZE, PCGS# 7320

**1887 Morgan Dollar, PR64
Vivid Multicolor Toning**

4004 1887 PR64 PCGS. CAC. Vivid shades of cobalt-blue and golden-brown toning blanket the well-preserved surfaces of this spectacular Choice proof. The design elements exhibit razor-sharp definition throughout and the deeply mirrored fields shine through the patina. Eye appeal is terrific. From a small mintage of 710 pieces. Population: 71 in 64 (1 in 64+), 50 finer. CAC: 5 in 64, 11 finer (4/19). NGC ID# 27ZG, PCGS# 7322

4005 1890 PR62 PCGS. A meager mintage of 590 proof Morgan dollars was achieved in 1890. This impressive PR62 example offers sharply detailed design elements and deeply reflective fields. The mostly brilliant surfaces show delicate hints of pale jade toning, with a few minor contact marks and hairlines underneath. NGC ID# 27ZK, PCGS# 7325

**1891 Dollar, PR63 Cameo
Gold-Tinged Brilliance**

4006 1891 PR63 Cameo NGC. This is a brilliant proof with delicate gold toning at the obverse rims and a faint golden sheen throughout the reverse. Glassy mirrors surround well-struck, moderately frosted motifs. Among the 650 proofs struck, about half of the pieces are in gradable condition, and about a quarter of those display Cameo contrast. This is an especially attractive example, with flashy mirrors and just a few delicate hairlines visible under a loupe. Census: 7 in 63 Cameo, 60 finer (4/19). NGC ID# 27ZL, PCGS# 87326

**1892 Dollar, PR64 Cameo
Dramatic Field Mirroring**

4007 1892 PR64 Cameo PCGS. CAC. This near-Gem Cameo offering closely resembles what a proof Morgan dollar must have looked like immediately after its production. The surfaces are completely black-and-white with dramatic field mirroring and a layer of frost over the devices. Minor hairlines do not affect the CAC-approved eye appeal. NGC ID# 27ZM, PCGS# 87327

- 4008 1896 PR62 PCGS.** The sharply detailed, frosty design elements of this attractive PR62 specimen exhibit noticeable (if undesignated) cameo contrast with the deeply mirrored fields, and the surfaces show a few minor contact marks and hairlines. NGC ID# 27ZT, PCGS# 7331

**1896 Silver Dollar, PR64
Undesignated Cameo Contrast**

- 4009 1896 PR64 PCGS. VAM-18.** Frosty motifs and legends demonstrate ready contrast with the mirrored fields. The cameo contrast is undeniable, though the coin is not certified as such by PCGS due to the age of the old green label holder. This well struck specimen is mostly white, although the margins offer light olive-green toning. Only 762 proofs were produced. NGC ID# 27ZT, PCGS# 7331

- 4010 1897 PR62 PCGS.** This impressive PR62 specimen exhibits sharp definition on all design elements and the lightly marked surfaces show a few minor hairlines in the deeply reflective fields. Delicate hints of pale gold toning add to the outstanding eye appeal. From a smallish mintage of 731 pieces. NGC ID# 27ZV, PCGS# 7332

**1897 Morgan Dollar, PR63
Sharp for the Assigned Grade**

- 4011 1897 PR63 PCGS.** A halo of pale-orange toning accents the borders of this well-produced 1897 Select proof. The obverse portrait is nicely frosted, while the reverse shows less contrast between the raised devices and well-mirrored fields. When angled in light, a few faint hairlines are seen, but they offer little distraction from the overall eye appeal of this flashy, visually appealing proof. NGC ID# 27ZV, PCGS# 7332

- 4012 1901 PR62 PCGS.** A moderate mintage of 813 proof Morgan dollars was accomplished in 1901. This impressive PR62 example displays well-detailed design elements and deeply reflective fields throughout. The lightly marked surfaces show highlights of sea-green toning at the peripheries. NGC ID# 27ZZ, PCGS# 7336

- 4013 1903 PR62 PCGS.** This well-detailed PR62 Morgan dollar exhibits just a trace of blending on the hair strands above Liberty's ear and the deeply reflective fields show a few minor signs of contact. Delicate shades of pale gold toning add to the considerable eye appeal. NGC ID# 2823, PCGS# 7338

**1903 Morgan Dollar, PR63
Spectacular Amber-Gold Toning**

- 4014 1903 PR63 PCGS.** Housed in an old, light-blue label holder with the barcode on the back, this razor-sharp 1903 proof displays vibrantly reflective mirrors beneath dappled amber-gold toning. Pale-blue accents fill open areas near the rims. 1903 proofs typically lack any trace of cameo contrast, although that characteristic is academic on this toned Select proof. The eye appeal is terrific. NGC ID# 2823, PCGS# 7338

**1903 Dollar, PR64
Moderately Contrasted Reverse**

- 4015 1903 PR64 PCGS.** Proof Morgan dollars struck from 1902 to 1904 are almost nonexistent with full cameo contrast. However, all three of those issues remain collectible. In the case of the 1903, 755 proofs were struck. This minimally toned near-Gem shows a hint of contrast on the reverse. Strike detail is expectedly strong, and contact is minimal. NGC ID# 2823, PCGS# 7338

PEACE DOLLARS

- 4016 1921 MS65 PCGS.** The high relief of the design causes just a touch of softness on Liberty's hair and the corresponding eagle's feathers on the reverse, but this delightful Gem is sharply detailed in other areas. The well-preserved, lustrous surfaces show highlights of golden-tan toning. PCGS# 7356

- 4017 1922 MS67 NGC.** Ex: Binion Collection. The central design elements are well-defined on each side of this Superb Gem Peace dollar, while the margins display slight incompleteness. Frosty luster shines through mottled charcoal and golden-russet patina that covers the reverse. The obverse is largely untuned with blushes of color around the edges. Ted Binion, a son of gangster-turned-businessman Benny Binion, owned the Horseshoe Casino in Las Vegas and reportedly amassed more than 100,000 silver dollars prior to his 1998 murder. Census: 41 in 67 (1 in 67★), 0 finer (4/19). Ex: *FUN Signature (Heritage, 1/2017)*, lot 5357. NGC ID# 257C, PCGS# 7357

- 4018 1922-D MS66 PCGS. CAC.** Well struck for the date and lustrous beneath rich patina, this 1922-D dollar is silver-gray in the centers with dappled green-to-gold hues at the margins. Two abrasions just right of the L in LIBERTY contribute to the grade. The 1922-D Peace dollar is challenging to locate in MS66 with CAC endorsement. PCGS has graded just three Superb Gems finer (4/19). Ex: *Central States Signature (Heritage, 4/2011)*, lot 5949, which realized \$2,070. NGC ID# 257D, PCGS# 7358

1922-S Peace Dollar, MS65
Attractive and Lustrous

4019 1922-S MS65 PCGS. CAC. Lustrous, frosty surfaces show virtually no mentionable abrasions on this CAC-approved Gem, while the central devices offer good sharpness. Eye appeal is excellent, unhindered by any toning. The 1922-S Peace dollar is occasionally available in this grade, but PCGS lists only 14 finer coins (4/19). NGC ID# 257E, PCGS# 7359

4020 1925 MS67 NGC. A faint, sideways blush of pale-blue toning sweeps across both sides of this otherwise brilliant Superb Gem Peace dollar for dramatic eye appeal. The strike and surface quality live up to the eye appeal, with a clean cheek on Liberty and fully defined hair strands. The reverse is equally sharp and attractive. NGC has certified just one numerically finer example (4/19). NGC ID# 257L, PCGS# 7365

4021 1926-S MS66 PCGS. Despite the mintage of 6.9 million pieces, the 1926-S Peace dollar is scarce at the MS66 grade level, and finer coins are condition rarities. This impressive Premium Gem displays well-detailed design elements and well-preserved lustrous surfaces under shades of golden-brown, burnt-orange, lavender-gray, and amber toning. PCGS has graded only two numerically finer examples (4/19). NGC ID# 257R, PCGS# 7369

4022 1927-S MS64+ PCGS. CAC. A better date, especially in high grade, the 1927-S Peace dollar boasts a mintage of only 866,000 coins. This high-end Choice example is among the finest pieces most collectors will acquire, as Gems are scarce. The CAC green label adds to its appeal. The strike is sharp and each side is brilliant across the interiors. Olive-green, gold, amber, and lilac toning surrounds the borders. NGC ID# 26J6, PCGS# 7372

4023 1934 MS66 PCGS. A hint of honey-gold patina accompanies this lustrous and low-mintage Philadelphia Peace dollar. A sharp strike and smooth surfaces ensure exceptional eye appeal. Though available in typical Uncirculated condition, the 1934 is difficult to secure above the MS66 level. NGC ID# 257Y, PCGS# 7375

4024 1934 MS66 PCGS. This is a softly lustrous Premium Gem with warm golden toning overall. The borders have deeper amber patina that attests to the originality of the surfaces. Well-struck design elements complement a lack of distracting abrasions. PCGS has seen only a half dozen finer examples of this elusive late-series Philadelphia issue (4/19). NGC ID# 257Y, PCGS# 7375

1934 Peace Dollar, MS66+
Low-Mintage Better Date

4025 1934 MS66+ PCGS. CAC. The 1934 Peace dollar is a popular better date, from a mintage of 954,057 pieces. This Plus-graded Premium Gem exhibits a bold strike, with just a touch of the usual softness on the eagle's shoulder. The impeccably preserved surfaces radiate vibrant mint luster, under shades of sea-green and lavender-gray toning. PCGS has graded six numerically finer examples (4/19). NGC ID# 257Y, PCGS# 7375

1934-D Peace Dollar, MS66
Nearly Uncollectible Finer

4026 1934-D MS66 PCGS. A particularly frosty coin with untuned surfaces and bold design elements. The 1934-D is a popular late-series issue. Circulated examples are plentiful, but in Mint State this date becomes somewhat scarce in the context of the series. Premium Gems are particularly elusive, acquired by only the most dedicated collectors of Peace dollars. PCGS and NGC each list only two finer examples of this date (4/19). NGC ID# 257Y, PCGS# 7376

1934-S Peace Dollar, Frosted MS62
Eye-Appealing for the Grade, CAC

4027 1934-S MS62 PCGS. CAC. A combination of low mintage (1,011,000 pieces) and widespread circulation makes the 1934-S the scarcest Peace dollar in Uncirculated condition. This frosted, brilliant example has only the slightest hint of pale-gold toning, with a reasonably sharp strike and relatively few marks for the assigned grade. CAC endorsement adds to its credentials. NGC ID# 257Z, PCGS# 7377

4028 1935 MS66 PCGS. A satiny Premium Gem example of this late-series Philadelphia issue, showing a bold strike and pastel coloration. Liberty's cheek is pleasantly frosty and unmarked. The 1935 is usually available in MS66 for a price, but no numerically finer coins are reported at PCGS (5/19). NGC ID# 2582, PCGS# 7378

- 4029 1935 MS66 PCGS. VAM-1A** Faint reverse die scratches identify the VAM-1A variety. Regardless of variety, the 1935 Peace dollar is an important condition rarity in grades above MS66. This smooth, satiny Premium Gem displays silver central devices with splashes of brownish-gray patina and pale-gold accents near the rims. A bold strike weakens slightly at the centers. PCGS has graded no coins in higher numeric grades (4/19). NGC ID# 2582, PCGS# 7378

**1935 Peace Dollar, Frosty MS66+
Tied for Finest at PCGS**

- 4030 1935 MS66+ PCGS.** The finest 1935 Peace dollars at PCGS are graded MS66+, and these Registry-tier coins are seldom offered at auction. This example is well-struck and frosty with a delicate golden hue over each side. No distracting abrasions are seen. A spectacular example of this late-series Philadelphia issue in the finest possible condition for a PCGS Registry Set. Population: 67 in 66+, 0 finer (4/19). NGC ID# 2582, PCGS# 7378

**1935-S Silver Dollar, MS66
Colorful and High Grade**

- 4031 1935-S MS66 PCGS.** Four rays below ONE. Splendid swaths of golden-russet and forest-green toning embrace the obverse border of this crisply struck and well-preserved final-year Peace dollar. The lower reverse margin displays rich rose-red patina. The obverse is semiprooflike, while the reverse exhibits sweeping cartwheel sheen. NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLARS

- 4032 1976-D Type One MS67 NGC.** The Type One Reverse shows thick border lettering. This Superb Gem is among the finest Denver coins certified. It displays a sharp strike and vibrant satin luster. The fields are absolutely pristine. Lilac-blue is the dominant color on this coin, although other pastel colors, including yellow-gold, mint-green, and peach-pink appear throughout. An excellent Registry candidate. Census: 7 in 67, 0 finer (4/19). NGC ID# B76N, PCGS# 7420

- 4033 1976-D Type Two MS67 PCGS.** An important Registry coin, this is among the finest-certified Type Two 1976-D Eisenhower dollars. Luster is satiny and without distracting abrasions. A faint champagne hue overlies each side. This Bicentennial issue is conditionally rare this fine. Population (Type Two): 33 in 67 (1 in 67+), 0 finer (4/19).

Ex: FUN Signature (Heritage, 1/2006), lot 7151, which realized \$2,990. NGC ID# B76P, PCGS# 7421

GOLD DOLLARS

- 4034 1849 Open Wreath, With L, D-2, Normal Stars, MS64+ PCGS.** The stars at 5 and 6 o'clock are nicely repunched. Dannreuther calls this the "Normal Stars" variety to differentiate it from D-3 (Distant Stars) and D-4 (Close Stars). This radiant first-year gold dollar offers booming luster and inoffensively abraded pumpkin-gold surfaces. The strike is sharp aside from a few star centers. NGC ID# 25B9, PCGS# 521674 Base PCGS# 7502

**1849 Open Wreath Gold Dollar, MS65
D-4, Close Stars, Cracked Reverse**

- 4035 1849 Open Wreath, D-4, Close Stars, MS65 NGC.** The date numerals are thin and the lower obverse stars are spaced close to the bust truncation. This first-year gold dollar type coin delivers satiny yellow-gold mint luster and sharp design elements. A few faint marks are not bothersome. On the reverse, a die crack stretches from the rim through the 1 in UNITED, into DOLLAR. Finer 1849 gold dollars are scarce. Census: 43 in 65 (2 in 65+), 10 finer (4/19). NGC ID# 25B9, PCGS# 521671 Base PCGS# 7502

**1849-O Open Wreath Gold Dollar, MS63
Popular Southern Branch Mint Issue**

- 4036 1849-O Open Wreath MS63 NGC. Variety 1.** The R in DOLLAR is doubled and the mintmark is fractionally higher than on Variety 2. This first-year branch mint issue is collectible thanks to a mintage of 215,000 coins. Examples are always sought-after in Mint State. Well-detailed motifs appear over lustrous, light yellow-gold surfaces. Each side shows a number of small abrasions. NGC ID# 25BE, PCGS# 7508

1850-C Gold Dollar, AU50
Attractive Color

- 4037 1850-C AU50 NGC. Variety 1.** The scarce 1850-C gold dollar claims a low mintage of 6,966 pieces, of which about 250 coins exist today. Each side of this About Uncirculated representative features attractive olive-green and orange-gold color. The only mentionable marks include a small tick beneath the A in DOLLAR and another on Liberty's cheek. NGC ID# 25BG, PCGS# 7510

1853-C Gold Dollar, AU55
Original Color, CAC Seal

- 4038 1853-C AU55 PCGS. CAC. Variety 1.** A lightly circulated green-gold Choice AU example. No marks or flan imperfections are apparent. The strike is decidedly above average for the under-resourced branch facility. A challenging Charlotte issue with a meager mintage of 11,515 pieces. Difficult to secure with CAC approval, since that firm has approved but 17 examples in all grades. Population: 17 in 55, 37 finer. NGC ID# 25BV, PCGS# 7522

- 4039 1853-O MS64 PCGS. Variety 1.** The High Date variant of the final Type One New Orleans issue. An intricately struck and impressively unabraded wheat-gold Choice example. A few pinpoint field flecks above the hairbun appear as made. Despite a reasonable mintage of 290,000 pieces, the '53-O is very scarce in the present grade, and is rarely seen any finer. Population: 44 in 64 (3 in 64+), 12 finer (4/19). NGC ID# 25BX, PCGS# 7524

- 4040 1853-O MS64 NGC. Variety 1.** Thickly frosted and sharply struck, this Choice Uncirculated O-Mint gold dollar is well-preserved for the issue. Soft mint luster glows beneath the greenish-gold surfaces, and marks are limited to just one or two tiny ticks on each side. No other New Orleans gold dollar is more available, yet it is scarce in the near-Gem grade and seldom seen any finer. Census: 46 in 64 (2 in 64+), 12 finer (4/19). NGC ID# 25BX, PCGS# 7524

1856-S Gold Dollar, AU55
The Only Type Two Produced This Year

- 4041 1856-S Type Two AU55 PCGS.** The 1856-S is the "forgotten" Type Two gold dollar. It was the only issue of this type struck in 1856, and a paltry 24,600 pieces were produced. This scarce Choice AU example displays deeper rose-gold and lilac patina on each side. The strike details are remarkably strong for a Type Two, and the only mark of note is located in the right obverse field. NGC ID# 25C8, PCGS# 7536

1856-S Gold Dollar, AU58
Sole Type Two From This Final Year

- 4042 1856-S Type Two AU58 PCGS.** Final issue in the short-lived Type Two series and the only Type Two struck in 1856, the combination makes the 1856-S a popular choice for collectors. About half of the known pieces exhibit a dramatically repunched mintmark, as seen here. The fields on each side are bright and semireflective with significant traces of luster in evidence around the devices. Sharply detailed throughout with only slight abrasions evident. Population: 34 in 58, 25 finer (4/19). NGC ID# 25C8, PCGS# 7536

- 4043 1861 MS65 NGC.** Lovely sea-green and honey-gold toning adorns this lustrous and boldly struck Civil War Gem. The fields display prominent clash marks, but no post-strike abrasions are remotely consequential. Although a fairly high-mintage issue, the 1861 is mostly found in AU55 to MS64 grades, and is very scarce any finer. Census: 36 in 65 (1 in 65★), 10 finer (4/19). NGC ID# 25CU, PCGS# 7558

**1863 Gold Dollar, AU58
Philadelphia Mint Rarity**

4044 1863 AU58 NGC. Typically tucked away after minimal circulation, this Civil War issue seldom saw any use in commerce before it was hoarded, along with virtually all gold or silver coinage. Just 6,200 pieces were struck for circulation. The 1863 ranks among the rarest of all gold dollars, exceeded in scarcity only by the 1875 among Philadelphia Mint issues. Deep-orange toning clings to the recesses of this apricot-gold example, with scattered light abrasions across both sides. Census: 7 in 58, 27 finer (4/19). NGC ID# 25CX, PCGS# 7562

4045 1869 MS64 PCGS. An attractive Choice example from a mintage of 5,900 pieces, this coin exhibits sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster from both sides. Population: 12 in 64, 19 finer (4/19). NGC ID# 25D5, PCGS# 7568

4046 1870 MS64 PCGS. A beautiful Choice Mint State example of this low-mintage issue (6,335 pieces struck), showing sharp definition and semireflective fields. Peach-gold and delicate greenish hues encompass each side, and there are no distracting abrasions. Population: 27 in 64 (2 in 64+), 28 finer (4/19). NGC ID# 25D6, PCGS# 7569

4047 1879 MS66 NGC. About 20% of the 3,000 gold dollars struck in 1879 are believed extant, mostly in Mint State grades. Scarcely are examples seen in MS66, and they are rare in MS67. Hallmarks of this Premium Gem include a full strike, gleaming mint frost, and attractive rose-gold color. Census: 23 in 66 (2 in 66★), 14 finer (4/19). NGC ID# 25DH, PCGS# 7580

4048 1889 MS67 PCGS. A delightful Superb Gem example from the final year of the denomination, this coin exhibits sharply detailed design elements and impeccably preserved orange-gold surfaces, with vibrant mint luster throughout. PCGS has graded 10 numerically finer examples (4/19). NGC ID# 25DU, PCGS# 7590

EARLY QUARTER EAGLE

**1830 BD-1 Quarter Eagle, XF Details
Scarce Low-Mintage Issue**

4049 1830 BD-1, R.4 — Surfaces Smoothed — PCGS Genuine. XF Details. Bass-Dannreuther Die State a/a, as always. The U in UNITED is recut on this singular 1830 quarter eagle variety. Some field reflectivity remains despite faint tool marks that are visible in the right obverse field under a loupe. The orange-gold surfaces are otherwise problem-free aside from a few light lines on the obverse that accompany the tooling. The left portion of the shield is weak, but the remainder of each side is sharp, and this well-detailed type coin shows no significant wear. John Dannreuther estimates that only 80 to 100 examples of this date survive in all grades. Only 4,540 pieces were struck.

CLASSIC QUARTER EAGLES

**1834 Classic Head Quarter Eagle, MS62
No Motto, Bright Semireflective Surfaces**

4050 1834 MS62 NGC. Breen-6138, Variety 1, R.1. This first-year No Motto quarter eagle variety is attributed by the flat leftmost curls. Yellow-gold surfaces are bright with a trace of field reflectivity. Marks are peppered over each side, as expected for this grade level. There is minor softness on the middle curls, but the rest of this Classic Head type coin is bold. NGC ID# 25FS, PCGS# 7692

4051 1839-C — Surfaces Smoothed — PCGS Genuine. XF Details. Breen-6149, Winter-3, Variety 24, R.4. An olive-gold example with noticeable luster about design elements. The fields exhibit myriad minuscule marks that provide an evenly textured appearance. The usually-seen late die state without a berry on the eagle's partially lapped branch. The second and final Charlotte Mint Classic two and a half issue, and very scarce since only 18,140 pieces were coined.

LIBERTY QUARTER EAGLES

4052 1843-O Small Date, Crosslet 4 MS61 NGC. Variety 1. Only the 1854-O rivals the 1843-O Small Date for availability among New Orleans' quarter eagles. The distinction is relative, because only 40 to 60 Uncirculated examples are thought to exist according to Doug Winter's recent book covering New Orleans gold. This is an attractive MS61 coin, with reflective fields and just pinpoint marks on the sharply struck surfaces. Numerous tiny lumps on both sides suggest rusted dies. Census: 55 in 61, 42 finer (4/19). NGC ID# 25GR, PCGS# 7731

4053 1847-D — Cleaned — NGC Details. AU. Variety 9-N. A sharp representative of this Dahlonga type issue. The dentils, stars, plumage, and curls are unusually sharp for the Georgian facility. The dusky peach-gold, sea-green, and lilac surfaces show few marks but are minutely granular, and the rims are lightly filed. NGC ID# 25H7, PCGS# 7746

4054 1852 MS64 PCGS. CAC. Lilac and pale-green accents coruscate across the smoothly frosted, straw-gold surfaces of this near-Gem quarter eagle. As the CAC endorsement suggests, eye appeal is outstanding and the surface quality is far above average. Only a few finer examples are certified by either PCGS or NGC. PCGS Population: 55 in 64 (4 in 64+), 16 finer. CAC: 20 in 64, 7 finer (4/19). NGC ID# 25HR, PCGS# 7763

4055 1857-O AU58 NGC. CAC. Variety 1. The early die state, before a crack develops to the right of the mintmark. This lightly circulated New Orleans type coin displays hints of luster in the fields and has attractive olive-gold patina. It carries CAC endorsement for quality and eye appeal within the grade. Finer 1857-O quarter eagles are scarce. NGC ID# 25JE, PCGS# 7784

4056 1863-S — Cleaned — NGC Details. AU. Throughout the 1860s, the San Francisco Mint favored the double eagle denomination over the quarter eagle. 1863 was typical in that the facility struck close to a million twenties, while two and a half dollar production amounted to only 10,800 pieces. Examples with AU sharpness are rare, though the present butter-gold representative is microgranular and moderately bright. NGC ID# 25K3, PCGS# 7799

1867 Two and a Half, AU58 Rare Philadelphia Issue

4057 1867 AU58 PCGS. With a mintage of only 3,200 coins, the 1867 quarter eagle is an underrated rarity from the Philadelphia Mint. PCGS reports only 33 grading events for this issue in all grades, few of which are in Mint State. This nearly Uncirculated AU coin displays bright yellow-gold surfaces and a bold strike. Light field chatter accompanies the grade, but this coin retains ample mirroring in the fields. Population: 8 in 58, 8 finer (4/19). NGC ID# 25K9, PCGS# 7805

4058 1873 Open 3 MS64+ PCGS. CAC. Semireflective fields are more satiny than frosted and virtually free of marks when viewed under a loupe, while Liberty's portrait is exceptionally free of marks as well. The sharp strike approaches full details. Variegated colors range from lilac and pale-olive to orange-gold and ruby-red for outstanding eye appeal. CAC endorsement and the PCGS Plus designation confirm the high quality. Population: 6 in 64+, 17 finer. CAC: 18 in 64, 9 finer (4/19). NGC ID# 25KN, PCGS# 7817

1878-S Two and a Half, MS64+ Exceptional Quality for This Issue

4059 1878-S MS64+ PCGS. CAC. The 1878-S is the penultimate branch mint issue in the Liberty quarter eagle series, and it is generally accessible for collectors. Nonetheless, this high-end near-Gem example is conditionally rare, and just one finer coin is reported at PCGS. Each side is lustrous with pleasing honey-gold color. The obverse fields are slightly prooflike. Typical of the type, this piece has minor strike weakness on the eagle's left (facing) leg. Population: 20 in 64 (2 in 64+), 1 finer. CAC: 10 in 64, 1 finer (4/19). NGC ID# 25KZ, PCGS# 7829

4060 1893 MS65+ PCGS. CAC. The 1893 quarter eagle is scarce in MS65 and finer grades, and it is rare in these conditions with CAC recognition. Offered here is a Plus-graded CAC Gem. Frosty wheat-gold luster complements sharp design elements and clean fields. A few faint grazes on the cheek keep the technical grade below MS66 but are not noticeable. Population: 59 in 65 (2 in 65+), 38 finer. CAC: 13 in 65, 15 finer (4/19). NGC ID# 25LH, PCGS# 7845

4061 1905 MS67 PCGS. The impeccably preserved lemon-yellow surfaces of this spectacular Superb Gem show a mix of vibrant mint luster and prooflike reflectivity and the design elements are sharply detailed throughout. Eye appeal is terrific. PCGS has graded five numerically finer examples (4/19). NGC ID# 267S, PCGS# 7857

PROOF LIBERTY QUARTER EAGLES

1896 Quarter Eagle, PR61 Cameo 132 Pieces Struck

4062 1896 PR61 Cameo NGC. JD-1, High R.4. A fairly generous mintage of 132 proof Liberty quarter eagles was accomplished in 1896 and John Dannreuther estimates the surviving population at 65-80 examples in all grades. This impressive PR61 example displays sharply detailed design elements and deeply reflective fields. The orange-gold surfaces show the expected number of minor contact marks for the grade. Census: 3 in 61 Cameo, 42 finer (4/19). NGC ID# C2GN, PCGS# 87922

1903 Quarter Eagle, PR61
JD-2, 60 to 80 Pieces Known

- 4063** 1903 PR61 PCGS. JD-2, High R.5. Two die varieties are known for the 197 proof quarter eagles struck in 1903, this one showing the date further right than JD-1. According to John Dannreuther, about 60 to 80 of these JD-2 specimens are known compared to 80 to 100 JD-1 pieces. Contrast is expectedly limited, although the reverse shows a partial cameo effect. Deep orange-gold surfaces are lightly hairlined. A pleasing proof gold type coin. NGC ID# 288T, PCGS# 7929

1903 Quarter Eagle, PR61
Just 197 Proofs Issued

- 4064** 1903 PR61 NGC. JD-1, R.4. Although a mere 197 proofs were struck, the 1903 issue is moderately available in proof format. Surprisingly, two die pairs were required to strike the proofs. This JD-1 example displays brightly reflective, medium-gold color throughout both sides, with a sharp strike. Light field chatter accounts for the assigned grade. Census (all varieties): 15 in 61, 81 finer (4/19). NGC ID# 288T, PCGS# 7929

1904 Quarter Eagle, Low-Mintage PR62
Just 170 Pieces Struck

- 4065** 1904 PR62 PCGS. JD-1, R.4. Just 170 quarter eagle proofs were produced in 1904, a number slightly less than the usual gold proof mintages of the decade, but a truly tiny number in the context of most 20th and 21st century proof production now available to collectors. This example displays attractive medium-gold color and deeply mirrored surfaces tempered by cloudiness in the fields surrounding the central devices, the result of scattered microscopic lines and tiny marks. Still, an attractive, fully struck proof with light frost on the crisp devices. Population: 12 in 62, 48 finer (4/19). Ex: Long Beach Signature (Heritage, 2/2017), lot 4966, which realized \$3,525. NGC ID# 288U, PCGS# 7930

1906 Liberty Quarter Eagle, PR62
Bold Cameo Example

- 4066** 1906 PR62 Cameo NGC. JD-1, R.4. Mintage of proof quarter eagles was slightly increased in 1906, to 160 pieces, and the survival rate was fairly high. John Dannreuther estimates the surviving population at 100-120 examples in all grades, and more coins show cameo surfaces than in the immediately preceding years. This attractive PR62 example exhibits sharply detailed design elements, with enough mint frost on the devices to contrast noticeably with the reflective fields. The lemon-yellow surfaces are lightly marked for the grade. Census: 7 in 62 Cameo (1 in 62+), 64 finer (4/19). NGC ID# 288W, PCGS# 87932

INDIAN QUARTER EAGLES

- 4067** 1908 MS65 NGC. A splendid Gem example of this first-year Indian quarter eagle, with its unique design executed in reduced relief. This piece displays sparkling luster, virtually no abrasions, and a strong strike for the issue with only the eagle's breast showing any (characteristic) lack of detail. Ex: Baltimore Signature (Heritage, 7/2003), lot 10185. NGC ID# 288Y, PCGS# 7939
- 4068** 1910 MS65 NGC. A luminous, satiny Gem example of this moderately plentiful issue, suitable for type purposes. Although some softness is seen on the lower headdress feathers, the strike is generally sharp. Attractive peach-gold surfaces have no major abrasions. NGC has seen only 17 finer representatives (5/19). NGC ID# 2892, PCGS# 7941
- 4069** 1911-D Weak D AU50 PCGS. Although the mintmark is extremely weak as PCGS indicates, it is visible on this specimen with careful examination, unlike many where it is entirely absent. Both sides retain considerable mint luster with pleasing green-gold coloration. NGC ID# 2895, PCGS# 7954
- 4070** 1911-D Weak D AU58 NGC. An impressive near-Mint representative of this low-mintage series key, with just a trace of wear on the design elements and a weakly impressed, but still legible, mintmark. The lightly abraded yellow and rose-gold surfaces retain much of their original mint luster. NGC ID# 2895, PCGS# 7954
- 4071** 1911-D — Cleaned — NGC Details. AU. Only three issues in the Indian quarter eagle series are mintmarked, and the 1911-D is far and away the rarest by mintage. Just 55,680 pieces were struck. This example was once lightly cleaned and shows some delicate hairlines when rotated under light. Pleasing medium-gold color and areas of soft mint luster remain. Faint high-point wear exists, and the D mintmark is fully visible but weakly defined.

**1911-D Quarter Eagle, AU53
55,680 Coins Struck**

- 4072 1911-D AU53 NGC.** The mintmark is clear, if not bold on this lightly circulated 1911-D quarter eagle. Each side showcases pale golden-orange color with scattered hairlines and a brush of friction over the high points. This Denver issue needs no introduction as the stand-alone key to the series. NGC ID# 7KR7, PCGS# 7943

**1911-D Two and a Half Dollar, AU58
Strong D Mintmark**

- 4073 1911-D AU58 PCGS.** Strong D. This is a fully struck example of the celebrated capstone issue among Pratt quarter eagles. Just a touch of rub precludes a Mint State assessment. Abundant satin luster remains, and each side features beautiful reddish-gold color. Abrasions are virtually unseen without magnification. NGC ID# 7KR7, PCGS# 7943

**1911-D Indian Quarter Eagle, AU58
Sought-After Key Issue**

- 4074 1911-D AU58 NGC.** The Denver Mint struck quarter eagles for the first time in 1911, when a minuscule production of 55,680 pieces was accomplished. The 1911-D is the most elusive issue of the series today. This impressive near-Mint specimen exhibits only a trace of wear on the design elements and the mintmark is fully delineated, but a little faint. The orange-gold surfaces are lightly abraded and retain significant amounts of mattelike mint luster. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, MS61
Key to the Set in Any Grade**

- 4075 1911-D MS61 NGC.** The 1911-D is the key to the short and completable series of two and a half dollar Indians. A matched series is difficult to attain with all the issues in the same grade. Most collectors opt for an AU 1911-D and all the other issues in BU. This lower-end Mint State example has a few of the expected field marks one would expect from the MS61 grade, but the mint luster is satiny and complete over each side. A bit of striking softness is noted at the top of the eagle's wing, but the mintmark is well-formed.
From The Chinook Collection, Part II. NGC ID# 7KR7, PCGS# 7943

**1911-D Two and a Half, Sharp MS61
High Quality Surfaces**

- 4076 1911-D MS61 NGC.** The light-yellow surfaces of this key Denver quarter eagle are finely textured, a trait that seemingly repels any abrasions. The strike is sharp, including the all-important D mintmark. Likewise, a diagnostic wire rim surrounds the right-side obverse from noon to 6 o'clock. Aside from a few minor ticks on the raised rim, the coin is nearly mark-free and razor-sharp. Mint luster glows from each side. NGC ID# 7KR7, PCGS# 7943

- 4077 1914 MS63 PCGS.** A sharp strike and remarkably unabraded obverse fields are on display, while the reverse has scattered light lines and abrasions that are grade-consistent. Mint luster glows from the attractive, straw-gold surfaces. The strike is unfailingly sharp throughout. With just 240,000 pieces struck, the 1914 claims the second-lowest mintage of the series and trails only the 1911-D and 1914-D in overall rarity. NGC ID# 7KRA, PCGS# 7946

- 4078 1914 MS63 NGC. CAC.** A splendid Select Indian type coin that boasts radiant sun-gold surfaces. Well struck and minimally marked for the grade. A trio of small rose-red alloy spots are near stars 1 and 3. Only a small percentage of MS63 examples possess a CAC seal. Encased in a prior generation holder. NGC ID# 7KRA, PCGS# 7946

- 4079 1914-D MS64 NGC.** The 1914-D is one of the popular condition rarities in the series. Examples are scarcely seen finer than this near-Gem, and they command strong prices at those levels. Bright, satin mint luster and light yellow-gold color characterize this near-Gem. A cluster of small marks appears behind the eagle's head. NGC ID# 2899, PCGS# 7947

- 4080 1925-D MS65+ PCGS.** Coinage of quarter eagles ended during the Great War, and did not resume until 1925, a decade later. Even then, only Denver coined the denomination that year. This lovely khaki-gold Gem is uncommonly free from contact, and shows only a couple of pinpoint flecks. A bold strike further proclaims the quality. NGC ID# 7KRD, PCGS# 7949

THREE DOLLAR GOLD PIECES

4081 1854 MS62 PCGS. A satiny Mint State example of the this first-year issue, showing honey-gold color and few distinguishable abrasions for the grade. Eye appeal is pleasing and the strike is sharp. The 1854 is frequently chosen for type representation, although it does become elusive in high grade. This example is accessible. NGC ID# 25M3, PCGS# 7969

4082 1854-O XF45 PCGS. A single-year type, the 1854-O three dollar gold is the New Orleans Mint sole contribution to the long-running series. As such, it is in strong demand among numerous collector interests. This Choice XF example displays glints of prooflike surface among the legends and orange-gold accents at the borders. The reverse die was heavily lapped, representing the usually seen Variety 2 die marriage. Numerous small marks and occasional, minor porosity dot surfaces that retain considerable eye appeal. NGC ID# 25M5, PCGS# 7971

4083 1857 AU58 NGC. The 1857 is one of the more-available issues in the three dollar series, often found in circulated conditions, and moderately available in Mint State as well. This near-Mint example walks the tightrope between circulated and Uncirculated, with substantial mint luster and only a trace of high-point wear. Marks are fewer than those seen on many full Mint State coins. NGC ID# 7K5G, PCGS# 7976

1858 Three Dollar, AU55 Low-Mintage Early Series Date

4084 1858 AU55 PCGS. CAC. A limited mintage of 2,133 three dollar gold pieces was accomplished in 1858, making the date scarce-to-rare in all grades. This impressive Choice AU example shows just a touch of wear on the well-detailed design elements, and the lightly abraded fields show traces of prooflike reflectivity around the devices. Population: 27 in 55, 28 finer. CAC: 7 in 55, 8 finer (4/19).

Ex: Long Beach Signature (Heritage, 9/2012), lot 4862. NGC ID# 7K5J, PCGS# 7978

1860 Three Dollar Gold, MS61 Prooflike and Well-Struck

4085 1860 MS61 NGC. From a mintage of only 7,036 pieces, this Mint State 1860 three dollar gold coin is an important acquisition for the collector of this series. Uncirculated pieces are elusive. This coin has prooflike fields and sharp design elements, save for a touch of softness on the high point of the wreath bowknot. Only light, unobtrusive abrasions are visible with a loupe. Census: 32 in 61 (1 in 61+), 30 finer (4/19). NGC ID# 25ME, PCGS# 7980

1874 Three Dollar, MS64 High-Grade Type Coin

4086 1874 MS64 PCGS. CAC. The 1874 is one of the three type coins in the three dollar gold series, although its ready availability rapidly diminishes at the Gem grade level. This Choice example balances quality and affordability in a lustrous, sharp, and minimally marked CAC-approved package. Only under a loupe does one first notice a few tiny marks along the upper-reverse border and some minor weakness on the wreath bowknot. PCGS lists 22 numerically finer representatives (4/19). NGC ID# 7KDE, PCGS# 7998

4087 1878 MS61 PCGS. This is a pleasing lower-end Mint State example of the 1878 three dollar gold piece, showing satiny, shimmering mint luster with minimal abrasions. Expected strike weakness affects the wreath bowknot, although it is less prominent than on many other pieces. The color is a rich yellow-gold hue, which is not often seen on this issue.
From The Chinook Collection, Part II. NGC ID# 25MZ, PCGS# 8000

4088 1878 MS61 NGC. The 1878 three dollar gold piece is a popular type coin not only because of its mintage and survivorship, but also because it frequently comes with outstanding eye appeal. This piece has a few marks, hence the grade, but shimmering luster and lovely rose-gold and peach-yellow hues stand out. The usual strike weakness affect the wreath bowknot.
From The Chinook Collection, Part II. NGC ID# 25MZ, PCGS# 8000

4089 1878 MS62 PCGS. From a substantial mintage of 82,304 pieces, the 1878 three dollar gold piece is a popular choice of type collectors. This attractive MS62 specimen offers well-detailed design elements and the lustrous orange-gold surfaces are lightly marked for the grade. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar Gold, MS63 Lustrous Type Coin

4090 1878 MS63 PCGS. True to reputation, this Select 1878 three dollar gold piece offers shimmering rose-gold luster with brighter yellow accents. Strike weakness on the wreath bowknot is also normal. This coin shows primarily light handling marks over the high points of the devices, but a thin graze on Liberty's chin is noted for accuracy. Eye appeal is pleasing. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS63
Elusive CAC-Endorsed Example**

- 4091 1878 MS63 NGC. CAC.** A generally well-struck Select Mint State example of this popular type coin issue, showing shimmering yellow-gold luster and minimal abrasions. Trivial weakness is seen only the wreath bowknot. Eye appeal is pleasing. The 1878 boasts a mintage of more than 82,000 coins, making this a common date among three dollar gold pieces. Still, attractive coins in collectible grades are sought-after. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, MS64+
Vibrant Glistening Frost**

- 4092 1878 MS64+ PCGS.** Mint luster is typically frosted, glistening vibrantly over yellow-gold surfaces. The headdress, date, denomination, and leaf left of the bow display crisp detail. Microscopic ticks on each side are trivial for the Choice grade level and barely prevent a Gem assessment for this 1878 three dollar. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS64+
Excellent Value for the Collector**

- 4093 1878 MS64+ PCGS.** This highly lustrous example of this unusual denomination is an especially good value for the collector. With 80% of the appearance of a Gem, it represents as much as a \$10,000 savings over buying an MS65. The yellow-gold surfaces are slightly muted by the presence of light reddish patina, and there are few contact marks evident (none worthy of individual mention). NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, MS64
Doubled Die Reverse**

- 4094 1878 MS64 PCGS. CAC.** Federal currency finally achieved parity with gold coin during the late 1870s. The U.S. Mint increased production of three dollar pieces that year, in the belief that the denomination would return to regular use in commerce. But the public was accustomed to paper money, and mintages of the series again declined to token levels. Although the 1878 is comparatively available in better Mint State grades, such pieces remain in demand from type collectors. This is a minimally abraded apricot-gold near-Gem that exhibits minor die doubling on the upper right portion of the wreath. We note a trace of aqua residue near the CA in AMERICA. NGC ID# 25MZ, PCGS# 8000

- 4095 1879 AU55 PCGS.** This low-mintage issue has only an estimated 175 to 225 pieces believed extant in all circulated grades. This is a bright example that also displays significant reflectivity in the fields (as do many threes). The strike is sharp throughout, and there are no mentionable abrasions inconsistent with the Choice About Uncirculated level. NGC ID# 25N2, PCGS# 8001

CLASSIC HALF EAGLES

- 4096 1834 Plain 4 AU58 NGC. Breen-6501, McCloskey 3-B, R.1.** First Head. A well-detailed Classic type coin that has original rose and olive accents across orange-gold surfaces. Luster shimmers throughout the devices and reverse border. Marks are trivial save for a tick on Liberty's jaw. In 1834, the dollar was devalued in terms of gold, which enabled gold coins to finally circulate in the United States. NGC ID# 25RR, PCGS# 8171

- 4097 1835 AU58 NGC. Breen-6504, McCloskey 1-A, R.2.** First Head. Luster fills the borders and motifs of this lightly circulated Classic type coin. The obverse field is bright near star 11, but relevant marks are limited to an unobtrusive line on Liberty's chin. A middle die state of the variety, without clash marks from the shield near the ear. NGC ID# 25RV, PCGS# 8173

- 4098 1838 AU58 NGC. Breen-6514, McCloskey 1-A, R.2.** Only two die marriages are known for the final-year Philadelphia Mint Classic half eagle. McCloskey 1-A is slightly scarcer than McCloskey 2-B, and is distinguished by repunching on the 5 in the denomination. This is a well struck lemon-gold Borderline Uncirculated example. Luster dominates protected regions, and marks are inoffensive throughout. NGC ID# 25S4, PCGS# 8176

LIBERTY HALF EAGLES

- 4099 1840 Narrow Mill AU58 NGC.** Seldom offered in full Mint State, the go-to grade for a sharp 1840 half eagle is AU58. This near-Mint example retains bright mint luster at the borders and pleasing orange accents around its raised devices. Light hairlines visit the open fields, with scattered minor marks and ticks. The strike is sharp, showing only trace wear and bits of high-point softness on the central motifs. Census: 64 in 58, 28 finer (4/19). NGC ID# 25SA, PCGS# 8194

**1845-O Half Eagle, AU53
Challenging New Orleans Issue**

- 4100 1845-O AU53 NGC. Variety 1.** The New Orleans Mint struck 41,000 half eagles in 1845, and these circulated extensively in the South. Mint State survivors are rare. Offered here is a collectible AU example with partial luster in the fields and bright yellow-gold color. Wear is light and neither side has major abrasions. Census: 14 in 53, 67 finer (4/19). NGC ID# 25TD, PCGS# 8225

**1847 Half Eagle, Highly Lustrous MS63
High Quality for the Grade**

- 4101 1847 MS63 PCGS.** The 1847 is among the few No Motto Liberty half eagles that are available for type collections in Mint State. This Select example is conditionally scarce but still accessible. Bright yellow-gold luster shimmers on each side, revealing few abrasions. Mild strike softness on the hair curls around Liberty's face joins similar incompleteness on the eagle's neck, where a mint-made planchet depression is also present. Population: 26 in 63 (3 in 63+), 6 finer (4/19). NGC ID# 25TL, PCGS# 8231

- 4102 1847-C XF40 PCGS. Variety 1.** The 1847-C half eagle has the highest mintage of any Charlotte product, but the few hundred survivors are always in demand from Southern gold type collectors. This is a moderately circulated but original and problem-free caramel-gold representative. Luster emerges from all design crevices. NGC ID# 25TN, PCGS# 8233

**1849-C Five Dollar, AU55
Scarce Charlotte Issue**

- 4103 1849-C AU55 PCGS. Variety 1.** The usual radial die crack is evident on the reverse, extending inward from the dentils by the U in UNITED. The Variety 1 obverse has the top of the 1 in the date separated from the bust. This Choice AU 1849-C half eagle is conditionally scarce and displays strong detail with little wear and no major abrasions. Each side has bright yellow-gold color with slight field reflectivity. Population: 28 in 55 (1 in 55+), 22 finer (4/19). NGC ID# C5XD, PCGS# 8241

**1849-C Five Dollar, AU55+
Well-Struck North Carolina Coin**

- 4104 1849-C AU55+ PCGS. Variety 1.** The upright of the 4 is centered directly over a dentil. The reverse is in the usual late die state with a crack from the leaf to the rim through the left serif of the U in UNITED. The devices are well-struck for a Charlotte half eagle with only slight softness on the curls over the ear and the eagle's left leg. Partial luster issues from orange-gold surfaces. A collectible North Carolina type coin. Population: 28 in 55 (1 in 55+), 22 finer (4/19). NGC ID# C5XD, PCGS# 8241

- 4105 1850-C Weak C AU55 NGC. Variety 4.** The mintmark has very low relief, but the serif, curve, and tail are unmistakable. A pleasing Choice AU Charlotte type coin with lemon and peach toning. Hints of lilac patina visit the upper reverse legend. The strike is above average for the Southern branch facility, and no marks are of singular notice. Census: 9 in 55, 10 finer (4/19). NGC ID# 25U2, PCGS# 98244 Base PCGS# 8244

**1850-C Half Eagle, Near-Mint
Strong Central Strike**

- 4106 1850-C Weak C AU58 NGC. Variety 4.** The date is positioned further right than on other varieties, with the 1 free from the bust tip. The C mintmark is weak but visible. Central strike detail is downright strong, while the stars and the lower half of the 0 are incomplete. Light yellow-gold color mixes with partial mint luster. An abrasion below the olive leaves deserves attention, but there are no other singular marks. The 1850-C half eagle is a collectible Charlotte issue with about 350 coins extant. NGC ID# 25U2, PCGS# 98244 Base PCGS# 8244

1853-D Liberty Half Eagle, AU55
Popular Branch Mint Issue

- 4107 1853-D AU55 NGC. Variety 35-AA.** The 1853-D Liberty half eagle claims a mintage of 89,678 pieces, making it one of the more available issues in the Dahlonega Mint series. This Choice AU specimen represents the scarce 35-AA variety, with the mintmark touching the feather and the stem. Only light wear is evident on the well-detailed design elements and the pleasing yellow and greenish-gold surfaces are lightly abraded. NGC ID# 25UF, PCGS# 8255

1855-C Five Dollar, AU50
Scarcer Issue in AU Grades

- 4108 1855-C AU50 PCGS. Variety 1.** The 1855-C is a moderately scarce C-mint five with a mintage of 39,789 pieces. Of the 175-225 pieces believed extant, probably two-thirds are in VF-XF condition. This is a bright red-gold AU example with moderately reflective fields. The strike details are well brought up on the obverse, less so on the reverse. There is a dig that deserves mention, located between stars 8 and 9 on the obverse. Also, a copper alloy (?) spot is seen between the upper portions of the 1 and 8 in the date. Otherwise, moderately abraded. Population: 27 in 50, 46 finer (4/19). NGC ID# 25UR, PCGS# 8262

1855-S Five Dollar, AU55
Scarce and Overlooked Issue

- 4109 1855-S AU55 NGC.** The 1855-S five dollar is an issue that has been overlooked and underappreciated for decades. Garrett and Guth point out that Harry Bass had six examples. Undoubtedly, Harry had six pieces because he knew to buy a nice one when he could find one. Typical of the few known survivors, this piece has extensively abraded surfaces. Nevertheless, this bright Choice AU will be challenging to upgrade. Census: 20 in 55, 18 finer (4/19). NGC ID# 25UU, PCGS# 8265

- 4110 1859-D Medium D — Cleaned — NGC Details. AU. Variety 44-HH.** A later-date Dahlonega half eagle that presents an above-average strike, though the curls and fletchings lack a full impression. Wear is minimal, but the butter-gold surfaces are moderately bright. Most survivors from the mintage of 10,366 pieces feature a Medium D, though a very rare Large D variety is confirmed. NGC ID# 25VD, PCGS# 8282

1871-S Half Eagle, Choice AU
Low Mintage, Little Saved

- 4111 1871-S AU55 NGC.** San Francisco mintages of eagles and half eagles remained very low until 1878. The 1871-S five dollar production was only 25,000 pieces, a fraction of double eagle coinage that year at San Francisco. This attractive caramel-gold example is well defined and displays peripheral luster. Unimportant field marks are distributed. The date is lightly repunched south, as always for the issue. Census: 21 in 55 (1 in 55+★), 16 finer (4/19). NGC ID# 25WE, PCGS# 8324

- 4112 1879-S MS63+ PCGS.** San Francisco mintages of half eagles perked up between 1878 and 1882, but relatively few pieces remain in lightly abraded Mint State grades. This butter-gold representative has a semiprooflike obverse and a fairly sharp strike. Population: 34 in 63 (2 in 63+), 13 finer (4/19). NGC ID# 25X9, PCGS# 8350

- 4113 1881-S MS65 NGC.** Approximately 3,000 Mint State 1881-S half eagles spent decades in bank vaults, primarily overseas. Most of those pieces were indifferently stored and display luster breaks and abrasions. Gems are surprisingly rare, yet more affordable now than at any time since third-party certification began. This well-struck apricot-gold example displays potent luster and minimal indications of contact. Census: 20 in 65, 2 finer (4/19). NGC ID# 25XF, PCGS# 8357

1882-CC Five Dollar, AU55
Variety 1-A, The Only Dies

- 4114 1882-CC AU55 NGC. CAC. Variety 1-A.** The 1882-CC Liberty half eagle is an available date, from a mintage of 82,817 pieces, all struck from a single die pair, although others may be awaiting discovery. This Choice AU example exhibits well-detailed design elements and trivial handling marks over its partially lustrous reddish-gold surfaces. NGC ID# 25XH, PCGS# 8359

1884-S Half Eagle, MS64
Lustrous Surfaces

4115 1884-S MS64 PCGS. CAC. This is an opportunity for the advanced gold specialist to acquire an 1884-S half eagle that is tied for second finest that PCGS has certified, and is bettered by only one coin. This piece is bright and reddish toned, highly lustrous with frosty mint surfaces, and excellent eye appeal. Population: 12 in 64 (1 in 64+), 1 finer. CAC: 7 in 64, 0 finer (4/19). NGC ID# 25XR, PCGS# 8366

4116 1885-S MS65 NGC. Strong stars and bold detail on the eagle are indicative of a crisp overall impression. Mint frost glows from each side of this peach-gold Gem. There are a few minuscule field grazes, but not much else. NGC has seen just 13 finer representatives (4/19). NGC ID# 2Y7X, PCGS# 8368

4117 1885-S MS65 PCGS. One of the few half eagles that ranks as an ideal type coin through the near-Gem level, the 1885-S is also accessible in full Gem condition. This is a richly frosted, straw-gold example with olive overtones. A sharp strike exists rim-to-rim on both sides, with excellent, minimally marked surfaces and great eye appeal. Finer pieces are scarce-to-rare. Population: 90 in 65 (4 in 65+), 10 finer (4/19). NGC ID# 2Y7X, PCGS# 8368

4118 1891-CC MS62 NGC. Variety 2-A. A fully struck representative of the popular Carson City type issue. The lustrous pumpkin-orange surfaces are clearly original, and marks are unimportant save for moderate contact near Liberty's chin and neck. NGC ID# 25Y5, PCGS# 8378

4119 1891-CC MS62 NGC. Variety 2-A. While the 1891-CC half eagle is generally available and a logical selection for type, it can be challenging to find a nice Mint State coin. This example is minimally marked and frosty, with olive-gold accents that flash across the softly lustrous surfaces. The strike is first-rate. Struck from one of two die pairs used for the issue, this one with a narrowly repunched second 1 in the date.

Ex: Houston Signature (Heritage, 12/2015), lot 4610, which realized \$2,350. NGC ID# 25Y5, PCGS# 8378

1901/0-S Half Eagle, MS65
FS-301, Guide Book Variety

4120 1901/0-S FS-301 MS65 NGC. An overdate in the true sense of the word, the 1901/0-S is an anomaly in the late gold series and among all post-1900 Federal coinage regardless of date or denomination. The upper curve of an underlying 0 is clear beneath 1 in the date. This is a lustrous Gem example, with frosted yellow-gold surfaces and a sharp strike. Only a few tiny marks exist on either side. Few pieces are known in numerically finer grades. Census: 23 in 65, 4 finer (4/19). NGC ID# 25YX, PCGS# 145720 Base PCGS# 8403

1903-S Liberty Half Eagle, MS66
Seldom Encountered at This Level

4121 1903-S MS66 NGC. Despite the substantial mintage of 1.8 million pieces, the 1903-S Liberty half eagle is an elusive issue in MS66 condition, and finer coins are condition rarities. This attractive Premium Gem exhibits sharply detailed central design elements, but some softness shows on the star centers. The lustrous orange-gold surfaces are impeccably preserved. Census: 42 in 66 (2 in 66+), 9 finer (4/19). NGC ID# 25Z3, PCGS# 8408

1904 Five Dollar, MS66
Beautifully Preserved Type Coin

4122 1904 MS66 PCGS. The availability of the 1904 half eagle drops off sharply at the Gem grade level, and Premium Gems are decidedly scarce. This type coin displays a sharp strike and shimmering satin luster with original straw-gold patina. Neither side has a single notable abrasions. Eye appeal is outstanding. Population: 27 in 66 (6 in 66+), 6 finer (4/19). NGC ID# 25Z6, PCGS# 8409

1905 Liberty Half Eagle, MS66
Rare in Finer Grades

4123 1905 MS66 NGC. The 1905 Liberty half eagle claims a mintage of 302,200 pieces and the issue is not difficult to locate in lower Mint State grades, but MS66 examples are rare. This delightful Premium Gem exhibits sharply detailed design elements and virtually pristine orange-gold surfaces, with vibrant mint luster and terrific eye appeal. Census: 20 in 66 (1 in 66+, 2 in 66★), 6 finer (4/19). NGC ID# 25Z6, PCGS# 8411

- 4124 1906-D MS65 PCGS.** Original yellow-green patina embraces this gently shimmering and nicely struck representative. The portrait is smooth, and the fields exhibit only moderate luster grazes. One of only two Liberty half eagle issues from the Denver Mint, which began production in 1906. Population: 75 in 65 (5 in 65+), 9 finer (4/19).
Ex: *Dallas Signature* (Heritage, 11/2006), lot 2268. NGC ID# 25ZA, PCGS# 8414

INDIAN HALF EAGLES

- 4125 1908 MS64 NGC.** An attractive Choice specimen from the first year of the popular Indian half eagle design, with sharply detailed motifs and well-preserved yellow and rose-gold surfaces that radiate vibrant mint luster throughout. While full Gem examples are available on occasion, this near-Gem is an eminently intelligent alternative. NGC ID# 28DE, PCGS# 8510
- 4126 1908 MS64 PCGS.** The popular incuse Indian design made its debut in 1908. This impressive Choice specimen offers sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster, with outstanding eye appeal. NGC ID# 28DE, PCGS# 8510
- 4127 1908 MS64 PCGS. CAC.** The design elements of this Choice first-year half eagle are sharply detailed in most areas, with just a trace of the usual softness on the eagle's shoulder. The lustrous orange-gold surfaces are well-preserved and attractive. NGC ID# 28DE, PCGS# 8510
- 4128 1908 MS64 PCGS. CAC.** Particularly smooth surfaces offer satiny mint luster and sharp devices, with a distinctive orange-gold tint to the fields and other relief elements. The recesses of the design have lighter yellow-gold coloration. Eye appeal is excellent. The 1908 Indian half eagle was well-saved at the time of issue for the novelty of the new design. Today, it is a popular type coin due to its availability. NGC ID# 28DE, PCGS# 8510
- 4129 1908-D MS64 NGC.** Three of the four active Mints struck Indian Head half eagles in their first year of issue. Denver chipped in 148,000 pieces, of which this is a delightful representative. The strike is solid, and the yellow-orange surfaces show uncommonly fine luster and only a handful of small, scattered marks. NGC has graded just six coins finer, a situation that has hardly changed in the past dozen years (4/19). NGC ID# 93KW, PCGS# 8511
- 4130 1909 MS64+ PCGS.** The 1909 half eagle had a rather substantial mintage of more than 627,000 pieces, and is easily found in most grades, though Gem-quality examples are elusive. This Plus-graded near-Gem is sharply struck throughout, and displays satiny bronze-gold mint luster. The surfaces are remarkably clean for issues of this type, with only insignificant field ticks near the profile precluding full Gem status.
Ex: *Long Beach Signature* (Heritage, 6/2014), lot 5731, which realized \$2,673.13. NGC ID# 28DH, PCGS# 8513
- 4131 1911-D AU55 NGC.** Profound red-gold color provides wonderful eye appeal to this Choice About Uncirculated half eagle. High-point friction occurs on each side, as do scattered marks, and the mintmark is somewhat difficult to discern, but these do not affect the desirability of this low-mintage key date. NGC ID# 28DR, PCGS# 8521
- 4132 1911-D AU55 NGC.** The 1911-D is an elusive issue in the Indian half eagle series. This impressive Choice AU specimen shows just a touch of wear on the well-detailed design elements and the lightly abraded yellow-gold surfaces radiate vibrant mint luster. NGC ID# 28DR, PCGS# 8521

1911-D Five Dollar Indian, AU58 Scarce, Low-Mintage Series Key

- 4133 1911-D AU58 PCGS.** With just brief high-point wear visible across the fields and on the less-protected areas of the sunken design, this low-mintage Denver issue is scarce in near-Mint condition. In full Mint State, the 1911-D ranks as one of the great rarities of the five dollar Indian gold series. Pleasing straw-gold color displays pale-olive overtones, with soft mint luster outlining the sharply struck devices. NGC ID# 28DR, PCGS# 8521

1911-S Indian Half Eagle, MS63 Rare Any Finer

- 4134 1911-S MS63 PCGS. CAC.** The 1911-S Indian half eagle claims a substantial mintage of 1.4 million pieces, but the issue is more elusive than the large production total would suggest. This attractive Select specimen exhibits well-detailed design elements and lustrous orange-gold surfaces, with hints of rose and lilac. Only minor signs of contact are evident. PCGS has graded 36 numerically finer examples (4/19). NGC ID# 25ZM, PCGS# 8522
- 4135 1913 MS64 PCGS. CAC.** While the 1913 Indian five is generally considered an available issue, it is seldom seen with the exceptional eye appeal of this lustrous, near-Gem coin. A sharp strike adds to the splendid surface quality. Brilliant, rich-gold color deepens slightly at the borders for an outstanding visual effect. There are no significant marks or abrasions to mention on this CAC-endorsed example. NGC ID# 28DT, PCGS# 8525
- 4136 1913 MS64+ PCGS. CAC.** A crisply struck khaki-gold example that shows little evidence of contact. The obverse has a moderately mattelike finish, as made. The 1913 is regarded as a type issue, but at the PCGS MS64+ level it becomes very scarce, with only 65 coins graded as such, and only 60 pieces finer (3/19). NGC ID# 28DT, PCGS# 8525
- 4137 1914-D MS63 NGC.** The 1914-D is the final half eagle struck at the Denver Mint, an important consideration for type purposes. This orange and rose-gold Select specimen offers well-detailed design elements and lustrous surfaces that show the expected number of minor scuffs and contact marks. Mint luster remains bold throughout both sides. NGC ID# 28DV, PCGS# 8528
- 4138 1914-D MS63 PCGS.** The lower headdress feathers have minor softness, but the eagle's shoulder and perch are sharp. The mintmark is clear. This is a better date in high grade but Select examples remain collectible. Only light abrasions are apparent.
Ex: *FUN Signature* (Heritage, 1/2003), lot 8716, which realized \$1,897.50. NGC ID# 28DV, PCGS# 8528

**1914-D Five Dollar, MS64
Luminous and Satiny**

4139 1914-D MS64 PCGS. The same number of half eagles were struck at the Philadelphia and Denver mints in 1914: 247,000. The mintmark is bold, as are the feathers on each side. Bright, satiny mint luster emanates from luminous honey-gold surfaces. There is a tick on the upper cheek and a few more scattered in the exposed fields. PCGS lists 20 higher grading events (5/19). NGC ID# 28DV, PCGS# 8528

4140 1915 MS64 PCGS. CAC. Exceptionally attractive reddish-gold color emanates from this lustrous 1915 five. The strike is sharp and marks are few (often the downfall of this issue), while the few wispy abrasions that exist are entirely nondistracting. Eye appeal borders on the extraordinary. PCGS has certified just 67 numerically finer pieces. CAC: 123 in 64, 12 finer (4/19). NGC ID# 28DX, PCGS# 8530

**1915-S Five Dollar, MS61
Scarce in Uncirculated Condition**

4141 1915-S MS61 NGC. Mint luster is satiny rather than brightly frosted. It shimmers softly over the straw-gold surfaces of this Uncirculated Indian half eagle. Orange accents are also present. The mintmark is somewhat mushy, and the overall strike is slightly uneven. With a mintage of 164,000 coins, the 1915-S is a notably scarce date in mint condition. NGC ID# 25ZR, PCGS# 8531

**1915-S Five Dollar, MS62
Attractive Mint State Collector Coin**

4142 1915-S MS62 PCGS. Ex: Rive d'Or Collection. Satiny surfaces display original mint luster on this Mint State 1915-S half eagle, including shades of peach-gold, orange, and rose. Some olive overtones attest to the originality of the surfaces. There is some minor strike weakness on the lower headdress feathers, but other details are sharp. Only light, scattered abrasions are evident. The 1915-S is seldom offered finer. NGC ID# 25ZR, PCGS# 8531

**1915-S Half Eagle, MS62
Better Date in High Grade**

4143 1915-S MS62 PCGS. The 1915-S is a better date in the Indian half eagle series, coming from a mintage of only 164,000 pieces. Uncirculated survivors are especially challenging above MS62. This collectible example displays a bold strike and satiny straw-gold mint luster. Scattered light field abrasions are generally minor, although a singular mark is seen below the Indian's nose. NGC ID# 25ZR, PCGS# 8531

EARLY EAGLE

**1801 Ten Dollar, XF Details
BD-2, Challenging Early Type**

4144 1801 BD-2, R.2 — Mount Removed — PCGS Genuine. XF Details. Obverse mounts were removed near 3 and 9 o'clock, and both sides display coarse vertical hairlines. A bend is apparent along the base of Liberty's neck. Despite its impairments, this sun-gold ten dollar gold piece represents the early and elusive Heraldic Eagle type. Wear is minimal for the XF level.

LIBERTY EAGLES

**1839/8 Ten Dollar, XF Details
Head of 1838, Large Letters**

4145 1839/8 Large Letters, Head of 1838 — Reverse Scratched — NGC Details. XF. The Head of 1838 is recognized at a glance for its widely curved bust truncation. The bust also leans forward, and the ear is covered except for the lobe. Liberty was modified later in 1839, and the reverse legends were made smaller, limiting the Type of 1838 to the 1838 and 1839/8 varieties. The present caramel-gold example is nicely defined, and relevant marks are limited to a cluster of thin pinscratches on the upper reverse field.

1839/8 Ten Dollar, AU55
Head of 1838

4146 1839/8 Large Letters, Head of 1838, AU55 NGC. The Head of 1838, sometimes called the Type of 1838, is more ornate on the Liberty portrait than the later Type of 1839 issue, which was used for the remainder of the Liberty Head series. The Type of 1838 represents a distinctive two-year subtype (1838 and 1839) that is essential for a complete Liberty eagle collection, whether assembling the series by type, date, or date and mint. This Choice AU example has smooth yellow-gold surfaces and subtle remnants of luster. Detail is sharp. NGC ID# 54XF, PCGS# 8576

4147 1840 AU50 PCGS. The 1840 eagle is an early issue for the type, which debuted two years earlier after an absence since 1804. More than 47,000 1840 tens were struck at Philadelphia. In Mint State, surviving 1840 coins are distinctive rarities, but in AU, this date is collectible. The present coin displays sharp detail and hints of luster. The rich olive-gold patina is original. Typical of the issue, both sides have extensive small abrasions. Population: 22 in 50, 29 finer (4/19). NGC ID# 262G, PCGS# 8581

4148 1842 Large Date AU55 NGC. The Large Date 1842 ten is more plentiful than the Small Date issue, although both are scarce in the upper AU grades and are rare in Mint State. This Choice AU Large Date coin displays natural olive-gold patina and strong detail, with hints of luster in the protected areas. Census: 37 in 55 (6 in 55+★), 23 finer (4/19). NGC ID# 262M, PCGS# 8584

4149 1843 AU50 PCGS. Breen-6861, Triple-Punched Date. The repunching on the date is most easily seen at the bases of the numerals. This AU coin displays strong detail and olive-gold patina. Each side is moderately abraded, as is normal for early No Motto Liberty eagles. This date is scarce in finer condition. Population: 26 in 50, 17 finer (4/19). NGC ID# 262P, PCGS# 8588

1846 Ten Dollar, AU53
Bowers: 'Rare and Underrated'

4150 1846 AU53 NGC. Only 20,095 eagles were struck at Philadelphia in 1846. Almost certainly fewer than 200 pieces survive in all, including only five to seven Mint State representatives. Bowers has called AU examples "rare and underrated" and "few and far between." Each side of this reddish-gold ten is lightly hairlined and abraded. Overall eye appeal remains good for this challenging issue. Census: 17 in 53, 21 finer (4/19). NGC ID# 262W, PCGS# 8594

1851-O Ten Dollar, AU58
Rarely Found Finer

4151 1851-O AU58 NGC. Variety 1. Satiny sun-yellow surfaces retain hints of luster in the protected areas, and little wear is evident over the high points of the devices. This is a well-struck 1851-O ten with smooth surfaces and attractive eye appeal. High-end AU coins such as this are scarce, and rarely is a Mint State piece offered. NGC lists only 19 finer submissions (4/19). NGC ID# 263B, PCGS# 8607

4152 1852 AU58 NGC. CAC. NGC and PCGS have certified a combined 150 examples as AU58, but the green bean is present on less than 10% of those pieces. This is because relatively few survivors retain their original peach-gold color. The present coin has the "dirty gold" look desired by specialists, and is refreshingly free from distracting marks. CAC: 14 in 58, 11 finer (4/19). NGC ID# 263C, PCGS# 8608

4153 1854 AU55 PCGS. CAC. Some luster remains in the fields of this CAC-approved Choice AU coin, complementing bold detail on the devices. Each side has pleasing peach-gold color with delicate rose highlights. Eye appeal is excellent for the grade. Finer 1854 tens are scarce. Population: 25 in 55, 33 finer. CAC: 10 in 55, 8 finer (4/19). NGC ID# 263G, PCGS# 8613

4154 1854 AU55 NGC. CAC. Variety 3, Misplaced Date. The 1854 is an unsung scarcity surrounded by many rare issues in the ten dollar gold series. European holdings have provided some additional examples to collectors, and shipwreck recoveries included a few more pieces, but the issue remains scarce in AU and rare in Mint State. This is Choice About Uncirculated example, CAC-endorsed, with smooth and attractive surfaces. Marks are minimal for the grade, with orange accents throughout the apricot-gold fields and devices. The top of a misplaced digit sits above the dentils beneath 18 in the date. Census: 68 in 55 (2 in 55+★), 77 finer. CAC: 10 in 55, 8 finer (4/19). NGC ID# 263G, PCGS# 8613

4155 1854-S AU53 NGC. Elements of luster remain in the protected areas of the fields and in the design recesses, emitting a warm yellow-gold glow. The worn areas of the fields have a deeper olive-gold hue. This well-detailed 1854-S eagle is moderately abraded but nonetheless displays good eye appeal. Ex: FUN Signature (Heritage, 1/2010), lot 9301, which realized \$1,265. NGC ID# 263K, PCGS# 8615

4156 1860-O — Cleaned — NGC Details. AU. Variety 1. A well-defined but glossy sun-gold example of this low mintage issue. Field depressions near the mintmark and profile appear to be strike-throughs, as made. New Orleans struck the ten dollar denomination for twenty consecutive years, 1841 through 1860. Nearly another two decades would pass before limited production resumed in 1879. NGC ID# 2645, PCGS# 98631

**1861 Liberty Eagle, AU55+
Seldom Encountered Finer**

- 4157 1861 AU55+ PCGS.** From a substantial mintage of 113,164 pieces, the 1861 Liberty eagle is an available issue in the context of the series. The 1861 is still elusive in grades above AU55, however. This Plus-graded Choice AU specimen exhibits just a touch of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces are still lustrous. Population: 73 in 55 (1 in 55+), 96 finer (4/19). NGC ID# 2647, PCGS# 8633

**1870-S Ten Dollar, XF40
Low Mintage and Survival Rate**

- 4158 1870-S XF40 PCGS.** PCGS CoinFacts estimates 80 to 100 of the 8,000 eagles struck at the San Francisco Mint in 1870 survive. This date-mintmark combination enjoys some added cachet thanks to the unique three dollar gold piece struck at the S-mint that same year. The surfaces of this XF representative feature natural red-gold color and a normal amount of small, undistracting abrasions. High-point softness is also expected. An unheralded rarity. Population: 10 in 40, 36 finer (4/19). NGC ID# 53FU, PCGS# 8659
- 4159 1879 MS63 PCGS.** The 1879 was the first ten dollar issue since 1861 with a mintage above 100,000 pieces. It had the highest mintage since 1850, when the double eagle became the denomination of convenience for bullion depositors. Yet the 1879 is surprisingly scarce at the Select level. This well struck and coruscating pumpkin-gold example shows fewer than the expected number of marks. Population: 37 in 63, 17 finer (4/19). NGC ID# 265M, PCGS# 8683

**1880-O Ten Dollar, AU50
Sharp, Ex: Eliasberg**

- 4160 1880-O AU50 PCGS. CAC.** Ex: Eliasberg. The 9,200-piece mintage ranks lowest among all eagles for the year. The 1880-O is of equal scarcity to the 1880-CC, although only recently has it approached equal value with collectors. This is a wonderfully original and attractive AU example — the former Eliasberg specimen — with pleasing, orange-gold color and bright mint luster remaining around the raised devices. A scattering of light abrasions and minor high-point wear account for the assigned grade. CAC endorsement adds to its credentials. Population: 36 in 50, 86 finer. CAC: 4 in 50, 14 finer (4/19).
Ex: *The U.S. Gold Collection (Bowers and Ruddy Galleries, 10/1982), lot 765. (Auction ticket included.)* NGC ID# 265U, PCGS# 8689

- 4161 1882-CC — Cleaned — NGC Details. AU. Variety 2-A.** The 1882 Carson City ten has a meager mintage of 6,764 pieces, and nearly all survivors are in VF through AU grades. This lightly cleaned caramel-gold example exhibits substantial peripheral luster, and abrasions are inconsequential save for a slight reverse rim knock at 7 o'clock. NGC ID# 2663, PCGS# 8696
- 4162 1882-O AU50 NGC. Variety 1.** The New Orleans Mint reopened in 1879 to strike silver dollars, but the facility also coined Liberty tens annually through 1883, and intermittently thereafter through 1906. The 1882 production was meager, only 10,820 pieces, with approximately 350 survivors. This is an original peach-gold example that displays pleasing definition and the expected number of singularly minor abrasions.
Ex: *Long Beach Signature (Heritage, 2/2009), lot 9594, which realized \$920.* NGC ID# 55GJ, PCGS# 8697
- 4163 1891-CC AU58 NGC. Variety 2-B.** A charming near-Mint Carson City type coin with original and slightly dusky caramel-gold surfaces. Sharply defined, and only minimally marked for the grade. Variety 2-B is the Wide CC variety, which is scarcer than the Repunched CC (FS-501) and Left CC (Variety 1-A) die pairings. The Right Close CC (Variety 5-D) is rarest. NGC ID# 266U, PCGS# 8720
- 4164 1891-CC MS62 NGC. Variety 1-A.** For this variety, the position of the mintmark is distinctive, but even more so is the diagonal die line above the base of the shield on the reverse. The surfaces display bright mint luster with radiant semiprooflike fields. Sharply struck, a few small to medium-sized abrasions account for the grade. NGC ID# 266U, PCGS# 8720
- 4165 1891-CC MS62 PCGS. Variety 1-A.** Second C in the mintmark under the feather tip. Lively luster rolls over each side, with light yellow-gold color at the centers and deeper shades of orange around the borders. All the design elements are well-formed. Superficial chatter limits the grade for this 1891-CC eagle. NGC ID# 266U, PCGS# 8720

1891-CC Ten Dollar, MS63
Scarce in This Grade, Rare Finer

4166 1891-CC MS63 NGC. Variety 1-A. The 1891-CC eagle is often available in Mint State, although pieces grading MS63 are scarce. This Select example displays a sharp strike and radiant luster. The obverse fields have a hint of reflectivity when tilted beneath a light. Grade-limiting abrasions are light. Fewer than a dozen finer 1891-CC tens are reported at NGC and PCGS combined. Census: 96 in 63 (1 in 63+), 7 finer (4/19). NGC ID# 266U, PCGS# 8720

4167 1891-CC/CC FS-501 MS61 NGC. Variety 4-C. The mintmark is clearly repunched, though the *Cherrypickers'* variety goes without mention on the NGC insert. The insert also omits a Prooflike designation, but the fields are undeniably flashy. A sharply struck and moderately abraded butter-gold Carson City type coin with a hint of struck-in grease near the eagle's beak. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

4168 1891-CC/CC FS-501 MS61 NGC. Variety 3-C. The mintmark is repunched, where remnants of the secondary mintmark remain well to the right of the primary CC mark. An odd, straight die line seemingly aligns star 12 at two of its outer points. The 1891-CC ten is readily available in lower Mint State grades, but seldom with the flashy mint luster and minimal abrasions of this sharply struck example. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

4169 1892-CC Tripled Die Reverse, FS-801, AU53 PCGS. Variety 1-A. The borders teem with luster, and the lightly circulated pumpkin-gold surfaces are problem-free. IN GOD WE TRUST is tripled, and STATES is die doubled. All 1892-CC eagles are FS-801, since only a single reverse die was used to produce the mintage of 40,000 pieces. NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

4170 1894 MS64+ PCGS. Impressively sharp devices and original, frosted peach-gold mint luster deliver better-than-expected eye appeal for the grade, hence the Plus designation. Each side has a vibrant cartwheel effect. Under a loupe, a scattering of microscopic grazes prevents Gem classification. PCGS has certified only two Gems (5/19). NGC ID# 2675, PCGS# 8729

4171 1894-O MS62 PCGS. Variety 2. Six die marriages of the 1894-O are known, despite a fairly low mintage of 107,500 pieces. The 1894-O can be obtained for little above melt in circulated grades, but PCGS has certified just one coin as MS64. This MS62 representative has a bold strike and surprisingly smooth apricot-gold surfaces. We note one mark concealed in the neck curls. Population: 66 in 62 (2 in 62+), 17 finer (4/19). NGC ID# 2676, PCGS# 8730

1895-O Ten Dollar, MS63
None Finer at PCGS

4172 1895-O MS63 PCGS. Variety 1. The New Orleans Mint produced gold coins intermittently throughout the last two decades of that facility's history. Eagles were coined in 10 of those 20 years, and half eagles in four different years. Those were the only two denominations struck in New Orleans from 1890 to 1909. All 14 issues had a combined total mintage of less than 900,000 coins. This Select Mint State example has a bold strike with only the first star indistinct. The surfaces are bright and lustrous. A lovely example and conditionally rare. Population: 29 in 63 (1 in 63+), 0 finer (4/19). NGC ID# 2679, PCGS# 8733

4173 1897 MS64+ PCGS. Available in lower grades, the 1897 Liberty eagle is elusive in MS64, and Gems are rare. This Plus-graded Choice coin displays shimmering yellow-gold luster and sharp motifs. Surprisingly few signs of contact are present, hence the Plus designation. PCGS lists only 15 finer representatives (4/19). NGC ID# 26CH, PCGS# 8737

4174 1901-S MS65 PCGS. Ideal for type, the 1901-S is readily available through the Gem grade. This razor-sharp Gem offers fantastic eye appeal, with vibrantly lustrous yellow-gold surfaces immersed in reddish-gold and lime-green overtones. Frosted surfaces show only a few small, shallow abrasions. NGC ID# 267S, PCGS# 8749

4175 1903-O MS63 PCGS. Variety 1. Most 1903-O tens are abraded from loose bank vault storage, but the present wheat-gold example shows relatively few marks. We note only a small rim tick above the second S in STATES. A late die state with numerous reverse cracks, unusual for Variety 1. A New Orleans type issue, but nonetheless becomes rare above the Select level. NGC ID# 267W, PCGS# 8753

4176 1904-O MS63 PCGS. Variety 1. Doug Winter states that the 1904-O ten dollar "has better eye appeal than most New Orleans eagles of the With Motto type. The typical piece is well struck and lustrous with decent color." This is a lustrous yellow-gold example with mostly complete star radials and crisp feathers. Grazes and bagmarks are unimportant. PCGS lists only 27 finer submissions (4/19).
Ex: Long Beach Signature (Heritage, 9/2017), lot 4940, which realized \$2,346. NGC ID# 7LHK, PCGS# 8756

4177 1906-O MS62 PCGS. Popular as the final ten dollar gold issue from the venerable Southern Mint, the 1906-O was surprisingly well-produced on the mint's antiquated equipment. This is a sharp example, crisply struck, with vibrantly lustrous surfaces and attractive, medium-gold coloration. Tiny bagmarks and light abrasions account for the assigned grade. Finer examples are notably scarce-to-rare. NGC ID# 53FB, PCGS# 8761

INDIAN EAGLES

- 4178 1907 No Motto MS64 PCGS.** No Periods. A popular addition to type sets as well as a necessary example of the No Motto, No Periods type for series collectors, this 1907 Indian ten is a gleaming, orange-gold near-Gem. Rich, satiny mint luster illuminates smooth fields and sharply struck devices — a well-preserved representative, with Choice Uncirculated surfaces and eye appeal that suggest an even finer grade. NGC ID# 28GF, PCGS# 8852

1908 No Motto Ten Dollar Indian, MS63 Low-Mintage Issue

- 4179 1908 No Motto MS63 PCGS.** The central devices of this Select 1908 No Motto eagle are well-struck, although the rims are not fully squared on each side. Satiny yellow-gold luster shows light, unobtrusive abrasions. This issue boasts a small mintage of 33,500 coins and is elusive in finer Mint State grades. NGC ID# 28GG, PCGS# 8853

- 4180 1908-D No Motto MS62 PCGS. CAC.** The novelty of the new Saint-Gaudens design had long worn off by the time this Denver No Motto ten was minted, and few Mint State examples were saved by the public. This is a sharply struck MS62 coin with CAC endorsement and substantial eye appeal. Mint luster glows from every angle, and the deeply impressed central motifs display full details. NGC ID# 28GH, PCGS# 8854

1908 Motto Indian Eagle, MS64+ Elusive CAC Endorsement

- 4181 1908 Motto MS64+ PCGS. CAC.** This With Motto Philadelphia coin displays a sharp strike and mattelike yellow-gold luster. Only faint grazes in the fields prevent Gem classification for this high-end CAC coin. A first-year Motto type coin, it is elusive with the CAC endorsement. Finer-graded examples of the date are also scarce. CAC: 53 in 64, 31 finer (4/19). NGC ID# 28GJ, PCGS# 8859

- 4182 1908-D Motto MS62 PCGS.** A sharp Mint State example of this first-year With Motto Denver issue, showing honey-gold surfaces and minimal abrasions for the grade. Despite a mintage in excess of 836,000 coins, the 1908-D With Motto ten is seldom offered finer than the present coin. NGC ID# 28GK, PCGS# 8860

1911-D Indian Eagle, AU55 Attractive Original Color

- 4183 1911-D AU55 NGC.** The 1911-D is a semikey issue in the ten dollar Indian series, boasting a small mintage of 30,100 pieces. This issue is scarce and out of reach for most collectors in Uncirculated condition, although the present Choice AU coin remains accessible. Natural olive-gold surfaces retain remnants of peach luster in the protected areas, producing strong eye appeal. NGC ID# 28GU, PCGS# 8869

1911-D Ten Dollar, AU58 Smallest Production in the Set

- 4184 1911-D AU58 PCGS.** The lowest regular-issue mintage in the series belongs to the 1911-D ten dollar, with only 30,100 coins. This is an eye-appealing, partly lustrous example in near-Mint condition that enjoys original red and khaki-gold color. The two lowest headdress feathers are fully struck, while the eagle's wing tip displays a bit of softness. A couple of marks appear in the field behind the eagle's head. NGC ID# 28GU, PCGS# 8869

- 4185 1912-S MS62+ PCGS. CAC.** A better date in Mint State, the 1912-S is especially scarce with CAC endorsement. This Plus-graded CAC coin is well-struck and lustrous with straw-gold coloration. Light abrasions appear on each side, but none are individually bothersome. NGC ID# 269G, PCGS# 8872

1913 Eagle, Crisp MS65 Warm Yellow-Gold Color

- 4186 1913 MS65 PCGS.** This is a collectible issue in most grades, though not nearly to the same extent as the 1926 or 1932. The motifs exhibit crisp definition without any areas of overt softness. Warm medium yellow-gold color and soft mint luster characterize the smooth, finely textured surfaces. Small abrasions appear on the portrait and in the field left of the date. PCGS reports 21 finer submissions (5/19). NGC ID# 28GY, PCGS# 8873

1914-D Ten Dollar, Red-Gold MS64

4187 1914-D MS64 PCGS. Most Uncirculated 1914-D eagles, of which there are several thousand, survive in MS60 to MS63 and derive from repatriations over the past four decades. Coins in MS64 are much more elusive, and Gems are scarce. This satiny, red-gold near-Gem has an exceptionally clean obverse. A few marks above IN on the reverse probably prevent an even higher assessment. Slightly soft on the lowest headdress feathers but otherwise crisp. PCGS reports 49 finer submissions (4/19). NGC ID# 28H3, PCGS# 8876

4188 1914-S MS61 NGC. Although the 1914-S mintage is more than one-third greater than the 1914, the former is considerably scarcer in Mint State. Indeed, the most prevalent certified grade at both services is AU58. The present apricot-gold example displays vibrant cartwheel luster and shows surprisingly few marks. NGC ID# 28H4, PCGS# 8877

1914-S Ten Dollar, MS63 Better San Francisco Issue

4189 1914-S MS63 PCGS. The 1914-S is a better date in Uncirculated condition, and it is especially scarce finer than MS63. This collectible Select example displays frosty yellow-gold luster and sharp design elements. Scattered abrasions limit the grade, but a vibrant cartwheel effect is the chief visual attribute. Eye appeal is pleasing for the MS63 level. NGC ID# 28H4, PCGS# 8877

1914-S Ten Dollar Indian, MS63 Scarce S-Mint Issue

4190 1914-S MS63 PCGS. A richly toned and lustrous example of this San Francisco issue, with well-developed orange patina and a notable lack of distracting marks. One abrasion is noted in the field in front of Liberty's chin, but it blends in well. The reverse has several small marks, but nothing unexpected for the grade assigned. Population figures for the 1914-S peak at MS62 and drop from there, with PCGS having certified only 84 pieces graded numerically finer (4/19). NGC ID# 28H4, PCGS# 8877

4191 1915 MS64+ PCGS. This Plus-graded Choice specimen displays exceptionally well-detailed design elements, with a touch of the usual softness on the eagle's shoulder, but sharp definition in the headdress feathers. The well-preserved orange-gold surfaces are exceedingly lustrous and appealing. NGC ID# 28H5, PCGS# 8878

1932 Ten Dollar, MS65 Frosty Indian Head Type Coin

4192 1932 MS65 PCGS. Frosty original mint luster engulfs this Gem 1932 Indian eagle, a prime type coin with outstanding eye appeal. Each side shows bold definition and clean surfaces save for some light marks on Liberty's cheek that prevent an even finer grade. The 1932 is usually available in this grade, but finer examples are scarce. NGC ID# 28HB, PCGS# 8884

1932 Saint-Gaudens Eagle, MS65+ Appealing Orange-Gold Surfaces

4193 1932 MS65+ PCGS. The most available Saint-Gaudens ten dollar gold issue has a mintage of 4.4 million coins. The 1932 was well-saved and can be found through MS65, while Premium Gems begin to pose more of a challenge. This is a well-struck, luminous type coin with appealing orange-gold color. A small dark spot occurs below U(NITED). NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Double Eagle, XF45 Inaugural Year for the Denomination

4194 1850 XF45 PCGS. Lovely and original antique-gold color displays orange rims and generous amounts of remaining mint luster amid the sharply struck devices of this Choice, first-year double eagle. Eye appeal is strong despite numerous pinprick abrasions that pepper the surfaces. This is an exceptional representative of the Type One design for a circulated gold type or double eagle date set. NGC ID# 268F, PCGS# 8902

**1850 Double Eagle, AU50
Some Luster Remains**

4195 1850 AU50 NGC. A pleasing example of the inaugural Philadelphia double eagle, showing the characteristic bright yellow-gold color and sharp devices. Light wear and some field chatter on each side prevent a Mint State designation, although luster remains in the peripheries sufficient to produce a cartwheel effect. NGC ID# 268F, PCGS# 8902

4196 1852 AU55 NGC. A lemon-gold representative from the early years of the double eagle denomination. The well-defined surfaces display marks consistent with light West Coast circulation. Luster is prominent throughout the borders and devices. Housed in a circa-2000 holder.

Ex: Philadelphia Signature (Heritage, 8/2000), lot 7417; Long Beach Signature (Heritage, 5/2003), lot 6771, which realized \$833.75. NGC ID# 268K, PCGS# 8906

**1852 Twenty Dollar, AU58
Lustrous Original Surfaces**

4197 1852 AU58 PCGS. A lustrous near-Mint example of this early Type One Philadelphia issue, the ideal type coin for double eagle collectors. Each side is sharp and displays original peach-gold and greenish hues, with only slight high-point friction evident over the devices. Mint State examples of this issue are scarce and seldom come with pleasing eye appeal, which this AU coin possesses. NGC ID# 268K, PCGS# 8906

4198 1854 Small Date XF45 PCGS. The 1854 Small Date Liberty double eagle is more available than its Large Date counterpart, making it a favorite choice of type collectors. This lightly worn Choice XF specimen displays lightly abraded orange-gold surfaces with traces of original mint luster. NGC ID# 268R, PCGS# 8911

1856 Double Eagle, Natural AU55

4199 1856 AU55 PCGS. CAC. The total survival estimate for the 1856 double eagle is only 550 to 650 pieces, maybe a few more, according to Doug Winter, who adds that examples "with natural color ... are becoming harder to find with the passing of each year." This is an original red-gold Choice AU representative with luster remaining. Liberty's portrait displays pinpoint detail. Myriad marks, as expected, but scarce any finer. CAC: 21 in 55, 25 finer (4/19). NGC ID# 268Y, PCGS# 8917

4200 1857 AU55 NGC. This Choice AU Type One twenty shows a remarkable amount of remaining mint luster on each side. The surfaces show evidence of light handling (and subsequent abrading), but there are no detracting marks to note. An arc-like grease stain begins at Liberty's eye and extends to just below star 3. NGC ID# 2693, PCGS# 8920

**1859-S Double Eagle, AU58
Still Lustrous, Scarce Any Finer**

4201 1859-S AU58 NGC. Medium S. Probably only a few dozen examples of the 1859-S twenty exist in all Mint State grades, making this issue much more difficult to obtain than the 1856-S or 1857-S, for example. This is a well-struck near-Mint representative with honey-gold color and partial original luster. A few hairlines are present, and a tick is noted near Liberty's mouth. NGC reports 22 finer submissions (4/19). NGC ID# 269C, PCGS# 8928

4202 1861 AU55 NGC. Most years of the Liberty double eagle witnessed the largest mintages at San Francisco, but the first year of the Civil War was an exception. Nearly 3 million pieces were coined at Philadelphia, the largest series emission from the facility with the exception of 1904. This attractive Choice AU green-gold example is lightly abraded for the grade. On the reverse, an alloy streak crosses through F AM. NGC ID# 269G, PCGS# 8932

4203 1861 AU55 PCGS. Only a trace of high-point wear shows on the well-detailed design elements of this attractive Choice AU specimen and the lightly abraded orange-gold surfaces radiate vibrant mint luster from both sides. Eye appeal is outstanding. NGC ID# 269G, PCGS# 8932

1861 Double Eagle, AU58
Substantial Luster Remains

4204 1861 AU58 PCGS. A production of almost 3 million coins — one of the highest totals in the entire series — contributes to the availability of this No Motto issue. This bright twenty dollar gold piece remains in nearly Uncirculated condition with substantial luster and minimal friction. The star radials are complete and the other elements are well-defined. Predictably abraded. NGC ID# 269G, PCGS# 8932

4205 1862-S XF45 NGC. CAC. A Choice XF Type One Liberty double eagle, with lightly abraded orange-gold surfaces that retain traces of original mint luster. Light wear shows on the prongs of the tiara, but much interior detail remains intact. NGC ID# 269N, PCGS# 8938

4206 1862-S AU55 NGC. This is a sharply struck coin with pleasing honey-gold and pale-rose hues across each side. Moderate luster remains in the fields, and the design elements retain most of their details. Scattered surface chatter accompanies a brief time in circulation. A number of About Uncirculated coins were recovered from shipwrecks — particularly the *S.S. Republic*, which yielded 127 examples of the 1862-S in various grades. NGC ID# 269N, PCGS# 8938

1865 Liberty Double Eagle, AU55
Lightly Worn, Lightly Abraded

4207 1865 AU55 PCGS. CAC. Before the recovery of 320 high-grade examples from the *S.S. Republic*, the 1865 Liberty double eagle was rarely seen in grades above the XF level. This attractive Choice AU specimen exhibits just a touch of wear on the high points of the design, like Liberty's curls. The orange-gold surfaces are lightly abraded and much original mint luster remains intact. NGC ID# 269U, PCGS# 8943

4208 1865-S XF45 NGC. A lightly abraded Choice XF Liberty double eagle, with still-lustrous orange-gold surfaces and some light wear on the design elements. From the final year of the Type One design, an important consideration for type purposes. NGC ID# 269V, PCGS# 8944

4209 1866-S Motto XF45 PCGS. Tall S, one of three mintmark style varieties for this introductory Motto issue. An almond-gold example with pockets of luster about the stars and throughout the legends. The obverse field shows smoothing above the date and behind the neck curls. NGC ID# 26B2, PCGS# 8950

1866-S Motto Double Eagle, AU50
Misplaced Date, FS-1301, Original Color

4210 1866-S Motto, Misplaced Date, FS-1301, AU50 NGC. CAC. The top of an errant 8 appears left of the 1. This first-year Motto issue is similar in terms of availability to the 1866 Philadelphia issue, though San Francisco coins from this period are generally more difficult to find in high grades. This is a beautiful, all-original AU example with marvelous reddish-gold color and flashes of frosty luster within the recessed areas. Myriad abrasions and a typical impression do not detract. NGC ID# 269Y, PCGS# 145734 Base PCGS# 8950

1868-S Liberty Twenty, MS60
Seldom Seen in Mint State

4211 1868-S MS60 PCGS. The 1868-S Liberty double eagle claims a moderate mintage for a Type Two issue, at 837,500 pieces. The 1868-S circulated heavily in both foreign and domestic trade, and examples can be easily located in circulated grades, but Mint State specimens are elusive. This well-detailed Mint State example offers colorful orange-gold surfaces, with the expected number of minor contact marks for the grade. Population: 24 in 60, 44 finer (4/19). NGC ID# 26A4, PCGS# 8954

1869-S Twenty Dollar, MS60
Scarce in Mint State

4212 1869-S MS60 PCGS. This Type Two San Francisco issue is plentiful in AU condition, but step up into the Mint State range and the population drops off a cliff. Offered here is a collectible MS60 coin; it has better eye appeal than typical for the grade. Moderate chatter on the obverse is apparent, but both sides reveal attractive peach-gold and yellow-green hues. NGC ID# 26A6, PCGS# 8956

1869-S Twenty Dollar, MS61

4213 1869-S MS61 PCGS. Ex: The Fairmount Collection. Type Two double eagles are known for their scarcity in Mint State, especially if the 1873 and 1873-S are excluded. The present pumpkin-gold example is only moderately abraded and displays ample glowing luster. The strike is solid and the eye appeal is attractive for the designated grade. Population: 58 in 61, 16 finer (4/19). NGC ID# 26A6, PCGS# 8956

4214 1870-S AU58 PCGS. CAC. Given the scarcity of Mint State 1870-S double eagles, CAC-endorsed near-Mint examples are in strong demand among today's gold specialists. This is a sharply struck AU58 coin, with original orange-gold color and glowing mint luster at the borders. Friction in the obverse fields exceeds the few marks that dot the reverse, yet the in-hand visual appeal is strong. NGC ID# 26A9, PCGS# 8959

4215 1870-S AU58 NGC. CAC. Attractive, orange-gold color blankets briefly circulated, semireflective surfaces of this originally patinated 1870-S. The strike is sharp, showing virtually no rub at the usual points of wear. Mint luster remains beneath the rich toning. The 1870 San Francisco issue was, and still is, a scarcity in Uncirculated grades. CAC endorsement moves this AU58 example up as a borderline Mint State piece, held back only by light abrasions at Liberty's chin and adjacent left field. NGC ID# 26A9, PCGS# 8959

1870-S Liberty Twenty, MS60 Scarce Type Two Issue in High Grade

4216 1870-S MS60 NGC. The 1870-S Liberty double eagle was struck in large numbers, but Jeff Garrett and Ron Guth note "most were exported or destroyed." The 1870-S is seldom seen in Mint State grades today. This impressive MS60 specimen offers well-detailed design elements and lustrous orange-gold surfaces that show the expected number of contact marks for the grade. Census: 25 in 60, 58 finer (4/19). NGC ID# 26A9, PCGS# 8959

1871 Liberty Double Eagle, AU50 Scarce Type Two Issue

4217 1871 AU50 PCGS. The 1871 Liberty double eagle boasts a small mintage of 80,120 pieces, making it a scarce Type Two issue in all grades. This impressive AU example exhibits only light wear on the well-detailed design elements and the light yellow-gold surfaces show the expected number of minor abrasions for the grade. Both sides retain much of their original mint luster. NGC ID# 26AA, PCGS# 8960

4218 1872-S MS60 PCGS. Micro S mintmark. A fair amount of original prooflike flash remains on this moderately abraded, sharply struck Uncirculated 1872-S. Pleasing orange-gold color and traces of mint grime confirm the original surfaces. While foreign repatriates continue to trickle in, the number of Mint State examples remains notably small across all Uncirculated grade levels. Most pieces (like this one) occupy the MS60 to MS61 range. Population: 65 in 60, 85 finer (4/19). NGC ID# 26AF, PCGS# 8965

4219 1873 Open 3 MS62 PCGS. CAC. Type Two twenties are a challenging series even for type purposes, primarily because of their limited years of production, 1866 through 1876. This is a strictly Uncirculated example of this difficult type that is strongly struck throughout and shows fewer than the expected number of abrasions for the issue. NGC ID# 26AL, PCGS# 8967

4220 1873 Open 3 MS62+ PCGS. CAC. The mint luster is thick and frosted on this piece, setting it apart from other Open 3 twenties and Type Two twenties in general. The MS62 grade is mainly attributable to a single angling abrasion on the upper part of the face of Liberty. Bright orange-gold color and sharply struck. NGC ID# 26AL, PCGS# 8967

1873 Open 3 Twenty Dollar, MS63 Frosted Rich-Gold Surfaces

4221 1873 Open 3 MS63 PCGS. Aside from a few tiny ticks and bagmarks, this Select Uncirculated double eagle shows virtually no distractions across its frosted and rich, medium-gold surfaces. Cartwheel mint luster illuminates the well-struck fields and devices. Ideal for type, the Open 3 twenty seldom achieves a higher numeric grade, and the eye appeal is excellent. PCGS reports just a dozen numerically finer examples (4/19). NGC ID# 26AL, PCGS# 8967

4222 1873-S Open 3 AU55 PCGS. CAC. Small Squat S. Among Philadelphia 1873 twenties, the Open 3 variety is more common than the Closed 3, since the date logotype was modified early in the year. But the new dies took their time to reach the distant San Francisco facility. As a result, the '73-S Closed 3 is about three times more available than its Open 3 successor. This is an attractive and original sun-gold example with traces of dirt in design recesses. NGC ID# 26AM, PCGS# 8979

- 4223 1876-CC — Cleaning — PCGS Genuine. AU Details. Variety 2-C.** This nicely struck peach-gold Centennial-year Carson City twenty shows only a hint of wear on the shoulder curl, and the semiprooflike reverse is attractive. Upon close inspection, the obverse exhibits horizontal hairlines. Variety 2-C exhibits die lines in the dentils below the date, and places the mintmark furthest west.

**1876-CC Double Eagle, AU55
Abundant Mint Frost Remains**

- 4224 1876-CC AU55 NGC. Variety 7-C.** This 1876 CC-mint double eagle is boldly impressed, and the reverse retains most of its original luster. Glints of frost also remain on the obverse, encircling the stars and filling the coronet and hair. No marks are worthy of mention, aside from a reed mark above the jaw and a thin mark above the right (facing) wing. NGC ID# 26AW, PCGS# 8977

**1877 Twenty Dollar, MS62
Inaugural Type Three Issue**

- 4225 1877 MS62 NGC.** The first year of the Type Three design, with the denomination fully spelled-out on the lower reverse. This is the highest readily accessible grade for the issue, which becomes scarce-to-rare in Select Mint State. Lustrous yellow-gold surfaces showcase complete design definition. Small abrasions peppered over each side are expected. NGC has seen 17 finer submissions (5/19). NGC ID# 2547, PCGS# 8982

**1877 Twenty Dollar, MS62
Eye-Catching Cartwheel Luster**

- 4226 1877 MS62 PCGS.** Radiant cartwheel luster engulfs this Mint State 1877 double eagle, illuminating deep orange hues around the margins and lighter yellow-gold color in the centers. The strike is sharp. Scattered abrasions limit the grade but none are individually bothersome. This issue is usually available in MS62 for a price, but PCGS lists just 19 finer representatives (5/19). NGC ID# 2547, PCGS# 8982

**1877-CC Twenty Dollar, XF45
Natural Color**

- 4227 1877-CC XF45 NGC. Variety 3-A.** Die lines at the rim near star 11 and after the top right serif of the E in AMERICA are diagnostic. Original olive-gold color and reddish accents define this Choice XF Carson City twenty. An area of struck-in grease in the right obverse field is as-made. Three reeding marks left of Liberty's eye and a mark right of star 4 are the only abrasions that deserve mention. Eye appeal is impressive. From a mintage of 42,565 coins. NGC ID# 26AZ, PCGS# 8983

- 4228 1878 MS62 PCGS. Variety 3.** Four different doubled die reverse varieties are known for the 1878 twenty. Variety 3 displays minor doubling on the reverse legends, most notably STATES OF. The present peach-gold example shows light steel-gray obverse toning across the high points and open field. Small marks are prevalent, and we note a line beneath the UNI in UNITED. NGC ID# 26B3, PCGS# 8985

**1879-S Twenty Dollar, MS61
Scarce Type Three Issue in Mint State**

- 4229 1879-S MS61 PCGS.** Despite a large mintage (more than 1.2 million pieces) and numerous repatriations from foreign holdings, the 1879-S is scarce in all Mint State grades, and rare in MS63 or finer conditions. This MS61 example shows the expected number of bagmarks and a few copper alloy spots along the rims. Full mint luster radiates from both sides across the frosted, medium-gold surfaces. NGC ID# 26B9, PCGS# 8991

- 4230 1881-S MS61 PCGS.** A challenging San Francisco issue at the MS62 level and rare in MS63 or finer grades. This MS61 example displays attractive, rose-gold color across the frosted and lustrous surfaces. Sharply struck, Liberty's hair and stars are fully defined. Tiny abrasions pepper the obverse and, to a lesser extent, the reverse. NGC ID# 26BD, PCGS# 8995

1882-CC Double Eagle, Red-Gold AU55

- 4231 1882-CC AU55 NGC. Variety 1-B. The usual die variety shows a crack through the base of TWENTY DOLLAR. This is a collectible Carson City issue despite its low mintage of 39,140 coins. Disbursements over the last few years have increased its availability. This attractive, partly lustrous Choice AU example boasts original red-gold color. A few struck-in encrustations appear on the bun and star 11. NGC ID# 26BF, PCGS# 8997

1882-CC Double Eagle, AU55
Endorsed by CAC

- 4232 1882-CC AU55 PCGS. CAC. Variety 1-B. This die pair shows a spike from Liberty's eyelid, and the second C in the mintmark is over D(OLLARS). The 1882-CC twenty, with only 39,140 coins struck, has become somewhat more available in the past couple of years, but demand continues to outpace supply. Reddish accents on the reverse accompany light yellow-gold color overall. Partial luster emanates from well-struck surfaces with scattered marks and clash marks in the fields. NGC ID# 26BF, PCGS# 8997

1882-CC Liberty Twenty, AU58
Nice Color and Luster

- 4233 1882-CC AU58 NGC. Variety 1-B. No double eagles were struck at the Carson City Mint in 1880 and 1881, and only 39,140 twenty dollar gold pieces were minted when production resumed in 1882. This attractive near-Mint example shows just a trace of wear on the high points of the design elements and the lustrous orange-gold surfaces are lightly abraded. A network of thin die cracks extends through most of the peripheral legends on the reverse. NGC ID# 26BF, PCGS# 8997

1883-CC Twenty, AU55
Variety 2-A

- 4234 1883-CC AU55 PCGS. CAC. Variety 2-A. The obverse and reverse diagnostics for the 2-A die combination are clearly visible on this Choice AU double eagle that has traces of dark patina on its brilliant and frosty yellow-gold surfaces. Myriad marks on both sides are inconsequential. NGC ID# 26BH, PCGS# 8999

1884-CC Double Eagle, AU58
Bright Mint Frost Around the Devices

- 4235 1884-CC AU58 PCGS. Variety 1-A. One die variety is known for this 81,139-coin issue. The strands of Liberty's hair show excellent delineation, as do the star radials and eagle's feathers. Luminous mint frost around the legends and motifs brightens yellow-gold surfaces that display just a hint of rub and normal chatter. NGC ID# 26BK, PCGS# 9001

1884-S Liberty Twenty, MS63
Seldom Encountered Any Finer

- 4236 1884-S MS63 PCGS. With a mintage of 916,000 pieces, the 1884-S Liberty double eagle can be located in grades up to the MS63 level without much difficulty, but the issue is elusive in finer grades. This attractive Select specimen exhibits well-detailed design elements, with just a touch of softness on the tiara. The colorful orange-gold surfaces are lustrous and lightly marked. PCGS has graded 31 numerically finer examples (4/19). NGC ID# 26BL, PCGS# 9002

**1884-S Liberty Double Eagle, MS63
Conditionally Rare in Higher Grades**

- 4237 1884-S MS63 PCGS. CAC. Ex:** The Fairmount Collection. From a mintage of 916,000 pieces, the 1884-S is not difficult to locate in grades up to the MS63 level, but finer coins are rare. This attractive Select example displays well-detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster on both sides. PCGS has graded 31 numerically finer examples (4/19). NGC ID# 26BL, PCGS# 9002

- 4238 1888 MS62 PCGS.** Philadelphia issues from the 1880s range from scarce to very rare to proof-only. The 1888 is the most available Philly twenty of the decade, but it is much more elusive in Mint State than its San Francisco cousin. This well-struck sun-gold representative exhibits the distributed minor marks typical of the MS62 level. NGC ID# 26BT, PCGS# 9008

**1889-CC Double Eagle, AU53
Popular Date-Mintmark Combo**

- 4239 1889-CC AU53 NGC. Variety 1-A.** Thin die cracks run through the base of the digits. This date-mintmark combination is always popular, owing in part to its association with the famous Morgan silver dollar. A combination of olive and red-gold color adorns each side. Mint luster remains, although it is diminished in the exposed fields. A couple of abrasions on Liberty's portrait identify the coin. NGC ID# 26BV, PCGS# 9011

- 4240 1890 MS60 Prooflike NGC. CAC.** The 1890 has a relatively low mintage (less than 76,000 pieces) and is undoubtedly elusive with mirrored fields. As of (4/19), NGC has certified only two 1890 double eagles as Prooflike; one each in the MS60 and MS62 grades. Additionally, the service has encapsulated one MS60 example as Deep Prooflike. This well-struck and flashy lemon-gold representative displays the expected number of individually minor marks. As always for the business issue, the peak of the 1 is repunched. NGC ID# 26BX, PCGS# 79013

- 4241 1890-CC XF40 NGC. Variety 1-A.** The CC mintmark is centered over the space between TWENTY and DOLLARS on this reverse die, while the other variety has the mintmark further right. The two die pairs contributed to a mintage of 91,209 double eagles. Both sides exhibit scattered handling marks on the light yellow-gold surfaces, although none of the marks are distracting. NGC ID# 26BY, PCGS# 9014

**1892-CC Coronet Twenty, VF35
Late-Date Carson City Issue**

- 4242 1892-CC VF35 PCGS. Variety 1-A.** Liberty's curls maintain mostly clear delineation and many of the star radials are defined on this Choice VF example of the sought-after 1892-CC double eagle. The apricot-gold surfaces are moderately bright. Myriad abrasions populate each side. A lower mintage Carson City issue, though more available than the 1891-CC. NGC ID# 26C6, PCGS# 9020

**1892-CC Liberty Double Eagle, AU55
Attractive CC-Mint Type Coin**

- 4243 1892-CC AU55 NGC. Variety 1-A.** Although the 1892-CC Liberty double eagle claims a relatively modest mintage, the issue is surprisingly available, due to the repatriation of a significant number of specimens from foreign holdings in recent times. This sharply detailed Choice AU specimen is lightly worn and lightly abraded and the orange-gold surfaces retain traces of original mint luster. NGC ID# 26C6, PCGS# 9020

- 4244 1893 MS63 NGC.** A sharp coin with vibrant peach-golden mint luster and surprisingly few abrasions for the grade. Eye appeal excels on this collector-grade coin. Finer 1893 Liberty Head twenties are infrequently available. NGC ID# 26C8, PCGS# 9022

- 4245 1893 MS63 NGC.** A beautifully lustrous, minimally abraded Mint State example of this Philadelphia issue, showing frosted yellow-gold surfaces and sharp design elements. Finer 1893 double eagles are elusive. This example is eye-appealing for the grade. NGC ID# 26C8, PCGS# 9022

1893-CC Liberty Head Twenty, AU53
Attractive for the Grade

- 4246 1893-CC AU53 NGC. Variety 2-A.** Glimmers of reflectivity remain in the protected portions of the fields, particularly on the reverse. Elsewhere, friction from circulation produces satiny olive-gold patina, although this Carson City double eagle lacks the bothersome abrasions typically found. Detail is sharp and eye appeal is pleasing. The Carson City Mint was shut down in 1893. The 18,402 double eagles of this date with the CC mintmark are the last coinage from the storied Nevada branch. NGC ID# 26C9, PCGS# 9023

1893-CC Double Eagle, AU53
Pleasing Color

- 4247 1893-CC AU53 PCGS. Variety 2.** The B in J.B.L. is over the right side of the 8 in the date. Semireflective red-gold surfaces are lightly hairlined. They feature attractive blue and violet accents around strongly rendered devices with faint friction. The Carson City Mint shuttered its doors shortly after it finished coining 18,402 double eagles in 1893. NGC ID# 26C9, PCGS# 9023
- 4248 1899 MS64 PCGS.** The 1899 is one of the more available, non-1904, Type Three dates, and with its 19th century date it is also one of the more popular ones. This piece displays distinctive deep reddish patina and frosted mint luster. Fully struck throughout. NGC ID# 26CM, PCGS# 9035
- 4249 1899 MS64+ PCGS. CAC.** Original, thick mint frost characterizes this impressive, near-Gem Type Three twenty. The surfaces are impressively free from abrasions with only the slightest luster breaks that prevent an even higher grade. Fully struck. NGC ID# 26CM, PCGS# 9035

1899 Liberty Twenty, MS62
Elusive Prooflike Example

- 4250 1899 MS62 Prooflike NGC.** The 1899 Liberty double eagle was produced in large numbers, but demand is strong for the issue as the last pre-1900 date of the series. This impressive MS62 example displays sharply detailed design elements and attractive canary-yellow surfaces, with much prooflike reflectivity in the fields. The usual number of minor contact marks are evident in the fields. Census: 11 in 62 (1 in 62★) Prooflike, 3 finer (4/19). NGC ID# 26CM, PCGS# 79035
- 4251 1900 MS64+ PCGS. Old Reverse.** Vibrant cartwheel luster sweeps across the lemon-gold surfaces of this boldly struck turn-of-the-century type coin. The reverse is uncommonly free from contact, while the obverse displays only unimportant marks. NGC ID# 26CP, PCGS# 9037
- 4252 1901 MS64 PCGS.** The mintage seems low — just 111,430 pieces were struck — yet the 1901 is readily available in all but the highest Mint State grades. This Choice Uncirculated example displays gleaming, orange-gold color across semireflective fields. The strike is razor sharp, while abrasions are limited to a few tiny marks and a pair of pinpoint gray flecks. NGC ID# 26CS, PCGS# 9039
- 4253 1901-S MS63 NGC.** The 1901-S Liberty double eagle is a plentiful issue in MS63, but finer coins are scarce. This sharp yellow-gold representative offers lightly marked surfaces, with vibrant mint luster and outstanding eye appeal. The fields are semiprooflike. NGC has graded 71 numerically finer examples (4/19).
Ex: Dallas Signature (Heritage, 12/2017), lot 4327, which realized \$2,280. NGC ID# 26CT, PCGS# 9040
- 4254 1902-S MS63 PCGS.** Radiant cartwheel luster engulfs this Select Mint State example, and the design elements are fully struck. The 1902-S is available in this grade as a type coin, although finer pieces are less often available. NGC ID# 26CV, PCGS# 9042
- 4255 1904 MS64+ PCGS.** Frosted, pale-olive overtones surround the central devices of this lustrous, high-end Choice twenty. Marks are limited to a few minor grazes and tiny ticks, while the PCGS Plus designation signifies superior quality for the near-Gem grade. The 1904 Liberty double eagle is the ultimate candidate for type — more than 6.2 million pieces were struck. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS65+
Quintessential Liberty Type Coin**

- 4256 1904 MS65+ PCGS.** The quintessential Liberty head double eagle issue for type representation claims the largest mintage in the series (6.2 million coins). A tick left of star 12 and another below the 0 in the date are the only apparent flaws on this high-end orange-gold Gem. Fully defined and highly lustrous with specks of crimson on the reverse. Seldom seen finer. NGC ID# 26CY, PCGS# 9045

**1904 Twenty Dollar Liberty, MS65
High-End for the Grade, CAC-Endorsed**

- 4257 1904 MS65 PCGS. CAC.** The original mintage of 6.2 million pieces ensures the availability of the 1904 twenty dollar Liberty. In addition to its abundant mintage it was also a well-produced issue, making it the go-to type coin for innumerable gold collectors. What separates one 1904 from another is the eye appeal within the given grade. In the case of this piece, that makes this a definite high-end coin. The surfaces are bright yellow-gold with a notable absence of the usually seen abrasions. Fully struck. NGC ID# 26CY, PCGS# 9045

- 4258 1904 MS62 Prooflike NGC.** While only a small fraction of surviving 1904 double eagles display prooflike fields, it is still a considerable number given the huge, 6.2 million-piece mintage. This is a flashy and sharply struck example, with light field chatter and undeniably prooflike surfaces. Gleaming rich-gold color adds to the appeal. NGC ID# 26CY, PCGS# 79045

**1904 Twenty Dollar, MS64 Prooflike
Reflective Orange-Gold Surfaces**

- 4259 1904 MS64 Prooflike NGC.** The 1904 double eagle can be found in almost any grade through MS67, with nearly a quarter-million coins graded at NGC alone. However, Prooflike pieces represent a minuscule percentage of those submissions. Profound orange-gold surfaces showcase considerable depth of field, delivering noticeable contrast against fully struck devices. This near-Gem possesses terrific eye appeal. Census: 63 in 64 (1 in 64+ Prooflike, 1 in 64★), 12 finer (4/19). NGC ID# 26CY, PCGS# 79045

- 4260 1906-S MS63+ PCGS.** Dynamic cartwheel luster illuminates this canary-gold late-date Liberty twenty. The strike is sharp and the reverse is well preserved. The left obverse exhibits moderate marks that correspond to the Select level. NGC ID# 26F6, PCGS# 9051

**1906-S Double Eagle, MS64
Few Are Known Finer**

- 4261 1906-S MS64 NGC.** Moderately available in MS64, the 1906-S double eagle is rarely found finer. NGC records just six higher-grade pieces, PCGS five (4/19). This near-Gem displays a sharp strike and radiant, frosty cartwheel luster. A few faint grazes on Liberty's cheek are all that limit the grade. Each side has original yellow-gold and peach coloration. NGC ID# 26F6, PCGS# 9051

**1907-D Double Eagle, MS64
Final Year of Liberty Head Production**

- 4262 1907-D MS64 NGC.** Demand for the 1907-D double eagle never seems to wane. After all, this is the second of only two Denver issues in the series and the final year of production for the Liberty Head twenty dollar gold piece. On the obverse, the stars are fully brought-up and the hair strands crisply detailed. The reverse stars and feathers are similarly strong. Medium yellow-gold surfaces showcase eye-appealing satin mint luster and a single tick on the chin. NGC ID# 26D8, PCGS# 9053

- 4263 1907-S MS63 PCGS.** A lovely orange-gold example of the final San Francisco Liberty issue. Sharply struck and lustrous. The portrait is moderately abraded, but the obverse field is relatively smooth. On its own, the reverse is well preserved with the eye appeal of a Gem. Certified in a green label holder. NGC ID# 26D9, PCGS# 9054

SAINT-GAUDENS DOUBLE EAGLES

- 4264 1907 MS64 PCGS.** Frosty wheat-gold luster shows only faint surface grazes under a loupe on this attractive near-Gem 1907 Arabic Numerals double eagle. The coin is well-struck and luminous with a strong cartwheel effect. An excellent type candidate. NGC ID# 26F5, PCGS# 9141

- 4265 1907 MS64 PCGS.** An attractive Choice specimen from the first year of the Saint-Gaudens design, this coin exhibits well-detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster on both sides. Eye appeal is outstanding. NGC ID# 26F5, PCGS# 9141

- 4266 1908 No Motto MS66+ PCGS.** Short Rays Obverse. A beautiful apricot-gold No Motto type coin. Well struck except for the usual slight softness on the eagle's upper leg feathers. Refreshingly free from abrasions, and a desirable example of the two-year subtype. NGC ID# 26F6, PCGS# 9142

- 4267 1908 No Motto, Wells Fargo Nevada, MS66 PCGS.** Short Rays Obverse, usual for the Wells Fargo pedigree. Narrow lime-green margins cede to peach-gold fields and motifs. Lustrous and well preserved with a good strike and a couple of minor strike-throughs on the upper obverse field. Housed in a green label holder. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142
- 4268 1908-D No Motto MS64+ PCGS. CAC.** The strike is sharp around the perimeter, including Liberty's torch hand and the Capitol. Each side displays original rose-gold and orange mint luster with a satiny cartwheel effect. Faint contact marks on the high points of Liberty's figure prevent Gem classification. NGC ID# 26F7, PCGS# 9143
- 4269 1908-D Motto MS64 PCGS.** Long Rays Obverse. Each side is surprisingly free from distracting abrasions. The softly frosted mint luster displays a layer of thin reddish patina on each side. Sharply defined throughout. NGC ID# 26F9, PCGS# 9148
- 4270 1908-D Motto MS64 PCGS.** Vibrant yellow-gold luster is the hallmark of this near-Gem 1908-D With Motto Saint-Gaudens double eagle, although a loupe also confirms above-average sharpness, especially on the fingers of Liberty's torch hand. Abrasions are unobtrusive aside from a horizontal graze in the field below Liberty's right (facing) arm. NGC ID# 26F9, PCGS# 9148
- 4271 1909/8 FS-301 — Reverse Cleaned — NGC Details. Unc.** The reverse is slightly glossy, and displays delicate hairlines near 9 o'clock. Otherwise, this sharply struck canary-gold double eagle is minimally abraded. The obverse has cartwheel luster while the reverse is satiny. The overdate is bold, as is always the case with this important variety. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151
- 4272 1909 MS63 PCGS.** A scattering of minor, grade-consistent contact marks is secondary to the glowing mint luster and vivid orange-gold color that represent this sharply struck Select Uncirculated specimen. Eye appeal is strong for the grade. The 1909 "regular" date is actually about equally as scarce as the 1909/8 overdate, although unrecognized as such by many collectors.
Ex: Beverly Hills Signature (Heritage, 11/2011), lot 4498, which realized 2,127.50. NGC ID# 26FC, PCGS# 9150
- 4273 1909-S MS64 PCGS.** Available in this grade for type purposes, the 1909-S double eagle becomes scarcer in higher grades. This Choice coin displays lustrous peach-gold surfaces and is well-struck. Light surface grazes are all that prevent Gem classification. NGC ID# 26FE, PCGS# 9153
- 4274 1909-S — Repunched Mintmark — MS64+ PCGS.** Traces of an underlying mintmark, including the top and bottom serifs, are visible beneath the bold S mintmark on the obverse of this Choice Mint State double eagle. The repunched mintmark variety differs from the more dramatic FS-501. The lustrous sun-gold surfaces are smooth except for an unobtrusive vertical mark on the upper central portion of the wings. NGC ID# 26FE, PCGS# 9153

**1909-S Twenty Dollar, MS65
Highest Collectible Grade for the Issue**

- 4275 1909-S MS65 PCGS.** Heavy melting severely reduced the total number of 1909-S twenties extant, but overseas export and repatriation have ensured the survival of several thousand examples, mainly in MS62 through MS64. A small number of Gems exist, while fewer than three dozen coins are certified at PCGS and NGC in MS66 or finer (5/19). Well-struck orange-gold surfaces glisten with softly frosted mint luster. Few marks are readily apparent, although a noticeable alloy spot occurs left of the L in LIBERTY. NGC ID# 26FE, PCGS# 9153
- 4276 1909-S/S FS-501 MS64 PCGS.** The mintmark is repunched southeast, primarily evident as two prongs below the base. A lustrous orange-gold near-Gem with vibrant cartwheel sheen and a good strike. Minor marks are scattered but do not challenge the grade. Population: 35 in 64 (2 in 64+), 8 finer (4/19). NGC ID# 26FE, PCGS# 145741 Base PCGS# 9153
- 4277 1910 MS64 PCGS. CAC.** This attractive Choice double eagle exhibits just a touch of softness on the torch, but other areas are sharply defined. The well-preserved orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. NGC ID# 26FF, PCGS# 9154
- 4278 1910-D MS65 PCGS.** The '10-D is a moderately available Denver issue that usually comes in lower grades, with Gems only occasionally available. The strike stands out on this example — a sharp example that has thick, satiny mint luster and light reddish-gold coloration. Marks are minimal and eye appeal is strong. Housed in a previous generation light-blue label holder with barcode on the back.
Ex: Dallas Signature (Heritage, 12/2004), lot 7112, which brought \$2,649.60. NGC ID# 26FG, PCGS# 9155
- 4279 1910-D MS65 NGC.** Lustrous orange-gold surfaces are present on this lovely example. The piece exhibits a strong level of detail. This is a wonderful Gem representative from an issue that is available up through this grade level, but is scarce any finer.
Ex: Long Beach Signature (Heritage, 6/2013), lot 5911. NGC ID# 26FG, PCGS# 9155

**1911 Double Eagle, MS64
Elusive in Finer Grades**

- 4280 1911 MS64 PCGS.** An available date in grades through MS64, the 1911 Saint-Gaudens double eagle is elusive finer. This piece is accessible for most collectors, and it displays pleasing eye appeal. The strike is sharp and each side has bright yellow-gold luster. A reed mark on the reverse by the O in DOLLAR is the only mentionable abrasion. NGC ID# 26FK, PCGS# 9157
-

**1911 Twenty Dollar, MS64
Strongly Defined**

4281 1911 MS64 PCGS. Hallmarks of this lovely near-Gem include medium yellow-gold color, radiant mint frost, a strong strike on Liberty's torch hand, face, and the Capitol, and clean surfaces for the grade. Fewer than 200,000 1911 double eagles were struck. The issue becomes scarce any finer than this near-Gem. NGC ID# 26FK, PCGS# 9157

4282 1911-D — Repunched Mintmark — MS65 PCGS. Not to be confused with the prominently repunched mintmark on the FS-501 *Cherrypickers'* variety, the present double eagle shows minimal evidence of an RPM. But the nicely struck pumpkin-orange surfaces team with cartwheel luster, and marks are relatively few and far between. NGC ID# 26FK, PCGS# 9158

**1911-D Twenty Dollar, MS66
Nearly Mark-Free, Frosted Surfaces**

4283 1911-D MS66 NGC. The mintage was 846,500 pieces — about half of which were used in foreign trade, split nearly evenly between European holdings and gold for agricultural products from South and Central America. Surviving examples are estimated at some 25,000 pieces, many of which are in Gem or finer grades. This is a spectacular Premium Gem, with orange-gold color and a razor-sharp strike. NGC has certified just 39 numerically finer pieces (4/19). NGC ID# 26FK, PCGS# 9158

**1911-D Twenty Dollar, MS66
Sharp and Lustrous, Seldom Finer**

4284 1911-D MS66 NGC. The 1911-D survived in remarkably high grades in unopened mint bags — especially from repatriated gold that came from South and Central America during the early 1970s. Gems are readily available and even Premium Gem coins — such as this lustrous, minimally marked example — are within the reach of most collectors. This frosted, sharply struck MS66 shows only a few minor abrasions on its lustrous, rich-gold surfaces. The eye appeal is excellent. NGC ID# 26FK, PCGS# 9158

4285 1911-D/D FS-501 MS65 NGC. Rich orange-gold and sea-green toning embraces this lustrous and well-preserved Saint-Gaudens Gem. A good strike, with clear definition on Liberty's nose and lips. The curve of the mintmark is boldly repunched east, a variety of sufficient significance to attain a *Cherrypickers' Guide* listing. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

4286 1911-D/D FS-501 MS65 PCGS. A bold strike and booming luster attest to the quality of this exemplary khaki-gold Gem. Marks are virtually absent save for a subtle scuff on the 19 in the date. The surfaces are slightly mattelike, as coined. An obvious repunched mintmark variety, with the curve of the D doubled due east. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

**1911-D/D Double Eagle, MS66
Popular *Cherrypickers'* Variety**

4287 1911-D/D FS-501 MS66 PCGS. The blatantly repunched curve of the mintmark identifies the FS-501 *Cherrypickers'* variety. The present magnificent peach-gold Premium Gem has satiny luster and fine-grained matte surfaces. The strike is full and there are virtually no marks. One speck of grease is struck in beneath the eagle's claw. Population: 53 in 66 (5 in 66+), 1 finer (4/19). NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

**1911-S Saint-Gaudens Double Eagle, MS65
Lustrous and Sharply Struck**

4288 1911-S MS65 PCGS. Near-Gem 1911-S double eagles are located rather easily, and MS65s can be had with a little more searching and patience. Finer-grade examples are elusive. Lustrous wheat-gold surfaces on this Gem exhibit sharply struck devices and a few insignificant grade-consistent marks. PCGS has graded 48 numerically finer examples (4/19). NGC ID# 26FL, PCGS# 9159

4289 1912 MS63 PCGS. A well-struck, bright yellow-gold example of this better Saint-Gaudens twenty, showing a few light abrasions that limit the grade. Only 149,700 double eagles were struck at Philadelphia in 1912, and no branch mint issues were produced. NGC ID# 26FM, PCGS# 9160

4290 1913-D MS64 PCGS. A better branch mint issue in Gem or finer grades, the 1913-D is attainable for most collectors at the MS64 level. This is a frosted, rich-gold example — refreshingly free of marks — with plentiful mint luster that reveals rose-gold and lemon-yellow highlights. The sharp strike adds to its strong eye appeal. NGC ID# 26FP, PCGS# 9162

**1914 Twenty Dollar, MS63
Low-Mintage Philadelphia Issue**

- 4291 1914 MS63 PCGS. CAC.** Soft, shimmering mint luster provides this Select 1914 double eagle with outstanding eye appeal for the grade. Only minor surface marks are present, hence the CAC endorsement. The color is a natural prairie-gold hue with attractive luminance. Only 95,250 double eagles were struck in 1914 at the Philadelphia Mint, making this a better date overall. NGC ID# 26FS, PCGS# 9164

**1914 Saint-Gaudens Twenty, MS64
Elusive Issue in Finer Grades**

- 4292 1914 MS64 PCGS.** The 1914 Saint-Gaudens double eagle claims a small mintage of 95,250 pieces, making it an elusive issue in grades above the MS64 level. This impressive Choice example displays well-detailed design elements and vibrant mint luster throughout. The orange-gold surfaces are well-preserved and appealing. PCGS has graded 45 numerically finer examples (4/19). NGC ID# 26FS, PCGS# 9164

- 4293 1914-D MS65 PCGS.** This alluring Gem specimen offers bold cartwheel luster on both sides, with attractive honey-gold patination. Examination with a loupe reveals only trivial abrasions unworthy of mention on this well-preserved piece.
Ex: Dallas Signature (Heritage, 7/2006), lot 2017, which realized \$2,127.50. NGC ID# 26FT, PCGS# 9165

**1914-D Twenty Dollar, MS65+
Vibrant Orange and Lime Color**

- 4294 1914-D MS65+ PCGS.** The 1914-D was the only wartime Denver issue. Approximately 15,000 pieces were exported overseas, where they reposited in bank vaults for many years. Gradually, they returned to the United States, but the issue remains rare at the MS65+ level. The present lustrous Gem offers rich peach and lime patina. Marks are limited to the right obverse field. NGC ID# 26FT, PCGS# 9165

- 4295 1915-S MS65 PCGS.** Smooth satin surfaces display a balance of honey-gold and greenish hues, attesting to the originality of this Gem 1915-S double eagle. The fingers on Liberty's torch hand are well-defined, and the remainder of each side also displays pleasing sharpness. NGC ID# 26FW, PCGS# 9168

- 4296 1922 MS65 PCGS.** Available in this grade, the 1922 double eagle is rare finer. PCGS lists only eight higher-grade representatives (4/19). This Gem is well-struck and satiny with orange-gold color. The only noticeable signs of contact appear on the high points of Liberty's figure. NGC ID# 26G3, PCGS# 9173

- 4297 1923-D MS65+ PCGS.** Thick, satiny mint luster shows a slight accent of reddish-gold patina on each side. The strike details are full in all areas. One mark is noted in the right obverse field. Exceptional overall quality and eye appeal. NGC ID# 26G6, PCGS# 9176

- 4298 1923-D MS65 PCGS. CAC.** The satiny mint luster has a pronounced brightness that is not usually encountered on Saints. The strike details are fully brought up and there are no obvious or detracting marks to note. NGC ID# 26G6, PCGS# 9176

**1923-D Saint-Gaudens Twenty, MS66
Excellent Branch Mint Type Coin**

- 4299 1923-D MS66 PCGS.** The 1923-D Saint-Gaudens double eagle enjoyed a substantial mintage of 1.7 million pieces and the issue is readily collectible in all grades up to the MS66 level. Finer coins are elusive. This delightful Premium Gem offers sharply detailed design elements and impeccably preserved orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. PCGS has graded 77 numerically finer examples (4/19). NGC ID# 26G6, PCGS# 9176

**1923-D Double Eagle, MS66
Clean Peach-Gold Surfaces**

- 4300 1923-D MS66 PCGS.** This is the only widely available branch mint issue from the 1920s. Burdette estimates 15,000 pieces survive, and many of them are available in Gem and Premium Gem condition. Finer coins are scarce. Well-struck devices, swirling mint luster, and clean peach-gold surfaces contribute to the appeal. A couple of abrasions appear on an around Liberty's right (facing) arm. NGC ID# 26G6, PCGS# 9176

**1923-D Saint-Gaudens Double Eagle, MS66
Vivid Color, Vibrant Mint Luster**

- 4301 1923-D MS66 PCGS.** The 1923-D Saint-Gaudens double eagle is an available issue in the series, unlike most branch mint twenties of this era. The issue becomes scarce in grades above the MS66 level, however. This spectacular Premium Gem exhibits sharply detailed design elements throughout. The vivid orange-gold surfaces radiate vibrant mint luster and a few tiny ticks on Liberty's arm are the only flaws of note. Eye appeal is terrific. PCGS has graded 78 numerically finer examples (4/19). NGC ID# 26G6, PCGS# 9176

**1923-D Double Eagle, MS66+
Colorful Accents**

- 4302 1923-D MS66+ PCGS.** Here is a glittering branch mint type coin in high-end Premium Gem condition. Radiant cartwheel mint luster swirls over the smooth, strongly defined surfaces. Accents of mint-green, powder-blue, and peach-orange provide fantastic aesthetic appeal. The 1923-D becomes scarce in higher grades. NGC ID# 26G6, PCGS# 9176

- 4303 1924 MS66+ PCGS.** With an estimated survival of 1.2 million pieces from a mintage of 4.3 million twenties, most buyers of generic gold and gold accumulators need to look no further than the 1924 issue. Nearly all survivors come from foreign holdings, filling all Mint State grade levels including the Premium Gem category. Superb Gems are scarce. This is a high-end Premium Gem, just a whisper from the Superb Gem grade. The strike is razor-sharp, while frosted surfaces display attractive, medium-gold color with green highlights. A trace of mint grime is seen beneath WE of TWENTY. NGC ID# 26G7, PCGS# 9177

- 4304 1924 MS66 NGC. CAC.** The availability of the 1924 in all grades makes it the ideal choice for type purposes. The softly frosted mint luster is immediately evident on this example, and the surfaces are exceptionally clean. Just the slightest hint of reddish patina is evident on each side. NGC ID# 26G7, PCGS# 9177

- 4305 1924-D — Cleaned — NGC Details. Unc.** Given its mintage of more than 3 million pieces, the 1924-D should be common. But unlike its 1924 cousin, most examples never left Treasury vaults and were melted after the FDR gold recall. The present piece is among the thousand-plus coins that escaped the furnaces, typically via storage in foreign banks. The sharply struck and lustrous olive-gold mattelike surfaces display few marks. NGC ID# 34VF, PCGS# 9178

**1924-D Double Eagle, MS62
Popular and Scarce D-Mint Issue**

- 4306 1924-D MS62 NGC.** The 1924-D was once a great rarity, before a number of coins surfaced in European holdings, and high-grade examples are still scarce. This attractive MS62 specimen exhibits well-detailed design elements, with a touch of softness on the peripheral devices. The lustrous surfaces show a scattering of grade-consistent contact marks, mostly on the obverse. *Ex: Fall ANA Signature (Heritage, 10/2012), lot 6422; FUN Signature (Heritage, 1/2014), lot 7391.* NGC ID# 34VF, PCGS# 9178

- 4307 1925 MS66 PCGS.** The color of this Premium Gem 1925 double eagle is captivating, supporting the remarkable preservation of the MS66 grade. Luminescent green-gold and lemon hues join richer orange-gold and peach in the fields, while the design elements are sharply struck. There are no distracting abrasions. PCGS has seen only seven numerically finer submissions (4/19). NGC ID# 26GA, PCGS# 9180

- 4308 1926 Tripled Die Obverse, FS-101, MS64 PCGS.** Evidence of a tripled die is most apparent on the Saint-Gaudens monogram. A peach-gold representative with dynamic cartwheel luster and a sharp strike. Marks are relatively few and far between, even by the strict standards of the MS64 grade. NGC ID# 26GD, PCGS# 145744 Base PCGS# 9183

- 4309 1926 Tripled Die Obverse, FS-101, MS64 PCGS.** Die tripling is apparent on the designer's monogram, the rays near the date, and the tail of the 9. Some 1926-S twenties exhibit identical tripling, which suggests a working obverse hub may have been responsible for both varieties. This Choice 1926 double eagle displays lustrous butter-gold surfaces. The strike is bold, and the sole reportable contact is on the sun. NGC ID# 26GD, PCGS# 145744 Base PCGS# 9183

**1926 Double Eagle, MS66
Tripled Die Obverse, FS-101**

- 4310 1926 Tripled Die Obverse, FS-101, MS66 PCGS.** In conducting research for his new series reference Roger Burdette found that Tripled Die Obverse examples made up roughly 10% of the 1926 double eagles examined. Tripling is strongest at the lower right on the rays, date, and monogram. This Premium Gem is smooth and frosty. Peach-gold color dominates each side. A small hit obscures much of the Capitol dome. Population: 19 in 66 (2 in 66+), 0 finer (4/19). NGC ID# 26GD, PCGS# 145744 Base PCGS# 9183

4311 1927 MS65 PCGS. CAC. Potent cartwheel luster sweeps the lemon-gold and olive-green surfaces of this boldly struck and CAC-approved Gem. Delicate grazes on the obverse field account for the grade. The 1927 has about one-third the mintage of its 1928 successor, but is regarded as a type coin. Encapsulated in an old green label holder. NGC ID# 26GG, PCGS# 9186

4312 1928 MS66 PCGS. Readily available at the Premium Gem level (but scarce any finer), the 1928 issue is a go-to Saint-Gaudens date for high-grade gold accumulators and type collectors alike. This is a smoothly frosted example, with rose and green highlights across pleasing, straw-gold surfaces. The coin is sharply struck with minimal marks and outstanding eye appeal. NGC ID# 34VK, PCGS# 9189

1928 Double Eagle, MS66+ Eye-Appealing Type Coin

4313 1928 MS66+ PCGS. Spectacular cartwheel luster plays across unabraded surfaces on this high-end Premium Gem type coin. Each side boasts sharp devices and rich orange-gold and peach coloration. A strong loupe reveals very minute die doubling of the 28 in the date, Saint-Gaudens' monogram, and the right-hand stars. It is less prominent than the HA-1 doubled die variety listed in Roger Burdette's *Saint-Gaudens Double Eagles*. NGC ID# 34VK, PCGS# 9189

COMMEMORATIVE SILVER

1893 Isabella Quarter, MS67 Vivid Multicolor Toning

4314 1893 Isabella Quarter MS67 NGC. Vivid shades of magenta, blue, and golden-brown toning blanket the virtually flawless surfaces of this spectacular Superb Gem. The design elements are sharply detailed throughout and vibrant mint luster shines through the patina. Overall eye appeal is terrific. From a distribution of 24,214 pieces. Census: 53 in 67 (8 in 67★, 1 in 67+★), 8 finer (4/19). NGC ID# BYJ9, PCGS# 9220

4315 1900 Lafayette Dollar MS64 NGC. DuVall 1-B. Delicate tan-gold toning adorns lustrous and splendidly smooth surfaces. A bold strike further proclaims the quality. One tiny spot on the hindquarters of the horse serves as an identifier. The Lafayette type is the only silver dollar entry in the classic silver commemorative series. NGC ID# BYKW, PCGS# 9222

1900 Lafayette Dollar, MS65 Radiant Frost-White Mint Luster DuVall 1-B Type Coin

4316 1900 Lafayette Dollar MS65 PCGS. DuVall 1-B. An entirely brilliant, radiantly lustrous Gem example of this early classic commemorative, showing a sharp strike and well-preserved surfaces. Only some faint grazes on Washington's portrait prevent consideration of an even finer grade. As a type, the Lafayette dollar is an important part of the classic commemorative series, being the only silver dollar therein. However, collectors also pursue this issue as a variety set. DuVall 1-B is a frequently seen variety, but not so much in this grade. NGC ID# BYKW, PCGS# 9222

1900 Lafayette Dollar, Brilliant MS65 DuVall 2-C Type Coin

4317 1900 Lafayette Dollar MS65 PCGS. DuVall 2-C. This is a plentiful variety, suitable for type representation. The attribution points are the placement of the branch above the date and the presence of doubling on the final S in STATES on the obverse. Lafayette dollars as a whole are scarce finer than MS65, making this grade ideal for most collectors. The present coin is sharp and brilliant with satiny mint luster. No distracting abrasions are observed. Housed in a green label holder. NGC ID# BYKW, PCGS# 9222

4318 1937 Arkansas MS67 PCGS. Strike detail on this frosty Superb Gem is as strong as can be expected for an Arkansas half dollar, which usually shows incompleteness on the brow, headbands, eagle's legs, and central feathers. Marks, too, are surprisingly scant. Cream-gray centers yield to blushes of golden patina around the borders. There are no numerically finer pieces certified at PCGS. Population: 19 in 67 (1 in 67+), 0 finer (4/19). NGC ID# BYFB, PCGS# 9241

**1938 Arkansas Half Dollar, MS67
Paltry Distribution, None Finer**

- 4319 1938 Arkansas MS67 PCGS.** Distribution for the 1938 Arkansas half dollar was 3,156 coins. This is one of the 20 highest-graded examples at PCGS. Satiny surfaces are mainly brilliant, although flecks of tan-gold color appear on each side and iridescent accents grace the obverse edges. Population: 20 in 67 (2 in 67+), 0 finer (4/19).

From The Cedar Crest Collection, Part II. NGC ID# BYFE, PCGS# 9245

**1936-S Bay Bridge Half Dollar, MS67+
Luminous Surfaces, Original Toning**

- 4320 1936-S Bay Bridge MS67+ PCGS. CAC.** A minority of the 1936-S Bay Bridge half dollars in MS67 are Plus-graded, and CAC coins are equally sought-after. This piece offers both designations, and only 13 finer coins are listed at PCGS (4/19). A dusting of russet and golden toning covers each side, with delicate lilac and greenish accents visible beneath a loupe. Neither side has bothersome abrasions and eye appeal is outstanding. NGC ID# BYFM, PCGS# 9254

- 4321 1935 Boone MS67+ PCGS. CAC.** A hint of pastel toning graces the satiny surfaces of this high-end 1935 Boone half dollar. The strike is sharp and neither side has bothersome abrasions. This issue is scarce so fine, and no higher-grade pieces are reported at PCGS. Population: 81 in 67 (9 in 67+), 0 finer. CAC: 31 in 67, 1 finer (4/19).

From The Cedar Crest Collection, Part II. NGC ID# BYFR, PCGS# 9258

- 4322 1936-S Boone MS67+ PCGS. CAC.** Attractive cherry-red, lemon-gold, and apple-green toning embraces the borders of this lustrous and fully struck Superb Gem. Marks are essentially absent, and the eye appeal is exceptional. CAC: 32 in 67, 2 finer (4/19). NGC ID# BYG2, PCGS# 9268

- 4323 1938-D Boone MS67+ PCGS. CAC.** The final-year Boone PDS set has among the lowest mintages of any silver commemorative issue, only slightly higher than 1935-D and 1935-S varieties with 1934 in the field. The present boldly struck Superb Gem displays attractive pastel wheat-gold, rose-red, and lime-green toning. PCGS has certified 9 pieces as MS67+ and only 5 pieces finer (4/19). NGC ID# BYG7, PCGS# 9275

- 4324 1925-S California MS67 PCGS.** Rich cobalt-blue and ruby-red shades encompass the borders of this lustrous and lofty-graded commemorative half dollar. The strike is full, and study beneath a lens fails to locate any consequential contact. NGC ID# BYGA, PCGS# 9281

**1925-S California Half Dollar, MS67+
High-End and Beautifully Toned**

- 4325 1925-S California MS67+ PCGS.** Richly toned and razor-sharp, this Plus-graded Superb Gem California half is one of just a dozen pieces to be so-graded at PCGS, and only a half-dozen examples are certified finer (4/19). Colorful iridescence exists within dappled shades of orange, pale-blue, and lavender-gray that blanket both sides. Marks are simply nonexistent, while the strike on the central motifs is nothing short of extraordinary. NGC ID# BYGA, PCGS# 9281

- 4326 1925-S California MS67 PCGS. CAC.** Delicate green and rose hues intrude upon mainly golden toning on this CAC-approved Superb Gem. Sharp devices and satiny mint luster complement the exceptional preservation. The California Diamond Jubilee half dollar is scarce in this grade, and PCGS has seen only a half dozen finer representatives. CAC: 76 in 67, 2 finer (4/19). NGC ID# BYGA, PCGS# 9281

**1936-D Columbia Half Dollar, MS68
Delicately Toned, None Numerically Finer**

- 4327 1936-D Columbia MS68 PCGS. CAC.** Both sides are delicately toned in blue, lavender, golden-orange, and crimson hues while maintaining significant brilliance. The surfaces are absolutely smooth and the devices fully struck. This D-mint Columbia half dollar is one of 8,009 pieces distributed. Population: 34 in 68 (5 in 68+), 0 finer. CAC: 16 in 68, 0 finer (4/19).

From The Cedar Crest Collection, Part II. NGC ID# BYGD, PCGS# 9292

1892 Columbian Half Dollar, PR63
Modest Field-Device Contrast
Rare in Proof Format

4328 1892 Columbian PR63 PCGS. Approximately 100 proof examples of the 1892 Columbian half dollar were struck. They can be distinguished from prooflike business strikes by examining the depth of mirroring in the fields and the sharpness of the intricate design details. On the reverse, proofs have fully delineated ribs on the sails, as well as needle-sharp definition of the ship's rigging and of the waves — characteristics not seen on the typical business strike. This Select proof shows all these elements with clarity, and the depth of mirroring is outstanding. The coin is brilliant aside from a tinge of light golden border toning, and although graded only PR63, the coin — housed in a green label holder — nonetheless displays appreciable field-device contrast on each side. Population: 18 in 63, 27 finer; 0 in 63 Cameo, 1 finer (4/19). NGC ID# BYMW, PCGS# 9295

4329 1893 Columbian MS67 PCGS. Shimmering luster on this beautifully preserved Superb Gem complements vivid rainbow toning around the margins. The interiors are untuned, allowing for full appreciation of the well-struck devices. The 1893 Columbian half dollar is scarce in MS67, and no numerically finer coins are reported at PCGS. Population: 43 in 67 (6 in 67+), 0 finer (4/19). NGC ID# BYGG, PCGS# 9297

4330 1893 Columbian MS67 PCGS. This Superb Gem is among the finest 1893 Columbian half dollars in a PCGS holder. The strike is solid, and neither side of the coin has abrasions. Original peach-gold, mint-green, sky-blue, and amber toning surrounds the borders, leaving the interiors mainly brilliant. Population: 43 in 67 (6 in 67+), 0 finer (4/19). NGC ID# BYGG, PCGS# 9297

4331 1936 Delaware MS67+ PCGS. CAC. A spectacular Delaware half dollar with satiny luster and dusky golden toning. The coin is sharp and beautifully preserved. Scarce in high grade, this 1936 commemorative is rare finer than the present coin. CAC: 76 in 67, 2 finer (4/19).
From The Cedar Crest Collection, Part II. NGC ID# BYGJ, PCGS# 9301

4332 1936 Gettysburg MS67 PCGS. Intermittent almond-gold and tan-brown toning dapples the lilac-silver surfaces of this 1936 Gettysburg Anniversary half. The soldiers' cheekbones and the top of the Union shield are particularly well-defined. Soft luster glows beneath attractive, light toning, while carefully preserved fields and devices show only two or three tiny marks of any kind — none of which detract from the Superb Gem surface quality. PCGS reports just three finer pieces (4/19). NGC ID# BYGM, PCGS# 9305

4333 1936 Gettysburg MS67 PCGS. CAC. Blushes of forest-green, cherry-red, and orange-gold illuminate the margins of this Civil War-themed Superb Gem. The lustrous fields and motifs are nicely struck and essentially immaculate. Commemorative issues flooded the numismatic hobby during 1936, but the Gettysburg is scarcest of all save for the Cincinnati PDS trio. CAC: 55 in 67, 1 finer (4/19). NGC ID# BYGM, PCGS# 9305

4334 1922 Grant No Star MS66+ PCGS. Lovely rainbow toning clings to the peripheries on this high-en No Star Grant half dollar, while satiny luster is mainly untuned across the interiors. This is a well-struck type coin with exceptional preservation. Finer pieces are scarce.

From The Cedar Crest Collection, Part II. NGC ID# BYGP, PCGS# 9306

4335 1922 Grant No Star — Minor Planchet Flaw at 8:00 — MS67 PCGS. A small rim flaw is apparent near the N in IN and the H in HALF. This unimportant mint-made feature has no effect on the eye appeal or the technical grade of this outstanding Superb Gem. Pastel olive-gold, chestnut-tan, slate-gray, and plum patina graces unmarked fields and strong devices. Population: 79 in 67 (10 in 67+), 0 finer (3/19).

1922 Grant Half Dollar, MS66
With Star, Green CAC Sticker

4336 1922 Grant With Star MS66 PCGS. CAC. Iridescent rim toning fades to mostly brilliant centers with faint traces of powder-blue and lavender color. Both sides are satiny and razor-sharp without any obvious imperfections. With Star halves are much scarcer in top grades than their No Star counterparts. Population: 53 in 66 (8 in 66+), 5 finer. CAC: 14 in 66, 3 finer (4/19).

From The Cedar Crest Collection, Part II. NGC ID# BYPP, PCGS# 9307

4337 1928 Hawaiian MS63 PCGS. Among all classic silver commemorative types, the Hawaiian has the lowest mintage, though the Hudson and Spanish Trail are close behind. The Hawaiian is considerably scarcer, due to non-collector distribution in what became the 50th state. This Select example is mostly pearl-gray with hints of peripheral gold patina. Housed in a green label holder. NGC ID# BYGR, PCGS# 9309

1928 Hawaiian Half Dollar, MS65
Satiny and Mostly Brilliant

4338 1928 Hawaiian MS65 PCGS. This mostly brilliant Gem example of the key Hawaiian half dollar showcases satiny mint luster and splashes of coppery toning across Captain Cook's bust. A few small ticks under HAWAII and a reeding mark on the left reverse volcano are the only ones seen. Slight softness occurs on the indigenous warrior's hand, but the rest of this coin is strongly defined. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half Dollar, MS65
Silver Commemorative Key**

4339 1928 Hawaiian MS65 PCGS. From a small distribution of 9,958 pieces, the 1928 Hawaiian half dollar is one of the keys to the silver commemorative series. This delightful Gem exhibits sharply detailed design elements and vibrant mint luster throughout. The well-preserved surfaces show subtle highlights of pale gold toning. Eye appeal is outstanding. NGC ID# BYGR, PCGS# 9309

4340 1918 Lincoln MS67 PCGS. A colorful example with vibrant ruby-red toning throughout the obverse margin. The portrait and nearby field are sea-green. The reverse shows light powder-blue and tan-gold toning prevalent near the rims. The fully struck surfaces are smooth save for delicate contact on Lincoln's cheekbone. NGC ID# BYGU, PCGS# 9320

4341 1936 Long Island MS67 PCGS. Richly toned in rainbow shades from its original cardboard sleeve of issue, this "tab-toned" Superb Gem displays natural eye appeal seldom seen on a Long Island half. The underlying colors coalesce at the obverse borders in a deep-plum hue, leaving a center dot of similar toning against amber-orange and yellow shades. The reverse colors intermingle in a spectacular array of lustrous patina. Scarce at this grade level, and unknown in numerically finer grades. Population: 99 in 67 (14 in 67+), 0 finer (3/19). NGC ID# BYGX, PCGS# 9322

**1936 Lynchburg Half Dollar, MS67+
One Finer Example at PCGS**

4342 1936 Lynchburg MS67+ PCGS. CAC. Lynchburg native Carter Glass was still serving as a Virginia senator when his likeness was featured on this 1936 commemorative half dollar, making him one of the few people in American history to be so-honored. Powder-blue and tan-gold colors complement the satiny, nearly flawless surfaces of this Superb Gem. A single coin is graded higher at PCGS, and this is one of the finest examples with a green CAC sticker (5/19).

From The Cedar Crest Collection, Part II. NGC ID# BYDJ, PCGS# 9324

4343 1920 Maine MS67 NGC. The Maine Centennial half dollar seldom comes this well-preserved, and finer pieces are nearly unknown. This coin displays luminous satin luster and a bold strike. Neither side has a single mentionable abrasion, adding to the incredible eye appeal. Census: 40 in 67 (3 in 67+, 5 in 67★), 1 finer (4/19). NGC ID# BYGY, PCGS# 9326

**1934 Maryland Half Dollar, MS67+
Lustrous and Essentially Mark-Free, CAC**

4344 1934 Maryland MS67+ PCGS. CAC. The three-quarters portrait of Cecil Calvert (Lord Baltimore) occupies the obverse, opposed by the state seal of Maryland and its motto on the reverse. Rippled fields are lustrous and frosted, showing noticeably few marks for the issue and a crisp strike. Silver surfaces are bounded by bluish-gray toning that with faint russet hues on the reverse. This example is CAC-endorsed and tied for finest at PCGS. Population: 83 in 67 (12 in 67+), 0 finer. CAC: 54 in 67, 0 finer (4/19). NGC ID# BYGZ, PCGS# 9328

4345 1921 Missouri MS65+ PCGS. The Missouri ranks among the scarcer silver commemorative types. The present lustrous Gem has a band of deep forest-green toning on the upper reverse, though the remainder of the coin is nearly brilliant. The fields display die polish lines but are practically free from contact. NGC ID# BYH2, PCGS# 9330

**1921 Missouri Half Dollar, MS66
'2x4' in the Field, Tied for Finest at PCGS**

4346 1921 Missouri 2x4 MS66 PCGS. Halos of multicolor toning surround the frontiersman on the obverse and the Native Americans on the reverse. This 2x4 Missouri Centennial half dollar is smooth and awash in satiny mint luster. The population declines substantially at this level, and a single NGC-graded coin is known finer. Population: 47 in 66 (4 in 66+), 0 finer (4/19).

From The Cedar Crest Collection, Part II. NGC ID# 2FE9, PCGS# 9331

1923-S Monroe Doctrine Half Dollar
Luminous MS66+

4347 1923-S Monroe MS66+ PCGS. Frosty luster shimmers across beautifully preserved surfaces on this high-end Premium Gem, complementing well-detailed devices and delicate pastel toning. Eye appeal is just spectacular. The 1923-S Monroe Doctrine Centennial half dollar boasts a substantial distribution of more than 274,000 coins, yet it is remarkably scarce in the upper Mint State grades. PCGS lists only 10 pieces finer than this Plus-designated coin (4/19). NGC ID# BYH4, PCGS# 9333

4348 1936 Norfolk MS68+ PCGS. A magnificent Plus-graded MS68 example, with sharply detailed design elements and vibrant mint luster throughout. The impeccably preserved surfaces display brilliant centers that cede to shades of greenish-gold and magenta around the rims for exquisite eye appeal. PCGS has graded only two numerically finer examples (4/19). NGC ID# BYH5, PCGS# 9337

4349 1926 Oregon MS67+ PCGS. CAC. Among the most famous commemorative designs, the Oregon Trail was designed by the husband-and-wife team of James Earle Fraser and Laura Gardin Fraser. This sharply struck and unblemished Superb Gem displays attractive cherry-red, jade-green, and wheat-gold toning across the margins. NGC ID# BYH6, PCGS# 9340

4350 1938-D Oregon MS68 PCGS. The lightly toned, satiny surfaces show glints of cinnamon and gold more prominently at the rims on this beautifully preserved 1938-D Oregon Trail half, a high-end survivor from the original issue of about 6,000 pieces. A couple of finer coins are theoretically available, but the search will be long and the acquisition will be out of reach for most collectors. This piece is visually and technically impressive. Population: 50 in 68 (9 in 68+), 3 finer (4/19).

Ex: New York Signature (Heritage, 2/2014), lot 4423, which realized \$3,040.90. NGC ID# BYHJ, PCGS# 9349

1939-D Oregon Trail Half Dollar, MS68
3,004 Coins Distributed

4351 1939-D Oregon MS68 PCGS. Oregon Trail half dollars were struck sporadically between 1926 and 1939, with this final-year Denver issue claiming a low distribution of 3,004 coins. This satiny, fully struck, and nearly unabraded Superb Gem is essentially brilliant, save for daubs of golden-orange rim toning. Population: 33 in 68 (6 in 68+), 0 finer (4/19).

From The Cedar Crest Collection, Part II. NGC ID# BYHM, PCGS# 9353

1921 Pilgrim Tercentenary Half Dollar
Low Distribution, MS67+

4352 1921 Pilgrim MS67+ PCGS. The Pilgrim Tercentenary half dollars were produced in 1920 and 1921, with only the latter coins showing the date in the left obverse field. Merely 20,053 pieces were distributed in 1921 compared to more than 150,000 in 1920. Colorful borders frame dove-gray, softly frosted centers without any mentionable marks. Population: 57 in 67 (10 in 67+), 1 finer (4/19). NGC ID# BYHS, PCGS# 9360

1937 Roanoke Half Dollar, MS68
Void of Discernable Flaws

4353 1937 Roanoke MS68 PCGS. The obverse features a brilliant center that anchors rich purple, crimson, orange, and forest-green toning around the rims. Similar shades coalesce throughout the entire reverse. Fully struck without any discernable flaws. Population: 28 in 68 (1 in 68+), 0 finer (4/19).

From The Cedar Crest Collection, Part II. NGC ID# BYHW, PCGS# 9367

1926 Sesquicentennial Half, MS65+
Lovely Pastel Toning

4354 1926 Sesquicentennial MS65+ PCGS. CAC. Rainbow iridescence at the margins yields to shades of gold, lilac, and a few deep-gray speckles that comprise the attractive, natural patina of this high-end Gem Sesquicentennial half dollar. Smooth, satiny luster coruscates within the colorfully toned, sloped borders. It will be challenging to improve on this Plus-graded example with CAC endorsement, since notably few coins are any finer from the mintage of 141,120 pieces. PCGS lists 13 finer pieces. CAC: 94 in 65, 6 finer (4/19). NGC ID# BYJ4, PCGS# 9374

**1926 Sesquicentennial Half Dollar, MS65+
Originally Toned**

4355 1926 Sesquicentennial MS65+ PCGS. CAC. The 1926 Sesquicentennial half dollar enjoyed a substantial distribution of 141,120 pieces but the issue is definitely rare in grades above the MS65 level. This Plus-graded Gem exhibits well-detailed design elements and well-preserved, lustrous surfaces, under shades of golden-brown and lavender-gray toning. PCGS has graded 13 numerically finer examples (5/19). NGC ID# BYJ4, PCGS# 9374

4356 1934 Texas MS67+ PCGS. CAC. While many Texas Independence Centennial halves exist with untoned or minimally toned surfaces, this high-end Superb Gem presents lustrous, originally toned fields and devices of outstanding eye appeal. Well struck for the issue, the coin is Plus-graded by PCGS and CAC-endorsed. Glimmers of silver punctuate openings in the iridescent shades that occupy the obverse and speckle the reverse. Population: 16 in 67+, 2 finer. CAC: 66 in 67, 0 finer (3/19). NGC ID# BYJ7, PCGS# 9381

4357 1935-S Texas MS67+ PCGS. CAC. Beautiful satin luster is especially luminous on the obverse of this high-end Texas half dollar, yielding a hint of champagne toning. PCGS has seen only two finer 1935-S coins, and the CAC endorsement makes this Plus-graded Superb Gem all the more appealing. CAC: 89 in 67, 2 finer (4/19).

From The Cedar Crest Collection, Part II. NGC ID# BYJD, PCGS# 9384

4358 1937-S Texas MS67+ PCGS. CAC. The 1937-S Texas half is scarce in this grade, and PCGS has seen only a single finer coin (5/19). This piece is among the finest with CAC approval. Sharply struck and satiny, the interiors display light sky-blue tinting. The border regions have warmer peach-gold color.

From The Cedar Crest Collection, Part II. NGC ID# BYJK, PCGS# 9392

4359 1937-S Texas MS68 NGC. The Texas half dollar (1934-1938) features one of the most popular designs in the classic commemorative series. This Superb Gem example of the 1937-S (6,637 coins distributed) exhibits pale gold, orange, and green patina over much of the obverse, especially around the rims, while the reverse is brilliant and frosty. A marvelous coin for a fine Registry Set. Census: 10 in 68 (1 in 68★), 0 finer (4/19). NGC ID# BYJK, PCGS# 9392

4360 1938 Texas MS67+ PCGS. CAC. A scarce Superb Gem example of this Philadelphia issue, boasting CAC endorsement and a PCGS Plus designation. The coin is sharp and satiny with delicate pastel toning. Population: 81 in 67 (13 in 67+), 1 finer. CAC: 47 in 67, 1 finer (4/19). NGC ID# BYJL, PCGS# 9394

4361 1938-D Texas MS67+ PCGS. CAC. The faintest trace of pastel color warms the satiny surfaces of this high-end Superb Gem. Each side is sharp and unabraded. The 1938-D Texas half is scarce this fine, and PCGS lists only three higher-grade representatives (5/19).

From The Cedar Crest Collection, Part II. NGC ID# BYJM, PCGS# 9395

4362 1938-D Texas MS67+ PCGS. CAC. Sharply struck with pastel iridescence across each side. This CAC coin has luminous satin luster and is devoid of abrasions. Registry and type collectors should pay attention to this piece, as only three coins are finer at PCGS. CAC: 65 in 67, 2 finer (4/19). NGC ID# BYJM, PCGS# 9395

4363 1925 Vancouver MS67 PCGS. CAC. The 1925 Vancouver half dollar is scarce above the MS66 grade level. Attractive toning in shades of golden-orange, cherry-red, forest-green, aquamarine, lemon-yellow, green-gray, and russet, primarily at the outer edges, adds to the visual allure of this Superb Gem. The piece displays deep satin luster that further enhances the appearance. Population: 82 in 67 (16 in 67+), 3 finer. CAC: 42 in 67, 0 finer (4/19).

Ex: Central States Signature (Heritage, 4/2013), lot 2980, which realized \$4,700; ANA Signature (Heritage, 8/2015), lot 6686, which realized \$2,115. NGC ID# BYJP, PCGS# 9399

**1951-D Booker T. Washington Half Dollar
Colorful Border Toning, None Certified Finer**

4364 1951-D Booker T. Washington MS67+ PCGS. CAC. Vivid multicolor tab toning appears in the margins of this high-end Superb Gem type coin, complementing silver-white interiors and satiny mint luster. The strike is sharp and each side is beautifully preserved. This is among the finest-certified 1951-D Booker T. Washington half dollars and it is scarce as such. Few other pieces are Plus-designated in this grade. Population: 49 in 67 (5 in 67+), 0 finer. CAC: 48 in 67, 0 finer (4/19). NGC ID# BYKA, PCGS# 9425

**1953-D Washington-Carver Half Dollar
Registry-Worthy MS66+**

4365 1953-D Washington-Carver MS66+ PCGS. CAC. The 1953-D shares the lowest mintage in the Washington-Carver commemorative half dollar set. Only 8,003 coins were distributed. Of those, examples at this level are scarce and each grading service reports just two coins finer (5/19). Satiny surfaces are mostly brilliant with splashes of pale golden color and hints of iridescent patina along the rims. Rarely found this nice with CAC endorsement.

From The Cedar Crest Collection, Part II. NGC ID# BYL7, PCGS# 9439

**1953-S Washington-Carver Half, MS67
Among the Best Examples at PCGS**

4366 1953-S Washington-Carver MS67 PCGS. The San Francisco Mint coined a substantial 88,020 Washington-Carver halves in 1953 — 11 times as many as were struck at Philadelphia and Denver. The frosty surfaces of this Superb Gem maintain their brilliance and display glints of gold along the left margins. Population: 17 in 67 (2 in 67+), 0 finer (4/19). NGC ID# 332B, PCGS# 9440

4367 1936 York MS68 PCGS. This stunning MS68 silver commemorative exhibits virtually pristine surfaces, with vibrant mint luster and sharply detailed design elements, under attractive shades of lavender, burnt-orange, and pale gold toning. Population: 36 in 68 (4 in 68+), 1 finer (4/19). *From The Cedar Crest Collection, Part II.* NGC ID# BYKV, PCGS# 9449

COMMEMORATIVE GOLD

**1903 Louisiana Purchase Gold Dollar, MS67+
Jefferson Type, Elusive This Fine**

4368 1903 Louisiana Purchase, Jefferson Gold Dollar MS67+ PCGS. CAC. The Louisiana Purchase issues, which revived an abolished denomination and displayed the nation's first gold commemorative designs, were minted to the maximum quantity permitted by the authorizing law, and the distributors had high hopes for sales; however, the vast majority of pieces struck were later melted. This Superb Gem survivor is boldly impressed throughout, and the strongly lustrous yellow-gold surfaces offer occasional canary accents. Exquisitely preserved with elegant and undeniable visual appeal. PCGS has graded no numerically finer examples (4/19). NGC ID# BYLD, PCGS# 7443

4369 1903 Louisiana Purchase, McKinley Gold Dollar MS66+ PCGS. CAC. Many examples of the McKinley version of the 1903 Louisiana Purchase gold dollar have survived in high grade from the distribution of 17,500 pieces. This Plus-graded Premium Gem exhibits sharp definition on the design elements and the well-preserved orange-gold surfaces radiate vibrant mint luster throughout. *From The Cedar Crest Collection, Part II.* NGC ID# BYLE, PCGS# 7444

**1915-S Gold Dollar, MS67
Panama-Pacific Issue**

4370 1915-S Panama-Pacific Gold Dollar MS67 PCGS. The mintmark is repunched southeast. This entry in the extensive series of gold and silver commemoratives issued for the Panama-Pacific International Exposition exhibits a canal worker on the obverse. That design has caused great confusion over the years as some have said the gentleman is a miner, and others have said he was a baseball player. Call it what you will, but this Superb Gem is a brilliant and lustrous yellow-gold beauty. Population: 83 in 67 (3 in 67+), 0 finer (3/19). NGC ID# BYLH, PCGS# 7449

**1915-S Quarter Eagle, MS64
Panama-Pacific Exposition**

4371 1915-S Panama-Pacific Quarter Eagle MS64 PCGS. Rich peach patina endows lustrous and sharply struck surfaces. A well-preserved Choice classic commemorative. The design is a joint effort by U.S. Mint engravers Charles Barber and George Morgan. Morgan's eagle is borrowed from the famous "Schoolgirl" silver dollar pattern, Judd-1608. Certified in a green label holder. NGC ID# BYLP, PCGS# 7450

4372 1916 McKinley Gold Dollar MS67 PCGS. The 1916 McKinley gold dollar claims a small distribution of 9,977 pieces. This spectacular Superb Gem exhibits well-detailed design elements and impeccably preserved orange-gold surfaces, with vibrant mint luster throughout. PCGS has certified no numerically finer examples (4/19). NGC ID# BYLK, PCGS# 7454

4373 1917 McKinley Gold Dollar MS66+ PCGS. CAC. The 1917 McKinley gold dollar is not difficult to locate in MS66 condition, but the issue becomes elusive in higher grades. This Plus-graded Premium Gem displays well-detailed design elements and impeccably preserved orange gold surfaces, with vibrant mint luster and outstanding eye appeal. *From The Cedar Crest Collection, Part II.* NGC ID# BYLL, PCGS# 7455

4374 1922 Grant Gold Dollar, No Star, MS66+ PCGS. CAC. The undisturbed caramel-gold surfaces of this Grant No Star gold dollar teem with luster. Swirling die polish lines appear under a loupe, which also shows no discernible contact. The strike is sharp throughout. *Ex: Philadelphia Signature (Heritage, 8/2012), lot 4291, which realized \$3,172.50.* NGC ID# BYLN, PCGS# 7458

4375 1922 Grant Gold Dollar, No Star, MS66+ PCGS. CAC. Only 5,000 Grant, No Star gold dollars were struck in 1922, but the issue was saved by contemporary collectors and many high-grade specimens have survived. This Plus-graded Premium Gem displays sharply defined design elements and impeccably preserved orange-gold surfaces, with radiant mint luster and outstanding eye appeal. *From The Cedar Crest Collection, Part II.* NGC ID# BYLN, PCGS# 7458

4376 1922 Grant Gold Dollar, With Star, MS66 PCGS. CAC. A lovely green-gold representative of Laura Gardin Fraser's multi-denominational design. A loupe reveals only minuscule imperfections. As always, the strike is incomplete on the tree trunk near the frame house window. *Ex: Central States Signature (Heritage, 4-5/2016), lot 6319, which realized \$2,012.78.* NGC ID# BYPS, PCGS# 7459

4377 1922 Grant Gold Dollar, With Star, MS66 PCGS. CAC. The 1922 Grant With Star gold dollar claims a small distribution of 5,016 pieces, but the issue enjoyed a high survival rate and it is not difficult to locate at the MS66 grade level. This attractive Premium Gem exhibits sharp definition on all design elements and the nearly flawless orange-gold surfaces are lustrous and appealing. *From The Cedar Crest Collection, Part II.* NGC ID# BYPS, PCGS# 7459

1922 Grant With Star Gold Dollar, MS67
Mintage Only 5,016 Pieces

4378 1922 Grant Gold Dollar, With Star, MS67 PCGS. This is a spectacular example of an always-popular gold commemorative, with splendidly original, satin-smooth surfaces and a razor-sharp strike. Just 5,016 pieces were distributed of the With Star variant, and few can match the Superb Gem quality of this well-preserved survivor. PCGS reports just five numerically finer pieces certified (4/19). NGC ID# BYPS, PCGS# 7459

1922 Grant Gold Dollar, MS67
Textured Orange-Gold Surfaces, With Star

4379 1922 Grant Gold Dollar, With Star, MS67 PCGS. The textured, unabraded surfaces of this orange-gold Superb Gem display coppery blushes right of Grant's nose and over the left window of the frame house. The motifs are fully struck. With Star and No Star commemorative dollars are equally available. Only five pieces are graded finer at PCGS (5/19). NGC ID# BYPS, PCGS# 7459

4380 1926 Sesquicentennial Quarter Eagle MS65+ PCGS. CAC. A substantial distribution of 46,019 pieces makes the 1926 Sesquicentennial quarter eagle reasonably available in MS65 condition. This Plus-graded Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. *From The Cedar Crest Collection, Part II.* NGC ID# 2FE9, PCGS# 7466

MODERN BULLION COINS

4381 1995-W Silver Eagle PR69 Ultra Cameo NGC. All 1995-W silver eagles originated in the American Eagle 10th anniversary set, which also included the four denominations of proof gold eagles. Many silver eagle collectors could not afford to purchase the set, and were obliged to obtain examples from the secondary market at ever-escalating prices. Today, the low-mintage 1995-W remains the key to the series. This is an immaculate specimen with frosty motifs and glassy fields.

Ex: New York Signature (Heritage, 10/2016), lot 5059, which brought \$3,290. NGC ID# CFWX, PCGS# 9887

4382 1995-W Silver Eagle PR69 Deep Cameo PCGS. A nearly flawless example of the key to the proof Silver Eagle series, showing frost-white devices and liquidlike fields. Deep cameo contrast characterizes each side. The 1995-W proof is a legend among Silver Eagles, boasting a distribution of only 30,125 coins. NGC ID# CFWX, PCGS# 9887

4383 1995-W Silver Eagle PR69 Deep Cameo PCGS. A beautifully preserved, essentially flawless Deep Cameo example of this West Point Mint key, showing frosted devices and liquidlike fields. Contrast is outstanding on both sides. Many collectors will find this issue out of reach in PR70 Deep Cameo, although PR69 coins are much more affordable and the untrained eye will be hard-pressed to see a difference between the two grades.

Ex: Central States Signature (Heritage, 5/2005), lot 10074, as part of a complete five-piece proof set. NGC ID# CFWX, PCGS# 9887

4384 1999-W Tenth-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS70 PCGS. The 1999-W tenth-ounce eagles were all intended to be proof coins, but one unfinished proof die pair was used to strike an estimated 14,500 pieces. Rather than a cameo proof finish, these 1999-W coins show a satiny texture. This example displays attractive rose-gold patina across the central reverse field. The key to the series.

Ex: Central States Signature (Heritage, 4/2013), lot 5200, which realized \$5,287.50. NGC ID# 26LB, PCGS# 511606 Base PCGS# 99940

4385 1999-W Tenth-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS70 NGC. Per the Cherrypickers' Guide, this issue was struck at the Philadelphia Mint despite its West Point mintmark. West Point did strike proofs that year, but the die pair for the present piece never received a proof finish, and was struck as a bullion issue. The satiny sun-gold surfaces are fully struck and void of evident detractors. Housed in a circa-2000 holder. NGC ID# 26LB, PCGS# 511606 Base PCGS# 99940

4386 1999-W Tenth-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS70 NGC. Gold bullion coins struck during the Y2K year of 1999 were not expected to have a West Point mintmark, since that mintmark was reserved for proof production. But a small mintage of tenth-ounce and quarter-ounce gold eagles were nonetheless coined during 1999 with an Uncirculated finish. A needle-sharp and pristine example. The NGC holder asserts the modern variety has Top 50 status. NGC ID# 26LB, PCGS# 511606 Base PCGS# 99940

**1999-W Quarter-Ounce Gold Eagle
Unfinished Proof Dies, MS70
Inadvertent Low Mintage Issue**

- 4387** 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS70 NGC. Gold bullion was in demand during 1999 from investors fearful of the much-hyped Y2K change in date. Increased demand at the U.S. Mint for fractional gold eagles may have been responsible for two dies with a West Point mintmark (one each for the tenth-ounce and quarter-ounce denominations) to forgo the customary proof finish. The *Guide Book* estimates the quarter-ounce mintage as 10,000 pieces, which makes examples keys to the series. A fully struck coin with satin luster and smooth butter-gold surfaces. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

- 4388** 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. A fully struck coin with deep mirroring through the concave surfaces. Neither side has a single blemish. Admirers of Saint-Gaudens' Ultra High Relief double eagle of 1907 prize this modern recreation, which is true to the original design on grounds of artistic merit. The eye appeal of this piece is particularly pleasing. NGC ID# 26S4, PCGS# 506602

TERRITORIAL GOLD

- 4389** (1842-1850) A. Bechtler Dollar, 27G. 21C., Plain Edge — Ex-Jewelry — PCGS Genuine. AU Details. K-24, R.3. An attractive lemon-gold example with light bends near the D in DOL and the second A in CAROLINA. A lamination is noted above the 2 in 27 G. The surfaces exhibit substantial luster. The most available Bechtler variety, coined by Christopher's son August. Listed on page 399 of the 2020 *Guide Book*.

**1849 Moffat Ten D., XF Details
Rare K-5 or K-5a Variety**

- 4390** 1849 Moffat & Co., "Ten D." — Damage — PCGS Genuine. XF Details. K-5 and K-5a, High R.6. Moffat & Co. was contracted to operate as the United States Assay Office in 1851. Two years earlier it issued its own five and ten dollar coins. The two 1849 ten dollar variants are distinguished by the spelling of the denomination, TEN D. (as here) or TEN DOL. Kagin lists K-5 and K-5a varieties for the TEN D. coins, but both appear to be the same. This example has green-gold color. Both sides show signs of tooling. Listed on page 401 of the 2020 *Guide Book*.

**1852 Humbert Ten Dollar, K-10a
VF Sharpness**

- 4391** 1852 Humbert Ten Dollar — Damage — PCGS Genuine. VF Details. K-10a, Low R.4. The late die state of K-10 with advanced obverse die crumbling. The present yellow-gold example has an edge knock at 1 o'clock and is glossy from a long-ago wipe. A few thin marks are on the field above the eagle's head. Overall, more desirable than suggested by the PCGS notation. Listed on page 403 of the 2020 *Guide Book*.

CALIFORNIA FRACTIONAL GOLD

- 4392** Undated Liberty Round 25 Cents, BG-222, R.2, MS67 NGC. Die State II. A fairly early die state without an obverse cud at 6:30. BG-222 is among several varieties of undated but early Liberty Head quarters issued by Antoine Louis Nouzillet. This high-grade example has a good strike and pristine butter-gold surfaces. Census: 2 in 67, 0 finer (4/19). NGC ID# 2BHU, PCGS# 10407

- 4393** 1856 Liberty Round 25 Cents, BG-229, R.4, MS65 Prooflike NGC. A flashy and flawless honey-gold Gem. The well-struck surfaces display hints of orange toning. As of (3/19), the grading services have certified 22 examples of BG-229 in circulated grades. This confirms the fractional gold coins played a role in the California Gold Rush economy, even with the advent of the San Francisco Mint. Census: 3 in 65 Prooflike, 0 finer (4/19). NGC ID# 2BJ4, PCGS# 710414

- 4394** 1854 Liberty Octagonal 1 Dollar, BG-508, High R.4, MS63 PCGS. A scarce Period One variety attributed to Frontier, Deviercy & Co. BG-508 was used in Gold Rush commerce, given that half of the PCGS-certified examples are in circulated grades. The present Select piece has luminous and lightly marked straw-gold surfaces. The strike is crisp except on the 18 in the date. Population: 13 in 63, 5 finer (4/19). NGC ID# 2BL5, PCGS# 10485

- 4395** 1859 Liberty Round 25 Cents, BG-801, R.3, MS66 Prooflike NGC. BG-801 is the sole 1859-dated round quarter variety. The R in DOLLAR is widely repunched, and the overall quality of engraving is crude. This high-grade apricot-gold example offers reflective fields and unmarked surfaces. Both fields are clashed and a retained obverse lamination is present near 3 o'clock. Census: 2 in 66 Prooflike, 2 finer (4/19). PCGS# 710662

- 4396** 1869 Liberty Octagonal 50 Cents, BG-907, Low R.5, MS67 NGC. A flawless Superb Gem. The caramel-gold surfaces are undisturbed, and the strike is sharp throughout. This Frontier & Co. product is one of just two 1869 octagonal halves in the Breen-Gillio series, along with Robert B. Gray's BG-919. As of (4/19), NGC has certified 16 BG-907 halves, with the present lot as the single finest.
Ex: *Dallas Signature (Heritage, 4/2017)*, lot 16949, which realized \$2,021. NGC ID# 2BW3, PCGS# 10765

- 4397** 1871 Liberty Octagonal 50 Cents, BG-912, R.3, MS67 PCGS. A radiant butter-gold Superb Gem. Both sides appear as made, with faint "ghosts" on the fields of both sides and minor incompleteness of strike on Liberty's hair and select portions of the reverse legends. BG-912 is credited to the San Francisco jewelry firm of Frontier & Co. Population: 2 in 67, 0 finer (4/19). NGC ID# 2BW8, PCGS# 10770

4398 1872 Indian Octagonal 50 Cents, BG-939, Low R.5, MS66+ Prooflike NGC. A Christopher Mohrig variety with a somewhat unusual appearance, since the date was hand-engraved on the obverse die, and the reverse exhibits a fancy 2 as the denominator. A flashy and well struck apricot-gold Premium Gem. As of (4/19), the present piece is single-finest among six examples certified as Prooflike by NGC. NGC has certified only one piece as Deep Prooflike, at the MS64 level.
Ex: Long Beach Signature (Heritage, 2/2017), lot 5294, which realized \$1,527.50. NGC ID# 2BX7, PCGS# 710797

4399 1874/3 Indian Octagonal 50 Cents, BG-943, High R.4, MS66 Prooflike NGC. A lovely caramel-gold Premium Gem. The mirrored fields are undisturbed. The central reverse shows minor inexactness of strike. A BG-unlisted late die state. The obverse border was lapped, effacing much of the final star. The dentils are thinner, and likely re-engraved by the maker. The reverse exhibits several delicate die cracks. Census: 1 in 66 Prooflike, 1 finer (4/19).
Ex: Dallas Signature (Heritage, 4/2017), lot 16950, which realized \$1,880. NGC ID# 26PA, PCGS# 710801 Base PCGS# 10801

**1868 Octagonal Indian Half Dollar
 Rare BG-960A Variety
 MS63 Prooflike**

4400 1868 Indian Octagonal 50 Cents, BG-960A, High R.6, MS63 Prooflike NGC. Mirrored fields and cameo frost on the wreath proclaim the eye appeal of this seldom-seen octagonal half dollar variety. Minor incompleteness of strike is noted on the central reverse. BG-960A is technically a late die state of BG-960. The reverse die was lapped, greatly weakening CAL. Census: 1 in 63 Prooflike, 2 finer (4/19). NGC ID# 26PP, PCGS# 710829

COINS OF HAWAII

**1871 Wailuku Plantation Token
 Medcalf 2TE-2, Narrow Starfish
 XF40, 12 1/2 Cents**

4401 1871 Wailuku Plantation, 12 1/2 Cents, Narrow Starfish, XF40 PCGS. M. 2TE-2. Local blacksmiths struck most varieties of Hawaiian sugar plantation tokens. They are often unevenly impressed, but the present piece is well-defined except for the 8 in the date, and the stars west of the denomination. The tokens were used to pay workers in lieu of Spanish-American silver, with 12 1/2 cents equal to one real. This is an unblemished and generally golden-brown example with hints of charcoal patina in protected areas. Listed on page 431 of the 2020 *Guide Book*. Population: 4 in 40, 3 finer (4/19). NGC ID# 2UBL, PCGS# 600503

**1872 Hawaii 12 1/2 Cent Token
 Wailuku Plantation, Broad Starfish
 VF35, Medcalf 2TE-3**

4402 1871 Wailuku Plantation 12 1/2 Cents, Broad Starfish, VF35 PCGS. M. 2TE-3. 4.68 gm. Hawaii sugar plantations dealt with a shortage of silver coinage by striking their own copper tokens. They were typically denominated as a half real or one real, with the latter Spanish-American denomination equivalent to 12 1/2 cents. Among 1871 one-bit tokens, the Broad or Large Starfish variety is substantially rarer than its Narrow Starfish counterpart. This is a problem-free example with minor incompleteness of strike on the fraction and the 8 in the date. Listed on page 431 of the 2020 *Guide Book*. PCGS# 412434

**Wailuku Plantation 'VI' Token, XF40
 Narrow Starfish, Medcalf 2TE-4**

4403 (1871) Wailuku Plantation 6 1/4 Cent, Narrow Starfish, XF40 PCGS. M. 2TE-4. The six cent tokens (approximately equal to a Spanish-American half-real) from the Wailuku Plantation are rarer than the 1871 12 1/2 cent varieties. The Broad Starfish variant is very rare, and even the Narrow Starfish VI token makes few auction appearances. The present golden-brown representative is noteworthy for an even strike. It is sharper, overall, than some higher-graded pieces. Contact is confined to a couple of ticks on the starfish. Listed on page 431 of the 2020 *Guide Book*. NGC ID# 2UBM, PCGS# 600506

1880 Wailuku Plantation Token, XF40
1 Real, Medcalf 2TE-6

- 4404** 1880 Wailuku Plantation Token, 1 Real, XF40 PCGS. M. 2TE-6. Struck for the sugar plantation by a blacksmith, and probably used for payments to workers when Spanish-American silver was scarce. One real was equivalent to an eighth of a dollar. The tokens were recognized and accepted throughout the islands. This light golden-brown example is evenly struck and shows only a single hair-thin diagonal mark above the large P. The surfaces are permeated with tiny planchet imperfections, as made. Listed on page 431 of the 2020 *Guide Book*. NGC ID# 2UBN, PCGS# 600512

PATTERNS

1858 Indian Cent in Copper-Nickel
Judd-208, Scarce Pollock-254, PR64 Cameo

- 4405** 1858 Indian Cent, Judd-208, Pollock-254, R.7, PR64 Cameo NGC. Snow-PT35, R.7. There are four notable subvarieties of Judd-208; these include each combination of narrow or broad bust point obverses paired with either five or six-leaf cluster laurel wreath reverses. The present piece pairs the narrow bust point obverse with six-leaf clusters on the wreath. Struck in copper-nickel with a plain edge. Snow states, "Rare and popular as the true transitional - The exact style of 1859." USPatterns.com estimates only a half-dozen or so pieces are known with this rare combination of a low date and a six-leaf cluster. The surfaces retain most of the bright, original honey-tan color that is inherent to copper-nickel, with slight reddish patina and an occasional dab or streak of deeper red. Stark contrast is evident between the fields and devices, as indicated by the Cameo designation. NGC ID# 29BP, PCGS# 11885

1858 Indian Cent in Copper-Nickel
Judd-211, Pollock-262, PR64

- 4406** 1858 Indian Cent, Judd-211, Pollock-262, R.4, PR64 NGC. The obverse is similar to the issued Indian cent, but dated 1858. The reverse is similar to the issued 1860 cent reverse, except there is no shield between the ends of the laurel wreath. This is the centered date, broad bust point variant, thus the Pollock-262 designation. Struck in copper-nickel with a plain edge. The honey-tan surfaces are pleasing and moderately reflective. The only mentionable flaw is a carbon spot on the obverse below the bottom serif of the F in OF. NGC ID# 29BT, PCGS# 11893

1863 Indian Cent in Bronze
Judd-299, Thick Planchet
PR64 Red and Brown Cameo

- 4407** 1863 One Cent, Judd-299, Pollock-359, R.3, PR64 Red and Brown Cameo PCGS. The regular issue designs for the 1863 Indian cent. Struck in bronze with a plain edge. Judd-299 is noteworthy as the Mint's first experiment with bronze, which would become the cent alloy the following year. Known with either a thin or thick planchet. Though no weight is recorded on the insert, this appears to be the rarer thick planchet example. The fields are deeply mirrored and the devices heavily frosted. Significant cherry-red luster remains and it is only slightly subdued by streaks of blue-brown patina. The reverse is rotated 180 degrees. NGC ID# 29ED, PCGS# 70453

1867 Five Cent Pattern, PR65
Judd-566, Struck in Nickel

- 4408** 1867 Five Cents, Judd-566, Pollock-627, Low R.6, PR65 NGC. The obverse features a bust of Liberty facing left, wearing a coronet, surrounded by the legend and date. The denomination is within a laurel wreath that is close to the edges on the reverse, with a tiny IN GOD WE TRUST above. Struck in nickel with a plain edge. One of many similar five cent patterns of the year based on the contemporary three cent nickel design, Judd-566 features CENTS in straight rather than curved letters, and Liberty's coronet does not have a star. A crisply struck and flashy piece with a hint of straw-gold toning and a few tiny mint-made obverse strike-throughs. *Ex: Palm Beach Signature (Heritage, 3/2005), lot 6670, which realized \$2,415. NGC ID# 45UC, PCGS# 70776*

1868 Three Cent Nickel in Nickel
Judd-618, PR65 Cameo

- 4409** 1868 Three Cent Nickel, Judd-618, Pollock-687, R.4, PR65 Cameo PCGS. Similar to the regular issue, but the Roman numerals on the reverse are smooth instead of ribbed. Struck in nickel with a plain edge. The date digits appear to be entered individually, at a time when gang punches were generally used. This nicely struck and flashy Gem shows only a hint of golden toning. The sole imperfection is a carbon fleck on the reverse at 7:30. NGC ID# 29NA, PCGS# 860834 Base PCGS# 60834

1870 William Barber Half Dime in Silver
Judd-815, PR64

- 4410** 1870 Half Dime, Judd-815, Pollock-904, Low R.7, PR64 PCGS. William Barber's Seated Liberty design shows her facing left, holding a shield in her right hand and with a free-standing Liberty pole behind. Regular issue half dime reverse. Struck in silver with a reeded edge. A lightly toned Choice pattern that boasts a razor-sharp strike and an undisturbed appearance. The frosty motifs contrast strongly against the reflective fields, but the green label holder precludes any Cameo designation. *Ex: ANA Signature (Heritage, 8/2016), lot 6339. NGC ID# 3ZSB, PCGS# 61059*

1870 Standard Silver Dime in Silver
Judd-850, Toned PR66

- 4411** 1870 Standard Silver Ten Cents, Judd-850, Pollock-957, High R.6, PR66 PCGS. CAC. *Ex: Denali Collection.* A Standard Silver design that shows a bust of Liberty facing right with UNITED STATES OF AMERICA above and IN GOD WE TRUST on a scroll below. Liberty wears a plain headband ornamented with a single star. The reverse has 10 CENTS and the date in the center of a wreath of cotton and corn with STANDARD above. Struck in silver with a plain edge. Medium lime-green and wheat-gold toning adorns moderately mirrored surfaces. The strike is slightly incomplete on the hair of the high relief portrait, but the remainder of the impression is complete. The Denali Collection of Patterns was distributed by Legend Numismatics in 2010. *Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4566, where it realized \$2,185. PCGS# 61094*

1870 Standard Silver Half in Silver
Judd-957, PR61

- 4412** 1870 Standard Silver Half Dollar, Judd-957, Pollock-1108, R.5, PR61 PCGS. A bust of Liberty faces right and is surrounded by UNITED STATES OF AMERICA. The figure of Liberty wears a headband inscribed LIBERTY, and the front of the headband has a large star. IN GOD WE TRUST is below on a banner. The reverse features 50 / CENTS / 1870 within a wreath of cotton and corn. STANDARD is centered above the wreath. Struck in silver with a reeded edge. Generally untuned with good reflectivity in the fields. The centers of each side show slight softness of detail from die opposition. *Ex: Long Beach Signature (Heritage, 9/2004), lot 8245; Beverly Hills Signature (Heritage, 11/2014), lot 5019. NGC ID# 26VX, PCGS# 61203*

GSA DOLLARS

1880-CC GSA Dollar, MS66 8 Over Low 7, VAM-6

- 4413** 1880-CC 8 Over Low 7, VAM-6, GSA, MS66 NGC. A Top 100 Variety. Undesignated as such on the NGC band, but this is the *Guide Book* 8 Over Low 7 variety, one of the most prominent overdates in the Morgan dollar series. This lustrous high-grade example displays rich autumn-brown and cobalt-blue toning on the left portions of both sides. The fields are smooth, and the cheek exhibits only delicate contact. Included with the lot is a GSA box without a certificate. NGC ID# 2542, PCGS# 518857 Base PCGS# 7104

- 4414** 1882-CC GSA MS66 Prooflike PCGS. CAC. This Premium Gem 1882-CC Morgan is tied with two others as the finest Prooflike GSA coin at PCGS (4/19). The CAC endorsement only adds to the appeal. The strike is well-executed, and the coin is essentially untoned. The lustrous surfaces are smooth and attractive. A small reed mark near the nose precludes an even finer grade. NGC ID# 254B, PCGS# 518867 Base PCGS# 7135

1882-CC GSA Morgan Dollar Brilliant MS65 Deep Prooflike

- 4415** 1882-CC GSA MS65 Deep Prooflike NGC. The 1882-CC is a plentiful Carson City Morgan dollar, although Deep Prooflike pieces still housed in their original GSA holders are rarely seen at the Gem level, and just a few are known finer. This piece is brilliant and starkly contrasted on both sides. The strike is sharp, and only a few trivial grazes on Liberty's cheek prevent an even finer grade. Census (GSA Hoard): 40 in 65 (1 in 65★, 2 in 65+) Deep Prooflike, 4 finer (4/19). NGC ID# 254B, PCGS# 518868 Base PCGS# 97135

- 4416** 1885-CC GSA MS64 Deep Prooflike NGC. VAM-3. CAC. Frosty motifs rise in bold detail above the glassy fields. This low-mintage Carson City silver dollar is brilliant aside from a dollop of tan toning west of the eagle's chest. Marks are minimal for the designated grade. A GSA box is included, as is a GSA certificate without a serial number. NGC ID# 254M, PCGS# 518877 Base PCGS# 97161

CERTIFIED MODERN PROOF SET

- 4417** 1937 Five-Piece Proof Set PR64 to PR67 PCGS. The coins are separately housed in holders bearing consecutive certification numbers. The set includes: cent PR66 Red, an outstanding orange-gold Premium Gem; nickel PR67, brilliant and immaculate, a good strike; dime PR66, fully impressed, traces of gray patina across nearly white surfaces; quarter PR64, lightly toned, a late dies specimen with delicate radial field lines; and a half dollar PR67, sharply struck and pristine with hints of almond-gold and powder-blue toning. (Total: 5 coins) PCGS# 904751

PROOF SET

- 4418** A Seven-Piece Lot of Unopened 1950s Proof Sets. The proof sets remain sealed within their Treasury-issued pale green-gray square boxes. According to dates written on the boxes by the purchaser more than six decades ago, the lot includes (1) 1950; (2) 1951; (1) 1952; (2) 1953; (1) 1954. (Total: 7 sets)

ERRORS

1943 Lincoln Cent, AU53 on a Silver Dime Planchet

- 4419** 1943 Lincoln Cent — Struck on a Silver Dime Planchet — AU53 NGC. It is an often-told tale that the 1943 zinc-plated steel cents were confused with silver dimes. But here is a 1943 cent struck on a silver dime planchet, and it passed in commerce briefly until a sharp-eyed collector set it aside. The primary clue to an undersized planchet is the partial E PLURIBUS UNUM, which shows distortion usual for the error combination. IN GOD WE TRUST has a nearly normal appearance, since the coin was struck aligned with the collar die at 12 o'clock. Problem-free, and far more affordable than its famous copper cousin.

1943-S Jefferson Nickel, AU58 on a Steel Cent Planchet

- 4420** 1943-S Jefferson Nickel — Struck on a Zinc-Plated Steel Cent Planchet — AU58 NGC. This off-metal war nickel was struck aligned with the collar die at 3 o'clock, which allows a complete IN GOD WE TRUST while LIBERTY and the date are partial. But the bases of all four date digits are present, including the lower curve of the 3. The well struck and satiny surfaces are steel-gray with distributed minute russet freckles.

1959 Franklin Half Dollar
MS64 Full Bell Lines
Struck on a Quarter Flan

- 4421** 1959 Franklin Half Dollar — Struck on a Quarter Planchet — MS64 Full Bell Lines NGC. 6.2 gm. Type One Reverse. The Liberty Bell is fully present, but on the obverse, LIBERTY is absent altogether. Appropriately, only a trace of the denomination is on the flan. A brilliant, lustrous, and unmarked near-Gem. There is no indication of a raised rim. A visually impressive and high-grade example of this desirable wrong planchet combination.

LINCOLN MEDALET

Lincoln Medalet Uniface Impression
on an 1861 Five Dollar, AU58

- 4422** Uniface Lincoln Medalet Impression on an 1861 Half Eagle AU58 ICG. Cunningham-22-670X. The medalet impression is 19 mm. The piece is unencapsulated, but accompanied by an ICG grading insert that credits the engraver as William Barber, and implies the obverse die was used to strike Julian-PR-39. But it is not the Barber bust for PR-39, which has a pointed tip and a different forecurl. The bust more closely resembles Paquet's head on PR-30, though reduced in size and without a designer's initial on the bust truncation. From the same die used to strike a similar example on an Uncirculated 1861 half eagle, lot 28086 in our September 2008 Long Beach Signature. The piece is also reminiscent of an 1861 First Defenders Medal uniface impression on an Uncirculated 1861 double eagle, lot 3348 in our November 2018 Dallas Signature, which suggests Mint Superintendent Oliver Bosbyshell may have made all such pieces circa 1891.

U.S. MINT MEDAL

1871 Grant Peace Medal
Julian-IP-42, Silver

- 4423** 1871 Ulysses S. Grant Indian Peace Medal, Silver. Julian-IP-42. 63 mm. 125.6 gm. Julian writes, "three hundred silver medals were struck in August and September [of 1871]." The originals were issued holed for suspension at 12 o'clock, and typically show wear. Restrikes in silver are known and usually unworn and unholed. The present silver-gray original features blended straw-gold and cream-gray toning. Wear is minimal, but the fields show occasional tooling, near the plow handles, portrait, and LET.

SO-CALLED DOLLAR

- 4424** 1920 Manila Mint Opening, Wilson Dollar, Silver, HK-449, R.4, MS64 NGC. Commemorating the July 16, 1920 opening of the Manila Mint — a far-flung branch of the U.S. Mint — medals were issued in silver, copper, and gold. The silver pieces are better known as Wilson dollars, struck on 38 mm planchets (same size as a regular U.S. silver dollar), here in Choice Uncirculated condition. Brilliant-white surfaces are satin-smooth and lustrous, struck from clashed dies with weakness (as usual) at Justice's head and shoulder. PCGS# 643969

EXPOSITIONS AND FAIRS

Gilt 1893 Columbian Exposition Medal
Eglit-101, MS63

- 4425** 1893 World's Columbian Exposition, 1892 High Relief Liberty Head, MS63 NGC. Eglit-101. Gilt, 90 mm. The reverse features a dramatic depiction of the 1492 Columbus discovery of America. The same design was also issued in 50 mm (Eglit-51), 36 mm (Eglit-51A), 28 mm (Eglit-unlisted), and 23 mm (Eglit-113). Eglit-101 is known in silver, bronze, copper, and aluminum, and is also found gilt or silver-plated. An unabraded and attractive olive-gold example.

HOBO NICKELS

Scarce Elephant Reverse Carving by 'Bo' Romines OHNS Certificate #R-001

- 4426 1937-S Carved Reverse, Elephant by "Bo" Hughes.** George Washington "Bo" Hughes liked animals and carved several reverses with his favorites — a donkey or mule, an elephant, a horse's head, or a turtle. The idea of a mule came from his childhood, while a circus he saw may have inspired the elephant. During election years, the mule became a donkey, and they were popular political keepsakes among Bo's customers. Many were carved in the 1940s, with donkeys in greater demand than elephants. This example is a svelte-looking elephant carved on a nice About Uncirculated 1937-S nickel. It comes with an early Del Romines' OHNS certificate, #R-001 dated February 1, 1994.

From The Jack Royse Collection of Hobo Nickels.

Cameo Carving by 'Bo' Hughes Bo's Brother, Signed GH 51

- 4427 Full Cameo Carving, Bo's Brother, Signed GH 51.** Bo Hughes often memorialized his brother, who died in (or about) 1919 as a casualty of World War I. Bo carved many 1919 nickels with the portrait of a helmeted soldier to represent his brother, each slightly different in its own way. Some of the nickels show the numerals 1919 etched onto the soldier's collar or shoulder. Others show the soldier puffing on a cigarette or cigar. This is a classic example of Bo's Brother — a superb, deeply carved cameo, with intricately carved beard stubble and hair, done in 1951 (signed GH 51). The exact coin is plated in Romines 2 on pages 29 and 37. An interesting discussion of this nickel is found on pages 28 and 29 of that reference. An early Del Romines OHNS Registration Certificate #R-004 accompanies the coin. The certificate is dated October 9, 1993.

From The Jack Royse Collection of Hobo Nickels.

Superior Carving, Man in a Domed Hat Pre-1940 by 'Bo' Hughes

- 4428 Superior Carving by Bo Hughes.** This Domed Hat hobo exhibits characteristics of both Bert Wiegand and Bo Hughes. In 1993, Del Romines concluded the carver was Bo, based on the ear and nose treatment, plus various cut marks — all representative of Bo's pre-1940 style. The piece is carved on a glossy 1937-D nickel, which is About Uncirculated with traces of luster, and it demonstrates Superior workmanship. The accompanying OHNS certificate is numbered R-007, dated October 10, 1993. Importantly, the 1996 Romines reference discusses this nickel on page 37, and it is plated on page 38.

From The Jack Royse Collection of Hobo Nickels.

Raised Ear Obverse
Mule and Shanty Reverse
Two-Sided Carving, Signed GH

- 4429** 1916-Dated Nickel, Fully Carved Two Sides by Bo Hughes. The hobo's ear is steeply raised on this classic Bo Hughes carving, an indication that it was done in the 1920s to mid-30s, when Bo became proficient with the raised metal technique. Bert Wiegand's influence shows in the hair, formed from delicate, long strokes in continuous waves, with no interruption between the beard and hair.

The extensively carved reverse depicts Bo's memories of his youth, where he grew up with 9 or 10 brothers and sisters in a plain, simple shanty, with a mule in the yard. His GH initials are present but inconspicuous, placed beneath FIVE CENTS in the exergue. This 1916 nickel is smoothly carved and accompanied by the OHNS Certificate #R-015 dated October 11, 1993. Two certificates were issued, one that mentions the obverse only, and another that includes both the obverse and reverse. Superior quality on both sides.

From The Jack Royse Collection of Hobo Nickels.

Domed Hat Hobo
Classic Style by 'Bert' Wiegand

- 4430** 1913 Type One Original Hobo Nickel by "Bert." This remarkably well-preserved example is quintessential Bertram "Bert" Wiegand. Bert was a disciplined artist who paid attention to details, and usually stayed within the limits of what he knew best. As Bo's mentor and teacher, Bert was the master, while innovation and creativity were among his student's greatest assets.

Bert worked quickly. The nickels he carved were soon sold or bartered, and despite his productivity, relatively few examples are extant today. This Domed Hat hobo is carved on a sharp 1913 Type One nickel. Soft luster permeates the slate-gray surfaces, with pale-blue and rose undertones. The Romines OHNS certificate #R-009 suggests it was probably carved pre-1932. The coin's Superior quality is on full display.

From The Jack Royse Collection of Hobo Nickels.

**Certified Domed Hat Hobo by 'Bert'
Carved on a 1913 Type One Nickel**

4431 Pre-1940 Carving by Bert Wiegand. The OHNS Registration suggests that this carving matches Bert's style from the mid-to-late 1920s. Carved on an About Uncirculated 1913 Type One nickel, it displays several of the techniques employed by Bert in his relatively early work. The raised ear shows inner detail, either purposely left in place by Bert from the host coin, or intentionally carved. Finely carved hair flows seamlessly into a manicured beard and moustache in classic Bert style.

The hatband lacks a bow or other decoration — despite careful workmanship and dressing of the brim and dome. The coin also ignores Bert's "signature," with LIB effaced during carving of the hat and adjacent field, although ERTY remains. Iridescent colors glow beneath intermittent, deep-gray toning throughout both sides of this interesting domed-hat hobo nickel. This original Bert carving includes its Registration Certificate #R-018 dated October 11, 1993.

From The Jack Royse Collection of Hobo Nickels.

**Confirmed 'Chain Gang' Nickel by Bert
Signed Prisoner Nickel, Carved in 1933**

4432 "Bert 33" Hobo Nickel by Bert Wiegand. "Bert Prisoner" nickels are, by far, the most-cherished among the few confirmed prisoner carvings that exist. As the story goes, Bert Wiegand had an altercation with railroad police after jumping a Georgia freight train in mid-to-late 1932. He was arrested and thrown into the local jail, and later transferred to a chain gang. Bert spent the better part of a year with the chain gang, although he avoided much of the heavy labor by carving nickels for the guards, who sold them at a handsome profit. Reportedly, Bert taught other convicts to carve nickels, too.

Only a few coins have been authenticated as chain gang nickels carved by Bert. This is a well-known and highly desirable example, signed BERT 33 along the right margin of an XF 1929 nickel. Carved in less-than-ideal conditions without the benefit of familiar tools, this nickel portrays a bearded man in a simple domed hat, needing a shave and haircut. Both the hair and the beard disappear inside the collar. This important coin is plated in the 1996 Romines book on page 75 and accompanied by the Del Romines OHNS Registration # R-019 dated October 11, 1993.

From The Jack Royse Collection of Hobo Nickels.

**Bulb-Nosed Clown
Partial Cameo Carving by 'Bo'**

4433 **Partial Cameo Clown Nickel by Bo Hughes.** Carved on a 1913 Type Two nickel, this classic Bo Hughes clown displays a bulb nose and a raised metal “trumpet” ear. The raised metal technique allowed Bo to carve the hair so it would lay convincingly beneath the upper ear. All markers point to a carving that was done pre-1950, since the partial cameo format was a precursor to the full cameo pieces that followed in 1950 until Bo’s hand injury in 1957.

Hobo lore says Bert and Bo sneaked into many circuses, and Bo often expressed his love of clowns through his carved nickels. Emmett Kelly is the most identifiable clown carved by Bo — the rest came from his memory and imagination. This piece is pictured in Romines 2 on page 35, and comes with the original OHNS certificate R-006, signed by Del Romines.

From The Jack Royse Collection of Hobo Nickels.

**‘Emmett Kelly’ by Bo Hughes
Lustrous Full Cameo Carving**

4434 **Signed GH 51, Emmett Kelly Carved by Bo Hughes.** Inspired by the famous circus “tramp clown,” Bo carved many nickels with his rendition of the sad-frowned “Weary Willie” as portrayed by Emmett Kelly. Perhaps none is done as beautifully as this cameo carving signed GH 51. The tattered hat and frayed necktie (tied around the neck, instead of at the shirt collar) were Emmett Kelly trademarks, as well as Kelly’s forlorn, downturned mouth.

Two styles of beards were used by Bo on his Kelly carvings. This one shows long sideburns extending downward from the carefully carved head hair, merging with raised metal forming thick beard stubble. The ear is unusually large — formed from Bo’s raised metal technique. Bo’s signature appears on the neck truncation. The quality of work is Superior, as designated on Del Romines’ OHNS Registration Certificate #R-013, dated October 10, 1993. This nickel is plated in the 1996 Romines book on page 23, and it is pictured on the cover of that edition as well.

From The Jack Royse Collection of Hobo Nickels.

Rare Cameo Carving of 'Monique'
Bo's Lady Friend, Signed GH 50

4435 Full Cameo Carving of Monique by Bo Hughes. In the late 1930s and 1940s, Bo spent the Fall months in New Orleans, home to his longtime lady friend, Monique. Upon Monique's passing in 1949—coupled with the loss of his friend and mentor Bert Wiegand (who no longer had contact with Bo, and possibly was last seen in Asheville, North Carolina in 1849)—Bo Hughes reached into his memory bank, and produced the finest carvings of his hobo nickel career. The work from 1950 until his hand injury in 1957 accounts for the most highly prized partial cameo and full cameo nickels in the hands of collectors. All are in high demand.

Bo carved nickels showing Monique in different phases of her life, but only a few of the nickels are in full cameo format. This piece was carved in 1950. Monique is in her prime, with hair pulled back to show her ear (seldom seen on Bo's Monique portraits). This is a deep, multilevel carving, signed boldly on the neck truncation GH 50. The Del Romines OHNS Registration Certificate is #R-011, dated October 11, 1993.

From The Jack Royse Collection of Hobo Nickels.

'Monique' — Or Someone Else?
Splendid Cameo Carving, Signed GH 50

4436 Full Cameo Carving Signed and Dated by Bo Hughes. The 1993 OHNS Registration Certificate #R-010 describes this nickel as "Cameo Monique w/ curled bangs," and notes that it is the only cameo carving showing the curled bangs hair style. In technical terms, the hair treatment is raised metal, which allows the "bangs" to appear as combed to the side, overlapping the delicate hair strands that run beneath the forecurls.

The 1982 Romines reference, *Hobo Nickels*, has useful photos of Monique nickels on pages 80 and 81. Monique is shown at different life stages (as depicted by Bo Hughes) on nine different nickels, which show how Monique aged over the years. In our opinion, the lady on this nickel may not be Monique, or perhaps it is an idealized portrait of Monique in her younger days. In some ways, it resembles a youthful "Jenny," who was the subject of a later cameo carving by Bo, previously held in the Don Haley Collection. One way or the other, this is a splendid 1950 cameo by Bo Hughes, truly Superior in its quality, lustrous and iridescent with shades of amber-orange and pale-lilac throughout its well-preserved surfaces. It is an important example of the highly sought cameo format, to our knowledge unseen at public auction until now.

From The Jack Royse Collection of Hobo Nickels.

Semi-Cameo Carving by Bo Hughes
'Marcy' — signed GH 47

4437 Partial Cameo of "Marcy" by Bo Hughes. The jaunty plume-and-feather hatband identifies this subject as Marcy, who was the "Sugar Daddy" of Bo's New Orleans love interest, Monique. This Bo carving was originally authenticated in 1984, and was first owned by a Tennessee collector/dealer, then sold to an Ohio collector before settling in the Jack Royse Collection.

Joyce Romines' 1996 book, *The Hobo Nickel*, quotes Bo Hughes: "I was Monique's 'Bo,' but he was her fancy beau ... wore big diamonds, always had a big feather in his hat, and a lie in his mouth." That is how he is portrayed in this Superior carving — well-dressed and impeccably groomed. Faint sunset-red luster glows from the attractive, nickel-gray surfaces. This classic hobo nickel comes with the OHNS Registration Certificate R-003, signed by Del Romines and dated October 9, 1993.

From The Jack Royse Collection of Hobo Nickels.

Reverse Carving on a 1915 Nickel
Classic 'Bindle Stiff' Variant, Signed GH 39

4438 1915 Nickel With Carved Reverse by Bo Hughes. The Jack Royse Collection includes three of the best-documented and highest-quality "Bindle Stiff" carvings attributed to Bo Hughes. This example is especially endearing, with the hobo sporting a jacket that is several sizes too small and unbuttoned, shown flapping in the wind. Both the jacket and pants pockets bulge open, as if filled with the few hobo possessions needed within easy reach. The raised-metal walking stick (Kelly stick) is shorter than normally seen.

A bindle (signed GH 39) is slung over the hobo's shoulder, and a domed hat sits atop the delicately carved bearded head. Subtle hints of luster remain throughout the Choice XF host nickel. This exceptional reverse carving is discussed in detail on page 32 of the 1996 Romines book, where it is plated twice. The lot includes the October 10, 1993 OHNS Registration Certificate #R-008.

From The Jack Royse Collection of Hobo Nickels.

**'Bindle Stiff' on a 1913 Type One Nickel
An Unsigned, Authenticated 'Bo' Carving**

- 4439** 1913 Type One Nickel With Carved Reverse by Bo Hughes. This nickel is unsigned, but confirmed by Del Romines as an original Bo carving. At least two similar nickels exist, both of which are signed and dated by Bo. The hobo has a hunchback posture (a function of the underlying bison motif), plus an altered head to show a balding, bearded hobo. The bison's two front legs become the hobo's arms, grasping a raised-metal walking stick. Del Romines' October 10, 1993 OHNS Registration #R-014 authenticates the piece. Plated in the second Romines book on page 33.
From The Jack Royse Collection of Hobo Nickels.

**Full-Figure Carved Reverse, 1930 Nickel
Authentic 'Bo' Hughes, Unsigned**

- 4440** 1930 Nickel, About Uncirculated, Carved Reverse by Bo Hughes. This hobo has worn-out shoes, with one or more toes sticking out. Patched elbows and knees complete his wardrobe. A large rucksack or bindle occupies one hand, while the other hand grasps a thick bindle stick. Pictured on page 33 of the 1996 Romines book. This coin made its way from a Tennessee dealer to an Ohio collector, then to a Missouri collector before transferring into the Jack Royse Collection in 1991. Supported by the April 18, 1994 OHNS Registration #R-073.
From The Jack Royse Collection of Hobo Nickels.

**Historic Carving by Bo Hughes
Portrait of Bert, 'Orleans Bound'**

- 4441** 1913 Type One Nickel, Two-Sided Carving by Bo Hughes. Although the accompanying 1993 Registration Certificate #R-005 says this is a self-portrait by Bo, the Joyce Romines reference clarifies that it is instead a portrait of Bert (carved by Bo). This important nickel has one of the most historic pedigrees of any hobo nickel. The 1996 Romines book gives the details on page 64, where both sides of the coin are plated.
Carved on an attractive, About Uncirculated 1913 Type One nickel, the coin links Bo — and perhaps Bert, too — to a small ranch north of Ipswich, South Dakota from the years 1934 to 1941. There, a few migrant workers and hoboes found jobs at the ranch from spring planting through the fall harvests.
Bo left the ranch owner four of his carved hobo nickels, which were passed on within the family. Some 50 years later, the nickels were transferred to the Jack Royse collection. This well-known nickel was among them, with its skillful carving of Bert's portrait on the obverse, and hand-engraved the message ORLEANS BOUND 10 41 on the reverse. Raised metal carving is seen on Bert's hair, ear, and beard stubble. The coin proves Bo traveled west of the Mississippi at least as far as South Dakota, and in the fall went to New Orleans before traveling on to the Florida "hobo jungle."
From The Jack Royse Collection of Hobo Nickels.

Signed Cameo Self-Portrait
Superior Quality by 'Bo' Hughes

- 4442** Full Cameo Carving, "Bo" Self-Portrait, Signed GH 50. The pinnacle of Bo Hughes' 65 years of artistry is a series of full cameo carvings, with deeply carved fields surrounded by a raised rim, the date and LIBERTY removed, and impeccable renditions of subjects most meaningful to Bo. Most of the pieces were signed by Bo on the neck truncation, above where the date was removed.

This example is a self-portrait of Bo carved in 1950. The coin is signed "GH 50" in tiny letters and numbers on the narrow neck truncation. Carved on an About Uncirculated or finer S-mint nickel, this outstanding hobo nickel displays attractive, slate-gray toning, with ice-blue and golden undertones. Luster exists on both sides. The balding portrait of Bo is of exceptionally high quality. The Del Romines OHNS Certificate #R-016 estimates Bo would have been between 50 and 55 years old when this nickel was carved. Because Bo was born around 1900, the nickel would have been like looking in a mirror as he applied the finishing touches. Cameo carvings such as this 1950 rendition rank among the most desired of all hobo nickels — a similar piece brought \$7,500 as lot 4955 in our 2019 sale of the Don Haley Collection.

From The Jack Royse Collection of Hobo Nickels.

Cameo Self-Portrait of 'Bo'
Maximum Baldness, Signed GH 51

- 4443** Full Cameo Self-Portrait of Bo Hughes. The self-portrait cameos carved from 1950 to 1953 show varying degrees of baldness, but none show significantly greater hair loss than this example. Bo achieved his maximum baldness between the age of 55 to 60, and although he carved nickels for another 20 years, he retained about the same amount of hair until he disappeared in Florida in approximately 1980. This is one of his Superior self-portraits, a capstone to the popular subset of Bo self-portraits sought by advanced collectors. The OHNS certificate issued by Del Romines #R-017 is dated October 11, 1993 and accompanies the lot.

From The Jack Royse Collection of Hobo Nickels.

Bearded Man in a Domed Hat
Raised Metal Collar Lapel, Signed GH 2(?)
Sharp and Lustrous

- 4444** 1913 Type One Hobo Nickel, Signed by Bo. Clearly, Bo was working hard at learning the art of raised metal carving in the 1920s. His teacher was Bert, and this coin may have been a tribute to his mentor. The portrait resembles Bert in appearance, although the workmanship is Bo's. Note that the letters BERT remain — the typical Bert Wiegand signature — a characteristic shared by other Bo carvings of Bert. Del Romines suggests this is one of three pieces done in a similar way, two of which were signed GH 28 under the lapel, as stated on the OHNS Certificate #R-012 dated October 10, 1993. This one shows GH clearly under the lapel, plus a faint 2 nearby. The final numeral of the carving date is obscured behind the raised metal overlay.

From The Jack Royse Collection of Hobo Nickels.

One-of-a-Kind Raised Metal Carving
Early Bo Hughes, Signed GH ILL 22

4445 1913 Type One Nickel, Raised Hat Brim, Signed by Bo Hughes. This nickel first surfaced in 1985, when part of a Missouri collection. It is described in the 1996 Romines reference under the section "ONE OF A KNOWN KIND" on page 72, where the nickel is plated. The coin is an exceptionally lustrous and well-carved example, which must have taken Bo much time to complete. Carved on a 1913 Type One nickel, the coin has been carefully preserved over the past 96+ years.

The OHNS Registration number is R-074 issued on April 18, 1994. There, Del Romines described the piece as unique: "... in that this is the only known carving which is signed and dated under the raised metal hat brim. The carving has the raised metal hat brim, raised metal ear, and raised (plateau) metal beard. 'GH ILL 22' is delicately carved on the bow of the hat band, and is partially beneath the brim." Lovely golden highlights illuminate each side of this About Uncirculated nickel.

From The Jack Royse Collection of Hobo Nickels.

The Amish Man by 'Bo'
Outstanding Cameo Carving
Signed GH 50

4446 Full Cameo Carving by Bo Hughes. When not carving nickels, Bert and Bo worked as much as possible during their travels. Occasionally, they returned to the same farms and ranches year after year, where their penchant for hard work was appreciated. The 1996 Romines book quotes Bo: "Some Amish folks in Indiana gave us a handout one time, but we had to earn our keep. Lord, they nearly worked our butts off. They was some mighty fine folks."

This deeply carved, full cameo portrait of an Amish man is one of only a few known from the 1950 to 1957 period, and it is perhaps the only one signed and dated GH 50. Intricate work exists on the hair and beard, plus raised-metal ear and hat brim. Lack of a moustache helps capture the Amish "look" of this well-carved portrait. The OHNS Registration Certificate #R-036 is signed by Del Romines.

From The Jack Royse Collection of Hobo Nickels.

Unique 'Eisenbach - Chicago' Nickel
Superior Bo Hughes Carving, Signed GH 23

- 4447** 1913 Type One Nickel, Fully Carved, Engraved Lettering by Bo Hughes. This important ethnic carving is discussed in detail on pages 78 and 79 in the 1996 Joyce Romines reference, where it is plated in both regular view and close-up on page 79. Carved on a nice XF or AU 1913 Type One nickel, it is one of the few examples of a raised beard nickel — and it is surely one of the earliest hobo nickels employing the technique. Raised metal is used to form the ear as well.

Research remains unfinished to positively identify the subject of Bo's work, which may reveal the circumstances and reasons for the carving. While Bo produced several "Rabbi" nickels, only this one reveals the subject's name and location. It seems remarkable that Bo was producing such high-quality work at such a young age. Del Romines' OHNS Certificate #R-027 is dated October 23, 1993 and accompanies the piece.

From The Jack Royse Collection of Hobo Nickels.

Totally Punched by Bo Hughes
Pictured in the First Romines Book

- 4448** 1935-S Nickel, Totally Punched After 1957 by Bo Hughes, Unsigned. Used to illustrate Superior quality for a totally punched nickel, this exact coin by Bo Hughes is plated on page 30 of *Hobo Nickels*, the 1982 book by Del Romines. The coin employs myriad overlapping punches from a curved jeweler's punch, done in the period following Bo's hand injury after several years of rehabilitation. This nickel is deeply toned, which is characteristic of Bo's work during a portion of his recovery.

From The Jack Royse Collection of Hobo Nickels.

Two Post-1957 Nickels by 'Bo'
One Plated in the First Romines Book
Different Stages of Recovery

- 4449** Two Post-1957 Nickels by Bo Hughes. Two Post-1957 Nickels by 'Bo' Hughes. One is deeply toned, where a solitary "S" punch was used — with Bo's innate ingenuity — to create ringlet-type hair curls, achieved by rotating and overlapping the punches. This coin is pictured in Del Romines *Hobo Nickels* on page 97. A later stage of Bo's recovery is shown by the second nickel, which combines punches for the hair and beard with some basic carving strokes complete the design.

From The Jack Royse Collection of Hobo Nickels. (Total: 2 coins)

Interesting Classic-Era Nickel
Unknown Artist

- 4450** Classic-Era Hobo Nickel, Artist Unknown. The oddly shaped ear comes to an abrupt end at the hat brim, and the simple lines and scraggly beard suggest this piece was primarily knife-carved. However, the fields are dressed, with LIBERTY reduced to ERTY. A shallow domed hat sits rather high on the forehead. This is a nice research piece, seemingly pre-1940 in its origin.

From The Jack Royse Collection of Hobo Nickels.

Above Average Pre-1940 Carving
OHNS-Named Carver 'Big Ear'

- 4451 1913 Type One Nickel, Pre-1940, Named Carver "Big Ear."** Numerous carvers old and new employ a large ear on some of their hobo nickel carvings, and the classic-era carver Big Ear has several characteristics that define his works. The prominent large ear has a strong outer ridge, a tapered lobe at the bottom, and visible internal ridges. A shallow derby tops his head, decorated with a simple, well-carved bow. The narrow brim has wrap-around ends. The hair and beard display short furrows and wrinkly grooves, and the face shows a carved eyebrow, crow's feet by the eye, cheek wrinkles, and an enlarged nostril. LIBERTY and the date remain, here on a 1913 Type One nickel. A two-part collar sits above the unaltered date area. This is a choice, original hobo nickel for the astute collector.
From The Jack Royse Collection of Hobo Nickels.

A Pair of Pre-1940 Hobo Nickels
From Prolific OHNS-Named Artists

- 4452 Two Classic-Era Hobo Nickels, OHNS-Named Artists.** OHNS-named artists Tufty and Smoothie come to mind when viewing these two classic-era hobo nickels. Both feature domed hats formed from simple lines. The Tufty piece is carved on a 1913 Type Two nickel, with a few sparse tufts of hair protruding at the forehead. The Smoothie nickel has thinly engraved lines applied to the smoothed-over obverse, including a simple outline ear.
From The Jack Royse Collection of Hobo Nickels. (Total: 2 coins)

Two Above Average Carvings
Excellent for Research

- 4453 Two Hobo Nickels, Unidentified Artists.** The Original Hobo Nickel Society website (www.hobonickels.org) is a good starting point to identify either or both of these seemingly old Above-Average carvings that need further research. One is a nattily attired hobo who proclaims "Certain-Tell," engraved above the domed hat. The piece is carved on a 1913 Type One nickel, date removed. A second nickel is equally interesting, with a pug-nosed hobo wearing a shallow domed hat, which is decorated with a zigzag pattern on the hatband. A collar flourish adds the finishing touch.
From The Jack Royse Collection of Hobo Nickels. (Total: 2 coins)

Two Interesting Old Nickels
Unidentified Carvers

- 4454 Two Hobo Nickels, Unknown Dates and Artists.** One of the nickels sports a mixture of dots and lines to depict a stylish hobo with a cross-hatched derby, a skinny ear, and the twinkle of a jeweled stickpin near the collar. It is an Average to Above Average carving with date removed, on a 1913-D Type One nickel based on the reverse diagnostics. A second nickel was hastily done with numerous shortcuts, including a counterstamped "C" for the ear, knife-carved outlines to the hat, collar, and shoulder, and hastily applied texture to the beard and fields.
From The Jack Royse Collection of Hobo Nickels. (Total: 2 coins)

8126 1914 Samuel Putnam Avery Library Medal. Smedley-102. Silver, 64 mm. Edge stamped TIFFANY & CO. FINE SILVER. Dies engraved by Victor D. Brenner.

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

- This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., Heritage Auctions, Inc., Heritage Collectibles, Inc., Heritage Luxury Property Auctions, Inc., Heritage Numismatic Auctions, Inc., Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the “Auctioneer”). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

- All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
 - For Domain Names & Intellectual Property Auction lots the Buyer's Premium is Fifteen percent (15%) subject to a minimum of \$19 per lot;
 - For Animation Art, Comic, Currency, Movie Posters, Sports Collectibles, US Coin, and World & Ancient Coin Auction lots the Buyer's Premium is Twenty percent (20%) subject to a minimum of \$19 per lot, except for Sports Collectibles lots which are subject to a minimum of \$14 per lot;
 - For Wine Auction lots the Buyer's Premium is Twenty-three percent (23%) subject to a minimum of \$19 per lot;
 - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$300,000 subject to a minimum of \$49 per lot, plus twenty percent (20%) of any amount between \$300,000 and \$3,000,000, plus twelve point five percent (12.5%) of any amount over \$3,000,000.

Auction Venues:

- The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Jewelry, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

- Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction (“Bidder(s)”).
- All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
- If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

- In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

- Bids in Signature® Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled “Choose your bidding method.” For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
- Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
- Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, email, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
- Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: “How can I lose by less than an increment?” on our website. Bids will be accepted in whole dollar amounts only. No “buy” or “unlimited” bids will be accepted.

The following chart governs current bidding increments (see [HA.com/c/ref/web-tips.zx#guidelines-increments](http://www.ha.com/c/ref/web-tips.zx#guidelines-increments)).

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$49	\$2	\$20,000 - \$49,999	\$2,000
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$499	\$20	\$200,000 - \$499,999	\$20,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$25,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$1,999,999	\$50,000
\$2,000 - \$4,999	\$200	\$2,000,000 - \$9,999,999	\$100,000
\$5,000 - \$9,999	\$500	>= \$10,000,000	\$200,000

- If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment (“Cut Bid”) only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

- Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A “Minimum Bid” is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN “Minimum Bids” ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE “Minimum Bid”, THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. “Minimum Bids” are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the

“Minimum Bid” for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

- The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any.
- Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in “Good Faith” when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in “Good Faith.” Any person apparently appearing on the OFAC list is not eligible to bid.
- Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
- Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
- All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
- Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
- Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
- The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
- The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

- All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes “good funds”: checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
- Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer.
- Lots you purchase may be subject to taxes or fees imposed by various foreign taxing agencies. You are responsible for paying all foreign imposed taxes whether VAT, GST, etc. prior to delivery unless other arrangements are made in writing. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Should state sales tax become applicable in the state for delivery prior to delivery of the property on the invoice, the bidder agrees to pay all applicable state sales tax as required by the delivery state as of the shipping date. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
- In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
- If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
- In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
- Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
- Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery, Shipping, and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.xz for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item's hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:
- a. **Scope of Transit Services:** Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, you will provide a Secure Location to which the items will be delivered. NOTICE: **Auctioneer is neither an insurance company nor a common carrier of any type.**
- b. **Auctioneer's Compensation for Transit Services:** Auctioneer will provide transit services to Buyer for ¼ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.
- c. **Auctioneer's Limitation of Liability for Transit Services:** You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**
35. It shall be the responsibility for the successful Bidder to arrange pick-up or shipping in a timely manner (within 10 days). Held Lots will be subject to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 20% Seller's Commission.
36. A. NOTICE OF CITES COMPLIANCE: The purchase of items made from protected species: Any property made of or incorporating endangered or protected species or wildlife may have import and/or export restrictions established by the Convention of International Trade in Endangered Species of Wild Fauna and Flora (CITES) in various countries and domestically. Plant and animal properties include (but are not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, alligator, lizard, or other wildlife. These items may not be available to ship internationally or, in some cases, domestically. Domestic bans and restrictions exist in these states: 1) California state law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California. 2) Fossil Ivory is currently banned or restricted in 5 U.S. states: New York, New Jersey, California, Hawaii, and New Mexico. By placing a bid, the bidder acknowledges that he or she is aware of any restriction in their country or place of residence and takes responsibility for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment or afford them the capacity to void their purchase or payment. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or failure to mark lots containing protected or regulated species. For further assistance, please contact client services at 1-800-872-6467.
36. B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.
36. C. Auctioneer shall not be liable for any loss caused by or resulting from:
- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles.
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties, and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. No statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. Any employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, cause of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity,

typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administered by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature® Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcgsguarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency and PMG may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 10470, Peoria, IL 61612-0470. Third-party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the noncertified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions, call the Credit department at 877-HERITAGE (437-4824) or email: CreditDept@HA.com.

Notice as to an Auction in New York City:

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21, which states: The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

The Largest Coin Show on the West Coast!
